1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new AD:

Beech: Applies to Models 1900 and 1900C (all serial numbers) airplanes certificated in any category.

Compliance: Required within 10 hours time-in-service after receipt of this AD, unless already accomplished.

To ensure that required performance can be achieved for each approved combination of take-off configuration, weight, altitude and temperature, accomplish the following:

(a) Revise Beech Model 1900/1900C Pilot's Operating Handbook and FAA Approved Airplane Flight Manual (POH/AFM), P/N 114-590021-3, in accordance with Model 1900 and 1900C Interim Addendum to POH/AFM, P/N 114-590021-3, dated October 21, 1985.

Note.—The above cited interim addendum was transmitted to Model 1900/1900C operators of record by Beech Letter 52-85-1948, dated October 21, 1985.

(b) Conduct further operations in accordance with the POH/AFM so revised.

(c) The requirements of Paragraph (a) of this AD may be accomplished by the holder of a pilot certificate issued under Part 61 of the Federal Aviation Regulations (FAR) on any airplane owned or operated by him. The person accomplishing these actions must make the appropriate aircraft maintenance record entry as prescribed by FAR 91.173.

(d) An equivalent method of compliance with this AD, if used, must be approved by the Manager, Wichita Aircraft Certification Office, FAA, 1801 Airport Road, Wichita, Kansas 67209; Telephone (316) 946-4400. All persons affected by this directive may obtain copies of the documents referred to herein upon request to Mr. Lou Gollin, Beech Aircraft Service Engineering, Department 52, Post Office Box 85, Wichita, Kansas 67201, or FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment becomes effective May 6, 1986, as to all persons except those persons to whom it was made immediately effective by priority letter from the FAA, dated October 22, 1985, and is identified as AD 85-21-07.

Issued in Kansas City, Missouri, on April 21, 1986

Jerold M. Chavkin,

Acting Director, Central Region.

BILLING CODE 4910-13-M

14 CFR Parts 71 and 75

[Airspace Docket No. 85-AWA-43]

Establishment of Jet Route J-190 and VOR Federal Airway V-576, New York

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: These amendments establish new Jet Route J-190 and Federal Airway V-576, located in northern New York state, due to the increase in traffic in the Hancock, NY, area. These new routes improve traffic flow and reduce congestion in the Bradley, CT, area. This action permits greater flexibility for maneuvering traffic in the Boston Air Route Traffic Control Center area and reduce controller workload.

EFFECTIVE DATE: 0901 U.t.c., July 3, 1986.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8626.

SUPPLEMENTARY INFORMATION:

History

On November 14, 1985, the FAA proposed to amend Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) to establish new Jet Route J-190 and new VOR Federal Airway V-576 located in the vicinity of Hancock, NY (50 FR 47062). Due to the increase in traffic on J-49, new Jet Route J-190 would parallel J-49 to eliminate opposite direction traffic for aircraft inbound to Bradley, CT, airport. This action alleviates congestion and compression of traffic in the Bradley terminal area and reduces controller workload. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, these amendments are the same as those proposed in the notice. Sections 71.123 and 75.100 of Parts 71 and 75 of the Federal Aviation Regulations were republished in Handbook 7400.6B dated January 2, 1986.

The Rule

These amendments to Parts 71 and 75 of the Federal Aviation Regulations establish new Jet Route J-190 and new VOR Federal Airway V-576 located in the vicinity of Hancock, NY. This action alleviates congestion and compression of traffic in the Bradley, CT, terminal area and reduces controller workload.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Parts 71 and 75

Aviation safety, Jet routes and VOR Federal airways.

Adoption of the Amendments

Accordingly, pursuant to the authority delegated to me, Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) are amended, as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

2. Section 71.123 is amended as follows:

V-576—[New]

From Philipsburg, PA, via Williamsport, PA; Hancock, NY; to DeLancey, NY.

PART 75—[AMENDED]

3. The authority citation for Part 75 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

4. Section 75.100 is amended as follows:

J-190—[New]

From Carleton, MI, via Slate Run, PA; to Rockdale, NY. The segment within Canada is excluded.

Issued in Washington, DC, on April 25, 1986.

James Burns, Jr.,

Manager, Airspace-Rules and Aeronautical Information Division.

Correction

In FR Doc. 86-8075, beginning on page 15315 in the issue of Wednesday, April 23, 1986, make the following corrections:

1. On page 15315, in the third column, the first line of the second paragraph under the heading "Rulemaking Requirements" should read "2. Section 13(a) of the Export".

2. On page 15316, in the first column, in § 379.9, the last word in the second line of paragraph (b) should read "exporter".

BILLING CODE 1505-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 882

[Docket No. R-86-1282; FR-2114]

Low Income Housing; Section 8 Existing Housing Assistance Payments Program, Existing Housing; Termination of Tenancy in First Year of Lease Term

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This rule revises the regulations concerning termination of tenancy in the section 8 Certificate Program. The revision makes it clear that, during the first year of the term of a lease, the owner may not terminate the tenancy for "other good cause" unless the termination is based on Family malfeasance or nonfeasance. It also provides examples of "other good cause" that may not be used as the basis for terminating a tenancy during the first year of the term of a lease.

EFFECTIVE DATE: June 11, 1986.

FOR FURTHER INFORMATION CONTACT: Madeline Hastings, Existing Housing Division, Office of Elderly and Assisted Housing, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410-2000, telephone (202) 755-6887. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: By Order Granting Permanent Injunction entered in *Levy, et al.* v. *HUD et al.*, No. C 84-7983 WWS (N.D. Cal. March 22, 1985), HUD was ordered to suspend and not otherwise enforce or implement its regulation at 24 CFR 882.215, as amended in 49 FR 12235, 12242 (March 29, 1984), insofar as the regulation permits termination of tenancy during the first year of a lease for reasons other than serious or repeated violation of the terms and conditions of the lease; violation of Federal, State, or local law that imposes obligations on the tenant in connection with the occupancy or use of the dwelling unit and surrounding premises; or other malfeasance or nonfeasance of the tenant. The Department was also ordered to publish a notice in the Federal Register setting out a statement contained in the Permanent Injunction and to mail a similar HUD notice to all affected PHAs.

In compliance with the Permanent Injunction, HUD published the statement required by the Court (on May 22, 1985, at 50 FR 15733) suspending that portion of 24 CFR 882.215 that allowed the termination of a tenancy during the first year of a lease for other good cause not based on the malfeasance or nonfeasance of the tenant. The Department also has mailed the HUD notice to the affected public housing agencies (PHAs). In addition, the Department has revised required lease language for the Section 8 Certificate Program to incorporate provisions consistent with the Court Order concerning termination of tenancy during the first year of the lease term.

This final rule adds a new § 882.215(c)(3) to provide explicitly that, in the first year of the term of a lease, the owner may not terminate the tenancy for "other good cause" unless termination is based on Family malfeasance or nonfeasance. The new § 882.215(c)(3) also makes it clear that during the first year of the term of the lease an owner may not terminate a tenancy for other good cause based on any of the following grounds: (1) Failure of a Family to accept the offer of a new lease; (2) an Owner's desire to utilize the unit for personal or family use or for a purpose other than use as a residential rental unit; or (3) a business or economic reason for termination of tenancy (such as sale of the property, renovation of the unit, desire to rent the unit at a higher rental). (The current § 882.215(c)(3) is redesignated as § 882.215(c)(4).)

Other Information

An Environmental Assessment is unnecessary since the Section 8 Certificate Program is categorically excluded from the Department's National Environmental Policy Act procedures under 24 CFR 50.20(d).

This rule does not constitute a "major rule" as that term is defined in section 1(b) of the Executive Order on Federal Regulations issued by the President on February 17, 1981. Analysis of the rule indicates that it would not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In accordance with the provisions of 5 U.S.C. 605(b), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities, because this rule simply clarifies the regulation to make it more explicit in reflecting current HUD policy regarding termination of tenancy during the first year of the term of a lease.

The subject matter of this rulemaking action relates to grants and is, therefore, exempt from the notice and public comment requirements of Section 553 of the Administrative Procedure Act. As a matter of policy, the Department submits many rulemaking actions with such subject matter to public comment either before or after effectiveness of the action, notwithstanding the statutory exemption. The Secretary has, however, determined that in this instance notice and prior public procedure are unnecessary: In compliance with the Court Order in *Levy, et al.*, v. *Pierce, et al., supra*, the Department has already implemented restrictions on termination of tenancy during the first year of the lease term, for other good cause based on Family malfeasance or nonfeasance, by issuing to PHAs, and by publishing in the Federal Register, the statement required by the Court. This rulemaking simply revises the Department's regulations to state explicitly the judicially-determined restrictions on termination of tenancy for other good cause during the first year of a lease term.

This rule was listed as Sequence No. 883 in the Department's Semiannual Agenda of Regulations published on April 21, 1986, (51 FR 14086, 14063) under Executive Order 12291 and the Regulatory Flexibility Act.

The Catalog of Federal Domestic Assistance program number for this program is 14.156.

List of Subjects in 24 CFR Part 882

Grant programs: housing and community development, Housing, Manufactured homes, Rent subsidies.

Accordingly, the Department amends 24 CFR Part 882 as follows:

PART 882—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—EXISTING HOUSING

1. The authority citation for Part 882 continues to read as follows:

Authority: Secs. 3, 5 and 8, United States Housing Act of 1937 (42 U.S.C. 1437a, 1437c, 1437f); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. In § 882.215, paragraph (c)(3) is redesignated as paragraph (c)(4), and a new paragraph (c)(3) is added, to read as follows:

§ 882.215 Assisted tenancy.

* * * * *

(c) * * *

(3) During the first year of the term of a Lease, the Owner may not terminate the tenancy for "other good cause" unless the termination is based on Family malfeasance or nonfeasance. For example, during the first year of the term of Lease, the Owner may not terminate the tenancy for "other good cause" based on any of the following grounds: (i) Failure by the Family to accept the offer of a new Lease; (ii) the Owner's desire to utilize the unit for personal or family use or for a purpose other than as a residential rental unit; or (iii) a business or economic reason for termination of the tenancy (such as sale of the property, renovation of the unit, desire to rent the unit at a higher rental).

BILLING CODE 4210-27-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8085]

Income Tax; Deduction of Employer Liability Payments

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations concerning the deduction of employer liability payments. Changes to the applicable tax law were made by the Multiemployer Pension Plan Amendments Act of 1980. The regulations will provide the public with additional guidance needed to comply with that Act and will affect all employers that maintain qualified plans.

DATES: The amendments are effective for employer payments made after September 25, 1980.

FOR FURTHER INFORMATION CONTACT: Marjorie Hoffman of the Employee Plans and Exempt Organizations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224 (Attention: CC:LR:T). Telephone 202-566-3430 (not a toll free number).

SUPPLEMENTARY INFORMATION:

Background

On May 20, 1985, the Federal Register published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 404 of the Internal Revenue Code of 1954 (50 FR 20800). These amendments conform the regulations to section 205 of the Multiemployer Pension Plan Amendments Act of 1980 (94 Stat. 1267). No comments were submitted on the proposed amendments. No public hearing on the proposed amendments was requested. Accordingly, the amendments are adopted by this Treasury decision substantially as they appeared in the Federal Register. Typographical errors which were contained in the notice of proposed rulemaking have been corrected.

Executive Order 12291 and Regulatory Flexibility Act

The Treasury Department has determined that this regulation is not subject to review under Executive Order 12291 and that a regulatory impact analysis therefore is not required.

Although a notice of proposed rulemaking that solicited public comment was issued, the Internal Revenue Service concluded when the notice was issued that the regulations are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 did not apply. Accordingly, the final regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

Drafting Information

The principal author of these final regulations is Marjorie Hoffman of the Employee Plans and Exempt Organizations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

List of Subjects in 26 CFR 1.401-0—1.425-1

Income taxes, Employee benefit plans, Pensions, Stock options, Individual retirement accounts, Employee stock ownership plans.

Adoption of amendments to the regulations

Accordingly, 26 CFR Part 1 is amended as follows:

The proposed regulations are adopted without change as set forth below.

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

Approved: April 14, 1986.

J. Roger Mentz,

Assistant Secretary of the Treasury.

PART 1—[AMENDED]

Paragraph 1. The authority citation for Part 1 continues to read, in part:

Authority: 26 U.S.C. 7805. * * *

Par. 2. The following new § 1.404(g)-1 is added immediately after § 1.404(e)-1A.

§ 1.404 (g)-1 Deduction of employer liability payments.

(a) *General rule.* Employer liability payments shall be treated as contributions to a stock bonus, pension, profit-sharing, or annuity plan to which section 404 applies. Such payments that satisfy the limitations of this section shall be deductible under section 404 when paid without regard to any other limitations in section 404.

(b) *Employer liability payments.* For purposes of this section, employer liability payments mean:

(1) Any payment to the Pension Benefit Guaranty Corporation (PBGC) for termination or withdrawal liability imposed under section 4062 (without regard to section 4062(b)(2)), 4063, or 4064 of the Employee Retirement Insurance Security Act of 1974 (ERISA). Any bond or escrow payment furnished under section 4063 of ERISA shall not be considered as a payment of liability until applied against the liability of the employer.

(2) Any payment to a non-multiemployer plan pursuant to a commitment to the PBGC made in accordance with PBGC Determination of Plan Sufficiency and Termination of

VOL 51 ISS 85 MY 2 1986 UMI

Sufficient Plans. See PBGC regulations, 29 CFR 2617.13(b) for rules concerning these commitments. Such payments shall not exceed an amount necessary to provide for, and used to fund, the benefits guaranteed under section 4022 of ERISA.

(3) Any payment to a multiemployer plan for withdrawal liability imposed under part 1 of subtitle E of title IV of ERISA. Any bond or escrow payment furnished under such part shall not be considered as a payment of liability until applied against the liability of the employer.

(c) *Limitations, etc.*—(1) *Permissible expenses.* A payment shall be deductible under section 404(g) and this section only if the payment satisfies the conditions of section 162 or section 212. Payments made by an entity which is liable for such payments because it is a member of a commonly controlled group of corporations, or trades or businesses, within the meaning of section 414 (b) or (c), shall not fail to satisfy such conditions merely because the entity did not directly employ participants in the plan with respect to which the liability payments were made.

(2) *Qualified plan.* A payment shall be deductible under section 404(g) and this section only if the payment is made in a taxable year of the employer ending within or with a taxable year of the trust for which the trust is exempt under section 501(a). For purposes of this paragraph, the payment timing rules of section 404(a)(6) shall apply.

(3) *Full funding limitation.* (i) If the employer liability payment is to a plan, the total amount deductible for such payment and for other plan contributions may not exceed an amount equal to the full funding limitation as defined in section 412(c)(7) for the taxable year with respect to which the contributions are deemed made under section 404.

(ii) If the total contributions to the plan for the taxable year including the employer liability payment exceed the amount equal to this full funding limitation, the employer liability payment shall be deductible first.

(iii) Any amount paid in a taxable year in excess of the amount deductible in such year under the full funding limitation shall be treated as a liability payment and be deductible in the succeeding taxable years in order of time to the extent of the difference between the employer liability payments made in each succeeding year and the maximum amount deductible for such year under the full funding limitation.

(4) *Maximum deduction allowable under section 404.* The amount deductible under section 404 is limited to the higher of the maximum amount deductible by the employer under section 404(a) or the amount otherwise deductible under section 404(g). If the contributions are to a plan to which more than one employer contributes, this limit shall apply to each employer separately rather than all employers in the aggregate. Thus, each employer may deduct the greater of its allocable share of the deduction determined under sections 404(a) and 413(b)(7) or 413(c)(6) or its allocable share of the amount deductible under section 404(g).

However, pursuant to the rule in subdivision (ii) of subparagraph (3), in determining each employer's allocable share under section 404(a), the total amount deductible under section 404(a) by all employers shall not exceed the difference between the full funding limitation and the total amount deductible by all employers under section 404(g).

(5) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. In the 1983 taxable year, Employer *A* makes a withdrawal liability payment of $700,000 to multiemployer Plan *X* to which Employer *A* and Employer *B* are required to contribute. Employer *A*'s allocable share of the deduction allowable under sections 404(a) and 413(b)(7) in the 1983 taxable year is $600,000. Employer *B*'s allocable share of the deduction allowable under section 404(a) and 413(b)(7) in the 1983 taxable year is $400,000.

The full funding limitation for the 1983 taxable year is $1,000,000. Based on paragraph (c)(4) of this section, Employer *A* may deduct $700,000, the amount of the withdrawal liability payment. However, the deduction of Employer *B* is limited to $300,000, the difference between the full funding limitation and the amount deductible under section 404(g).

(d) *Effective date etc.*—(1) *General rule.* This section is effective for employer payments made after September 25, 1980.

(2) *Transitional rule.* For employer payments made before September 26, 1980, for purposes of section 404, any amount paid by an employer under section 4062, 4063, or 4064 of the Employee Retirement Income Security Act of 1974 shall be treated as a contribution to which section 404 applies by such employer to or under a stock bonus, pension, profit-sharing, or annuity plan.

BILLING CODE 4830-01-M

26 CFR Parts 1 and 602

[T.D. 8068]

Income Taxes; Election of $10 Million Limitation on Exempt Small Issues of Industrial Development Bonds; Supplemental Capital Expenditure Statements

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final rule; Treasury decision.

SUMMARY: This document contains regulatory amendments that change the existing regulatory requirement for electing the $10 million limitation for exempt small issues of industrial development bonds and eliminate the existing regulatory requirement to file certain supplemental capital expenditure statements with respect to certain small issues of tax-exempt industrial development bonds. The amendments also conform the regulations on exempt small issues to the increase in the limit on the size of such small issues, enacted by the Revenue Act of 1978, and clarify rules regarding capital expenditures. The amendments affect issuers and holders of the exempt small issues, and principal users of facilities financed with the proceeds of these issues.

DATES: The elimination of the requirement to file capital expenditure statements implemented by the amendments to § 1.103–10(b)(2)(vi) is effective on and after September 3, 1971. The amendments relating to the time for and manner of making the $10 million small issue election under § 1.103–10(b)(2)(vi) are effective after May 2, 1986 except that issuers who, before October 29, 1986, make the election in the manner prescribed by § 1.103–10(b)(2)(vi) as in effect prior to amendment by this Treasury decision will be treated as having made the election at the time and in the manner prescribed by § 1.103–10(b)(2)(vi) as amended by this Treasury decision. The amendments to § 1.103–10 relating to the increase in the limit on the size of small issues of industrial development bonds are effective for obligations issued after December 31, 1978, in taxable years ending after such date, and for capital expenditures made after December 31, 1978, with respect to obligations issued before January 1, 1979.

FOR FURTHER INFORMATION CONTACT: John A. Tolleris of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC. 20224 (Attention: CC:LR:T) (202–566–3590).

SUPPLEMENTARY INFORMATION:

Background

This document contains amendments to the Income Tax Regulations (26 CFR Part 1) under section 103(b)(6)(D) of the Internal Revenue Code of 1954. These amendments revise the present requirements of § 1.103–10(b)(2)(vi) relating to elections and supplemental capital expenditure statements with respect to certain small issues of tax-exempt industrial development bonds.

The Treasury decision was not preceded by a notice of proposed rulemaking soliciting public comments because the Treasury Department has determined that the rules promulgated herein will not adversely affect any taxpayer. Accordingly, it is found unnecessary to issue this Treasury decision with notice and public procedure under subsection (b) of section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Explanation of Provisions

This Treasury decision eliminates the requirement that issuers of exempt small issues of industrial development bonds file a statement with the Service in order to elect the $10 million small issue limitation; however, bond issuers would be required to make the election under section 103(b)(6) by timely making a notation thereof on their books or records with respect to the issue.

This Treasury decision also eliminates the requirement that principal users of facilities financed by certain small issues of tax-exempt industrial development bonds (with respect to which the $10 million limitation has been elected under section 103(b)(6)(D)) file annual supplemental capital expenditure statements concerning such facilities and copies of the election statement with certain income tax returns.

This Treasury decision also contains a provision to conform the Income Tax Regulations to the increase in the limitation, from $5 million to $10 million, in the size of certain exempt small issues, enacted by section 331(a) of the Revenue Act of 1978 (92 Stat. 2839). This document also contains amendments to clarify rules regarding capital expenditures.

Nonapplicability of Executive Order 12291

The Commissioner of Internal Revenue has determined that this rule is not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis therefore is not required.

Regulatory Flexibility Act

A general notice of proposed rulemaking is not required by 5 U.S.C. 553 for final regulations subject to 5 U.S.C. 553(b)(B). Therefore, the final regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Drafting Information

The principal author of these proposed amendments is John A. Tolleris of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

Paperwork Reduction Act

The elimination of the collection of information contained in this regulation has been submitted to the Office of Management and Budget (OMB) in accordance with the requirements of the Paperwork Reduction Act of 1980. This reduction in the requirements had been approved by OMB under control number 1545–0940.

List of Subjects

26 CFR 1.61–1–1.281–4

Income taxes, Taxable income, Deductions, Exemptions.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Parts 1 and 602 are amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953—[AMENDED]

Paragraph 1. The authority for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Section 1.103–10 also issued under 26 U.S.C. 103(b)(6). * * *

Par. 2. Section 1.103–10 (relating to exemption for certain small issues of industrial development bonds) is amended as follows:

(1) The phrase "section 103(c)" is removed each place it appears as a reference or part of a reference and the phrase "section 103(b)" is inserted in lieu thereof as a reference or part of a reference.

(2) Paragraph (a) is amended by adding the following new sentence at the end thereof: "For bonds issued before January 1, 1979, in taxable years ending before such date, and for capital expenditures made before January 1, 1979, with respect to such bonds, paragraphs (b), (c), and (d) of this section shall be applied by substituting $5 million for $10 million."

(3) Paragraph (c)(2) is amended by revising the caption to read "10 million or less refinancing issue." and by removing "$5" each place it appears and inserting in lieu thereof "$10".

(4) Paragraph (d)(1) is amended by removing "$5" and inserting in lieu thereof "$10".

(5) Paragraph (d)(3)(ii) is amended by removing "$5" each place it appears and inserting in lieu thereof "$10".

(6) Paragraph (b)(2) is amended by revising the heading and subdivisions (i), (ii)(*a*), and (vi) thereof, to read as follows:

§ 1.103–10 Exemption for certain small issues of industrial development bonds.

* * * * * * *

(b) *Small issue exemption.* * * *

(2) *$10 million or less.* (i) Under section 103(b)(6)(D), the issuing State or local governmental unit may elect to have an aggregate authorized face amount of $10 million or less, in lieu of the $1 million exemption otherwise provided for in section 103(b)(6)(A), with respect to issues of obligations that are industrial development bonds (within the meaning of section 103(b)(2)) issued after October 24, 1968. If the election is made in a timely manner, the bonds will be treated as obligations of a State or local governmental unit described in section 103(a)(1) and § 1.103–1 if the sum of—

(*a*) The aggregate face amount of the issue including the aggregate outstanding face amount of any prior $1 million or $10 million exempt small issues taken into account under section 103(b)(6)(B) and paragraph (d) of this section, and

(*b*) The aggregate amount of "section 103(b)(6)(D) capital expenditures" (within the meaning of paragraph (b)(2)(ii) of this section), is $10 million or less. In the case of an issue of obligations that qualified for exemption under section 103(b)(6)(A) and this paragraph, if a section (b)(6)(D) capital expenditure made after the date of issue has the effect of making taxable the interest on the issue, under section 103(b)(6)(G) the loss of tax exemption for the interest shall begin only with the

VOL 51 ISS 85 MY 2 1986 UMI

date on which the expenditure that caused the issue to cease to qualify under the $10 million limit was paid or incurred. See paragraph (b)(2)(vi) of this section for the time and manner in which the issuer may elect the $10 million exemption. See section 103(b)(6)(H) and paragraph (c)(2) of this section for the treatment of certain refinancing issues of $10 million of less.

(ii) * * *

(*a*) The capital expenditure was financed other than out of the proceeds of issues to the extent such issues are taken into account under paragraph (b)(2)(i)(*a*) of this section.

* * * * *

(vi) The issuer may make the election provided by section 103(b)(6)(D) and this paragraph (b)(2) (assuming that the bonds otherwise qualify under section 103(b)(6) by noting the election affirmatively at or before the time of issuance of the issue in question on its books or records with respect to the issue. The term "books or records" includes the bond resolution or other similar legislation for the issue in question as well as the bond transcript or other compilation of bond and bond-related documents. If the issuer fails to make an election at the time and in the manner prescribed in this paragraph (b)(2), the issue will not be treated as described in section 103(b)(6)(D), and interest thereon will be includible in gross income.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT—[AMENDED]

Par. 3. The authority citation for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 4. Section 602.101(c) is amended by inserting in the appropriate place in the table "§ 1.103–10(b)(2)(vi) . . . 1545–0940".

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

Approved: March 28, 1986.

J. Roger Mentz,

Acting Assistant Secretary of the Treasury.

[T.D. 8084]

Excise Taxes; Second Tier Excise Taxes

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to second tier excise taxes. Changes to the applicable tax law were made by Pub. L. 96–596. The regulations will affect private foundations, black lung benefit trusts, pension plans, and disqualified persons with respect to the foregoing who may become liable for second tier taxes within the meaning of section 4963(b) of the Internal Revenue Code of 1954.

DATES: The amendments to the CFR are effective upon publication in the **Federal Register**. The amendments to §§ 53.4941(e)–1(a)(1), 53.4942(a)–1(c)(1)(ii), 53.4943–9(a)(1), 53.4944–5(a)(1), and 53.4963–1(e)(7) apply to first tier taxes imposed under sections 4941, 4942, 4943, and 4944 after December 31, 1969. Under § 53.4951–1 (a) and (f), the amendment to § 53.4941(e)–1(a)(1) applies to first tier taxes imposed under section 4951 after December 31, 1977. The amendments to §§ 54.4971–1(e) and § 53.4963–1(e)(7) apply to first tier taxes imposed under section 4971 after September 2, 1974. The amendments to § 54.4975–1(d) apply to first tier taxes imposed under section 4975 after December 31, 1974. The amendments relating to second tier taxes (as defined in section 4963(b)) apply to second tier taxes assessed after December 24, 1980.

FOR FURTHER INFORMATION CONTACT: George B. Baker of the Employee Plans and Exempt Organizations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224, Attention: CC:LR:T:EE–16–81, 202–566–3422 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

On February 13, 1984, the **Federal Register** published proposed amendments to the Foundation and Similar Excise Taxes Regulations (26 CFR Part 53), to the Pension Excise Taxes Regulations (26 CFR Part 54), to the Temporary Excise Tax Regulations under the Employee Retirement Income Security Act of 1974 (26 CFR Part 141), and to the Procedure and Administration Regulations (26 CFR Part 301), under sections 4941, 4942, 4943, 4944, 4945, 4961, 4962, 4971, 4975, 6213, 6503, 6861, and 7422. One correction was published in the issue of Friday, March 2, 1984, at page 7836. The amendments were proposed to conform the regulations to section 2 of the Act of December 24, 1980 (Pub. L. No. 96–596, 94 Stat. 3469). No comments were received; no public hearing was requested or held. The amendments are therefore adopted as revised by this Treasury decision.

Explanation of Provisions

Final Regulations

The amendments conform the regulations to the changes to the Internal Revenue Code made by section 2 of Pub. L. 96–596. The Code imposes excise taxes in two tiers to insure compliance with certain provisions of the Code by private foundations, black lung benefit trusts, pension trusts, and disqualified persons with respect to the foregoing entities. A first tier excise tax is imposed automatically if the foundation, trust, or disqualified person engages in a prohibited act (such as self-dealing between a disqualified person and a private foundation), or fails to perform a required act (such as a private foundation's failure to distribute the amount described in section 4942). The Code provides for a much larger second tier excise tax which is imposed at the end of a "taxable period," which begins with the event giving rise to the tax and ends on the earliest of (i) the date a notice of deficiency with respect to the first tier tax is mailed, or (ii) the date the first tier tax is assessed if no deficiency notice is mailed, or (iii) (in some cases) the date the taxable act is corrected. Although the second tier tax is imposed at the end of the taxable period, it is not assessed until after a notice of deficiency is mailed (see sections 6211 through 6216) unless a termination assessment (section 6851) or jeopardy assessment (section 6861) is made.

Under new section 4961, if the taxpayer corrects the act (or failure to act) giving rise to the second tier tax within a "correction period," the tax is not to be assessed, and if assessed, it is to be abated, and if collected, it is to be credited or refunded as an overpayment. See § 53.4961–1. The correction period begins on the day the taxable event occurs and ends 90 days after the date of mailing of a notice of deficiency with respect to the second tier tax, but may be extended in certain cases. See § 53.4963–1.

Other provisions relate to court proceedings concerning the amount of tax and the timeliness of correction, as well as deferral of assessment or collection during certain court actions. See § 53.4961–2.

Changes to Notice of Proposed Rulemaking

The notice of proposed rulemaking proposed deleting or revising a special rule for determining the end of the taxable period and invited comments on this aspect of the proposal. Although no comments were received, upon reconsideration, the Internal Revenue Service has determined to retain the existing special rule. The rule is also incorporated explicitly in regulations for chapter 43 excise taxes (relating to pension plans) in light of the revision of § 141.4975–13 and in the interest of promoting procedural uniformity between chapter 42 and 43 taxes.

Under the special rule, the taxable period ends upon filing of a waiver of the restrictions on assessment and collection of a deficiency in first tier tax. This rule does not apply under section 4945 because the taxable period does not affect the amount of the first or second tier tax under section 4945.

Thus, the following provisions are not deleted or revised, as originally proposed: § 53.4941 (e)–1(a)(3); Example 3 of § 53.4941 (e)–1(a)(4); § 53.4942(a)–1(c)(1)(ii); § 53.4943–9(a)(2); and § 53.4944–5(a)(2). In addition, a clarifying change has been made to § 53.4961–2, proposed new section 53.4963–1 has been adopted as § 53.4963–1, and cross references to section 4963 have been adopted as cross references to section 4963.

Study of § 53.4943–9(a)(1)(ii)

The Internal Revenue Service believes that § 4943–9(a)(1)(ii), which provides that the taxable period ends upon elimination of excess business holdings, may not be consistent with the statute. The Service is studying the provision and expects to propose a conforming change.

Regulatory Flexibility Act

Although a notice of proposed rulemaking that solicited public comment was issued, the Internal Revenue Service concluded when the notice was issued that the regulations are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 did not apply. Accordingly, the final regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Non-Applicability of Executive Order 12291

The Commissioner of Internal Revenue has determined that this final rule it not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis therefore is not required.

Paperwork Reduction Act

The collection of information requirements contained in these regulations have been submitted to the Office of Management and Budget (OMB) in accordance with the requirements of the Paperwork Reduction Act of 1980. These requirements have been approved by OMB under control number 1545–0024.

Drafting Information

The principal author of these regulations was George B. Baker of the Employee Plans and Exempt Organizations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

List of Subjects

26 CFR Part 53

Excise taxes, Foundations, Investments, Trusts and trustees, Black Lung benefit trusts.

26 CFR Part 54

Excise taxes, Pensions.

26 CFR Part 141

Excise taxes, pensions, Employee Retirement Income Security Act of 1974.

26 CFR Part 301

Administrative practice and procedure, Bankruptcy, Courts, Crime, Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Investigations, Law enforcement, Penalties, Pensions, Statistics, Taxes, Disclosure of information, Filing requirements.

26 CFR Part 602

OMB control numbers under the Paperwork Reduction Act, Reporting and recordkeeping requirements.

Adoption of Amendments of the Regulations

Accordingly, amendments to 26 CFR Parts 53, 54, 141, 301, and 602 are adopted as set forth below:

PART 53—FOUNDATION AND SIMILAR EXCISE TAXES—[AMENDED]

Paragraph 1. The authority for Part 53 continues to read in part:

Authority: 26 U.S.C. 7805. * * *

§ 53.4941 [Amended.]

Par. 2. In § 53.4941(b)–1, paragraph (a) is amended by removing the language "correction period (as defined in § 53.4941(e)–1(d))." and adding in its place the language "taxable period (as defined in § 53.4941(e)–1(a))."

Par. 3. Section 53.4941 (e)–1 is amended as follows:

1. In paragraph (b)(3) and in Example (2) of paragraph (e)(ii), the words "correction period" are removed and the words "taxable period" are added in their place; and

2. Paragraph (a)(1), Example (4) of paragraph (b)(4), and paragraph (d) are revised to read as set forth below.

§ 53.4941(e)–1 Definitions.

(a) *Taxable period*—(1) *In general.* For purposes of any act of self-dealing, the term "taxable period" means the period beginning with the date on which the act of self-dealing occurs and ending on the earliest of:

(i) The date of mailing of a notice of deficiency under section 6212 with respect to the tax imposed by section 4941(a)(1),

(ii) The date on which correction of the act of self-dealing is completed, or

(iii) The date on which the tax imposed by section 4941(a)(1) is assessed.

* * * * *

(b) *Amount involved.* * * *

(4) *Examples.* * * *

Example (4). D, a disqualified person with respect to private foundation T, purchases 100 shares of stock from T for $5,000 on June 15, 1982. The fair market value of the 100 shares of stock on that date is $4,800. D sells the 100 shares of stock on December 20, 1983, for $6,000. On December 27, 1983, a notice of deficiency with respect to the taxes imposed under subsections (a) and (b) of section 4941 is mailed to D and the taxable period ends. D fails to correct during the taxable period. Between June 15, 1982, and the end of the taxable period, the stock was quoted on the New York Stock Exchange at a high of $67 per share. The amount involved with respect to the tax imposed under subsection (a) is $5,000, and the amount involved with respect to the tax imposed under subsection (b) for failure to correct is $6,700 (100 shares at $67 per share), the highest fair market value during the taxable period.

* * * * *

(d) *Cross reference.* For rules relating to taxable events that are corrected within the correction period, defined in section 4963 (e), see section 4961 (a), and the regulations thereunder.

* * * * *

Par. 4. Section 53.4942(a)–1 is amended as follows:

1. In paragraph (a)(2), the language "correction period" and "paragraph (c)(3)" is removed and the language "taxable period" and "paragraph (c)(1)", respectively, is added in its place;

2. In paragraph (c)(4), Example (3) is removed; and

3. Paragraph (a)(4), paragraph (c)(1)(i), and paragraph (c)(3) are revised to read as set forth below.

VOL 51 ISS 85 MY 2 1986 UMI

§ 53.4942(a)-1 Taxes for failure to distribute income.

(a) *Imposition of tax.* * * *

(4) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example (1). *M*, a private foundation which uses the calendar year as its taxable year, has at the end of 1981, $50,000 of undistributed income (as defined in paragraph (a) of § 53.4942 (a)-3) for 1981. As of January 1, 1983, $40,000 is still undistributed. On August 15, 1983, a notice of deficiency with respect to the excise taxes imposed by section 4942 (a) and (b) is mailed to *M* under section 6212 (a) and the taxable period ends. Thus, under these facts, an initial excise tax of $8,000 (15 percent of $40,000) is imposed upon *M*. An additional excise tax of $40,000 (100 percent of $40,000) is imposed by section 4942(b). Under section 4961(a), however, if the undistributed income is reduced to zero during the correction period, this latter tax will not be assessed, and if assessed, it will be abated, and if collected, it will be credited or refunded as an overpayment.

Example (2). Assume the facts as stated in example (1), except that the notice of deficiency is mailed to *M* on September 7, 1984, and as of January 1, 1984, only $10,000 of the $50,000 of undistributed income with respect to 1981 is undistributed. Therefore, initial excise taxes of $8,000 (15 percent of $40,000, M's undistributed income from 1981, as of January 1, 1983) and $1,500 (15 percent of $10,000, *M's* undistributed income from 1981 as of January 1, 1984) are imposed by section 4942(a). If the $10,000 remains undistributed as of September 7, 1984, the end of the taxable period, an additional excise tax of $10,000 (100 percent of $10,000, *M's* undistributed income from 1981, as of September 7, 1984) is imposed by section 4942(b).

* * * * *

(c) *Certain periods.* For purposes of this section—

(1) *Taxable period.* (i) The term "taxable period" means, with respect to the undistributed income of a private foundation for any taxable year, the period beginning with the first day of the taxable year and ending on the earlier of:

(A) The date of mailing of a notice of deficiency under section 6212(a) with respect to the initial excise tax imposed under section 4942(a), or

(B) The date on which the initial excise tax imposed under section 4942(a) is assessed.

For example, assume M, a private foundation which uses the calendar year as the taxable year, has $15,000 of undistributed income for 1981. A notice of deficiency is mailed to M under section 6212(a) on June 1, 1983. With respect to the undistributed income of M for 1981, the taxable period began on January 1, 1981, and ended on June 1, 1983.

* * * * *

(3) *Cross reference.* For rules relating to taxable events that are corrected within the correction period, defined in section 4963(e), see section 4961 (a) and the regulations thereunder.

* * * * *

Par. 5. In § 53.4942(a)-3, Example (2) of paragraph (d)(3) is revised to read as follows:

§ 53.4942(a)-3 Qualifying distributions defined.

* * * * *

(d) *Treatment of qualifying distributions.* * * *

(3) *Examples.* * * *

Example (2). *M*, a private foundation which uses the calendar year as the taxable year, has undistributed income of $300 for 1981, $300 for 1982, and $400 for 1983. On January 14, 1983, *M* makes its first qualifying distribution in 1983 when it sets aside (within the meaning of paragraph (b) of this section) $700 for construction of a hospital. On February 24, 1983 a notice of deficiency with respect to the excise taxes imposed by section 4942 (a) and (b) in regard to *M's* undistributed income for 1981 is mailed to *M* under section 6212(a). *M* notifies the Commissioner in writing on March 24, 1983, that it is making an election under subparagraph (2) of this paragraph to have its distribution of January 14th applied first against its undistributed income for 1982, next against its undistributed income for 1981, and last against its undistributed income for 1983. Thus, $200 of the $700 qualifying distribution is treated as made out of the undistributed income for 1982; $300, out of undistributed income for 1981; and $200 ($700 less the sum of $200 and $300), out of the undistributed income for 1983. Thus, an initial excise tax of $45 (15 percent of $300) is imposed under section 4942(a). Since *M* made the election described above, the $300 (treated as distributed out of undistributed income for 1981) corrects (within the meaning of section 4963(d)(2)) the taxable act because the undistributed income for 1981 is reduced to zero. Furthermore, correction is effected within the correction period (as defined in section 4963(e)(1) and § 53.4963-1(e)). Therefore, under the provisions of section 4961(a), the additional tax imposed by section 4942(b) will not be assessed.

* * * * *

Par. 6. In § 53.4943-2, paragraph (b) is revised to read as follows:

§ 53.4943-2 Imposition of tax on excess business holdings of private foundations.

* * * * *

(b) *Additional tax.* In any case in which the initial tax is imposed under section 4943(a) with respect to the holdings of a private foundation in any business enterprise, if, at the close of the taxable period (as defined in section 4943(d)(2) and § 53.4943-9) with respect to such holdings the foundation still has excess business holdings in such enterprise, there is imposed a tax under section 4943(b) equal to 200 percent of the value of such excess holdings as of the last day of the taxable period.

Par. 7. In § 53.4943-9, paragraph (a)(1) and paragraph (b) are revised to read as set forth below.

§ 53.4943-9 Business holdings; certain periods.

(a) *Taxable period*—(1) *In general.* For purposes of section 4943, the term "taxable period" means, with respect to any excess business holdings of a private foundation in a business enterprise, the period beginning with the first day on which there are such excess business holdings and ending on the earliest of:

(i) The date of mailing of a notice of deficiency under section 6212 with respect to the tax imposed on the holdings by the section 4943(a);

(ii) The date on which the excess is eliminated; or

(iii) The date on which the tax imposed by section 4943(a) is assessed.

For example, *M*, a private foundation, first has excess business holdings in *X*, a corporation, on February 5, 1972. A notice of deficiency is mailed under section 6212 to *M* on June 1, 1974. With respect to *M's* excess business holdings in *X*, the taxable period begins on February 5, 1972, and ends on June 1, 1974.

* * * * *

(b) *Cross reference.* For rules relating to taxable events that are corrected within the correction period, defined in section 4963(e), see section 4961(a) and the regulations thereunder.

* * * * *

§ 53.4944-3 [Amended]

Par. 8. Section 53.4944-3 is amended as follows:

1. In paragraph (a), the words "correction period" are removed from the first and third sentences and the words "taxable period" are added in their place, and the language "4944(e)(3)" is removed from the first sentence and the language "4944(e)(1)" is added in its place; and

2. At the end of paragraph (b), in the fourth sentence of Example (1) in paragraph (c), and in the first and second sentence of Example (3) in paragraph (c), the words "correction period" are removed and the words "taxable period" are added in their place.

Par. 9. In § 53.4944-5, paragraphs (a)(1) and (d) are revised to read as set forth below.

§ 53.4944-5 Definitions.

(a) *Taxable period*—(1) *In general.* For purposes of section 4944, the term "taxable period" means, with respect to any investment which jeopardizes the carrying out of a private foundation's exempt purposes, the period beginning with the date on which the amount is invested and ending on the earliest of:

(i) The date of mailing of a notice of deficiency under section 6212 with respect to the tax imposed on the making of the investment by section 4944(a)(1);

(ii) The date on which the amount invested is removed from jeopardy; or

(iii) The date on which the tax imposed by section 4944(a)(1) is assessed.

* * * * *

(d) *Cross reference.* For rules relating to taxable events that are corrected within the correction period, defined in section 4963(e), see section 4961(a) and the regulations thereunder.

Par. 10. Section 53.4945-1 is amended as follows:

1. In the first sentence of paragraph (b)(1), the words "correction period" are removed and the words "taxable period" are added in their place; and

2. Example (2) in paragraph (c)(3) and paragraph (e) are revised to read as set forth below.

§ 53.4945-1 Taxes on taxable expenditures.

* * * * *

(c) *Special rules.* * * *

(3) *Examples.* * * *

Example (2). Assume the same facts as in example (1). Further assume that within the taxable period A makes a motion to correct the taxable expenditure at a meeting of the board of directors. The motion is defeated by a two-to-one vote, A voting for the motion and B and C voting against it. In these circumstances an additional tax is imposed on the private foundation in the amount of $100,000 (100 percent of $100,000). The additional tax imposed on B and C is $10,000 (50 percent of $100,000 subject to a maximum of $10,000). B and C are jointly and severally liable for the $10,000, and this sum may be collected by the Service from either of them.

* * * * *

(e) *Certain periods*—(1) *Taxable period.* For purposes of section 4945, the term "taxable period" means, with respect to any taxable expenditure, the period beginning with the date on which the taxable expenditure occurs and ending on the earlier of:

(i) The date of mailing of a notice of deficiency under section 6212 with respect to the tax imposed on taxable expenditures by section 4945(a)(1); or

(ii) The date on which the tax imposed by section 4945(a)(1) is assessed.

(2) *Cross reference.* For rules relating to taxable events that are corrected within the correction period, defined in section 4963(e), see section 4961(a) and the regulations thereunder.

Par. 11. Sections 53.6001-1 through 53.7101-1 (Subpart K) of Part 53 are redesignated Subpart L, and a new subpart K is added to read as follows:

Subpart K—Second Tier Excise Taxes

Sec.

53.4961-1 Abatement of second tier taxes for correction within correction period.
53.4961-2 Court proceedings to determine liability for second tier tax.
53.4963-1 Definitions.

Subpart K—Second Tier Excise Taxes

§ 53.4961-1 Abatement of second tier taxes for correction within correction period.

If any taxable event is corrected during the correction period for the event, then any second tier tax imposed with respect to the event shall not be assessed. If the tax has been assessed, it shall be abated. If the tax has been collected, it shall be credited or refunded as an overpayment. For purposes of this section, the tax imposed includes interest, additions to the tax and additional amounts. For definitions of the terms "second tier tax," "taxable event," "correct," and "correction period," see § 53.4963-1.

§ 53.4961-2 Court proceedings to determine liability for second tier tax.

(a) *Introduction.* Under section 4961 (b) and (c), the period of limitations on collection may be suspended and assessment or collection of first or second tier tax may be prohibited during the pendency of administrative and judicial proceedings conducted to determine a taxpayer's liability for second tier tax. This section provides rules relating to the suspension of the limitations period and the prohibitions on assessment and collection. In addition, this section describes the administrative and judicial proceedings to which these rules apply.

(b) *Initial proceeding*—(1) *Defined.* For purposes of subpart K, an initial proceeding means a proceeding described in subparagraph (2) or (3).

(2) *Tax Court proceeding before assessment.* A proceeding is described in this subparagraph (2) if it is a proceeding with respect to the taxpayer's liability for second tier tax and is commenced in accordance with section 6213 (a).

(3) *Refund proceeding commenced before correction period ends.* A proceeding is described in this subparagraph (3) if it is a proceeding commenced under section 7422, in accordance with the provisions of § 53.4963-1(e) (4) and (5) (relating to prerequisites to extension of the correction period during certain refund proceedings), and with respect to the taxpayer's liability for second tier tax.

(c) *Supplemental proceeding*—(1) *Jurisdiction.* If a determination in an initial proceeding that a taxpayer is liable for a second tier tax has become final, the court in which the initial proceeding was commenced shall have jurisdiction to conduct any necessary supplemental proceeding to determine whether the taxable event was corrected during the correction period.

(2) *Time for beginning proceeding.* The time for beginning a supplemental proceeding begins on the day after a determination in an initial proceeding becomes final and ends on the 90th day after the last day of the correction period.

(d) *Restriction on assessment during Tax Court proceeding.* If a supplemental proceeding described in section 4961 (b) and § 53.4961-2(c) is commenced in the Tax Court, the provisions of the second and third sentences of section 6213(a) and the first and third sentences of § 301.6213-1(a)(2) apply with respect to a deficiency in second tier tax until the decision of the Tax Court in the supplemental proceeding is final.

(e) *Suspension of period of collection for second tier tax*—(1) *Scope.* Except as provided in subparagraph (6), this paragraph (e) applies to the second tier tax assessed with respect to a taxable event if a claim described in subparagraph (2) is filed.

(2) *Claim for refund.* A claim for refund is described in this subparagraph (2) if, no later than 90 days after the day on which the second tier tax is assessed with respect to a taxable event, the taxpayer—

(i) Pays the full amount of first tier tax for the taxable period, and

(ii) Files a claim for refund of the amount paid.

(3) *Collection prohibited.* No levy or proceeding in court for the collection of the second tier tax shall be made, begun, or prosecuted until the end of the collection prohibition period described in subparagraph (5). Notwithstanding section 7421(a), the collection by levy or proceeding may be enjoined during the collection prohibition period by a proceeding in the proper court.

(4) *Suspension of running of period of limitations on collection.* With respect to a second tier tax to which this paragraph (e) applies, the running of the period of limitations provided in section 6502 (relating to collection of tax by levy

VOL 51 ISS 85 MY 2 1986 UMI

or by a proceeding in court) shall be suspended for the collection prohibition period described in subparagraph (5).

(5) *Collection prohibition period.* The collection prohibition period begins on the day the second tier tax is assessed and ends on the latest of:

(i) The day a decision in a refund proceeding commenced before the 91st day after denial of the claim described in subparagraph (2) of this paragraph (including any supplemental proceeding under § 53.4961–2(c)) becomes final;

(ii) The 90th day after the claim referred to in subparagraph (2) is denied; or

(iii) The 90th day after the second tier tax is assessed.

(6) *Jeopardy collection.* If the Secretary makes a finding that the collection of the second tier tax is in jeopardy, nothing in this paragraph (e) shall prevent the immediate collection of such tax.

(f) *Finality*—(1) *Tax Court proceeding.* For purposes of this subpart K, section 7481 applies in determining when a decision in a Tax Court proceeding becomes final.

(2) *Refund proceeding.* For purposes of this subpart K, § 301.7422–1 applies in determining when a decision in a refund proceeding becomes final.

§ 53.4963–1 Definitions.

(a) *First tier tax.* For purposes of this subpart K, the term "first tier tax" means any tax imposed by subsection (a) of section 4941, 4942, 4943, 4944, 4945, 4951, 4952, 4971, or 4975. A first tier tax may also be referred to as an "initial tax" in parts 53 and 54.

(b) *Second tier tax.* For purposes of this subpart K, the term "second tier tax" means any tax imposed by subsection (b) of section 4941, 4942, 4943, 4944, 4945, 4951, 4952, 4971, or 4975. A second tier tax may also be referred to as an "additional tax" in parts 53 and 54.

(c) *Taxable event.* For purposes of this subpart K, the term "taxable event" means any act, or failure to act, giving rise to liability for tax under section 4941, 4942, 4943, 4944, 4945, 4951, 4952, 4971, or 4975.

(d) *Correct*—(1) *In general.* Except as provided in subparagraph (2), the term "correct" has the same meaning for purposes of this subpart K as in the section which imposes the second tier tax or the regulations thereunder.

(2) *Special rules.* The term "correct" means—

(i) For a second tier tax imposed by section 4942(b), reducing the amount of the undistributed income to zero,

(ii) For a second tier tax imposed by section 4943(b), reducing the amount of the excess business holdings to zero, and

(iii) For a second tier tax imposed by section 4944(b), removing the investment from jeopardy.

(e) *Correction period*—(1) *In general.* The correction period with respect to any taxable event shall begin with the date on which the taxable event occurs and shall end 90 days after the date of mailing of a notice of deficiency under section 6212 with respect to the second tier tax imposed with respect to the taxable event.

(2) *Extensions of correction period.* The correction period referred to in subparagraph (1) of this paragraph shall be extended by any period in which a deficiency cannot be assessed under section 6213(a). In addition, the correction period referred to in subparagraph (1) of this paragraph (e) shall be extended in accordance with subparagraph (3), (4), and (5) of this paragraph except that subparagraph (4), or (5) shall not operate to extend a correction period with respect to which a taxpayer has filed a petition with the United States Tax Court for redetermination of a deficiency within the time prescribed by section 6213(a).

(3) *Extensions by Commissioner.* The correction period referred to in subparagraph (1) of this paragraph may be extended by any period which the Commissioner determines is reasonable and necessary to bring about correction (including, for taxes imposed by section 4975, equitable relief sought by the Secretary of Labor) of the taxable event. The Commissioner ordinarily will not extend the correction period unless the following factors are present.

(i) The taxpayer on whom the second tier tax is imposed, the Secretary of Labor (for taxes imposed by section 4975), or an appropriate State officer (as defined in section 6104(c)(2)) is actively seeking in good faith to correct the taxable event;

(ii) Adequate corrective action cannot reasonably be expected to result during the unextended correction period;

(iii) For taxes imposed by section 4975, the Secretary of Labor requests the extension because subdivision (ii) applies; and

(iv) For taxes imposed by chapter 42 (other than taxes imposed by section 4904), the taxable event appears to have been an isolated occurrence so that it appears unlikely that similar taxable events will occur in the future.

(4) *Extension for payment of first tier tax.* If, within the unexpected correction period, the taxpayer pays the full amount of the first tier tax imposed with respect to the taxable event the Commissioner shall extend the correction period to the later of—

(i) Ninety days after the payment of the first tier tax, or

(ii) The last day of the correction period determined without regard to this paragraph.

(5) *Extensions for filing claim for refund or refund suit.* If prior to the expiration of the correction period (including extensions) a claim for refund is filed with respect to payment of the full amount of the first tier tax imposed with respect to the taxable event, the Commissioner shall extend the correction period during the pendency of the claim plus an additional 90 days. If within that time a suit or proceeding referred to in section 7422(g) with respect to the claim is filed, the Commissioner shall extend the correction period until the determination in the suit for refund (determined without regard to a supplemental proceeding under section 4961(b)) is final, determined under § 301.7422–2(e).

(6) *End of correction period if waiver accepted.* If the notice of deficiency referred to in paragraph (1) is not mailed because there is a waiver of the restrictions on assessment and collection of the deficiency or because the deficiency is paid, the correction period will end with the end of the collection prohibition period described in § 53.4961–2(e)(5).

(7) *Date on which taxable event occurs.* For purposes of subparagraph (1), the taxable event shall be treated as occurring—

(i) Under section 4942, on the first day of the taxable year for which there is undistributed income,

(ii) Under section 4943, on the first day on which there are excess business holdings,

(iii) Under section 4971, on the last day of the plan year in which there is an accumulated funding deficiency, and

(iv) In all other cases, the date on which the event occurred.

(f) *Effective date.* The provisions of this subpart K are effective with respect to second tier taxes assessed after December 24, 1980. The preceding sentence shall not be construed to permit the assessment of a tax in a case to which, on December 24, 1980, the doctrine of res judicata applied.

PART 54—PENSION EXCISE TAX REGULATIONS—[AMENDED]

Par. 12. The authority for Part 54 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 13. Section 54.4971–1 is added immediately after the authority citation for Part 54 to read as follows:

§ 54.4971–1 General rules relating to excise tax on failure to meet minimum funding standards.

(a) [Reserved]

(b) [Reserved]

(c) *Additional tax.* Section 4971(b) imposes an excise tax in any case in which an initial tax is imposed under section 4971(a) on an accumulated funding deficiency and the accumulated funding deficiency is not corrected within the taxable period (as defined in section 4971(c)(3)). The additional tax is 100 percent of the accumulated funding deficiency to the extent not corrected.

(d) [Reserved]

(e) *Definition of taxable period*—(1) *In general.* For purposes of any accumulated funding deficiency, the term "taxable period" means the period beginning with the end of the plan year in which there is an accumulated funding deficiency and ending on the earlier of:

(i) The date of mailing of a notice of deficiency under section 6212 with respect to the tax imposed by section 4971(a), or

(ii) The date on which the tax imposed by section 4971(a) is assessed.

(2) *Special rule.* Where a notice of deficiency referred to in paragraph (e)(1)(i) of this section is not mailed because a waiver of the restrictions on assessment and collection of a deficiency has been accepted or because the deficiency is paid, the date of filing of the waiver or the date of such payment, respectively, shall be treated as the end of the taxable period.

Par. 14. Section 54.4975–1 is added immediately after § 54.4974–1 to read as follows:

§ 54.4975–1 General rules relating to excise tax on prohibited transactions.

(a) *Scope.* This section provides general rules for the imposition of the excise taxes on prohibited transactions.

(b) *Initial tax.* Section 4975(a) imposes an initial tax on each prohibited transaction. The initial tax is 5 percent of the amount involved with respect to the prohibited transaction for each year (or part thereof) in the taxable period.

(c) *Additional tax.* Section 4975(b) imposes an excise tax in any case in which an initial tax is imposed under section 4975(a) on a prohibited transaction and the prohibited transaction is not corrected within the taxable period (as defined in paragraph (d) of this section). The additional tax is 100 percent of the amount involved with respect to the prohibited transaction.

(d) *Taxable period*—(1) *In general.* For purposes of any prohibited transaction, the term "taxable period" means the period beginning with the date on which the prohibited transaction occurs and ending on the earliest of:

(i) The date of mailing of a notice of deficiency under section 6212 with respect to the tax imposed by section 4975(a);

(ii) The date on which correction of the prohibited transaction is completed; or

(iii) The date on which the tax imposed by section 4975(a) is assessed.

(2) *Special rule.* Where a notice of deficiency referred to in paragraph (d)(1)(i) of this section is not mailed because a waiver of the restrictions on assessment and collection of a deficiency has been accepted or because the deficiency is paid, the date of filing of the waiver or the date of such payment, respectively, shall be treated as the end of the taxable period.

PART 141—TEMPORARY EXCISE TAX REGULATIONS UNDER THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974—[AMENDED]

Par. 15. The authority for Part 141 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 16. In § 141.4975–13, the title is revised to read as set forth below, and the language "4975(f) (2), (4), (5) and (6)" is removed and the language "4975(f) (4) and (5)" is added in its place.

§ 141.4975–13 Definition of "amount involved" and "correction".

* * * * *

PART 301—PROCEDURE AND ADMINISTRATION—[AMENDED]

Par. 17. The authority for Part 301 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 18. In § 301.6212–1 the following two sentences are added at the end of paragraph (c):

§ 301.6212–1 Notice of deficiency.

* * * * *

(c) *Further deficiency letters restricted.* * * * Solely for purposes of applying the restriction of section 6212(c), a notice of deficiency with respect to second tier tax under chapter 43 shall be deemed to be a notice of deficiency for the taxable year in which the taxable event occurs. See § 53.4963–1(e)(7) (iii) or (iv) for the date on which the taxable event occurs.

Par. 19. In § 301.6213–1, the first sentence of paragraph (e) is revised to read as follows:

§ 301.6213–1 Restrictions applicable to deficiencies; petition to Tax Court.

* * * * *

(e) *Suspension of filing period for certain chapter 42 and chapter 43 taxes.* The period prescribed by section 6213(a) for filing a petition in the Tax Court with respect to the taxes imposed by section 4941, 4942, 4943, 4944, 4945, 4951, 4952, 4971, or 4975, shall be suspended for any other period which the Commissioner has allowed for making correction under § 53.4963–1(e)(3). * * *

Par. 20. Paragraph (a) of § 301.6503 (a)–1 is amended by adding a new subparagraph (3) to read as follows:

§ 301.6503 (a)–1 Suspension of running of period of limitation; issuance of statutory notice of deficiency.

(a) *General rule.* * * *

(3) For provisions relating to suspension of the running of the period of limitation with respect to collection of "second tier" excise taxes (as defined in section 4963) until final resolution of a refund proceeding described in sections 4961 and 7422 for the determination of the taxpayer's liability for the second tier taxes, see § 53.4961–2 (e) (4).

* * * * *

§ 301.6503 [Amended]

Par. 21. Section 301.6503 (g)–1 is amended by removing all of the text that follows the word "correction" and adding the language "under section 4963 (e) (1) (B)." in its place.

§ 301.6861–1 [Amended]

Par. 22. In § 301.6861–1, paragraph (g) is amended by removing the last sentence.

Par. 23. Section 301.7422–1 is revised to read as follows:

§ 301.7422–1 Special rules for certain excise taxes imposed by chapter 42 or 43.

(a) *Finality of refund proceeding.* For purposes of sections 4941, 4942, 4943, 4944, 4945, 4951, 4952, 4961, 4963, 4971, and 4975, and the regulations thereunder, a decision in a suit for refund instituted under the provisions of this section shall be final—

(1) Upon the expiration of the time allowed for filing a notice of appeal from a decision of the United States Claims Court or of the United States District Court, if no timely notice of appeal is filed; or

(2) Upon the expiration of the time allowed for filing a petition for certiorari from a decision of the United States Claims Court, or from a decision of the United States District Court, which has been affirmed or the appeal dismissed by the United States Court of Appeals, if

VOL 51 ISS 85 MY 2 1986 UMI

no timely petition for certiorari is filed; or

(3) If a petition for certiorari has been filed, thirty days from the denial of such petition; or

(4) Thirty days from the date of a decision of the United States Supreme Court if no timely petition for rehearing is filed; however, if a timely petition for rehearing from such a decision is filed, and is denied, thirty days from the denial thereof; or

(5) If a decision is entered upon a rehearing or if a decision is modified or reversed as the result of a decision of a higher court, upon the expiration, with respect to the decision on rehearing or the modified or reversed decision, of periods similar to those provided in subparagraphs (1) through (4).

(b) *Right to bring action.* With respect to any taxable event, payment of the full amount of first tier tax for the taxable period shall constitute sufficient payment in order to maintain an action under this section with respect to the second tier tax.

(c) *Limitation on suit for refund.* No suit may be maintained under this section for the credit or refund of any tax imposed under section 4941, 4942, 4943, 4944, 4945, 4951, 4952, 4971, or 4975 with respect to any taxable event unless—

(1) No other suit has been maintained for credit or refund of any tax imposed by such sections with respect to such taxable event; and

(2) No petition has been filed in the Tax Court with respect to a deficiency in any tax imposed by such sections with respect to such taxable event.

(d) *Final determination of issues.* For purposes of this section, any suit for the credit or refund of any tax imposed under section 4941, 4942, 4943, 4944, 4945, 4951, 4952, 4971, or 4975, together with a supplemental proceeding (if any) under section 4961 (b), with respect to any taxable event, shall constitute a suit to determine all questions with respect to any other tax imposed with respect to such taxable event under such sections. Consequently, failure by the parties to the suit to bring before the Court any question described in the preceding sentence shall constitute a bar to the question.

(e) *Definitions.* For definitions of the terms "taxable event," "first tier tax," and "second tier tax," see § 53.4963–1.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT—[AMENDED]

Par. 24. Part 602 is amended as follows:

1. The authority citation for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 602.101 [Amended]

2. Section 602.101(c), is amended by inserting in the appropriate places in the tables.

"53.4961–2 (e) (2)..... 1545–0024," and
"53.4963–1 (e) (5)..... 1545–0024".

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

Approved: April 3, 1986.

J. Roger Mentz,
Assistant Secretary of the Treasury.

BILLING CODE 4830–01–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Parts 117 and 118

[CGD 84–022]

Bridge Lighting and Other Signals

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This rule revises the bridge lighting regulations by adding standards for retroreflectors, daymarks, fog signals, vertical clearance gauges, radar reflectors, racons, and other signals. Due to a history of accidents involving vessels hitting bridges, the old regulations, which refer only to bridge lighting, needed to be expanded to include means of signalling in daylight or fog and of informing vessel operators of the vertical clearance at bridges. These amendments are intended to promote safe navigation through bridges across the navigable waters of the United States.

DATES: This rule is effective on June 2, 1986. The incorporation by reference of the material listed in the rule is approved by the Director of the Federal Register as of June 2, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Alfred T. Meschter, (202) 426–0942.

SUPPLEMENTARY INFORMATION: On January 31, 1985, the Coast Guard published a Notice of Proposed Rulemaking (NPRM) in the **Federal Register** (50 FR 4529) proposing to revise 33 CFR Parts 117 and 118. Opportunity for comment on the proposal was given until March 18, 1985.

Forty-four comments were received directly in response to the NPRM from government agencies, railroads, boat owners and associations, and private individuals. Several of the responses did not contain any substantive comments. In addition to the comments submitted directly in response to the NPRM, 36 comments were received at Coast Guard district offices. These comments, along with the views of various Coast Guard officials, have been included in the public docket.

One writer hoped a public hearing would be held but did not indicate a reason why. After considering all comments received, the Coast Guard determined that the opportunity to make oral presentations would not substantially aid the rulemaking process. Therefore, a public hearing was not held.

Drafting Information

The principal persons involved in drafting these regulations are Mr. Alfred T. Meschter, Project Manager, and Mr. Stephen H. Barber, Project Counsel.

Discussion of Comments

Several states and most railroad companies objected on the grounds that, because the proposed signals, such as racons, radar reflectors, lateral lighting, and retroreflective materials, were navigation aids, their cost should be borne by the users or the Federal Government. Bridge owners are allowed to construct bridges over navigable waters of the United States as long as the navigation through or under them is not unreasonably obstructed. The statutes which provide this privilege are clear in requiring the owner to provide lighting and other signals necessary to render the navigation free and reasonably unobstructed. The high frequency and cost of vessel/bridge accidents indicate that additional and standardized signals to reduce or prevent these accidents are necessary.

Several bridge owners stated that the rule is unnecessary and burdensome and questioned the Coast Guard's assessment of economic impact and costs. Coast Guard records show that from 1981 through 1984 there were 401 vessel/bridge accidents totaling $22,030,081 in damage to vessels, $18,827,183 in damage to bridges, and $9,384,112 in damage to cargo. The number of accidents varied between 81 to 111 annually. The cost estimate of $19,000 per bridge assumes a bridge which presently has no signals and which would be required to install all the signals addressed in this rule, including racons. Without racons, which would be required on very few bridges, the cost is estimated to be $4,000. Even if these estimates are low, the cost to the bridge owner would be far less than the

cost of a single, typical vessel/bridge accident.

Several comments concerned the increase in bridge owner's liability resulting from failure of required signals, especially high maintenance items such as racons. There would be an increase in liability only if the bridge owner fails to take reasonable measures to maintain required devices. It would be irresponsible for the Coast Guard to allow continued inadequate marking of bridges and continued accidents for this reason. Most of the additional marking required by these rules will require minimum maintenance. Racons will only be required on those few bridges where installation of these devices will be a clear benefit. As discussed more fully below, even racons have a high degree of reliability when properly installed.

One comment suggested an appeal from the decision of the District Commander concerning the markings or signals required. This suggestion has not been adopted. The District Commander is in the best position to determine the needs of navigation and the cost of even the most expensive equipment does not justify an administrative appeal. The District Commander's decision is final agency action.

One comment suggested that lateral red and green lighting would tend to create confusion if used to mark a main channel span where red pier lights were in use. Section 118.110 has been changed to provide for the marking of adjacent piers with fixed yellow lights in those instances. This provision conforms to the U.S. Aids to Navigation System.

One comment stated that electronic depth gauges should be required to provide real time vertical clearances. This suggestion was not adopted because electronic depth gauges for use as bridge clearance gauges are relatively new. The Coast Guard has no information on their reliability, cost, and accuracy. Furthermore, information from nautical charts and other publications, as well as visual gauges giving vertical clearances of bridges is more than adequate for the needs of navigation.

Many of the comments objecting to costs were by states or railroad companies owning numerous bridges and indicated an expectation that the owners would be required to install many, if not all, of the various signals upon the effective date of the rule. However, as noted in one comment, the signals are required only on a case-by-case, site-specific basis in response to the particular navigational problems presented by the bridge. Because of the site-specific intent of the regulations, we do not expect significant numbers of immediate changes to be required. In the event that new signal equipment was recently installed, the Coast Guard would consider this factor in determining the need for replacement.

A number of comments raised specific questions concerning the effectiveness of retroreflective material. Retroreflective material has been in common use on bridges, aids to navigation structures, and buoys over a number of years and has proven effective.

Several comments asked what color specifications for lights under § 118.60 are required. Though no color specifications are prescribed, § 118.60 has been changed to recommend the use of the chromaticity standards for vessel navigation lights in Annex I, Appendix A of 33 CFR Part 81.

A number of comments suggested that flashing lights be required in § 118.65 instead of fixed lights. The Coast Guard considers the use of flashing lights as more appropriately limited to those instances where they conform to the standard aids to navigation system and have lateral significance; particularly as they relate to the location of the main navigation channel through a bridge. Under § 118.110, the District Commander may require the use of flashing lights in appropriate cases.

A number of comments raised specific questions concerning the reliability of racons under § 118.120. Very few racons are in use or are anticipated to be used on bridges. Because of their solid state construction, racons are considered to be maintenance free for three to five years, if operated within the design standards and installed with anti-vibration mounting properly matched to the intended environment.

A number of comments raised specific questions concerning cost of reflective material and other signals. The economic impact of these rules is discussed in the following Regulatory Evaluation section.

As a result of the comments received, several minor changes were made to the information in Appendix A of Part 117 to correct erroneous locations, names, spellings, call signs, and VHF channels of the listed bridges. In addition, editorial changes have been made in §§ 117.24(b)(2), 118.100(c), and 118.116(d) to clarify the rules.

Incorporation by Reference

The following material has been approved for incorporation by reference by the Director of the Federal Register under 5 U.S.C. 552 and 1 CFR Part 51:

Standard Alphabets for Highway Signs, Federal Highway Administration (FHWA), 1986. (Reprinted April 1984.)

Copies of the material incorporated by reference may be obtained from the sources indicated in § 118.3(c).

If substantive changes are made to the material incorporated, those changes may be considered for incorporation. However, before taking final action, the Coast Guard will publish a separate notice in the **Federal Register** for public comment.

Regulatory Evaluation

These rules are considered to be nonmajor under Executive Order 12291 and nonsignificant under the Department of Transportation Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of May 22, 1980). The economic impact of this rule has been found to be so minimal that a full regulatory evaluation in unnecessary.

These rules would not automatically require all bridges to have all of the various devices considered. Only when the District Commander determines on a case-by-case basis that a particular bridge needs one or more of the devices for reasons of safe navigation would the device or devices be required. In the event the bridge owner voluntarily chooses to comply with one or more of these rules, the owner would still have to receive the District Commander's approval in order to determine whether the measures taken will improve safety of navigation and conform to the regulations.

Because any requirement for installation is on a case-by-case basis and because many bridge owners would prefer to comply with one or more rules even though not required to, it is not known how many bridges would be required to install any of this equipment.

Retroflective material costs less than $10 a square foot, the maximum size required. The cost for painting, day boards, lateral lighting, radar reflectors, traveller lighting, and fog signals range in cost from $100 to $4,000 depending on which are required. The Coast Guard anticipates that the most costly device, racons at $15,000 a unit, would be needed only on large bridges crossing busy waterways. These large bridges, the type owned by railroads and governmental bodies, could, therefore, require up to a $19,000 outlay, though this cost would be exceptional.

We do not have data to estimate accurately the total number of bridges affected. However, that number is unlikely to exceed five or six major bridges and 40 to 50 minor bridges annually for a total cost of less than $224,000 per year. If one accident can be avoided, such as one of the two recent

VOL 51 ISS 85 MY 2 1986 UMI

collisions with the Popular Street Bridge across the Mississippi River at St. Louis, Missouri, which resulted in damages totalling $9,000,000 and $3,000,000 respectively, these improvements would be cost effective.

Therefore, based upon these estimates, the benefits of these rules are anticipated to exceed their costs.

Regulatory Flexibility Act

These rules would apply mostly to major bridges across busy waterways, the type of bridge usually owned by a railroad or local governmental agency. Smaller bridges affected, ones that might be owned by small entities, would number about 40 to 50 a year. At the most, costs for required equipment for the smaller bridges would not exceed $4,000 per bridge and would probably be considerably less. Therefore, for the above reasons, it is certified, in accordance with section 605(d) of the Regulatory Flexibility Act (94 Stat. 1164; 5 U.S.C. 601), that these rules will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This rulemaking contains no information collection or recordkeeping requirements.

Environmental Assessment

These rules are limited to actions by the Coast Guard to protect public safety by authorizing or requiring the installation of approved warning devices to reduce the likelihood of vessels striking bridges. Therefore, the rules are of the category that would not significantly affect the environment and do not require an Environmental Assessment, Finding of No Significant Impact, or Environmental Impact Statement (Section 2-B-3-g, COMDTINST M16475.1A).

List of Subjects

33 CFR Part 117

Bridges.

33 CFR Part 118

Bridges, Incorporation by reference.

In consideration of the foregoing, Parts 117 and 118 of Title 33, Code of Federal Regulations, are amended as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 is revised to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46(c)(5).

2. By adding a note at the end of paragraph (d)(1) of § 117.15 to read as follows:

§ 117.15 Signals.

* * * * *

(d) * * *
(1) * * *

Note.—Call signs and radio channels for drawbridges with radiotelephones are listed in Appendix A to this part.

* * * * *

3. By adding a new § 117.24 to read as follows:

§ 117.24 Radiotelephone installation identification.

(a) The Coast Guard authorizes, and the District Commander may require the installation of a sign on drawbridges, on the upstream and downstream sides, indicating that the bridge is equipped with and operates a VHF radiotelephone in accordance with § 117.23.

(b) The sign shall give notice of the radiotelephone and its calling and working channels—

(1) In plain language; or

(2) By a sign consisting of the outline of a telephone handset with the long axis placed horizontally and a vertical three-legged lightning slash superimposed over the handset. The slash shall be as long vertically as the handset is wide horizontally and normally not less than 27 inches and no more than 36 inches long. The preferred calling channel should be shown in the lower left quadrant and the preferred working channel should be shown in the lower right quadrant.

Note.—It is recommended that the radiotelephone sign be similar in design to the Service Signs established by the Federal Highway Administration (FHWA) in U.S. Road Symbol Signs using Reflective Blue and Reflective White colors. Color and design information is available from the District Commander of the Coast Guard District in which the bridge is located.

4. By revising paragraph (b) in § 117.47, not including the note, to read as follows:

§ 117.47 Clearance guages.

* * * * *

(b) Except for provisions in this part which specify otherwise for particular drawbridges, clearance guages shall be designed, installed, and maintained according to the provisions of § 118.160 of this chapter.

* * * * *

5. By adding a new Appendix A at the end of Part 117 to read as follows:

Appendix A to Part 117—Drawbridges Equipped with Radiotelephones.

[1] Effective April 15, 1983, all state-owned highway drawbridges in Louisiana need not monitor channel 16 (Emergency Channel).

6. By revising the title of Part 118 to read as follows:

PART 118—BRIDGE LIGHTING AND OTHER SIGNALS

7. The authority citation for Part 118 is revised to read as follows and all section authority citations are removed:

Authority: 33 U.S.C. 494; 14 U.S.C. 85, 633; 49 CFR 1.46 (b) and (c).

8. By revising § 118.1 to read as follows:

§ 118.1 General requirements.

All persons owning or operating bridges over the navigable waters of the United States or any international bridge constructed after March 23, 1906, shall maintain at their own expense the lights and other signals required by this part.

9. By adding a new § 118.3 to read as follows:

§ 118.3 Incorporation by reference.

(a) In this part, portions or the entire text of certain standards and specifications are incorporated by reference as the governing requirements for materials, equipment, tests, or procedures to be followed. These standards and specification requirements specifically referred to in this part are the governing requirements for the subject matters covered, unless specifically limited, modified, or replaced by the regulations.

(b) These materials are incorporated by reference into this part under 5 U.S.C. 552(a) with the approval of the Director of the Federal Register. The Office of the Federal Register publishes a table, "Material Approved for Incorporation by Reference," which appears in the Finding Aids section of this volume. In that table are found citations to the particular sections of this part where the material is incorporated. To enforce any edition other than the one listed in paragraph (c) of this section, notice of the change must be published in the Federal Register and the material made available. All approved material is on file at the Office of the Federal Register, Washington, D.C. 20408 and at U.S. Coast Guard, Room 1410, 2100 Second Street, SW., Washington, D.C. 20593. Copies may be obtained from the sources indicated in paragraph (c) of this section.

(c) The materials approved for incorporation by reference in this part are:

Federal Highway Administration (FHWA), 400 Seventh Street, SW., Washington, D.C. 20590

Standard Alphabets for Highways Signs, 1966. (Reprinted April 1984).

10. By revising § 118.40 to read as follows:

§ 118.40 Modification of requirements.

(a) The District Commander may modify the requirements for the display of lights and other signals on any bridge when a change in local conditions warrants the modification.

(b) The District Commander may exempt bridges over waterways with no significant nighttime navigation from the lighting or other signal requirements in this part.

(c) The District Commander may prescribe special lighting or other signals in specific cases when the lighting or other signals in this part may not provide adequately for the safe passage of vessels.

(d) While a bridge is under construction, the District Commander prescribes the temporary lights and other signals to be displayed for the protection of navigation.

11. By revising § 118.50 to read as follows:

§ 118.50 Inspection.

Lights and other signals required or authorized under this part are subject to inspection at any time by Coast Guard personnel or authorized agents.

12. By revising § 118.60 to read as follows:

§ 118.60 Characteristics of lights.

All lights required or authorized under this part must be securely attached to the structure and of sufficient candlepower as to be visible against the background lighting at a distance of at least 2,000 yards 90 percent of the nights of the year. Lights must meet the requirements of this part. Lights shall be fixed lights excepting as provided in §§118.95, 118.110 and 118.150 of this part. Color specifications are not prescribed for bridge lights, however, the chromaticity standards for navigation lights in Annex I, Appendix A of 33 CFR Part 81 are recommended.

13. By revising § 118.95 to read as follows:

§ 118.95 Lights on structures not part of a bridge or approach structure.

Lights on sheer booms, isolated piers, obstructions, and other structures not part of a bridge or approach structure must meet the requirements for aids to navigation in Subpart 66.01 of Part 66 of this chapter.

14. By revising § 118.100 to read as follows:

§ 118.100 Retroreflective panels on bridge piers.

The District Commander may require or authorize the display of high intensity red or green retroreflective panels when the District Commander finds it necessary:

(a) To better identify a hazardous pier.

(b) To provide a backup for red pier lights, red channel margin lights, and green mid channel lights, which are subject to vandalism or otherwise difficult to properly maintain. If the District Commander determines that the nominal nighttime visibility required is less than one-half mile, the panels must be at least six inches square. If the visibility required is more than one-half mile, the panels must be at least 12 inches square.

(c) To mark bridge piers or channel sides on bridges not required to have bridge lighting. Lateral significant red triangles and green square retroreflective panels shall be used. The panels shall be at least 36 square inches in area to provide a nominal nighttime visibility distance of at least one-half mile.

§ 118.105 [Removed]

15. By removing § 118.105, Bridges infrequently used and unusual cases.

16. By adding new §§ 118.110, 118.120, 118.130, 118.140, 118.150 and 118.160 to read as follows:

§ 118.110 Daymarks and lateral lighting on bridges.

(a) The District Commander may require or authorize the marking of the margins of navigation channels through bridges with U.S. aids to navigation system lateral marks and lights installed on the superstructure or on the channel piers. The District Commander may also require or authorize the use of quick flashing, flashing, isophase or occulting red and green lights to mark the main channels.

(b) If lateral system lights are required or authorized to mark the main navigation channels, fixed yellow lights shall be used to mark the adjacent piers and the centerline of the channel shall be marked with the standard lateral system safe water mark and occulting white light, instead of the lights prescribed in § 118.65.

(c) The District Commander may require or authorize the marking of the centerline of the navigation channel drawspan of floating drawbridges with a special mark, diamond in shape, yellow in color, and with a high intensity retroreflective material border. The District Commander may require or authorize the mark to exhibit a flashing yellow light Morse Code "B" characteristic. The mark may not be visible when the drawspan is in the open position.

§ 118.120 Radar reflectors and racons.

The District Commander may require or authorize the installation of radar reflectors and racons on bridge structures, stakes, or buoys. Radar reflectors are used to mark the location of the edge of the navigation channel or bridge channel piers. Racons are used to mark the centerline of the channel.

§ 118.130 Fog signals.

On waterways where visibility is frequently reduced due to fog or other

BEST COPY AVAILABLE

VOL 51 ISS 85 MY 2 1986 UMI

causes, the District Commander may require or authorize the installation of one or more fog signals to warn the navigator of the presence of the bridge. The fog signals must conform to the installation, range, and sound frequencies provisions in Subpart 67.10 of Part 67 of this chapter. If more than one fog signal is installed on a bridge or in the vicinity, their characteristics must be different to distinguish each signal. The fog signals must be directional to the fullest extent possible to minimize adverse impact on local residents.

§ 118.140 Painting bridge piers.

The District Commander may require painting the sides of bridge channel piers below the superstructure facing traffic white or yellow when they are significantly darkened by weathering or other causes so as to be poorly visible against a dark background.

§ 118.150 Traveller platforms.

The District Commander may require under deck traveller platforms which may significantly reduce the vertical clearance when operated over navigation channels at night to be lighted with quick flashing red lights on each of the four lower corners.

§ 118.160 Vertical clearance gauges.

(a) When necessary for reasons of safety of navigation, the District Commander may require or authorize the installation of clearance gauges. Except as specified in §117.47(b) of this chapter for certain drawbridges, clearance gauges must meet the requirements of this section.

(b) Clearance gauges must indicate the vertical distance between "low steel" of the bridge channel span and the level of the water, measured to the bottom of the foot marks, read from top to bottom. Each gauge must be installed on the end of the right channel pier or pier protection structure facing approaching vessels and extend to a reasonable height above high water so as to be meaningful to the viewer. Other or additional locations may be prescribed by the District Commander if particular conditions or circumstances warrant.

(c) *Construction.* Each gauge must be premanently fixed to the bridge pier or pier protection structure and made of a durable material of sufficient strength to provide resistence to weather, tide, and current. Gauges may be painted directly on the bridge channel pier or pier protection structure if the surface is suitable and has sufficient width to accommodate the foot marks (graduations) and numerals.

(d) *Numerals.* (1) Each gauge must be marked by black numerals and foot marks on a white background. Paint, if used, must be of good exterior quality, resistant to excessive chalking or bleeding. Manufactured numerals and background material may be used.

(2) The size, type, and spacing of numerals must conform to the Standard Alphabets for Highway Signs and the following table. The nominal day visibility distance is the distance at which the clearance information needs to be ascertained by approaching vessel operators. The District Commander determines this distance for each bridge.

Nominal day visibility distance (feet)	Height of numeral (inches)	Type of numeral	Vertical spacing of numerals (feet)
Less than 500	12	Series C	2
500 to 750	18	Series C	2
750 to 1,000	24	Series D	5
1,000 to 2,000	30	Series E	5
More than 2,000	36	Series E	10

(3) The length of the foot marks must be no less than the width of a single numeral used (except numerals 1 and 4), be the same thickness as the width of stroke of the numeral, and extend to the nearest margin of the white background. Foot marks must be spaced every foot for nominal day visibility of less than 500 feet, every two feet for a nominal day visibility of more than 500 feet but less than 1,000 feet, and every five feet for nominal day visibility of more than 1,000 feet.

(4) Intermediate foot marks may be used when more precise determination of actual clearance is necessary. Such intermediate foot marks must have a width of stroke one-half the width of the stroke required for the numeral and shall be three-quarters as long as the primary foot marks.

(5) The horizontal distance between the numeral and nearest edge of the white background shall be no less than one-half the width of a single numeral (excepting numerals 1 and 4).

(6) The minimum width of the white background shall be no less than three times the width of a single numeral (excepting numerals 1 and 4) plus the widths of each additional numeral (when multiple numerals are used plus numeral spacing).

(e) *Maintenance.* The owner or operator of the bridge shall maintain each gauge in good repair and legible condition. The bridge owner or operator is responsible for the accuracy of the gauge and shall remeasure the vertical distance of the numerals and foot marks below "low steel" of the bridge whenever the gauge is repainted or the structure is repaired.

Dated: April 14, 1986.

T.J. Wojnar,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation.

[FR Doc. 86-8653 Filed 5-1-86; 8:45 am]

BILLING CODE 4910-14-M

VETERANS ADMINISTRATION

38 CFR Part 21

Veterans Education; Adjustments in the G.I. Bill Resulting From the Veterans' Educational Assistance Act of 1984

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: These regulations implement provisions of the Veteran's Educational Assistance Act of 1984 which affect people eligible to receive benefits under the dependents' educational assistance program or the G.I. Bill. Some regulations which deal primarily with the G.I. Bill are amended to show that they also apply to the new educational program for members of the Armed Forces or to the new educational program for members of the Selected Reserve, or both. These regulations will acquaint the public with the way in which the VA (Veterans Administration) will implement these provisions of law.

EFFECTIVE DATES: The amendment to 38 CFR 21.4005(c) is effective April 14, 1986. In keeping with the Veterans' Educational Assistance Act of 1984, the rest of the regulations are effective October 19, 1984.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer (225), Assistant Director for Policy and Program Administration, Education Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420 (202) 389-2092.

SUPPLEMENTARY INFORMATION: On pages 47066 through 47068 of the **Federal Register** of November 14, 1985, it was proposed to amend 38 CFR Part 21 to make it consistent with the Veterans' Educational Assistance Act of 1984. Interested people were given 28 days to submit comments, suggestions or objections.

The VA received one letter from an educational organization. The letter writer commented that he had no problem with the proposal. Accordingly, the VA is making the proposal final without change.

The VA is making these regulations retroactively effective on October 19, 1984. Retroactive effect is justified for

BEST COPY AVAILABLE

the following reasons. Most of these regulations are restrictive. A few are liberalizing. They either repeat portions of Public Law 98-525 or construe the meaning of some of the provisions of that law.

The VA finds that good cause exists for making these regulations, like the sections of the statute they implement, retroactively effective on October 19, 1984. This legislation's restrictions are intended to prevent some people from receiving benefits under more than one of the various educational programs the VA administers. Consequently, a delayed effective date for these regulations would be contrary to statutory design; would complicate administration of several provisions of the law; and might result in some people receiving benefits to which they would not be entitled.

The VA has determined that these regulations are not major rules as that term is defined by E.O. 12291, entitled, Federal Regulation. The regulations will not cause a major increase in costs or prices for anyone. They will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator of Veterans' Affairs has certified that the regulations will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601-612. Pursuant to 5 U.S.C. 605(b) these regulations, therefore, are exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

This certification can be made because most of these changes affect only individual benefit recipients. The impact from those that do not affect individuals will result from the underlying law. It will not result from the regulations themselves.

The Catalog of Federal Domestic Assistance numbers for the programs affected by these regulations are 64.111 and 64.117.

List of Subjects in 38 CFR Part 21

Civil rights, claims, education, grant programs-education, loan programs-education, reporting and recordkeeping requirements, schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: April 14, 1986.

Thomas K. Turnage,

Administrator.

PART 21—[AMENDED]

38 CFR Part 21, Vocational Rehabilitation and Education, is amended as follows:

1. Section 21.1022 is amended by adding a new paragraph (b)(6) and a new paragraph (c) to read as follows:

§ 21.1022 Nonduplication—programs administered by the VA.

* * * * *

(b) * * *

* * * * *

(6) 10 U.S.C. ch. 106.

(38 U.S.C. 1781; Pub. L. 98-223, Pub. L. 98-525)

(c) *Chapters 30 and 34.* A veteran who is eligible for educational assistance under chapters 30 and 34 may not receive assistance under both programs concurrently, but must elect which benefit he or she will receive. (38 U.S.C. 1433; Pub. L. 98-525)

2. Section 21.3022 is revised to read as follows:

§ 21.3022 Nonduplication—programs administered by the VA.

(a) *Chapter 35 and most other programs administered by the VA.* A person who is eligible for educational assistance under 38 U.S.C. ch. 35 and is also eligible for assistance under any of the provisions of law listed in this paragraph, must elect which benefit he or she will receive for each program of education that person will pursue. The election is subject to the conditions specified in § 21.4022. The provisions of law are:

(1) 38 U.S.C. ch. 31,
(2) 38 U.S.C. ch. 32,
(3) 38 U.S.C. ch. 34,
(4) 10 U.S.C. ch. 106,
(5) 10 U.S.C. ch. 107,
(6) Section 903 of the Department of Defense Authorization Act of 1981, or
(7) The Hostage Relief Act of 1980.

(38 U.S.C. 1781; Pub. L. 98-223, Pub. L. 525)

(b) *Chapters 30 and 35.* An individual who is eligible for educational assistance under chapters 30 and 35 may not receive assistance under both programs concurrently, but must elect which benefit he or she will receive. (38 U.S.C. 1433; Pub. L. 98-525)

3. In § 21.4005, paragraphs (a)(1) and (2); (b)(1)(ii) (d) and (e); (b)(2)(ii)(a) and (c)(1) and (2) are revised to read as follows:

§ 21.4005 Conflicting interests.

(a) *General.* (1) An officer or employee of the VA will be immediately dismissed from his or her office or employment, if while such an officer or employee he or she has owned any interest in, or received any wages, salary, dividends, profits, gratuities, or services from, any school operated for profit in which a veteran or eligible person was pursuing a course of education under 10 U.S.C. ch. 106 or 38 U.S.C. chs. 30, 32, 34, 35 or 36. (10 U.S.C. 2136(b), 38 U.S.C. 1434(a), 1641, 1783(a); Pub. L. 98-525)

(2) The VA will discontinue payments under § 21.4153 to a State approving agency when the Administrator finds that any person who is an officer or employee of a State approving agency has, while he or she was such an officer or employee, owned any interest in, or received any wages, salary, dividends, profits, gratuities, or services from a school operated for profit in which a veteran or eligible person was pursuing a course of education or training under 10 U.S.C. ch. 106 or 38 U.S.C. chs. 30, 32, 34, 35 or 36 unless that agency takes, without delay such steps as may be necessary to terminate the employment of such a person. The VA will not resume payments while such a person is an officer or employee of [delete]

(i) The State approving agency, or

(ii) State Department of Veterans' Affairs, or

(iii) State Department of Education.

4. In § 21.4009, paragraph (c) is revised to read as follows:

§ 21.4009 Overpayments—waiver or recovery.

* * * * *

(c) *Committee on school liability.* Each field station having jurisdiction over schools with courses approved for training under chapter 106, title 10, United States Code, chs. 30, 32, 34, 35 and/or 36, title 38, United States Code shall establish a Committee on School Liability. The committee or a panel designated by the committee chairperson and drawn from the committee, is authorized to find whether a school is liable for an overpayment.

(10 U.S.C. 2136(b), 38 U.S.C. 1434(a), 1641, 1785; Pub. L. 98–525)

* * * * *

5. In § 21.4020, paragraphs (a) (4) through (7) are revised to read as follows:

§ 21.4020 Two or more programs.

(a) * * *

(4) 38 U.S.C. chs. 30, 32, 34, 35 and 36 and the former ch. 33;

(5) 10 U.S.C. chs. 106 and 107;

(6) Section 903 of the Department of Defense Authorization Act, 1981; and

(7) The Hostage Relief Act of 1980.

(38 U.S.C. 1795(a); Pub. L. 90–631, Pub. L. 92–540, Pub. L. 96–466, Pub. L. 98–223, Pub. L. 98–525)

* * * * *

6. In § 21.4022, paragraph (a) is revised to read as follows:

§ 21.4022 Nonduplication—programs administered by the VA.

(a) *Election.* (1) A veteran or eligible person who is eligible for education or training under more than one of the provisions of law listed in this subparagraph based on his or her own service or based on the service of another person must elect which benefit he or she will receive for each program of education he or she wishes to pursue. Except for an election between 38 U.S.C. chs. 32 and 34 which is irrevocable once a check has been negotiated, the person may reelect at any time. The provisions of law are:

(i) 38 U.S.C. ch. 31,
(ii) 38 U.S.C. ch. 32,
(iii) 38 U.S.C. ch. 34,
(iv) 38 U.S.C. ch. 35,
(v) 10 U.S.C. ch. 106,
(vi) 10 U.S.C. ch. 107,
(vii) Section 903 of the Department of Defense Authorization Act, 1981, or
(viii) The Hostage Relief Act of 1980.

(38 U.S.C. 1781; Pub. L. 96–223, Pub. L. 98–525)

(2) A veteran or eligible person who is eligible for educational assistance under chs. 30 and 34 may not receive assistance under both programs concurrently, but must elect which benefit he or she will receive.

(38 U.S.C. 1433, 1781; Pub. L. 96–233, Pub. L. 98–525)

* * * * *

7. In § 21.4134, paragraphs (b) (1) and (2) and (c)(2) are revised to read as follows:

§ 21.4134 Suspension and discontinuance.

* * * * *

(b) * * *

(1) The program of education or any course in which the veteran or eligible person is enrolled fails to meet any of the requirements of chapter 106 of title 10, United States Code or chapter 30, 32, 34, 35 or 36 of title 38, United States Code, or

(2) The educational institution offering the veteran's or eligible person's course has violated or failed to meet any of the requirements of chapter 106 of title 10, United States Code or chapter 30, 32, 34, 35 or 36 of title 38, United States Code, and

(38 U.S.C. 1790(b); Pub. L. 98–525)

* * * * *

(c) * * *

(2) The educational institution offering the course has violated one or more of the recordkeeping or reporting requirements of chapter 106 of title 10, United States Code or chapter 30, 32, 34, 35 or 36 of title 38, United States Code.

(10 U.S.C. 2136, 38 U.S.C. 1434, 1790(b); Pub. L. 97–306, Pub. L. 98–525)

* * * * *

8. In § 21.4153, paragraph (c)(4)(i) is revised to read as follows:

§ 21.4153 Reimbursement of expenses.

* * * * *

(c) * * *

(4) * * *

(i) The work has a direct relationship to the requirements of chapter 106 of title 10, United States Code or chapter 30, 32, 34, 35 or 36 of title 38, United States Code, and (10 U.S.C. 2136, 38 U.S.C. 1434, 1774; Pub. L. 98–525)

* * * * *

9. In § 21.4201, paragraphs (c)(4) introductory text, (e)(2) introductory paragraph, (f)(1)(ii) and (g)(2) introductory paragraph are revised to read as follows:

§ 21.4201 Restrictions on enrollment—percentage of students receiving financial support.

* * * * *

(c) * * *

(4) The provisions of paragraph (a) of this section generally do not apply to a course when the total number of veterans and eligible persons receiving assistances under chapters 30, 31, 32, 34, 35 and 36, title 38, United States Code, who are enrolled in the educational institution offering the course, equals 35 percent or less of the total student enrollment at the educational institution (computed separately for the main campus and any branch or extension of the institution). However, the provisions of paragraph (a) of this section will apply to such a course when—

(38 U.S.C. 1673(d); Pub. L. 98–525)

* * * * *

(e) * * *

(2) Assigning students to each part of the ratio. Notwithstanding the provisions of paragraph (a) of this section, the following students will be considered to be nonsupported provided the VA is not furnishing them with educational assistance under title 38, United States Code: (38 U.S.C. 1673(d); Pub. L. 98–525)

* * * * *

(f) * * *

(1) * * *

(ii) Until such time as the total number of veterans and eligible persons receiving assistance under chs. 30, 31, 32, 34, 35 or 36, title 38, United States Code, who are enrolled in the educational institution offering the course, equals more than 35 percent of the total student enrollment at the educational institution (computed separately for the main campus and any branch or extension of the institution). At that time the procedures contained in paragraph (f)(2) of this section shall apply. (38 U.S.C. 1673(d); Pub. L. 98–525)

* * * * *

(g) * * *

(2) Except for those enrollments with a beginning date before or the same as the date the school completed the most recent computation, no benefits will be paid either under chapter 106, title 10, United States Code or under chs. 30, 32, 34, 35 or 36, title 38, United States Code when that computation established that the course (10 U.S.C. 2136, 38 U.S.C. 1434, 1641, 1673(d); Pub. L. 98–525)

* * * * *

10. In § 21.4206 the introductory paragraph and paragraphs (a) and (e)(1) are revised to read as follows:

§ 21.4206 Reporting fee.

The VA may pay annually to each educational institution furnishing education or each joint apprenticeship training committee acting as a training establishment under 10 U.S.C. ch. 106 or 38 U.S.C. chs. 30, 32, 34, 35 or 36 a reporting fee for required reports or certifications. The reporting fee will be paid as soon as feasible after the end of the calendar year.

(a) Except as provided in paragraph (b) of this section the reporting fee will be computed for each calendar year by multiplying $7.00 by the number of eligible veterans and eligible persons enrolled under 10 U.S.C. ch. 106, or 38 U.S.C. chs. 30, 32, 34, 35 or 36 on October 31 of that year. (10 U.S.C. 2136, 38 U.S.C. 1434, 1641, 1784(c); Pub. L. 90–77; Pub. L. 92–540, Pub. L. 93–508, Pub. L. 94–502, Pub. L. 95–202, Pub. L. 98–525)

* * * * *

(e) * * *

(1) It has exercised reasonable diligence in determining whether it or any course offered by it approved for the enrollment of veterans or eligible persons meets all of the applicable requirements of ch. 106 of title 10, United States Code or chs. 30, 32, 34, 35 and 36 of title 38, United States Code; and (10 U.S.C. 2136, 38 U.S.C. 1434, 1641, 1784(b); Pub. L. 98–525)

* * * * *

11. In § 21.4207, the introductory paragraph is revised to read as follows:

§ 21.4207 Failure of school to meet requirements.

When the VA discovers facts which appear to warrant a finding that the school is in violation of specific criteria of 10 U.S.C. ch. 106, or 38 U.S.C. chs. 30, 32, 34, 35 or 36, including failure to meet requirements for approval of a course offered to a veteran or eligible person and institution of policies regarding payment of tuition and fees so as to deny the benefits of the advance payment program, the facts will be referred to the field station Committee on Educational Allowances. (10 U.S.C. 2136, 38 U.S.C.1434, 1641, 1790(b); Pub. L. 98–525)

* * * * *

12. In § 21.4209, paragraph (a)(1) is revised to read as follows:

§ 21.4209 Examination of records.

(a) * * *

(1) Records and accounts pertaining to veterans or eligible persons who received educational assistance under ch. 106 of title 10, United States Code or chs. 30, 32, 34, 35 or 36 of title 38, United States Code, and (10 U.S.C. 2136, 38 U.S.C. 1434, 1644, 1790; Pub. L. 98–525)

* * * * *

13. In § 21.4250, paragraph (c)(2)(ii) is revised to read as follows:

§ 21.4250 Approval of courses.

* * * * *

(c) * * *

(2) * * *

(ii) A course of education to be pursued under 10 U.S.C. ch. 106 or 38 U.S.C. chs. 30, 32, 34, 35 or 36 offered by a school located in the Canal Zone, Guam or Samoa; (10 U.S.C. 2136, 38 U.S.C. 1434, 1641, 1772; Pub. L. 98–525)

BILLING CODE 8320–01–M

38 CFR Part 21

Vocational Rehabilitation and Education; Amendments to the Veterans' Job Training Act

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The Veterans' Job Training Act has been amended by the Veterans' Compensation Rate Increase and Job Training Amendments of 1985. These amendments extend the deadline for a veteran to apply for a job training program. They also extend the deadline for beginning a job training program from July 1, 1986 to July 31, 1987. The length of a veteran's period of unemployment which he or she must have in order to qualify as an eligible veteran under the Act is shortened. The regulations which deal with these matters are amended accordingly.

EFFECTIVE DATE: The amendment to 38 CFR 21.4632(e)(2)(ii) is effective February 1, 1986. All other amendments are effective January 13, 1986.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer (225), Assistant Director for Policy and Program Administration, Education Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue NW, Washington, D.C. 20420 (202) 389–2092.

SUPPLEMENTARY INFORMATION: Public Law 99–238 changes the name of the Emergency Veterans' Job Training Act of 1983 to the Veterans' Job Training Act. It permits new applicants for the program; extends the deadline for beginning a job training program; and changes the unemployment criterion which must be met by a veteran before he or she can qualify for the program.

The VA finds that good cause exists for making these amended regulations final without previous publications of a notice of proposed rulemaking. The changes contained in these regulations are directly based upon the law. The VA must make the Code of Federal Regulations agree with the law. Public participation in this rulemaking is, therefore, unnecessary. Since a Notice of Proposed Rulemaking is unnecessary and will not be published, this change does not come within the term "rule" as defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601(2), and is therefore not subject to the requirements of that Act.

Nevertheless, these amended regulations will not have a significant economic impact on a substantial number of small entities as they are defined in the RFA, 5 U.S.C. 601–612. Although small entities will be affected by the extension of the Veterans' Job Training Act, all the effects will derive from the change in the law upon which the regulations are based. The regulations themselves will have no effect upon small entities.

The VA has determined that these amended regulations do not contain a major rule as that term is defined by E.O. 12291, entitled Federal Regulation. The regulations will not have a $100 million annual effect on the economy, and will not cause a major increase in costs or prices for anyone. They will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

VOL 51 ISS 85 MY 2 1986 UMI

The Catalog of Federal Domestic Assistance number for the program affected by these regulations is 64.121.

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs-education, Loan programs-education, Reporting and recordkeeping requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: April 15, 1986.

Thomas K. Turnage,

Administrator.

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

38 CFR Part 21 is amended as follows:

1. In § 21.4131, paragraph (j) is revised to read as follows:

§ 21.4131 Commencing dates.

* * * * *

(j) *Veterans' Job Training Act (§ 21.4632).* The day following the last day for which the veteran's employer received payments on the veteran's behalf under the Veteran's Job Training Act. (Pub. L. 98-77, sec. 13; Pub. L. 99-238, sec. 201(a))

* * * * *

1a. In § 21.4135, paragraph (y) is revised to read as follows:

§ 21.4135 [Amended]

(y) *Veterans' Job Training Act (§ 21.4632).* The first day for which the veteran's employer received payments on the veteran's behalf under the Veterans' Job Training Act. (Pub. L. 98-77, sec. 13; Pub. L. 99-238, sec. 201(a))

* * * * *

2. The title of Subpart F-1 and § 21.4600 are revised to read as follows:

Subpart F-1 Veterans' Job Training

* * * * *

§ 21.4600 Job training program.

Sections 21.4600 through 21.4648 establish a Veterans' Job Training Program to assist eligible veterans in obtaining employment through training for employment in stable and permanent positions that involve significant training. The VA makes payments to employers who employ and train eligible veterans in these jobs. The payments assist employers in defraying the costs of necessary training. (Pub. L. 98-77, sec. 4; Pub. L. 99-238, sec. 201(a))

3. In § 21.4610, paragraph (a)(1)(ii) is revised to read as follows:

§ 21.4610 Eligibility requirements.

* * * * *

(a) * * *

(1) * * *

(ii) Have been unemployed for at least 10 of the 15 weeks immediately preceding the date of his or her application for participation in a job training program. (Pub. L. 98-77, sec. 5; Pub. L. 99-238, sec. 210(c))

* * * * *

4. In § 21.4632, paragraph (e)(2) (i) and (ii) are revised to read as follows:

§ 21.4632 Payments.

* * * * *

(e) * * *

(2) * * *

(i) On behalf of any veteran who initially applies for a job training program after January 31, 1987;

(ii) For any job training program which begins after July 31, 1987; (Pub. L. 98-543, sec. 212; Pub. L. 99-108; Pub. L. 99-238, sec. 201(e))

BILLING CODE 8320-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 433

[BPO-500-FCN]

Medicaid Program; Third Party Liability for Medical Assistance; Correction

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: This final rule amends a provision in the Medicaid regulations relating to the methods that a State must use to pay providers for Medicaid claims that involve third party liability payments. The amendment is necessary to assure that regulations published on November 12, 1985, regarding recovery of reimbursement of a claim payment involving third party liability are implemented properly.

EFFECTIVE DATE: These regulations are effective June 2, 1986.

FOR FURTHER INFORMATION CONTACT: Herb Shankroff, (301) 594-6719.

SUPPLEMENTARY INFORMATION:

Background and Provisions of Regulations

Section 1902(a)(25) of the Social Security Act (the Act) requires States with Medicaid programs to seek reimbursement of payment for medical assistance from a third party to the extent that the party is legally liable for services provided under Medicaid. Section 1903(o) prohibits the use of Federal funds for Federal matching of State medical assistance expenditures if there is a liable third party. Medicare regulations under 42 CFR 433.139 implement these provisions. Section 433.139, before it was amended on November 12, 1985 (50 FR 46852), permitted States to use either of two methods of paying claims involving third party liability. Under the first method, States could pay claims involving third party liability only to the extent that the agency's allowed payment exceeded the third party liability. Under the second method, States could pay the full allowed amount of the claim but had to seek recovery from the liable third party within 30 days after payment was made. In the November 12 regulations, we made the following changes:

- For Medicaid claims involving third party liability that are processed on or after May 12, 1986, a State may use the second method of paying the entire claim and then seeking reimbursement only if it has obtained a waiver from HCFA authorizing its use.
- The 30-day requirement for seeking recovery of reimbursement of any third party liability was extended to 60 days. This includes claims paid in which third party liability has been established and claims in which the agency learns of the existence of a liable third party after the claim is paid or benefits become available after the claim is paid.

However, as redrafted, the November 12 regulations did not make explicit that the 30-day requirement, now extended to 60 days, for seeking recovery of reimbursement continues to apply to a State that has obtained a waiver, even though the application of the 60-day requirement for recovery was explained in the preamble to the regulations. Therefore, we are amending § 433.139 as published on November 12 to specify that—

- If the agency has an approved waiver to pay a claim in which probable third party liability has been established and then seek recovery of reimbursement, the agency must seek recovery of reimbursement from the third party to the limit of legal liability within 60 days after the end of the month in which payment is made.
- If the agency learns of the existence of a liable third party after a claim is paid, or benefits become available after the claim is paid, the agency must seek recovery of reimbursement within 60 days after the end of the month it learns of the existence of the liable third party or benefits become available.

Waiver of Notice of Proposed Rulemaking

Consistent with the Administrative Procedure Act, we usually issue a notice of proposed rulemaking and provide the public with an opportunity to comment on changes in our regulations unless we find good cause to waiver this public notice and comment procedure. The correction in these regulations is merely a technical change to clarify existing policy. It does not alter the basic policy in the November 12, 1985 regulations. We do not believe it would be in the best interest of the public to delay the issuance of this clarification in final to obtain public comment. We, therefore, find good cause to waive the notice of proposed rulemaking procedures.

Impact Analysis

Executive Order 12291

Executive Order 12291 requires us to prepare and publish a regulatory impact analysis for any major regulations—that is, those that will have an annual effect on the economy of $100 million or more; cause a major increase in costs or prices for consumers, individual industries, government agencies, or geographic regions; or have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises in domestic or export markets. We have determined that this regulation change, which is technical in nature, does not meet any of these criteria. Therefore, a regulatory impact analysis is not required.

Regulatory Flexibility Act of 1980

Consistent with the Regulatory Flexibility Act, we prepare and publish a regulatory flexibility analysis (RFA) for any regulation that will have a significant impact on a substantial number of small entities. A small entity is a small business, a nonprofit enterprise, or a government jurisdiction (such as a county or township) with a population of less than 50,000. The purpose of the analysis would be to anticipate the impact and to seek alternatives that would have a less significant effect. This technical change will have little impact on State Medicaid agencies and Medicaid providers, which are considered small entities, as it merely clarifies existing policy. Therefore, we have determined, and the Secretary certifies, consistent with the Regulatory Flexibility Act, that these final regulations will not have a significant impact on a substantial number of small entities.

Paperwork Reduction Act of 1980

Section 433.139(d) does not contain information collection requirements that are subject to approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act.

List of Subjects in 42 CFR Part 433

Administrative practice and procedure, Claims, Grant programs-health, Medicaid, Reporting and recordkeeping requirements.

42 CFR Part 433 is amended as follows:

PART 433—STATE FISCAL ADMINISTRATION

1. The authority citation for Part 433 continues to read as follows:

Authority: Secs. 1102, 1902(a)(4), 1902(a)(25), 1902(a)(45), 1903(a)(3), 1903(d)(2), 1903(d)(5), 1903(o), 1903(p), 1903(r), and 1912 of the Social Security Act, 42 U.S.C. 1302, 1396a(a)(4), 1396a(a)(25), 1396a(a)(45), 1396b(a)(3), 1396b(d)(2), 1396b(d)(5), 1396b(o), 1396b(p), 1396b(r), and 1396k, unless otherwise noted.

2. Section 433.139 is amended by revising paragraph (d) to read as follows:

§ 433.139 Payment of claims

* * * * *

(d) *Recovery of reimbursement.*

(1) If the agency has an approved waiver under paragraph (e) of this section to pay a claim in which the probable existence of third party liability has been established and then seek reimbursement, the agency must seek recovery of reimbursement from the third party to the limit of legal liability within 60 days after the end of the month in which payment is made.

(2) If the agency learns of the existence of a liable third party after a claim is paid, or benefits become available from a third party after a claim is paid, the agency must seek recovery of reimbursement within 60 days after the end of the month it learns of the existence of the liable third party or benefits become available.

(3) Reimbursement must be sought unless the agency determines that recovery would not be cost effective in accordance with paragraph (f) of this section.

BILLING CODE 4120-01-M

DEPARTMENT OF THE INTERIOR

43 CFR Part 3

Special Rules Applicable to Surface Coal Mining Hearings and Appeals

AGENCY: Office of Hearings and Appeals, Interior.

ACTION: Final rule.

SUMMARY: These amendments to existing rules confirm that dismissal of the applicable petition or application is the mandatory sanction for failure to comply with time limits for: (1) Filing petitions for review of proposed civil penalties, (2) filing applications for review of notices of violation or cessation orders, and (3) making full payment of proposed civil penalties under section 518(c) of the Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1268(c) (1982).

EFFECTIVE DATE: June 2, 1986.

FOR FURTHER INFORMATION CONTACT: Will A. Irwin, Administrative Judge, Interior Board of Land Appeals, Office of Hearings and Appeals, U.S. Department of the Interior, 4015 Wilson Blvd., Arlington, Virginia 22203; phone (703) 235-3750.

SUPPLEMENTARY INFORMATION: On November 15, 1985, the Office of Hearings and Appeals (OHA) published proposed amendments providing sanctions for failure to comply with the time limit for filing a petition for review of a proposed civil penalty set forth in 43 CFR 4.1151; for failure to comply with the time limit for payment of a proposed assessment set forth in 43 CFR 4.1152; and for failure to comply with the time limit for filing an application for review of a notice of violation or cessation order set forth in 43 CFR 4.1162. *See* 50 FR 47237-38 (Nov. 15, 1985). In each case the sanction proposed was dismissal of the applicable petition or application for review.

Comments on the proposed rules were received from the Mining and Reclamation Council of America, the Pennsylvania Coal Mining Association, and Arch Mineral Corporation. The comments and OHA's responses are set forth below:

Comment 1: It is questionable whether the time limits for filing for administrative review under sections 518(c) and 525(a) of the Act, 30 U.S.C. 1268(c) and 1275(a) (1982), are jurisdictional, as the amendments to the rules assume, or rather are statutes of limitations with which failure to comply must be raised by the Office of Surface Mining (OSM) as an affirmative defense or in a motion to dismiss. *See Zipes* v.

VOL 51 ISS 85 MY 2 1986 UMI

Trans World Airlines, Inc., 455 U.S. 385, 392–98 (1982). Congress was only concerned that payment of a proposed civil penalty precede a hearing, not that payment occur within 30 days. Section 518(c) states only that failure to forward payment within 30 days results in a "waiver" of the right to contest the amount of the penalty or the fact of the violation; it does not expressly bar jurisdiction to conduct administrative review. OHA should take the opportunity of the proposed rulemaking to rescind its decisions holding that untimely filings of petitions for review or applications for review and untimely submission of the amount of a proposed civil penalty deprive it of jurisdiction to consider an appeal.

Response: Section 525(a)(1), 30 U.S.C. 1275(a)(1) (1982), provides that a permittee issued a notice of violation or cessation order or any person having an interest which is or may be adversely affected by such a notice or order "may apply to the Secretary for review of the notice or order within 30 days of receipt thereof or within 30 days of its modification, vacation, or termination." Congress included this provision "[i]n order to assure expeditious review and the process for persons seeking administrative relief from enforcement decisions of Federal inspectors." H.R. Rep. No. 218, 95th Cong., 1st Sess. 130 (1977). Section 525 "establishes clear, definitive administrative review procedures." Id. at 131.

The reason for such procedures was stated:

> H.R. 2 contains comprehensive provisions for inspections, enforcement notices and orders, administrative and judicial review, and penalties. These requirements are of equal importance to the provisions of the bill regarding mining and reclamation performance standards since experience with State surface mining reclamation laws has amply demonstrated that the most effective reclamation occurs when sound performance standards go hand in hand with strong, equitable enforcement mechanisms.

Id. at 128.

Section 518(c), 30 U.S.C. 1268(c), provides that a person charged with a proposed civil penalty shall have 30 days after being informed of its amount to either pay the penalty or, if the person wishes to contest either the amount of the penalty or the fact of the violation, forward the proposed amount to the Secretary for placement in an escrow account. The Congress stated that the permittee "must forward the amount of the proposed penalty to the Secretary within 30 days of receipt of the notice of proposed penalty." S. Rep. No. 128, 95th Cong., 1st Sess. 1, 88 (1977). A civil penalty would become final after a hearing was held "or waived by act or by operation of law." *Id.* The explanation for this approach was:

> This section also requires the operator (or permittee) to pay the proposed penalty within thirty days after he has been assessed a penalty for violation of the Act or permit. If the permittee wishes to contest either the fact of violation or the amount of the penalty, he shall so notify the Secretary when making the remittance. Upon receipt of a payment from a permittee the Secretary shall place it in an escrow account and should the permittee's challenge by sustained, the payment is to be returned to the permittee with interest. The Committee is of the belief that this procedure will avoid the problem of non-collection of fines.

Id. at 58–59.

The last comment was a reference to difficulties experienced with the civil penalty provisions of the Federal Coal Mine Health and Safety Act of 1969. The Committee stated that variations from the provisions of that law in the surface mining bill were made, in part, "to improve enforcement." *Id.* at 56.

It is OHA's belief that the plain language of Sections 525(a) and 518(c) and the legislative history of these administrative review provisions require that failure to file application for review of notices of violation or cessation orders "within thirty days" of receiving them, as required by Section 525(a), be regarded as failure to meet the jurisdictional prerequisite for administrative review established by the Congress. Interpreting the 30-day period as a matter that OSM must raise as an affirmative defense if it were not complied with would neither "assure expeditious review" nor constitute a "clear, definitive administrative review procedure." Similarly, the language of 518(c) provides that in every case the amount of a proposed civil penalty must be sent to the Department within 30 days of being informed of the amount; only if the person "wishes to contest the amount or the fact of the violation" would the amount be placed in escrow pending the outcome of administrative or judicial review. The consequence of failure to forward the amount of the proposed assessment to the Secretary within 30 days is clearly set forth in the statute: Such a failure "*shall* result in a waiver of *all* legal rights to contest the violation or the amount of the penalty." (Emphasis added.) The statute does not say such a failure may be deemed a waiver, and the Committee report states that a hearing could be waived "by operation of law." The report also states that the permittee "must" forward the amount within 30 days and that the section "requires" this. Nor would allowing the failure to pay within 30 days to be raised as an affirmative defense "improve enforcement" of the civil penalty provisions or "avoid the problem of non-collection of fines."

Zipes v. *Trans World Airlines, Inc.*, *supra*, does not indicate the time limits of the surface mining act should be interpreted as statutes of limitations rather than jurisdictional prerequisites. That was a case under Title VII of the Civil Rights Act of 1964 in which the Court held that filing charges of discrimination with the Equal Employment Opportunity Commission (EEOC) within the time prescribed by statute was not a jurisdictional prerequisite to bringing a Title VII suit in Federal court. The Court found the Act's provisions did not limit Federal court jurisdiction to cases in which there had been a timely filing with the EEOC under a separate provision that did not refer to court jurisdiction. The Court supported its decision by referring to 1972 Congressional action in amending the Act, and to the principle that a literal reading of filing provisions would be "particularly inappropriate in a statutory scheme in which laymen, unassisted by trained lawyers, initiate the process." 455 U.S. at 397. It also noted the "remedial purpose of the legislation as a whole." *Id.* at 398. In the surface mining act the Congress sought to provide a statutory scheme of "strong, equitable enforcement mechanisms" with "clear, definitive administrative review procedures" and a remedial purpose of improving enforcement of civil penalties by requiring that they be paid within 30 days whether or not the person was contesting them. It is apparent that this scheme and purpose are markedly different from the provisions of the Civil Rights Act considered by the Court in *Zipes*.

OHA therefore adheres to its position that compliance with these time limits in the surface mining act is a jurisdictional prerequisite to administrative review and that dismissal is mandatory for failure to comply. The suggestion in the comment is accordingly rejected.

Comment 2: If the Department will not allow a hearing when a person filing a petition for review of a proposed civil penalty pays the amount after 30 days, the preamble to the rule should clarify that such an amount will be returned with the dismissed petition.

Response: The only circumstance under which the amount of a proposed civil penalty or any part of it can be returned is if a person pays it within 30 days of being informed of the amount, contests either the amount of the penalty or the fact of the violation, and successfully demonstrates that no violation occurred or that the amount of the penalty should be reduced. 30 U.S.C. 1268(c); 30 CFR 723.20(c). If the amount is paid after 30 days it will be regarded as payment of the penalty that is due, since there is no jurisdiction to conduct administrative review. 30 U.S.C. 1268(c); 30 CFR 723.20(a). There is no legal authority to support the suggestion in the comment and it is therefore rejected.

Comment 3: There should be a clarification that failure to file a petition for review of a proposed civil penalty or to pay the amount assessed within 30 days does not preclude filing an application for review of a notice of violation or cessation order or operate as an admission of the fact of violation in such proceeding.

Response: The statute establishes separate proceedings to review notices of violation and cessation orders under Section 525 and to review proposed civil penalties under Section 518. Although hearings under Section 518 shall be consolidated with other proceedings resulting from Section 521 when appropriate (30 U.S.C. 1268(b)), a person may elect administrative review under either Section 518 or Section 525 or both and failure to elect one does not affect one's rights under the other. Specifically, dismissal of a petition for review of a proposed civil penalty because the petition or the proposed amount of the penalty was untimely would not be res judicata on the issue of the fact of the violation in an application for review proceeding arising from the same notice of violation or cessation order. The amendments to 43 CFR 4.1151 and 4.1152 have been revised to make this explicit.

Comment 4: The rules should allow the administrative law judge discretion to accept a petition for review or application for review outside of the 30 day time limit for good cause or exigent circumstances.

Response: As discussed in the response to Comment 1, compliance with the 30 day limits for filing is required for OHA jurisdiction. Therefore, neither an administrative law judge nor the Interior Board of Land Appeals may excuse failure to comply with these limits. The suggestion in the comment must be rejected.

Comment 5: Sanctions similar to those contained in the proposed amendments should be adopted for failure to comply with the time limits for filing under 43 CFR 4.1280 *et seq.* and 4.1290 *et seq.*

Response: Although the proceedings referred to are not covered in this rulemaking, the surface mining act does not provide time limits for initiating such proceedings as it does for those that are covered by this rulemaking.

Because these rules simply confirm the mandatory nature of existing filing requirements, the Department has determined that these rules are not major, as defined by E.O. 12291; will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*); and will not significantly affect the quality of the human environment, and therefore no detailed statement is required under the National Environmental Policy Act (42 U.S.C. 4332(2)(C)).

The rules contain no information collection requirements requiring Office of Management and Budget approval under 44 U.S.C. 3507.

The author of these regulations is Will A. Irwin, Administrative Judge, Board of Land Appeals, Office of Hearings and Appeals.

List of Subjects in 43 CFR Part 4

Administrative practice and procedure, Surface mining.

For the reasons stated in the preamble and under the authority of 30 U.S.C. 1201 *et seq.* (1982), 4.1151, 4.1152, and 4.1162 of Subpart L of Part 4 of Title 43 of the Code of Federal Regulations are amended as set forth below.

Dated: March 28, 1986.

Ann McLaughlin,

Under Secretary.

PART 4—[AMENDED]

43 CFR Part 4 is amended as follows:

1. The authority citation for Part 4, Subpart L, continues to read as follows:

Authority: 30 U.S.C. 1256, 1260, 1261, 1268, 1271, 1272, 1275, 1293; 5 U.S.C. 301.

2. In part 4, §4.1151 is amended by adding paragraph (c) as follows:

§ 4.1151 Time for filing.

* * * * *

(c) No extension of time will be granted for filing a petition for review of a proposed assessment of a civil penalty as required by paragraph (a) or (b) of this section. If a petition for review is not filed within the time period provided in paragraph (a) or (b) of this section, the appropriateness of the amount of the penalty, and the fact of the violation if there is no proceeding pending under section 525 of the Act to review the notice of violation or cessation order involved, shall be deemed admitted, the petition shall be dismissed, and the civil penalty assessed shall become a final order of the Secretary.

3. In Part 4, § 4.1152 is amended by adding paragraph (d), as follows:

§ 4.1152 Contents of petition; payment required.

* * * * *

(d) No extension of time will be granted for full payment of the proposed assessment. If payment is not made within the time period provided in §4.1151 (a) or (b), the appropriateness of the amount of the penalty, and the fact of the violation if there is no proceeding pending under section 525 of the Act of review the notice of violation or cessation order involved, shall be deemed admitted, the petition shall be dismissed, and the civil penalty assessed shall become a final order of the Secretary.

4. In Part 4, § 4.1162 is revised.

§ 4.1162 Time for filing.

(a) Any person filing an application for review under § 4.1160 *et seq.* shall file that application within 30 days of the receipt of a notice or order or within 30 days of receipt of notice of modification, vacation, or termination of such a notice or order. Any person not served with a copy of the document shall file the application for review within 40 days of the date of issuance of the document.

(b) No extension of time will be granted for filing an application for review as provided by paragraph (a) of this section. If an application for review is not filed within the time period provided in paragraph (a) of this section, the application shall be dismissed.

BILLING CODE 4310-10-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[FCC 86-179]

Revision of the FCC's Rules Requiring the Inclusion of a Table of Contents and Summary of Filing in Documents Longer Than Ten Pages

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document revises the rule governing the preparation of summaries and tables of contents for documents filed in Commission proceedings. This action is necessary to alleviate confusion in the existing rule and has the effect of exempting certain routine filings from these requirements. Unless otherwise exempted, all documents and pleadings filed with the Commission that exceed ten pages must

VOL 51 ISS 85 MY 2 1986 UMI

include a table of contents and a summary.

EFFECTIVE DATE: May 27, 1986.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Joseph S. McBride, Office of General Counsel, (202) 254–6530.

SUPPLEMENTARY INFORMATION:

Third Order

Adopted: April 11, 1986.
Released: April 18, 1986.

By the Commission:

1. On September 5, 1985, the Commission adopted a Second Order in this proceeding that added § 1.49(d) of the Rules. 50 FR 37856 (1985). That provision exempts certain discovery pleadings from the general requirement of Section 1.49 that all pleadings and documents in excess of ten pages filed in any proceeding contain both a summary and table of contents.

2. Since the release of the Second Order, we have had informal discussions with members of the communications bar. They believed that the use of the word "proceeding" in this rule was vague and might require the submission of summaries and tables of contents in instances where they were neither needed nor desired or not require such submissions where they were desired. To avoid any ambiguity they requested that the Commission revise the rule to make it applicable only in specifically enumerated situations. After consideration and review of those suggestions, we find that the clarity and understanding of our Rules would be enhanced by expanding the exclusions listed in § 1.49(d) to include FCC Forms, FCC applications, transcripts, depositions, interrogatories and answers thereto, letters, and exhibits or appendices accompanying any document, application, or pleading submitted to the Commission. For example, with respect to the latter, a report or affidavit accompanying a petition for reconsideration or petition to deny would not require a summary or table of contents.

3. The purpose of this rule is to provide the Commission and its staff with an easy tool for analyzing and retrieving filings expeditiously and effectively. Documents such as petitions to deny, applications for review, petitions for reconsideration, and rule making comments are often lengthy and contain numerous arguments. The documents listed above that are not intended to be covered by the rule are generally either standardized for easy reference, such as FCC forms and applications, address a limited number of preestablished issues, or concern materials that merely support issues raised in the primary filing. In those documents, summaries and tables of contents are unnecessary. On the other hand, we do not believe that the suggestion to apply the rule only to those matters specifically enumerated is sound.

4. Our purpose is to require summaries generally for all documents exceeding 10 pages. We believe that the specific exclusions should adequately address the concerns which arose after the original rules were adopted. Should any ambiguity arise in the future regarding a specific document, the interested party may request an informal interpretative ruling from the Bureau's staff. We again emphasize that all documents, regardless of the nature of the proceeding, must comply with the requirements of § 1.49 of the Rules, unless one of the exceptions in § 1.49(d) applies.

5. We find that prior notice and public comment procedures are unnecessary to implement this amendment involving general rules of agency practice and procedure. 5 U.S.C. 553(b)(3)(A).

6. In view of the foregoing and pursuant to sections 1, 4 (i) and (j), and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154 (i) and (j), and 303(r), it is hereby ordered that Part 1 of the Commission's Rules is amended as set forth below, effective May 27, 1986.

List of Subjects in 47 CFR Part 1

Administrative practice and procedure, Federal Communications Commission.

William J. Tricarico,
Secretary.

Part 1 of Title 47 of the Code of Federal Regulations is amended as follows:

PART 1—PRACTICE AND PROCEDURE

1. The authority citation for Part 1 continues to read:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended, 47 U.S.C. 154, 303.

2. In § 1.49, paragraphs (b), (c), and (d) are revised to read as follows:

§ 1.49 Specifications as to pleadings and documents.

* * * * *

(b) Except as provided in paragraph (d) of this section, all pleadings and documents filed with the Commission, the length of which as computed under this chapter exceeds ten pages, shall include, as part of the pleading or document, a table of contents with page references.

(c) Except as provided in paragraph (d) of this section, all pleadings and documents filed with the Commission, the length of which filings as computed under this chapter exceeds ten pages, shall include, as part of the pleading or document, a summary of the filing, suitably paragraphed, which should be a succinct, but accurate and clear condensation of the substance of the filing. It should not be a mere repetition of the headings under which the filing is arranged. For pleadings and documents exceeding ten but not twenty-five pages in length, the summary should seldom exceed one and never two pages; for pleadings and documents exceeding twenty-five pages in length, the summary should seldom exceed two and never five pages.

(d) The requirements of paragraphs (b) and (c) of this section shall not apply to:

(1) Interrogatories or answers to interrogatories, and depositions;
(2) FCC forms or applications;
(3) Transcripts;
(4) Contracts and reports;
(5) Letters; or
(6) Hearing exhibits, and exhibits or appendicies accompanying any document or pleading submitted to the Commission.

Note.—The table of contents and the summary pages shall not be included in complying with any page limitation requirements as set forth by Commission rule.

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 85-367; RM-4929]

FM Broadcast Station in Chatom, AL

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: Action taken herein substitutes Channel 291A for Channel 276A at Chatom, Alabama, and modifies the permit of Station WCCJ (FM), in response to a joint petition filed by Radio Hattiesburg, Inc. and June G. Fuss. The substitution will enable Station WHER (FM), Hattiesburg, Mississippi, to move its transmitter site and maintain its Class C status.

EFFECTIVE DATE: June 2, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended: 47 U.S.C. 154, 303. Interpret or apply secs. 301, 308, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Report and Order; Proceeding Terminated

In the Matter of Amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations: (Chatom, Alabama); MM Docket No. 85–367 and RM–4929.

Adopted: April 14, 1986.
Released: April 25, 1986.

By the Chief, Policy and Rules Division.

1. The Commission has before it for consideration the *Notice of Proposed Rule Making and Order to Show Cause*, 50 FR 51712, published December 19, 1985, seeking comments on the proposed substitution of Channel 291A [1] for 276A at Chatom, Alabama, and modification of the license of Station WCCJ (FM) [2] accordingly, at the joint request of Radio Hattiesburg, Inc. ("RHI") and June G. Fuss ("FUSS").[3] The proposal, if implemented, would enable Station WHER to relocate its transmitter and maintain its Class C status at Hattiesburg. The *Notice* also directed the permittee of Station WCCJ (FM), to show cause why its permit should not be modified, as proposed. In response to the *Notice*, supporting comments were filed by RHI, Benchmark and EJM Broadcasting ("EJM"). EJM also filed reply comments.

2. In its comments, Benchmark states that it is willing to modify its permit for Station WCCJ (FM) provided it is reimbursed for expenses incurred in changing frequencies.

3. RHI advises that it will reimburse Benchmark for reasonable costs incurred in changing WCCJ's frequency. Additionally, RHI remarks that it will reimburse Fuss for monies it expended in connection with the original Chatom proposal.

4. In its comments, EJM interposes no objection to the proposed substitution of Channel 291A for 276A, as advanced in the *Notice*. However, it advises that it does object to petitioner's original proposal to substitute Channel 254A for 276A at Chatom which would conflict with its pending proposal to upgrade the facilities of Station WDLT–FM at Chickasaw, Alabama (see fn. 1, *supra*).

5. As set forth in the *Notice and Order to Show Cause*, established Commission policy provides for reimbursement of reasonable costs incurred in changing a station's frequency from the party benefitting from a new channel allotment. Therefore, equitable considerations dictate that RHI should reimburse Benchmark for its reasonable costs in changing channels. Assisted by guidelines such as *Circleville, Ohio*, 8 F.C.C. 2d 159 (1967), the appropriate costs constituting a "reasonable" reimbursement figure are generally left to the good faith judgment of the parties, subject to Commission approval in the event of disagreement. See also, *Mitchell, South Dakota*, 62 F.C.C. 2d 70 (1976).

PART 73—[AMENDED]

6. Accordingly, pursuant to the authority contained in sections 4(i), 5(c)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, It is ordered, That effective June 2, 1986, the FM Table of Allotments, § 73.202(b) of the Commission's Rules is amended with respect to the community listed below, as follows:

City	Channel No.
Chatom, AL	291A

7. It is further ordered, That, pursuant to section 316(a) of the Communications Act of 1934, as amended, the outstanding permit held by Benchmark Communications Corporation for Station WCCJ(FM), Chatom, Alabama, is modified effective June 2, 1986, to specify operation on Channel 291A in lieu of Channel 276A with the condition it will be reimbursed for the reasonable costs incurred in switching frequencies from Radio Hattiesburg, Inc. The permit modification for Station WCCJ(FM) is subject to the following conditions:

(a) Nothing contained herein shall be construed as authorizing any change in the permit of Station WCCJ except the channel as specified above. Any other changes, except for those so specified under § 73.1690 of the Rules, require prior authorization pursuant to an application for construction permit (FCC Form 301).

(b) Program tests may be conducted in accordance with the provisions of § 73.1620 of the Rules, provided the transmission facilities comply in all respects with the permit except for the channel as specified above and a license application (FCC Form 302) is filed within 10 days of commencement of program tests.

8. It is further ordered, That the Secretary of the Commission shall send a copy of this *Order* by *Certified Mail, Return Receipt Requested*, to Benchmark Communications Corporation, permittee of Station WCCJ(FM), Chatom, Alabama, at the following address: 4709 S.W. 75th Avenue, Miami, Florida 33155; and also a copy thereof, by regular mail to its attorney, John Wells King, Esq., Haley, Bader and Potts, Suite 600, 2000 M Street, NW., Washington, DC 20036–4574.

9. It is further ordered, That this proceeding is terminated.

10. For further information concerning the above, contact Nancy V. Joyner, Mass Media Bureau, (202) 634–6530.

Federal Communications Commission.

Charles Schott,
Chief, Policy and Rules Division, Mass Media Bureau.

[FR Doc. 86–9850 Filed 5–1–86; 8:45 am]
BILLING CODE 6712–01–M

47 CFR Part 73

[MM Docket No. 85–222; RM–4977]

FM Broadcast Station in Spencer, OK

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: Action taken herein allocates Channel 289A to Spencer, Oklahoma, as the community's first local FM service, at the request of Lift Him Up Outreach Ministries, Inc.

EFFECTIVE DATE: June 2, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

[1] Petitioners initially proposed the substitution of Channel 254A for Channel 276A at Chatom. However, that proposal conflicted with a separate request to substitute Channel 254C1 for Channel 252A at Chickasaw, Alabama, and to modify the license of Station WDLT–FM (RM–5108), licensed to EJM Broadcasting. As a result, Channel 291A was substituted for consideration herein.

[2] Formerly Station WDAL (FM).

[3] As indicated in the *Notice*, at the time this petition was filed, Fuss was the permittee of Station WDAL (FM). However, the permit was subsequently assigned to Benchmark Communications Corporation and the call letters changed to WCCJ (FM).

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Report and Order; Proceeding Terminated

In the Matter of Amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations; (Spencer, Oklahoma); MM Docket No. 85-222 and RM-4677.

Adopted: April 9, 1986.
Released: April 24, 1986.

By the Chief, Policy and Rules Division.

1. The Commission has before it for consideration the *Notice of Proposed Rule Making*, 50 FR 30973, published July 31, 1985, seeking comments on the allocation of Channel 289A to Spencer, Oklahoma, as the community's first local FM service, at the request of Lift Him Up Outreach Ministries, Inc. ("petitioner"). Petitioner filed comments reiterating its intention to apply for the frequency, if allocated. No other comments were received. Channel 289A can be allocated to Spencer in compliance with the Commission's minimum distance separation and other technical requirements if the transmitter site is restricted to an area at least 1.1 kilometers (0.7 miles) north in order to avoid a short-spacing to Station KGOU, Channel 292A, Norman, Oklahoma.

PART 73—[AMENDED]

2. We believe the public interest would be served by allocating the channel as proposed since it could provide Spencer with its first local FM service. Accordingly, pursuant to the authority contained in Sections 4(i), 5(c)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is ordered, that effective June 2, 1986, the FM Table of Allotments, § 73.202(b) of the Rules, is Amended with respect to the community listed below, to read as follows:

City	Channel No.
Spencer, OK	289A

3. The window period for filing applications on this channel will open on June 3, 1986, and close on July 3, 1986.

4. It is further ordered, That this proceeding is terminated.

5. For further information concerning this proceeding, contact Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 83-519; RM-4419]

TV Broadcast Station in Gaylea or Shreveport, LA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: Action taken herein assigns UHF Television Channel 45 to Shreveport, Louisiana as its fourth commercial television channel in response to two petitions for reconsideration filed by Word of Life Ministries, Inc. and Wesley Godfrey. The action reverses an earlier Commission action dismissing the proposal for lack of an expression of interest in the assignment.

EFFECTIVE DATE: June 2, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: D. David Weston, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Television broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Memorandum Opinion and Order

(Proceeding Terminated)

In the Matter of Amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations. (Gaylea or Shreveport, Louisiana); MM Docket No. 83-519 and RM-4419.

Adopted: April 8, 1986.
Released: April 23, 1986.

By the Chief, Policy and Rules Division.

1. The Commission has before it two petitions for reconsideration of the *Report and Order*, 49 FR 30752, published August 1, 1984 dismissing the request of Saul Dresner ("Dresner") to assign UHF Television Channel 45 to either Gayles or Shreveport, Louisiana. Reconsideration of that decision is sought by Word of Life Ministries, Inc. ("Word of Life") and Wesley Godfrey ("Godfrey").

2. The Commission dismissed the proposal of Dresner at his request. No other comments expressing an interest in the proposal were received. Both Word of Life and Godfrey, in their petitions for reconsideration have filed statements of intent to construct and operate a station on Channel 45 if assigned to Shreveport, Louisiana.

3. We believe the public interest would be served by the assignment of UHF Television Channel 45 to Shreveport, Louisiana since it could provide the community with a fourth commercial television service. Inasmuch as the channel would have been assigned earlier had it not been for a lack of expression of interest, we believe that a reversal of our earlier dismissal of the request is warranted.

4. The assignment of UHF Television Channel 45 can be made to Shreveport, Louisiana in compliance with the minimum distance separation and other technical requirements with a positive offset.

5. In view of the above consideration, it is ordered, That the petitions for reconsideration filed by Word of Life Ministries, Inc. and Wesley Godfrey are granted.

PART 73—[AMENDED]

6. It is further ordered, pursuant to the authority contained in Sections 4(i), 5(c)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, That effective June 2, 1986, the Television Table of Assignments, § 73.606(b) of the Rules, is amended, with respect to the following community.

City	Channel No.
Shreveport, LA	3-, 12, *24-, 33, and 45+

7. It is further ordered, That this proceeding is terminated.

8. For further information contact D. David Weston, Mass Media Bureau, (202) 634-6530.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 81-11; Notice 17]

Federal Motor Vehicle Safety Standards; Lamps, Reflective Devices, and Associated Equipment

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Final rule.

SUMMARY: This notice adopts two new types of standardized replaceable light sources to be used in replaceable bulb headlighting systems on motor vehicles. In a two light source system developed by General Motors Corporation ("GM") one source provides the upper beam, and the other, the lower beam. The new light sources will be known as "HB3" and "HB4". The present standardized replaceable light source is now designated "HB1".

The rule is based upon a notice published January 7, 1986, that proposed dimensional changes differing from those originally proposed on May 13, 1985.

DATE: Effective date of the amendment is June 2, 1986.

ADDRESS: Petitions for reconsideration should be addressed to the Administrator, National Highway Traffic Safety Administration, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Richard Van Iderstine, Office of Rulemaking, NHTSA, Washington, DC (202-426-2720).

SUPPLEMENTARY INFORMATION: On May 13, 1985, NHTSA published a proposal to allow new types of standardized replaceable light sources in motor vehicle headlamps (50 FR 19961). Two of these light sources were designed by GM, one intended to provide the upper beam, which would be denominated HB3, and the other to provide the lower beam, to be denominated HB4. After the close of the comment period, GM submitted new drawings and specifications for the light sources which it felt met the needs of the industry as a result of its efforts with the SAE Replaceable Bulb Task Force. Later it submitted further updates of specifications.

Accordingly, on January 7, 1986, NHTSA published a second NPRM on this subject, proposing a revision in dimensional specifications (Figures 19 and 20) incorporating the GM changes, which included the provision for a seal (51 FR 641). NHTSA is now amending Standard No. 108 to add the HB3 and HB4 light sources in accordance with the previous proposals.

In the May 1985 notice, NHTSA proposed that the light sources meet the photometric requirements of Type F sealed beam headlighting systems. With reference to the internal heat tests of S6.7, no flash rate is currently specified for a turn signal that is incorporated into a headlamp housing. NHTSA, believing that there could be excessive buildup of heat from a steady burning signal, proposed to include a flashing turn signal at the test condition of 90 flashes per minute with a 75 plus or minus 2% current "on-time" performance. Because HB3 and HB4 have filament locations different from that of the current standardized replaceable light source (to be known from now on as "HB1"), NHTSA proposed changing the bulb deflection test to accommodate these differences. The point of deflection would be at a specific measured distance from a reference plane instead of being located by reference to the filament. This change was also proposed for the HB1 with the actual deflection point remaining the same. Additionally, for HB3 and HB4, the direction of force application was specified to be radially inward anywhere in the perpendicular plane located at the application point.

In its proposal, NHTSA also sought comment on whether there were any safety reasons, such as excessive glare, excessive candela, or insufficient illumination to prohibit intermixes of the HB1 with HB3 and HB4 and conversely to seek appropriate photometric and other specifications which would be required to permit such intermix, should commenters deem that course of action desirable.

The proposals in the second notice published in January 1986 were confined to dimensional changes, and the addition of a protective seal for HB3 and HB4 meeting the performance criteria proposed.

Comments were received on both proposals from major vehicle and lighting equipment manufacturers. With regard to the photometry of HB3 and HB4, Chrysler Corporation and Ford Motor Company urged that only one photometric performance requirement be implemented for all headlamp systems. Because three performance requirements currently exist; Type F, SAE J579a, and SAE J579c, this suggestion cannot be implemented at this time. Accordingly, NHTSA has proceeded to adopt the Type F photometrics for the HB3 and HB4, a proposal that was supported by Sylvania GTE, Department of California Highway Patrol, and GM among others. Further, the comments generally supported intermixing of light sources, given that headlamp systems are all required to meet minimum photometric requirements, and that NHTSA has proposed labeling of the headlamp lens to denote the type of light source used. Ford commented that intermixing will permit designers to optimize lighting for glare and seeing distance. On the other hand, GTE Sylvania and General Electric were opposed to intermixing until further study of the likely effects can be completed. Sylvania suggested that the SAE Lighting Committee should resolve the questions of intermixing and the related simplification of photometrics to achieve a single performance level. NHTSA believes that as long as photometric performance is met, and the lens identifies the light source, there is no reason to prohibit intermixing, and is amending the standard to allow it provided that the system meets Type F photometrics.

The proposed bulb deflection test specified that the direction of the application of force be radially inward anywhere in the perpendicular plane located at the application point. All those who commented recommended a revised procedure that would exercise the deflection resistance performance while simplifying the test. The basis for the recommendations is the SAE Replaceable Headlamp Bulb Task Force work on SAE XJ1496, Recommended Practice for Headlamp Light Sources. This states essentially that the deflection force should be applied radially at four equally spaced intervals at the light center length of the lower beam filament (or upper if there is only an upper beam filament), beginning at the weakest axis of the bulb crimp. NHTSA agrees with this recommendation because it is a simpler method of achieving the same goal, and the standard is amended accordingly. Comments also supported the proposed test conditions for turn signals in replaceable bulb headlamps (amended in Item 4, 50 FR 21056) and the standard has been amended accordingly.

Regarding the specification changes proposed in January 1986, all comments except those received from Hella and Sylvania supported the proposal. Hella requested ECE tolerances, but would

VOL 51 ISS 85 MY 2 1986 UMI

accept the recommendation by the SAE Bulb Task Force. Sylvania in essence requested a capsule and support envelope with a diameter of at least 19.66 mm for the HB6, because of limitations of its manufacturing equipment, and NHTSA is making this change to accommodate this concern. However, it necessitates the addition of a note requiring the capsule and supports to provide for insertion into the lamp without interfering with the lamp's key. The numbers suggested by the SAE Headlamp Bulb Task Force have been added to Figure 20. The larger diameters could create a burden for headlamp manufacturers but not light source manufacturers such as Sylvania because space will be removed that was previously reserved for internal lamp parts; however, the agency knows of no instance in which lamp design has been so far finalized that this would occur. The NPRM of May 1985 contained a note to the Figures: "Bulb envelope must not exceed this area". This was changed to "Bulb envelope must not exceed this volume" in the January 1986 NPRM. To achieve consistency in the standard and to more clearly state the note, NHTSA is adopting the language used in a similar note for the HB1 light source: "Capsule and supports shall not exceed this envelope."

The commenters discussed other issues of interest as well. Both the Federal Highway Administration (FHWA) and Volkswagen addressed the need to assure adequate illumination of overhead signs, and other highway indicators. The FHWA suggested that new minimum test point values be added to the photometric performance requirements for all headlamps. While this is beyond the scope of the present rulemaking, it will remain under consideration.

Hella recommended that a "standardized bulb" rather than "any" bulb be used for compliance testing, specifically the bulb set forth in the SAE XJ1496 document. NHTSA continues to believe that any light source which is available to the consumer in the market place should be used for compliance testing, rather than one specially prepared for laboratory use.

Some commenters felt that industry terms, such as "9004", should be used to designate light sources rather than NHTSA's terminology, such as "HB1". Other commenters felt that the terminology should be applied in a sequence different from that proposed, such as the 9005 being HB5 and 9006 being HB6. The agency does not deem either of these suggestions desirable. In the first case, should a light source meeting HB1 specifications be developed that uses less power to achieve the same performance, the HB1 nomenclature would allow it to be used in any headlamp designed to use the original light source. But the updated replacement would probably have some other trade number, 9006 for example, to indicate its lower power consumption. This difference in trade numbers could be confusing to consumers seeking to replace the light source. Therefore, NHTSA intends to continue Standard No. 106's nomenclature for headlighting systems. Industry, of course, is free to assign any trade numbers it wishes, but is required to certify that the light source is designed to conform to the requirements of Standard No. 108. The same logic has been applied to replaceable headlamp light sources. In the second case, on the application of the NHTSA terminology, NHTSA proposed the HB number sequence based on the order in which light sources were received for incorporation into the Standard. Additionally, because the European H-4 light source could be different from the proposed U.S. version of that light source and not have the same uses in the U.S. market as it has traditionally had, a distinctly different nomenclature is deemed necessary. Therefore, NHTSA is implementing the nomenclature as proposed for the HB1, HB3 and HB4.

With respect to "designed to conform", some commenters noted that the language proposed for S4.1.1.39 contemplated light sources that "conform" as contrasted with the requirement in S4.1.1.36 that headlamps other than sealed beam be equipped with light sources "designed to conform". To remove this inconsistency with paragraph S4.1.1.36, NHTSA has adopted the "design to conform" language in S4.1.1.39.

The comments reflected a wide range of opinion about the need for labelling of headlamp lenses with information such as light source type, beam type, and photometric performance designation. Lamp manufacturers are concerned about the adverse effects on headlamp performance, especially if the location of the labelling is a specified one. NHTSA has concluded that motor vehicle safety requires identification of the light source, and the proper function of a headlamp (upper or lower beam) when two headlamp types are used on a vehicle. It is not necessary to provide photometric performance information when the lens identifies the light source. Replacement of a light source with one of the same type will assure equivalent and compatible lighting performance. However, there is no compelling reason to specify that any information be located at the lens center. NHTSA has decided to leave placement of the information to the discretion of the manufacturer, as long as the information is placed on the lens area in front of, and used by the light source it is designating.

ETL Testing Laboratories asked for three clarifications of the proposal. The language in proposed S4.1.1.39(f) and (h) regarding "low pressure side" was unclear. The "low pressure side" is the connector side of the HB3 or HB4 light source base. This test of the sealing mechanism does not apply to the HB1. The second point of confusion was the extent of the photometry test of S6.7.2. Except for a headlamp with a single HB1 light source, the photometry test is intended to be a complete testing of all test points for the beam or beams produced by the lamp. Finally, in S6.7.2, a statement was requested on the conditions of time lapse or temperature stabilization occurring after the high temperature test and before the photometry test. NHTSA replies that there should be sufficient time for the temperature of the lamp to stabilize to room ambient temperature.

NHTSA has considered this rule and has determined that it is not major within the meaning of Executive Order No. 12291 "Federal Regulation" or significant under Department of Transportation regulatory policies and procedures, and that neither a regulatory impact analysis nor a full regulatory evaluation is required. However, a regulatory evaluation has been prepared and placed in the public docket. Since use of the two light sources is optional, the rule would not impose additional costs or requirements but would permit manufacturers greater flexibility in the use of headlighting systems.

NHTSA has analyzed this rule for the purposes of the National Environmental Policy Act. The rule may have a small positive effect on the human environment since the weight and quantity of materials used in the manufacture of headlamps would be reduced.

The agency has also considered the impacts of this rule in relation to the Regulatory Flexibility Act. I certify that this rule will not have a significant economic impact on a substantial number of small entities. Accordingly, no regulatory flexibility analysis has been prepared. Manufacturers of motor vehicles and headlamps, those affected by the rule, are generally not small businesses within the meaning of the Regulatory Flexibility Act. Finally, small organizations and governmental jurisdictions would not be significantly affected since the price of new vehicles, headlamps, and aimer adjusters will be minimally impacted.

Because of the necessity for vehicle, headlamp, and replaceable light source manufacturers to plan production and distribution on an orderly basis, it is hereby found that an effective date earlier than 180 days after issuance of the final rule is in the public interest.

The engineer and lawyer primarily responsible for this rule are Richard Van Iderstine and Taylor Vinson, respectively.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles, Rubber and rubber products, Tires.

PART 571—[AMENDED]

In consideration of the foregoing, 49 CFR Part 571 and 571.108, Motor Vehicle Safety Standard No. 108, *Lamps, Reflective Devices, and Associated Equipment* is amended as follows:

The authority citation for Part 571 continues to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

§ 571.108 [Amended]

1. The definition of "Standardized replaceable light source" in S3 *Definitions* is revised to read:

"Standardized replaceable light source" means an assembly of a capsule, base, and terminals that meets the requirements of S4.1.1.39.

2. In paragraph S4.1.1.36, paragraph (a)(1) is revised to read:

(a)(1) Each replaceable bulb headlamp shall include components which are designed to conform to the applicable specifications of paragraphs S4.1.1.37, S4.1.1.38 and S4.1.1.39.

3. The first sentence of Paragraph (b)(2) of S4.1.1.36 is revised to read:

(2) Section 3.1—Test Voltage and Section 3.5—Photometric Design Requirements, excluding Tables 1 and 2 for headlamps equipped with Type HB3, Type HB4, Types HB1 and HB3, or Types HB1 and HB4, and excluding Table 2 of SAE J579c *Sealed Beam Headlamp Units for Motor Vehicles* December 1978 for headlamps in systems with only Type HB1.

4. In Paragraphs (d)(1), (d)(3), (d)(5), (d)(6)(A), (d)(6)(B), and (d)(7) of paragraph S4.1.1.36, the words "of SAE J579c *Sealed Beam Headlamp Units for Motor Vehicles*, December 1978" are removed and the words "applicable to the headlamp system under test" substituted.

5. A new paragraph (e) is added to S4.1.1.36, before (e)(1) to read: "For a headlamp equipped with one or two Type HB1 light sources the following requirements apply."

6. A new paragraph (f) is added to S4.1.1.36 to read:

"For headlamp systems equipped with Type HB3 and HB4, HB1 and HB3, or HB1 and HB4 light sources, the following requirements apply:"

(1) There shall be no mechanism that allows adjustment of an individual light source, or adjustment of reflector aim on a headlamp with two light sources.

(2) Lower beam photometrics shall be provided by filaments with a minimum average design life of not less than 320 hours.

(3) The lower and upper beams of a headlamp system consisting of two lamps, each containing two light sources (type HB3 and HB4, or type HB1 with HB3 or HB4) shall be provided only as follows:

(i) The lower beam shall be produced in one of the following ways:

(A) By the outboard light source (or the uppermost if arranged vertically) or single light source, designed to conform to the lower beam requirements of Figure 17; or;

(B) By both light sources, designed to conform to the lower beam requirements of Figure 17.

(ii) The upper beam shall be provided in one of the following ways:

(A) By the inboard light source (or the lower one if arranged vertically) or single light source, designed to conform to the upper beam requirements of Figure 17; or

(B) By both light sources, designed to conform to the upper beam requirements of Figure 17.

(4) The lower and upper beams of a headlamp system consisting of four lamps, using HB3 and HB4, HB1 and HB3, or HB1 and HB4 light sources, each containing only a single light source, shall be provided only as follows:

(i) The lower beam shall be produced by the outboard lamp (or upper one if arranged vertically), designed to conform to the lower beam requirements of Figure 15. The lens of each such headlamp shall be permanently marked with the letter "L".

(ii) The upper beam shall be produced by the inboard lamp (or lower one if arranged vertically), designed to conform to the upper beam requirements of Figure 15. The lens of each such headlamp shall be permanently marked with the letter "U".

(5) For replaceable bulb headlamps, a ± ¼ degree reaim tolerance is permitted for the test points of Figures 15 and 17. The test point 10U–90U shall be measured from the normally exposed surface of the lens face.

7. Paragraph S4.1.1.37 is revised to read:

S4.1.1.37 Each lens-reflector unit manufactured as replacement equipment for a replaceable bulb headlamp system shall be designed to conform to the requirement of S4.1.1.36 when any standardized replaceable light source appropriate for such unit is inserted in it.

8. Section 4.1.1.39 is removed. S4.1.1.40 is redesignated S4.1.1.38 and revised as follows.

S4.1.1.38 The lens of each replaceable bulb headlamp and the base of each standardized replaceable light source shall be marked as follows:

(a) With the symbol "DOT" horizontally or vertically which shall constitute certification that the headlamp or light source conforms to all applicable Federal motor vehicle safety standards.

(b) The base of each Type HB3 and HB4 light source shall also be marked by its manufacturer or importer with its HB Type Designation and the name or trademark registered with the U.S. Patent Office of the manufacturer and importer (if applicable).

(c) The lens of each replaceable bulb headlamp using HB3 or HB4 light sources, or HB1 light sources in conjunction with HB3 or HB4 light sources within a headlamp system on a motor vehicle shall permanently display the Type Designation(s) for that standardized replaceable light source on the lens in front of each light source.

9. Paragraph S4.1.1.38 is redesignated S4.1.1.39 and revised as follows:

S4.1.1.39 Each standardized replaceable light source shall be designed to conform to the following requirements:

(a) A Type HB1 light source shall be designed to conform to the dimensions specified in Figure 3 and shall incorporate a silicone O-ring. A Type HB3 light source shall be designed to conform to the dimensions specified in Figure 19. A Type HB4 light source shall be designed to conform to the dimensions specified in Figure 20.

(b) Each standardized replaceable light source shall be designed to conform to the following general specifications:

Specification	Lower beam	Upper beam
Maximum power, watts:		
HB1	50	70.
HB3		70.
HB4	60	
Luminous flux, lumens:		

VOL 51 ISS 85 MY 2 1986 UMI

Specification	Lower beam	Upper beam
HB1	700–15 percent.	1,800±15 percent.
HB3		1,700±12 percent.
HB4	1,000±15 percent.	
Minimum average design life, hours: all	300	150.

(c) The standardized replaceable light source filament(s) shall be subject to seasoning before measurement of maximum power and luminous flux.

(d) Measurement of maximum power and luminous flux shall be made with the direct current test voltage regulated within one quarter of one percent. The test voltage shall be design voltage, 12.8v. The measurement of luminous flux for the HB1 shall be in accordance with the Illuminating Society of North America, LM–45; *IES Approved Method for Electrical and Photometric Measurements of General Service Incandescent Filament Lamps* (April 1980), shall be made with the black cap installed on HB1 and HB4, and shall be made with the electrical connector and light source base shrouded with an opaque white colored cover, except for the portion normally located within the interior of the lamp housing. The measurement of luminous flux for the HB3 and HB4 shall be with the base covered with a white cover shown in Figures 19–1 and 20–1. The white covers are used to eliminate the likelihood of incorrect lumen measurement that will occur should the reflectance of the light source base and electrical connector be low.

(e) Measurement of minimum average design life shall be made at 14.0v for all light sources. Testing is conducted in a completed headlamp assembly, or equivalent, placed in the attitude in which the assembly is to be installed on a motor vehicle.

(f) The capsule, lead wires and/or terminals on each Type HB1, Type HB3 and Type HB4 light source shall be installed in the base so as to provide an airtight seal. Such a seal exists on Type HB3 and Type HB4 when no air bubbles shall appear on the low pressure (connector) side after the light source has been immersed in water for one minute while inserted in a cylindrical aperture of 0.798±0.004 in. (20.22±0.10 mm) (Type HB3) or 0.875±0.004 in. (22.2±0.1 mm) (Type HB4) and subject to a minimum air pressure of 69kPa (10 P.S.I.G.) on the glass capsule side.

(g) After the force deflection test conducted in accordance with S7, the permanent deflection of the glass envelope shall not exceed 0.005 in. (0.13 mm) in the direction of the applied force.

(h) A general tolerance shall apply to Figure 3 as follows: ±0.004 in. (0.10 mm) to all linear dimensions and ±1°00′ to all angular dimensions except for referenced dimensions and unless otherwise specified.

10. Paragraph S4.5.6 is amended by adding the following as a second sentence:

S4.5.6 * * * On a motor vehicle equipped with a headlighting system comprising four replacement bulb headlamps designed to conform to the photometry of Figure 15, the lamps marked "L" may be wired to remain permanently activated when the lamps marked "U" are activated.

11. Paragraph S4.5.9 is revised to read:

S4.5.9 The wiring harness or connector assembly of a replaceable bulb headlamp with two identical standardized replaceable light sources or a four-lamp replaceable bulb headlamp system which uses identical light sources in all four lamps shall be designed so that the filaments not intended to be used with the lens prescription in front of such filament shall not be illuminated.

12. Paragraph S6.1. is revised is to read:

S6.1 *Photometry.* A replaceable bulb headlamp shall be tested according to paragraph S3.5, Photometric Design Requirements, and Table 1 of SAE Standard J579c *Sealed Beam Headlamp Units for Motor Vehicles*, Dec. 1978, or by Figure 15 or 17 of Standard 108, as applicable, after the tests specified in S6.2, S6.4, S6.6, S6.7.1, S6.7.2 and S6.8.

13. Paragraphs S6.7 and S6.8 are revised to read:

S6.7 *Temperature and internal heat tests.* A headlamp with one or more standarized replaceable light sources shall be tested according to S6.7.1 and S6.7.2. Tests shall be made with all filaments lighted at design voltage that are intended to be used simultaneously in the headlamp and which in combination draw the highest total wattage. These include but are not limited to filaments used for turn signal lamps, fog lamps, parking lamps, and headlamp lower beams lighted with upper beams when the wiring harness is so connected on the vehicle. If a turn signal is included in the headlamp assembly, it shall be operated at 90 flashes a minute with a 75±2% current "on time". If the lamp produces both the upper and lower beam, it shall be tested in both the upper beam mode and the lower beam mode under the conditions above described, except for a headlamp with a single HB1 light source.

S6.7.1 *Temperature cycle.* A headlamp mounted on a headlamp test fixture shall be subjected to 10 complete consecutive cycles having the thermal cycle profile shown in Figure 6. During the hot cycle, the lamp shall be energized commencing at point "A" of Figure 6 and de-energized at point "B". Separate or single test chambers may be used to generate the environment of Figure 6. All drain holes, breathing devices or other openings or vents of the headlamps shall be in their normal operating positions.

S6.7.2 *Internal heat test.*

(a) The headlamp lens surface that would normally be exposed to road dirt shall be uniformly sprayed with any appropriate mixture of dust and water or other appropriate materials to reduce the photometric output at the H–V test point of the upper beam (or the 1/2D–1 1/2R test point of the lower beam as appropriate) to 25±2% of the output originally measured in the photometric test performed under S4.1.1.36(b). A headlamp with a single HB1 light source shall be tested on the upper beam only. Such reduction shall be determined under the same conditions as that of the original photometric measurement.

(b) After the determination has been made that the photometric output of the lamp has been reduced as specified in S6.7.2(a), the lamp and its mounting hardware shall be mounted in an environmental chamber in a manner similar to that indicated in Figure 7, "Dirt/Ambient Test Setup". The headlamp shall be soaked for one hour at a temperature of 95+7−0 degrees F (34+4−0 degrees C) and then the lamp shall be energized according to S6.7 for one hour in a still air condition, allowing the temperature to rise from the soak temperature.

(c) The lamp shall be returned to a room ambient temperature of 73+7−0 degrees F (23+4−0 degrees C) and a relative humidity of 40±10% and allowed to stabilize to the room ambient temperature. The lens shall then be cleaned.

S6.8 *Humidity.* The headlamp mounted on a test fixture shall be placed in a controlled environment consisting of a temperature of 100+7−0°F (38+4−0°C) with a relative humidity of not less than 90%. All drain holes, breathing devices, and other designed openings shall be in their normal operating positions. The headlamp shall be subjected to 20 consecutive 6-hour test cycles. In each cycle, it shall be energized at design voltage with the highest combination of filament wattages that are intended to be used, including a turn signal flashing at 90 flashes a minute with a 75±2% current "on-time", if so equipped, and then de-

energized for 5 hours. After completion of the last cycle, the lamp shall be soaked for 1 hour at 73+7−0°F (20+4−0°C) and relative humidity of 40±10% before it is removed for photometric testing. The headlamp shall be tested for photometrics at 10±1 minutes following completion of the humidity test.

14. Section S7 is revised to read:

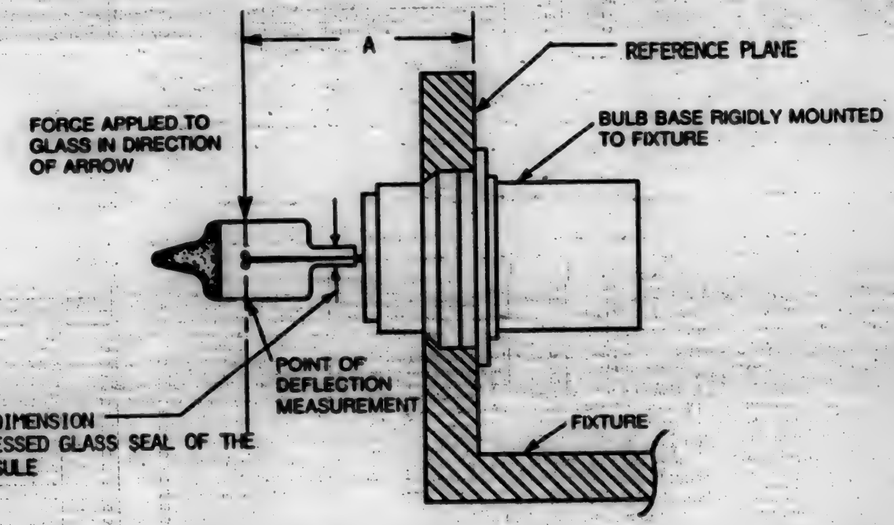
S7 *Deflection test for standardized replaceable light sources.*

(a) *Type HB1 light source.* With the light source rigidly mounted in a fixture in a manner indicated in Figure 8, apply a force of 4.0±0.1 pounds (17.8±0.4N) at a distance "A" from the reference plane perpendicular to the longitudinal axis of the glass capsule and parallel to the smallest dimension of the pressed glass capsule seal. The force application shall be applied using a rod with a hard rubber tip with a minimum spherical radius of 0.39 in (1 mm). The bulb deflection shall be measured at the glass capsule surface at 180 degrees opposite to the force application.

(b) *Type HB3 and HB4 light sources.* The deflection test is conducted according to paragraph (a), except that the force shall be applied radially to the surface of the glass capsule in four locations in a plane parallel to the reference plane and spaced at a distance "A" from that plane. These force applications shall be spaced 90 degrees apart starting at the point perpendicular to the smallest dimension of the pressed seal of the glass capsule.

15. In Tables II and IV, Column 2 for the Headlamps is revised to read:

Headlamps	On the front, each headlamp providing the upper beam, at the same height, 1 on each side of the vertical centerline, each headlamp providing the lower beam, at the same height, 1 on each side of the vertical centerline, as far apart as practicable. If a single standardized replaceable light source is used to provide the lower beam in a headlamp with two standardized replaceable light sources, it shall be the farthest one from the vertical centerline.



16. The title of Figure 3 is revised to read "Specifications for the Type HB1 Standardized Replaceable Light Source."

17. Figure 8 is revised as follows:

Proposed Rules

Federal Register
Vol. 51, No. 85
Friday, May 2, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 911

Limes Grown in Florida; Proposed Amendment to Container Regulation

Correction

In FR Doc. 86-9037 appearing on page 15349 in the issue of Wednesday, April 23, 1986, make the following correction:

In the third column, in amendatory instruction 2, sixth line, "(a)(2)(iv)" should read "(a)(2)(vi)".

BILLING CODE 1505-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 86-CE-5-AD]

Airworthiness Directive; Government Aircraft Factories Models N22B and N24A Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This Notice proposes to adopt a new Airworthiness Directive (AD), applicable to Government Aircraft Factories (GAF) Models N22B and N24A airplanes which would require the installation of a guard plate on the structure and a low friction button on the rudder pedal pivot pins. The proposed AD is needed because the rudder pedal has jammed at full deflection in some instances. A rudder pedal jammed at full deflection could lead to loss of directional control.

DATE: Comments must be received on or before June 5, 1986.

ADDRESSES: GAF Service Bulletin NMD-27-34, dated October 21, 1985, applicable to this AD may be obtained from Government Aircraft Factories, 226 Lormier Street, Fisherman's Bend, Port Melbourne, Victoria, Australia 3207; Telephone 03-647-3111; Telex 30252; Cable BEAUFAIR or the Rules Docket at the address below.

Send comments on the proposal in duplicate to Federal Aviation Administration, Central Region, Office of Regional Counsel, Attention: Rules Docket No. 86-CE-5-AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8:00 a.m. and 4:00 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Mr. Gene Domich, Aerospace Engineer, Airframe Section, ANM-172W, Western Aircraft Certification Office, Northwest Mountain Region, FAA, Post Office Box 92007, Worldway Postal Center, Los Angeles, California 90009-2007; Telephone (213) 297-1143.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Director before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. Comments are specifically invited on the overall regulatory, economic, environmental and emergency aspects of the rule. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Central Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 86-CE-5-AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

Discussion

There has been an AD (AD/GAF-N22/51) received from the Australian Department of Aviation stating that jamming on the rudder pedals at full deflection has occurred on GAF Models N22B and N24A airplanes. The manufacturer has investigated and found that this happens when the pedals are adjusted at or near full aft position concurrently with landing on rough terrain or nose wheel shimmy. The interference occurs between the sidewall structure and the outboard end of each rudder pedal pivot pin. Since the rudder pedal jammed at full deflection could lead to loss of airplane direction control, GAF has issued Service Bulletin NMD-27-34 dated October 21, 1985, which gives instruction for installing a guard plate on the structure and a low friction button on the rudder pedal pivot pin to eliminate the jamming. GAF compliance with the provisions of Service Bulletin NMD-27-34 is recorded in aircraft log books as Mod N642.

The Australian Department of Aviation, who has responsibility and authority to maintain the continuing airworthiness of these airplanes in Australia, has classified this service bulletin and the actions recommended therein by the manufacturer as mandatory to assure the continued airworthiness of the affected airplanes. On airplanes operated under Australian regulations, this action has the same effect as an AD on airplanes certificated for operation in the United States.

The FAA relies upon the certification of the Australian Department of Aviation combined with the FAA review of pertinent documentation in finding compliance of the design of these airplanes with applicable United States airworthiness requirements and the airworthiness conformity for products of this design certificated for operation in the United States. The FAA has examined the available information related to the issuance of Service Bulletin NMD-27-34 and the mandatory classification of this service bulletin by the Australian Department of Aviation. Based on the foregoing, the FAA believes that the condition addressed by Service Bulletin NMD-27-34 is an unsafe condition that may exist on other products of this type design certificated for operation in the United States. Consequently, the proposed AD is

VOL 51 ISS 85 MY 2 1986 UMI

applicable to GAF N22B and N24A airplanes and would require installation of a manufacturer supplied kit in accordance with GAF Service Bulletin NMD–27–34 to allow jam free operation of the rudder pedals. There are approximately 22 United States registered airplanes affected by the proposed AD. The cost of complying with the proposed AD is estimated to be $320 per airplane. The kit is furnished by GAF at no cost. The cost to the private section is estimated to be $7,040. Few, if any small entities own the affected airplanes. The cost of compliance is so minimal that it would not impose a significant economic burden on any such owner. Therefore, I certify that this action (1) is not major under provisions of Executive Order 12291, (2) is not a significant rule under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and (3) if promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation has been prepared for this action and has been placed in the public docket. A copy of it may be obtained by contacting the Rules Docket at the location identified under the caption "ADDRESSES".

List of Subjects in 14 CFR Part 39

Air transportation, Aviation safety, Aviation, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the FAR as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new AD:

Government Aircraft Factories (GAF): Applies to Models N22B and N24A airplanes, (all serial numbers) certificated in any category unless Service Bulletin NMD–27–34 (Mod N642) has been incorporated.

Compliance: Required within 100 hours time-in-service after the effective date of this AD or one calendar year after the effective date of this AD, whichever occurs first, unless already accomplished.

To prevent jamming of the rudder pedals accomplish the following:

(a) Modify the airplane sidewall structure and rudder pedals in accordance with Paragraph 2, "Accomplishment Instructions" of GAF Service Bulletin NMD–27–34 dated October 21, 1985, or later equivalent approved by the Manager, Western Aircraft Certification Office.

(b) An equivalent method of compliance with this AD, if used, must be approved by the Manager, Western Aircraft Certification Office, ANM–170W, Northwest Mountain Region, FAA, Post Office Box 92007, Worldway Postal Center, Los Angeles, California 90009–2007.

All persons affected by this directive may obtain copies of the documents referred to herein upon request to Government Aircraft Factories, 226 Lormier Street, Fisherman's Bend, Port Melbourne, Victoria, Australia 3207, or FAA, Office of Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on April 21, 1986.

Jerold M. Chavkin,
Acting Director, Central Region.

[LR–50–80]

Income Taxes; Procedure for Electing $10 Million Limitation on Small Issues of Industries Development Bonds; Withdrawal of Notice of Proposed Rulemaking

AGENCY: Internal Revenue Service, Treasury.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: This document withdraws a notice of proposed rulemaking published in the Federal Register for June 22, 1982 (47 FR 26854) that proposed to revise the procedures for electing the $10 million limitation for exempt small issues of industrial development bonds and for filing supplemental statements of capital expenditures.

DATE: The withdrawal of this notice of proposed rulemaking is effective on May 1, 1986.

FOR FURTHER INFORMATION CONTACT: John A. Tolleris of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Ave., NW., Washington, DC 20224 (Telephone: (202) 566–3459).

SUPPLEMENTARY INFORMATION:

Background

On June 22, 1982, the Federal Register published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 103(b)(6)(D) of the Internal Revenue Code of 1954 (47 FR 26854). These amendments were proposed to make revisions in the manner of electing the $10 million limitation for exempt small issues of industrial development bonds and for filing supplemental statements of capital expenditures. Several written comments responding to this notice were received, but no public hearing was requested or held. After consideration of all comments regarding the proposed amendments, it was determined that the proposed rules relating to the time and manner of filing small issue elections and capital expenditure statements were inappropriate. Accordingly, those proposed amendments are withdrawn by this document.

Drafting Information

The principal author of this document is John A. Tolleris of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

Withdrawal of Notice of Proposed Rulemaking

Accordingly, the proposed amendments to 26 CFR Part 1 relating to the procedure for electing the $10 million limitation for exempt small issues of industrial development bonds and for filing supplemental statements of capital expenditures, published in the Federal Register for June 22, 1982 (47 FR 26854), are hereby withdrawn.

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Parts 250 and 256

Oil and Gas and Sulphur Operations in the Outer Continental Shelf; Outer Continental Shelf Minerals and Rights-of-Way Management, General

AGENCY: Minerals Management Service, Interior.

ACTION: Proposed rule; extension of comment period.

SUMMARY: This notice extends to September 15, 1986, the comment period for the notice of proposed rulemaking concerning the consolidation of the rules

of the Minerals Management Service (MMS) that govern oil, gas, and sulphur operations in the Outer Continental Shelf (OCS). The extension was requested by several commenters due to the extensive nature of the rulemaking.

DATES: Comments must be hand-delivered or postmarked no later than September 15, 1986.

ADDRESSES: Written comments must be mailed or hand-delivered to the Department of the Interior; Minerals Management Service; 12203 Sunrise Valley Drive; Mail Stop 646; Room 6A110, Reston, Virginia 22091; Attention: David A. Schuenke.

FOR FURTHER INFORMATION CONTACT: David A. Schuenke, Telephone: (703) 648–7734.

SUPPLEMENTARY INFORMATION: On March 18, 1986, MMS published a notice of proposed rulemaking in the Federal Register (51 FR 9316) to consolidate into one document the currently multitiered rules that govern oil, gas, and sulphur operations in the OCS. The proposed rule restructures MMS requirements currently contained in regulations at 30 CFR Part 250 and OCS Orders for each of the four OCS Regions. Due to the extensive nature of the rulemaking, commenters have requested additional time to analyze the proposed rule and to prepare comments. The MMS considers the additional time to be warranted and is extending the comment period. The original comment period was through June 16, 1986. This notice extends the comment period through September 15, 1986.

Dated: April 21, 1986.

William D. Bettenberg,
Director, Minerals Management Service.

National Park Service

36 CFR Part 62

National Natural Landmarks Program; National Significance Criteria

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: This revision to the National Natural Landmarks Program national significance criteria is proposed to clarify the language and sharpen the definition of national significance. The revised criteria will better enable the National Park Service to evaluate additions to the National Registry of Natural Landmarks and better communicate the concept of national significance to the public. Since many persons and organizations seek such recognition for sites they own or administer, a better understanding of our definition of the concept will help them recognize why few sites qualify, and also assist our contractors in providing us with information we need to make good judgements.

DATES: Written comments, suggestions or objections will be accepted until—June 2, 1986.

ADDRESS: Comments should be addressed to: Arthur L. Stewart, Interagency Resources Division, National Park Service, Department of the Interior, P.O. Box 37127, Washington, D.C. 20013–7127, (202) 343–9500.

FOR FURTHER INFORMATION CONTACT: Arthur L. Stewart, Interagency Resources Division, National Park Service, Department of the Interior, P.O. Box 37127, Washington, D.C. 20013–7127, (202) 343–9500.

SUPPLEMENTARY INFORMATION

Background

The Secretary of the Interior established the National Landmarks Program in 1962 as a natural areas survey to identify and encourage the preservation of features that best illustrate the ecological and geological character of the United States, to enhance the educational and scientific value of sites thus identified, to strengthen public appreciation of natural history, and to foster wider support for conservation of the Nation's natural heritage.

Potential National Natural Landmarks are identified primarily through inventory studies conducted for the National Park Service, but also through recommendations received from Federal agencies, State natural heritage programs, and other sources. Recommended areas are surveyed in the field and evaluated with respect to selection criteria by expert natural scientists. If an area is judged nationally significant, it is proposed to the Secretary of the Interior for designation as a National Natural Landmark. Areas so designated are listed on the National Registry of Natural Landmarks, which now includes 569 sites in 48 States, 3 territories, and the Commonwealth of Puerto Rico. Additions to the Registry are published annually in the Federal Register.

Natural landmark designation is not a land withdrawal and affects neither the ownership of a site nor its use. Rather, it is a means of public recognition employed by the Secretary to encourage the preservation, well-informed management, and consideration in public and private planning efforts of nationally significant natural areas without acquisition by the Federal Government.

Public Participation

The policy of the National Park Service is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions, or objections regarding this proposed regulation to the address noted at the beginning of this rulemaking.

Drafting Information

Drafting of this regulation was done by National Natural Landmarks Program staff, in consultation with other National Park Service employees, outside scientists, representatives of national conservation organizations, and others.

Compliance With Other Laws

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 (February 19, 1981), 46 FR 13193, and that this document will not have a significant economic effect on a substantial number of small entities as per the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This conclusion is based on the finding that no costs should result for any small entity.

The rule does not contain any information collection or recordkeeping requirements as defined by the Paperwork Reduction Act of 1981.

Natural resources.

PART 62—NATIONAL NATURAL LANDMARKS PROGRAM

For the reasons set out in the preamble, it is proposed to amend 36 CFR Part 62 as follows:

1. The authority citation for Part 62 continues to read as follows:

Authority: Sec. 1, Pub. L. 74–292, 49 Stat. 666 (16 U.S.C. 461 et seq); Sec. 2 of Reorganization Plan No. 3 of 1950 (64 Stat. 1262).

2. Section 62.2 is amended by revising the definition "National Significance" to read as follows:

§ 62.2 Definitions.

* * * * *

"National Significance" denotes a site which exemplifies one of a natural region's characteristic biotic or geologic features which has been evaluated, using Department of Interior standards.

VOL 51 ISS 85 MY 2 1986 UMI

as one of the best known examples of that feature.

* * * * *

3. Section 62.5 is revised to read as follows:

§ 62.5 National natural landmark criteria.

(a) *Introduction:* (1) "National Significance" denotes a site which exemplifies one of a natural region's characteristic biotic or geologic features which has been evaluated, using Department of Interior standards, as one of the best known examples of that feature. Such features include terrestrial and aquatic ecosystems; geologic structures, exposures, and landforms that record active geologic processes or portions of earth history; and fossil evidence for biological evolution. Because the general character of natural diversity is regionally distinct according to broad patterns of physiography, many types of natural features lie wholly within one of the 33 physiographic provinces of the Nation. For that reason, and because no uniform, nationally applicable classification schemes for biotic communities or geologic features have gained wide acceptance and use in lieu of other classification schemes by the majority of organizations involved in natural area inventory activities, individual classification systems developed for regional inventory studies are used to identify the types of regionally characteristic natural features sought for representation on the National Registry of Natural Landmarks. Most types represent the scale of distinct biotic communities or individual geologic, paleontologic or physiographic features, most of which are mappable at the Earth's surface at scales on the order of 1:25,000 or are traceable in the subsurface. Nearly two-thirds of all National Natural Landmarks range in size between about 30 and 2,000 hectares (about 8 and 5,000 acres), but larger and smaller sites also occur owing to the wide variety of natural features recognized by the National Natural Landmarks Program.

(b) *Criteria:* (1) The following criteria form the guidelines used to evaluate the relative quality of sites as examples of regionally characteristic natural features. Primary criteria relating to a specific type of natural feature from the principal basis for selection and must be met for a site to be considered for National Natural Landmark designation. Secondary criteria relating to significant features or qualities in addition to the principal feature are provided for additional consideration when two or more sites are found to meet the primary criteria.

(2) Primary Criteria:

(i) Illustrative Character: A site exhibits an unusual combination of well-developed component features that are recognized in the appropriate scientific literature as characteristic of a particular type of natural feature. What is sought, therefore, is not necessarily the statistically representative, but rather the unusually illustrative.

Example: An alpine glacier, which exhibits classic shape, an unusual number of glaciologic structures like crevasses, and well-developed bordering moraine sequences.

(ii) Present Condition: A site has received less human disturbance than other examples.

Example: A large beech-maple forest, only a small portion of which has been disturbed by logging.

(3) Secondary Criteria:

(i) Diversity: A site, in addition to its primary natural feature, contains high quality examples of other ecological and/or geological features.

Example: A composite volcano, which also illustrates geothermal phenomena.

(ii) Rarity: A site, in addition to its primary natural feature, contains a rare geological or paleontological feature or biotic community, or provides high quality habitat for one or more rare, threatened, or endangered species.

Example: Badlands, which also are composed of strata containing rare fossils.

(iii) Value for Science and Education: A site is associated with a significant scientific discovery or concept, possesses an exceptionally extensive and long-term record of onsite research, or offers unusual opportunities for public interpretation of the natural history of the United States.

Example: A dunes landscape, which was the subject of pioneering studies that first recognized the process of ecological succession.

Dated: February 28, 1986.

P. Daniel Smith,

Deputy Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 86-9962 Filed 5-1-86; 8:45 am]

BILLING CODE 4310-70-M

VETERANS ADMINISTRATION

38 CFR Part 4

Nomenclature and Descriptive Terms for Mental Disorders

AGENCY: Veterans Administration.

ACTION: Proposed rules.

SUMMARY: The Diagnostic and Statistical Manual of Mental Disorders, Third Edition (DSM–III) changed the diagnostic terms for many mental disorders. The proposed changes to the Schedule for Rating Disabilities (38 CFR Part 4) are designed to comport with the diagnostic terms used in DSM–III.

DATES: Comments must be received on or before June 2, 1986. This rule is proposed to be effective 30 days following date of final publication.

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections regarding these proposed regulations to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW, Washington, DC 20420. All written comments received will be available for public inspection only in room 132, Veterans Services Unit, at the above address between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until June 16, 1986.

FOR FURTHER INFORMATION CONTACT: Robert M. White, Chief, Regulations Staff, Compensation and Pension Services, Department of Veterans Benefits, (202) 389–3005.

SUPPLEMENTARY INFORMATION: Under the heading of Psychotic Disorders, DSM–III changed the following diagnoses: Schizophrenia, hebephrenic type, changed to schizophrenia, disorganized type—schizophrenia, unspecified type, changed to schizophrenia residual type, schizoaffective disorder, and other and unspecified type—manic depressive illness, changed to bipolar disorder—paranoid state changed to paranoid disorder-involutional melancholia or paranoid state changed to major depression or paranoia—psychosis, unspecified, changed to atypical psychosis—schizophrenia, simple type is deleted as a ratable entity as such is now considered a personality disorder.

The heading of Organic Brain Disorder is changed to Organic Mental Disorders. Under this heading, organic brain syndromes are changed to dementia, and the distinction between psychotic and non-psychotic dementia is deleted.

Under the heading of Psychoneurotic Disorders, the majority of diagnostic entities were referred to as neuroses. The term "neurosis" is changed to "disorder."

The heading of Psychophysiologic Disorders is changed to read Psychological Factors Affecting Physical Conditions, and the individual diagnoses under this heading are changed accordingly.

The Schedule for Rating Disabilities (38 CFR Part 4) is amended to reflect the changes made in DSM–III.

The descriptive adjectives used in the Schedule for Rating Disabilities which characterize the degree of industrial and social impairment for mental disorders are being changed to uniformly describe the degree of impairment as "total" for 100%, "severe" for 70%, "extensive" for 50%, "definite" for 30% and "mild" for 10%. The descriptive terms stated above do not necessarily refer to the severity of the disease, but refer to the impairment such disease entity has on the social and industrial activity of the veteran. It should be noted that disability evaluations assigned under the Schedule for Rating Disabilities are based on the average impairment of earning capacity resulting from a specific disease or injury. The uniform use of the descriptive adjectives are not intended to raise or reduce evaluations for mental disorders, but are designed to reflect consistency in describing social and industrial impairment.

The Administrator hereby certifies that this regulatory amendment will not have a significant impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. §§ 601–612. The reason for this certification is that this amendment changes certain terminology used in the schedule under which the VA rates or evaluates the disabilities of individual veterans. These regulations are in no way directed toward, and impose no regulatory burdens upon, small entities. Therefore, pursuant to 5 U.S.C. 605(b), this amendment is exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, we have determined that this regulatory amendment is non-major for the following reasons:

(1) It will not have an effect on the economy of $100 million or more.

(2) It will not cause a major increase in costs or prices.

(3) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 38 CFR Part 4

Administrative practice and procedure, Claims, Handicapped, Health care, Pensions, Veterans.

(Catalog of Federal Domestic Assistance Program numbers are 64.104, 64.109 and 64.110)

Approved: April 2, 1986.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

38 CFR Part 4, SCHEDULE FOR RATING DISABILITIES is amended as follows:

PART 4—[AMENDED]

1. Section 4.125 is revised to read as follows:

§ 4.125 General considerations.

The field of mental disorders represents the greatest possible variety of etiology, chronicity and disabling effects, and requires differential consideration in these respects. These sections under mental disorders are concerned with the rating of psychiatric conditions, specifically psychotic and psychoneurotic disorders and psychological disorders affecting physical conditions as well as organic mental disorders. Advances in modern psychiatry during and since World War II have been rapid and profound and have extended to the entire medical profession a better understanding of an deeper insight into the etiological factors, psychodynamics, and psychopathological changes which occur in mental disease and emotional disturbances. The psychiatric nomenclature employed is based upon the Diagnostic and Statistical Manual of Mental Disorders, Third Edition (DSM–III), American Psychiatric Association. This nomenclature has been adopted by the Department of Medicine and Surgery of the Veterans Administration. It limits itself to the classification of disturbances of mental functioning. To comply with the fundamental requirements for rating psychiatric conditions, it is imperative that rating personnel familiarize themselves thoroughly with this manual (American Psychiatric Association Manual, 1980 Edition) which will be hereinafter referred to as the APA manual. [38 U.S.C. 210(c)]

2. Section 4.126 is revised to read as follows:

§ 4.126 Substantiation of diagnosis.

It must be established first that a true mental disorder exists. The disorder will be diagnosed in accordance with the APA manual. A diagnosis not in accord with this manual is not acceptable for rating purposes and will be returned through channels to the examiner. Normal reactions of discouragement, anxiety, depression, and self-concern in the presence of physical disability, dissatisfaction with work environment, difficulties in securing employment, etc., must not be accepted by the rating board as indicative of psychoneurosis. Moreover mere failure of social or industrial adjustment or the presence of numerous complaints should not, in the absence of definite symptomatology typical of a psychoneurotic or psychological disorder, become the acceptable basis of a diagnosis in this field. It is the responsibility of rating boards to accept or reject diagnoses shown on reports of examination. If a diagnosis is not supported by the findings shown on the examination report, it is incumbent upon the board to return the report for clarification. [38 U.S.C. 210(c)]

3. Section 4.127 is revised to read as follows:

§ 4.127 Mental deficiency and personality disorders.

Mental deficiency and personality disorders will not be considered as disabilities under the terms of the schedule. Attention is directed to the outline of personality disorders in the APA manual. Formal psychometric tests are essential in the diagnosis of mental deficiency. Brief emotional outbursts or periods of confusion are not unusual in mental deficiency or personality disorders and are not acceptable as the basis for a diagnosis of psychotic disorder. However, properly diagnosed superimposed psychotic disorders developing after enlistment, i.e., mental deficiency with psychotic disorder, or personality disorder with psychotic disorder, are to be considered as disabilities analogous to, and ratable as, schizophrenia, unless otherwise diagnosed. (38 U.S.C. 210 (c))

4. Section 4.128 is revised to read as follows:

§ 4.128 Change of diagnosis.

Rating boards encountering a change of diagnosis will exercise caution in the determination as to whether a change in diagnosis represents no more than a progression of an earlier diagnosis, an error in a prior diagnosis, or possibly a disease entity independent of the service-connected psychiatric disorder. (38 U.S.C. 210 (c))

5. Section 4.129 is revised to read as follows:

§ 4.129 Social inadaptability.

Social integration is one of the best evidences of mental health and reflects the ability to establish (together with the desire to establish) healthy and effective interpersonal relationships. Poor contact with other human beings may be an index of emotional illness. However, in evaluating impairment resulting from the

VOL 51 ISS 85 MY 2 1986 UMI

ratable psychiatric disorders, social inadaptability is to be evaluated only as it affects industrial adaptability. The principle of social and industrial inadaptability as the basic criterion for rating disability from the mental disorders contemplates those abnormalities of conduct, judgment, and emotional reactions which affect economic adjustment, i.e., which produce impairment of earning capacity.

6. Section 4.130 is revised to read as follows:

§ 4.130 Evaluation of psychiatric disability.

The severity of disability is based upon actual symptomatology, as it affects social and industrial adaptability. Two of the most important determinants of disability are time lost from gainful work and decrease in work efficiency. The rating board must not underevaluate the emotionally sick veteran with a good work record, nor must it overevaluate his or her condition on the basis of a poor work record not supported by the psychiatric disability picture. It is for this reason that great emphasis is placed upon the full report of the examiner, descriptive of actual symptomatology. The record of the history and complaints is only preliminary to the examination. The objective findings and the examiner's analysis of the symptomatology are the essentials. The examiner's classification of the disease as "mild," "extensive," or "severe" is not determinative of the degree of disability, but the report and the analysis of the symptomatology and the full consideration of the whole history by the rating agency will be. In evaluating disability from psychotic disorders it is necessary to consider, in addition to present symptomatology or its absence, the frequency, severity, and duration of previous psychotic periods, and the veteran's capacity for adjustment during periods of remission. Repeated psychotic periods, without long remissions, may be expected to have a sustained effect upon employability until elapsed time in good remission and with good capacity for adjustment establishes the contrary. Ratings are to be assigned which represent the impairment of social and industrial adaptability based on all of the evidence of record. Evidence of material improvement in psychotic disorders disclosed by field examination or social survey should be utilized in determinations of competency, but the fact will be borne in mind that a person who has regained competency may still be unemployable, depending upon the level of his or her disability as shown by recent examinations and other evidence of record. (38 U.S.C. 210(c))

7. Section 4.131 is revised to read as follows:

§ 4.131 Mental disorders due to psychic trauma.

Certain mental disorders having their onset as an incident of battle or enemy action, or following bombing, shipwreck, imprisonment, exhaustion, or prolonged operational fatigue may at the outset be designated as gross stress disorder, "combat fatigue," "exhaustion," or any one of a number of special terms. These conditions may clear up entirely, permitting return to full or limited duty, or they may persist as one of the recognized mental disorders, particularly generalized anxiety disorder, or recur as post-traumatic stress disorder. If the mental disorder is sufficiently severe to warrant discharge from service, a minimum rating of 50 percent will be assigned with an examination to be scheduled within 6 months from discharge. (38 U.S.C. 210(c))

8. The four rating tables contained in § 4.132 are revised to read as follows:

§ 4.132 Schedule of ratings—mental disorders.

PSYCHOTIC DISORDERS

	Rating
9200 Removed.	
9201 Schizophrenia, disorganized type.	
9202 Schizophrenia, catatonic type.	
9203 Schizophrenia, paranoid type.	
9204 Schizophrenia, undifferentiated type.	
9205 Schizophrenia, residual type; schizoaffective disorder; other and unspecified types.	
9206 Bipolar disorder, manic, depressed, or mixed.	
9207 Major depression with psychotic features.	
9208 Paranoid disorders (specify type).	
9209 Major depression with melancholia.	
9210 Atypical psychosis.	
General Rating Formula for Psychotic Disorders:	
Active psychotic manifestations of such extent, severity, depth, persistence or bizarreness as to produce total social and industrial inadaptability	100
With lesser symptomatology such as to produce severe impairment of social and industrial adaptability	70
Extensive impairment of social and industrial adaptability	50
Definite impairment of social and industrial adaptability	30
Mild impairment of social and industrial adaptability	10
Psychosis in full remission	0
Convalescent rating in psychotic disorders: Upon regular discharge or release to non-bed care from a hospital where a beneficiary has been under care and treatment for a continuous period in the hospital of not less than 6 months, an open rating of 100 percent will be continued for 6 months. A Veterans Administration examination is mandatory at the expiration of the 6-month period, after which the condition will be rated in accordance with the degree of disability shown. Where the beneficiary has been under hospital care and treatment for less than 6 months and is not ratable at 100 percent under the rating formula, consideration should be given to § 4.29.	

ORGANIC MENTAL DISORDERS

	Rating
9300 Delirium Associated with infection, trauma, circulatory disturbance, etc.	
NOTE: Acute organic mental disorders with or without accompanying psychotic disorder are temporary and reversible. If psychiatric impairment attributable to such diagnosis continues beyond 6 months, the report of examination is to be returned to the examiner for reconsideration of the diagnosis.	
9301 Dementia associated with central nervous system syphilis.	
9302 Dementia associated with intracranial infection other than syphilis.	
9303 Dementia associated with alcoholism.	
9304 Dementia associated with brain trauma.	
9305 Multi-infarct dementia with cerebral arteriosclerosis.	
9306 Multi-infarct dementia due to causes other than cerebral arteriosclerosis.	
9307 Dementia associated with convulsive disorder (idiopathic epilepsy).	
9308 Dementia associated with disturbances of metabolism.	
9309 Dementia associated with brain tumor.	
9310 Dementia due to unknown cause.	
9311 Dementia due to undiagnosed cause.	
9312 Dementia, primary, degenerative.	
9313 Removed.	
9314 Removed.	
9315 Dementia associated with epidemic encephalitis.	
9316-9321 Removed.	
9322 Dementia associated with endocrine disorder.	
9323 Removed.	
9324 Dementia associated with systemic infection.	
9325 Dementia associated with drug or poison intoxication (other than alcohol).	
9326 Removed.	
Before attempting to rate organic mental disorders, rating specialist should become thoroughly acquainted with the relevant concepts presented by the current Diagnostic and Statistical Manual of the American Psychiatric Association and the following:	
(1) Under the codes 9300 through 9325 the basic syndrome of organic mental disorder may be the only mental disturbance present or it may appear with related "psychotic" manifestations. An organic mental disorder with or without such qualifying phrases will be rated according to the general rating formula for organic mental disorders assigning a rating which reflects the entire psychiatric picture.	
(2) An organic mental disorder, as defined in the American Psychiatric Association manual, is characterized solely by psychiatric manifestations. However, neurological or other manifestations of etiology common to the mental disorder may be present, and if present, are to be rated separately as distinct entities under the neurological or other appropriate system and combined with the rating for the mental disorder.	
General Rating Formula for Organic Mental Disorders:	
Impairment of intellectual functions, orientation, memory and judgment, and liability and shallowness of affect of such extent, severity, depth, and persistence as to produce total social and industrial inadaptability	100
Less than 100 percent, in symptom combinations productive of:	
Severe impairment of social and industrial adaptability	70
Extensive impairment of social and industrial adaptability	50
Definite impairment of social and industrial adaptability	30
Mild impairment of social and industrial adaptability	10
No impairment of social and industrial adaptability	0

PSYCHONEUROTIC DISORDERS

	Rating
9400 Generalized anxiety disorder.	
9401 Psychogenic amnesia; psychogenic fugue; multiple personality.	
9402 Conversion disorder; psychogenic pain disorder.	
9403 Phobic disorder.	
9404 Obsessive compulsive disorder.	
9405 Dysthymic disorder; Adjustment disorder with depressed mood; Major depression without melancholia.	
9408 Depersonalization disorder.	
9409 Hypochondriasis.	
9410 Other and unspecified neurosis.	
9411 Post-traumatic stress disorder.	
Read well notes (1) to (4) following general rating formula before applying the general rating formula.	
General Rating Formula for Psychoneurotic Disorders:	
The attitudes of all contacts except the most intimate are so adversely affected as to result in virtual isolation in the community. Totally incapacitating psychoneurotic symptoms bordering on gross repudiation of reality with disturbed thought or behavioral processes associated with almost all daily activities such as fantasy confusion, panic and explosions of aggressive energy resulting in profound retreat from mature behavior. Demonstrably unable to obtain or retain employment	100
Ability to establish and maintain effective or favorable relationships with people is severely impaired. The psychoneurotic symptoms are of such severity and persistence that there is severe impairment in the ability to obtain or retain employment	70
Ability to establish or maintain effective or favorable relationships with people is seriously impaired. By reason of psychoneurotic symptoms the reliability, flexibility and efficiency levels are so reduced as to result in extensive industrial impairment	50
Definite impairment in the ability to establish or maintain effective and wholesome relationships with people. The psychoneurotic symptoms result in such reduction in initiative, flexibility, efficiency and reliability levels as to produce definite industrial impairment	30
Less than criteria for the 30 percent, with emotional tension or other evidence of anxiety productive of mild social and industrial impairment	10
There are neurotic symptoms which may somewhat adversely affect relationships with others but which do not cause impairment of working ability	0
NOTE (1): Social impairment per se will not be used as the sole basis for any specific percentage evaluation, but is of value only in substantiating the degree of disability based on all of the findings.	
NOTE (2): The requirements for a compensable rating are not met when the psychiatric findings are not more characteristic than minor alterations of mood beyond normal limits; fatigue or anxiety incident to actual situations; minor compulsive acts or phobias; occasional stuttering or stammering; minor habit spasms or tics; minor subjective sensory disturbances such as anosmia, dizziness, loss of sense of taste, anesthesia, paresthesia, etc. When such findings actually interfere with employability to a mild, a 10 percent rating under the general rating formula may be assigned.	

PSYCHONEUROTIC DISORDERS—Continued

	Rating
NOTE (3): It is to be emphasized that vague complaints are not to be erected into a concept of conversion disorder. A diagnosis of conversion disorder must be established on the basis of specific distinctive findings characteristic of such disturbance and not merely by exclusion of organic disease. If a diagnosis of conversion disorder is found by the rating board to be inadequately supported by findings, the report of examination will be returned through channels to the examiner for reconsideration.	
NOTE (4): When two diagnoses, one organic and the other psychological or psychoneurotic, are presented covering the organic and psychiatric aspects of a single disability entity, only one percentage evaluation will be assigned under the appropriate diagnostic code determined by the rating board to represent the major degree of disability. When the diagnosis of the same basic disability is changed from an organic one to one in the psychological or psychoneurotic categories, the condition will be rated under the new diagnosis.	

PSYCHOLOGICAL FACTORS AFFECTING PHYSICAL CONDITION

	Rating

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 65

[A-5-FRL-3010-6]

Air Quality Implementation Plans; Delayed Compliance Order for General Motors Corporation, Saginaw Division, Saginaw, MI

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to issue an administrative order to General Motors Corporation, Saginaw Division. The Order requires the company to bring volatile organic hydrocarbon emissions from its metallic surface coating lines in Saginaw, Michigan, into compliance with the Michigan Department of Natural Resources Air Pollution Control Commission Rule R336.1621 (Michigan Rule 621), part of the federally approved Michigan State Implementation Plan (SIP). The company is unable to comply with these regulations at this time, and the proposed Order would establish an expeditious schedule requiring final compliance by December 31, 1986. Source compliance with the Order would preclude suits under the Federal enforcement and citizen suit provision of the Clean Air Act for violation of the SIP regulations covered by the Order. The purpose of this notice is to invite public comment and to offer an opportunity to request a public hearing on EPA's proposed issuance of the Order.

DATES: Written comments must be received on or before June 2, 1986, and requests for a public hearing must be received on or before May 19, 1986. All requests for a public hearing should be accompanied by a statement of why the hearing would be beneficial and a text or summary of any proposed testimony to be offered at the hearing. If there is significant public interest in a hearing, it will be held 21 days after notice of the date, time, and place of the hearing, which will be provided in a separate notice in the **Federal Register**.

ADDRESS: Comments and requests for a public hearing should be submitted to the Office of Regional Counsel, U.S. EPA, Region V, 230 South Dearborn Street, Chicago, Illinois 60604. Material supporting the Order and public comments received in response to this

notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Ms. Dorothy Attermeyer, Associate Regional Counsel, Office of Regional Counsel, U.S. EPA, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, at (312) 886-5312.

SUPPLEMENTARY INFORMATION: General Motors Corporation, Saginaw Division, operates a manufacturing plant in Saginaw, Michigan, which contains coating lines to coat metallic surfaces. The proposed Order addresses volatile organic hydrocarbon emissions from the metal coating lines at the Saginaw Division plant which are subject to Michigan Rule 621, part of a federally approved Michigan State Implementation Plan. This Order requires final compliance with Michigan Rule 621 by December 31, 1988, by coating reformulation or installation of control equipment. The source has consented to the terms of the Order and has agreed to meet the increments established in the Order during the period of this informal Rulemaking.

BILLING CODE 6560-50-M

FEDERAL MARITIME COMMISSION

46 CFR Part 572

[Docket No. 86-16]

Maritime Carriers; Conference Service Contract Authority

AGENCY: Federal Maritime Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Maritime Commission proposes to revise its regulations governing Agreements By Ocean Common Carriers and Other Persons Subject to the Shipping Act of 1984. The Proposed Rule would limit the discretion of a conference to implement service contract authority in a manner not expressly stated in its organic agreement prior to the filing of a modification with the Commission.

DATES: Comments due on or before July 1, 1986.

ADDRESS: Send comments (original and fifteen copies) to: John Robert Ewers, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573 (202) 523-5725.

FOR FURTHER INFORMATION CONTACT: Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573, (202) 523-5740.

SUPPLEMENTARY INFORMATION:

I. Background

The Shipping Act of 1984, 46 U.S.C. app. 1701-1720, (the Act or the 1984 Act) provides express statutory authority for individual ocean common carriers or conferences of ocean common carriers to enter into service contracts [1] with shippers or shippers' associations. This authority is stated in section 8(c) of the Act, 46 U.S.C. app. 1707(c), which provides, in relevant part:

> (c) Service Contracts.—An ocean common carrier or conference may enter into a service contract with a shipper or shippers' association subject to the requirements of this Act.

Section 8(c) also requires both individual carriers and conferences to file service contracts with the Commission on a confidential basis and to publish the essential terms of service contracts in tariff format. The purpose of such publication is to ensure that the essential terms of service contracts shall be available to all similarly situated shippers.[2]

Conference agreements on service contracts are subject to the same regulatory regime as other agreements that are within the Act's scope. Any agreement among the members of a conference regarding the regulation of the use of service contracts is made subject to the Act's requirements by section 4 of the Act.[3] Under section 5(a) of the Act, a "true copy" of every agreement described in section 4, including agreements on service contract authority, must be filed with the Commission.[4] In the case of an oral agreement, "a complete memorandum *specifying in detail the substance of the agreement* shall be filed." 46 U.S.C. app. 1704(a) (italics added).

Once filed, agreement provisions relating to service contracts are processed under the same procedures as any other section 4 agreement. Notice of the filing of such an agreement is published in the Federal Register in accordance with section 6(a), 46 U.S.C. app. 1705(a), thereby ensuring an opportunity for public scrutiny and comment. An agreement relating to service contracts is subject to possible rejection pursuant to section 6(b), 46 U.S.C app. 1705(b), and must observe the statutory waiting period before becoming effective, 46 U.S.C. app. 1705(c). Service contract authority is subject to review under the general standard, 46 U.S.C app. 1705(g), and for compliance with the prohibited acts section of the 1984 Act, 46 U.S.C. app. 1709. In short, a conference of ocean common carriers must have express service contract authority in an effective agreement in order to take collective action regarding the use of service contracts under the shield of the antitrust immunity conferred by section 7 of the Act, 46 U.S.C. app. 1706.

Conferences have stated their service contract authority under the 1984 Act in a variety of ways. Of particular concern are certain service contract authorities found in a number of currently effective conference agreements. Some service contract authorities are stated so generally as to allow virtually unlimited discretion with regard to any particular course of conduct that may be taken in regulating service contracts. Other service contract authorities provide, in varying degrees of detail, for a particular method of regulating service contracts but allow for a change from that method, and implementation of that change, upon a vote of the membership and without filing an amendment to the agreement with the Commission.

These service contract authorities do not appear to be in keeping with the regulatory requirements of the 1984 Act. The grant of antitrust immunity for collective action on service contracts is premised on the assumption that the agreement provision authorizing such action has been subjected to the opportunity for public comment and to a meaningful review by the Commission, both under the general standard and the prohibited acts' section of the 1984 Act, *prior to its implementation.* This pre-implementation clearance procedure would appear to be defeated (1) where a statement of authority is so general that it allows for a wide range of implementing actions, including actions which are diametrically opposed (*e.g.*, individual service contracts permitted versus individual service contracts prohibited), or (2) where the method of regulating service contracts may be changed and implemented by a vote of the members without filing an agreement modification with the Commission. The Proposed Rule addresses these types of conference service contract authority provisions.

[1] The term "service contract" is defined at 46 U.S.C. app. 1702(21).

[2] The Commission's rules governing the filing of service contracts and availability of essential terms appear at 46 CFR 580.7. On February 18, 1986, the Commission issued a notice of proposed rulemaking which would substantially revise its service contract regulations. *See* Docket No. 86-6, "Service Contracts", Notice of proposed rulemaking, 51 FR 5734 (February 18, 1986).

[3] Section 4(a)(7) of the Act, 46 U.S.C. app. 1703(a)(7), provides:

> (a) Ocean Common Carriers.—This Act applies to agreements by or among ocean common carriers to—
>
> . . . . .
>
> (7) regulate or prohibit their use of service contracts.

[4] Section 5(a) of the Act, 46 U.S.C. app. 1704(a), states in part:

> (a) Filing Requirements.—A true copy of every agreement entered into with respect to an activity described in section 4 of this Act shall be filed with the Commission . . .

II. The Proposed Rule

The Proposed Rule would require a conference agreement that contained service contract authority to state specifically the method by which the use of service contracts will be regulated pursuant to that authority. A general statement of authority, without more, could not be implemented prior to filing an agreement modification with the Commission. The Proposed Rule would also require that any change in the stated conference method of regulating service contracts could not be implemented prior to filing an agreement modification with the Commission. Finally, as a strictly technical matter of format, the Proposed Rule would reserve a specific numbered article of conference agreements for the statement of service contract authority.

The Proposed Rule would require that any conference agreement that contained service contract authority state the specific method by which service contracts are regulated pursuant to that authority. The Proposed Rule would preclude a conference from implementing a general statement of service contract authority prior to the filing and effectiveness of an agreement modification stating the specific course of conduct that will be followed.

An example of a general statement of service contract authority addressed by the Proposed Rule would be a conference agreement which contained only the following language:

> The conference may regulate or prohibit its member lines from unilaterally entering into service contracts and may also regulate or prohibit any member line from taking independent action on any service contract offered by the conference.

Such a statement is little more than a paraphrase and slight expansion of the jurisdictional language of section 4 of the Act. It provides no indication of the specific course of conduct to be followed with respect to service contracts. Such an agreement, on its face, would not disclose at any particular time whether service contracts are totally prohibited, whether individual service contracts are permitted, whether conference or individual service contracts are subject to terms and conditions, or whether independent action may be taken on any service contract. Such a statement is so broad as to defeat any meaningful pre-implementation review by the Commission under the general standard or the prohibited acts or comment by the shipping public. Moreover, a third party reviewing the effective agreement would be unable to determine what course of conduct the conference was following pursuant to its service contract authority.

A recitation of the jurisdictional language of section 4, without more, would not appear to be an adequate statement of agreement authority that is intended to govern actual business practices. In this regard, it should be noted that section 5(a) of the Act requires that "[i]n the case of an oral agreement, a complete memorandum *specifying in detail* the substance of the agreement shall be filed." Presumably written agreements would also be required to specify in detail the substance of the agreement.[5]

This interpretation is consistent with prior Commission precedent. In *Joint Agreement Between Member Lines of the Far East Conference and the Member Lines of the Pacific Westbound Conference*, 8 F.M.C. 553 (1965), *aff'd in part, rev'd in part, Pacific Westbound Conference v. Federal Maritime Commission*, 440 F.2d 1303 (5th Cir. 1971), *cert. denied*, 404 U.S. 861 (1971) (*Joint Agreement*), the Commission had before it an agreement between two conferences which raised the issue as to whether the agreement was a true and complete agreement between the parties. The Commission found that the agreement was nothing more than ". . . evidence of a general intention of the parties to enter into concerted rate-making. It sets out no details, no procedures . . . nor does it inform any interested person as to how the agreement is to work." *Joint Agreement, supra*, 8 F.M.C. at 558. The Commission formulated the following test for determining whether the agreement is set out in adequate detail:

> Although not articulated in past cases, we are of the opinion that the applicable test here is whether or not the agreement as filed with the Commission and as approved sets out in adequate detail the procedures and arrangements under which the concerted activity permitted by the agreement is to take place. Any interested party should be able, by a reading of the agreement, to ascertain how the agreement is to work, without resort to inquiries of the parties or an investigation by the Commission. This is not to say that we are limiting the scope of "routine actions" which need not be the subject of section 15 filings; we are merely giving purpose to the requirements of the section. We can see no reason for the filing of agreements if they do not inform the Commission and the public in more than the barest outline as to how the agreement is to be carried out. No one reading Agreement No. 8200 could reasonably have been informed as to the procedures under which the respondent conference were carrying out the agreement nor as to the nature of the supplementary agreements which respondents claim are within the contemplation of Agreement No. 8200.

Joint Agreement, supra, 8 F.M.C. at 558. Similarly, in *Agreement 9448—N. Atlantic Outbound/European Trade*, 10 F.M.C. 299, 307 (1967), the Commission held that agreements which were so broadly worded that they failed to ". . . set forth clearly, and in sufficient detail to appraise the public just what activities will be undertaken . . ." would be subject to disapproval under section 15 of the Shipping Act, 1916. Although these cases were decided under the 1916 Act, the same principles regarding the degree of detail and specificity required in agreements would appear to apply to agreements filed under the 1984 Act.

At a minimum, such detail with respect to service contract authority which is intended to govern actual operations would appear to include the following: (1) Whether the conference permits or prohibits service contracts; (2) if conference service contracts are permitted, the significant conditions or terms under which they may be offered; (3) whether the conference permits or prohibits individual service contracts; (4) if individual service contracts are permitted, the significant conditions or terms under which they may be offered; (5) whether the conference permits or prohibits independent action on service contracts. These would appear to be, at a minimum, the items necessary in order that the Commission may adequately review the ongoing rights and responsibilities created under the agreement.

This treatment of service contract authority would be consistent with current Commission policy regarding the review under the 1984 Act of other types of agreement authority. For example, a pooling agreement which merely recited the statutory language stating that the parties are authorized to ". . . pool or apportion traffic revenues, earnings, or

[5] The Commission's Agreement Rules require that an agreement be "complete" and that it "specify in detail the substance of the understanding of the parties." 46 CFR 572.403(a).

BEST COPY AVAILABLE

VOL 51 ISS 85 MY 2 1986 UMI

losses . . ." would be deficient. It would provide no information as to pool accounting methods, pool penalties or other types of provisions. Some further agreement as to detail would in fact be necessary for the pool to function. Similarly, an agreement which simply stated that the parties may ". . . allot ports or restrict or otherwise regulate the number and character of sailings between ports . . ." could be said to be inadequate. There would be no indication in such a statement of agreement authority as to how the operations of the parties would be conducted. This same objection would apply to agreement authority that merely authorized the parties to regulate or prohibit the use of service contracts. The Proposed Rule would therefore require that conferences with general service contract authority file a modification stating the specific method of treating service contracts prior to implementing that general authority.

The Proposed Rule would also preclude a conference from implementing changes made in its method of regulating service contracts by a vote of the members prior to filing a modification with the Commission. A number of conference agreements contain provisions which allow the conference a substantial amount of flexibility and discretion to regulate the use of service contracts.[6] Such provisions allow the conference to change its method of regulating service contracts by a vote of the members and without filing a modification with the Commission reflecting that change. In some instances there may be virtually unlimited discretion with regard to whether, and the manner in which, service contracts may be offered. For example, a conference agreement might expressly provide that the members may offer individual service contracts. The agreement authority, however, might state further that the members by a vote at a meeting may prohibit, limit or set standards for the use of individual service contracts. In such a case, the parties to the agreement could abolish the right, granted by the agreement, to enter into individual service contracts, as expressly provided for in the agreement, simply by voting to prohibit them and without formal modification of the conference agreement. The result might be that an agreement would have a provision which, on its face, expressly granted the right to offer individual service contracts while the actual practice under the agreement would be that no individual service contracts could be offered. Or the parties could set limits, establish standards, impose terms and conditions upon the use of service contracts or prohibit or limit independent action with respect to such contracts. Subsequently, the members could reinstate the right to offer individual service contracts by another vote of the members or remove particular terms and conditions. In such an example, it is not possible at any given time to know from the face of the agreement itself the particular course of conduct which a conference has chosen with respect to service contracts. Such provisions therefore raise the same concerns as are raised by general statements of service contract authority.

In addition, a provision which would allow for change by conference vote could be implemented in a manner which might violate the prohibited acts section of the 1984 Act, 46 U.S.C. app. 1709, for example, by applying restrictions on service contracts to an individual conference member. Moreover, it is not inconceivable that a change in the method of regulating service contracts could run afoul of the general standard. Requiring the filing of a modification would allow the Commission an opportunity to evaluate the proposed authority and perhaps negotiate revisions or seek a court injunction prior to effectiveness.

Pre-implementation review of changes in conference service contract authority is also important from the perspective of the shipping public. For example, shippers should have an opportunity to comment if a conference that offered service contracts should decide to prohibit them.[7] While removal of the right to offer individual service contracts is clearly an option available to conference parties, the 1984 Act could be interpreted to require that it be done only through the filing of an appropriate modification with the Commission. This would also appear to be required by § 572.408(b) of the Commission's Agreement Rules.[8]

The only exception to the requirement of § 572.408(b) is in the case of an agreement that is considered interstitial implementation of authority. Such actions would include those which concern routine operational or administrative matters such as the establishment of tariff rates, rules and regulations. *See* 46 CFR 572.408(c). However, a decision to prohibit offering of individual service contracts would not appear to be a "routine operational or administrative matter" as contemplated by subsection (c).

The exercise of service contract authority is unlike the exercise of general ratemaking authority. Certain changes in tariff rates, fares, and changes generally may be made by conference vote without further agreement modification. However, there was express support for this in the legislative history of the 1916 Act. *See Agreement 7770—Establishment of a Rate Structure*, 10 F.M.C. 61, 66 (1966), *aff'd sub nom., Persian Gulf Outward Freight Conference v. Federal Maritime Commission*, 375 F.2d 335 (D.C. Cir. 1967) (*Agreement 7770*). Moreover, it is significant that even in the case of ratemaking authority, rate actions which "have the effect of restructuring competition in a manner not reasonably to be inferred from the basic agreement" could not be implemented without specific agreement authority. *Agreement 7770, supra*, 10 F.M.C. at 66. Thus, in *Agreement 7770*, the Commission held that a two-level rate system based upon vessel flag could not be effectuated prior to Commission approval. This rationale suggests that specific implementation of such conference authority could only be accomplished through the filing of a modification with the Commission.

In *Agreement 7770*, the Commission established general guidelines to determine whether such further agreements are interstitial to the underlying authority. Further agreements are not interstitial if they: (1) Introduce an entirely new scheme of rate combination and discrimination not embodied in the basic agreement, (2) represent a new course of conduct, (3) provide new means of regulating and controlling competition, (4) are not limited to the pure regulation of intraconference competition, or (5) constitute an activity the nature and manner of effectuation of which cannot be ascertained by a mere reading of the basic agreement. *Agreement 7770, supra*, 10 F.M.C. at 65. *See also Tariff FMC 6, Rule 22 of the Continental North Atlantic Westbound Freight Conference*, 21 F.M.C. 594, 597 (1978), *vacated and remanded, Interpool Ltd. v. Federal Maritime Commission*, 663 F.2d 142 (D.C. Cir. 1980). Further agreements made pursuant to such conference authority would appear to fall under at least categories 2 and 3 above and, arguably, category 5.

While the 1984 Act does authorize carrier agreements to control service contracts, including the use of individual service contracts, it would not appear to confer an absolute discretion upon a conference or rate agreement to take any action it wishes by a mere vote of the members without filing a modification. Requiring the filing of a modification with the Commission should not unduly restrict the flexibility of conferences in making changes in their service contract practices in light of the relatively short waiting period under the 1984 Act and the availability of expedited review under section 6(e) of the Act. 46 U.S.C. app. 1705(e).

The Proposed Rule would also include a requirement that service contract authority be contained in Article 14 of conference agreements. This requirement is strictly technical in nature and will facilitate the initial review and periodic evaluation of conference service contract authority.

II. Conclusion

For the reasons stated above, the Commission proposes to promulgate a rule that woud require conferences to file an appropriate agreement modification with the Commission prior to implementing general service contract authority and to file a modification prior to implementing a change in the existing method of regulation service contracts accomplished by a vote of the members. The rule also contains a technical format requirement.

The Federal Maritme Commission has determined that the proposed rule, if adopted, is not a "major rule" as defined in Executive Order 12291, 46 FR 12193, February 27, 1981, because it will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) a significant adverse effect on competition, employment, investment, productivity, innovations, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, the Chairman of the Federal Maritime Commission certifies that the proposed rule will not, if adopted, have a significant economic impact on a substantial number of small entities, including small businesses, small organizational units and small governmental jurisdictions.

The collection of information requirements contained in this rule have been submitted to the Office of Management and Budget for review under section 3504(h) of the Paperwork Reduction Act of 1980, 44 U.S.C. 3504(h). A copy of the request for OMB review and supporting documentation may be obtained from the Commission's Director, Bureau of Administration. Comments on the information collection aspects of this rule should be submitted to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention: Desk Officer for the Federal Maritime Commission.

Administrative practice and procedure; Antitrust; Contracts; Maritime carriers; Report and recordkeeping requirements.

PART 572—[AMENDED]

Therefore, Part 572 of Title 46, Code of Federal Regulations, is proposed to be amended as follows:

1. The Authority Citation for Part 572 continues to read as follows:

Authority: 5 U.S.C. 553, 46 U.S.C. app. 1701–1717, 1708–1710, 1712 and 1714–1717.

2. Paragraph (a) of § 572.502 is amended to add a new paragraph (a)(5) to read:

§ 572.502 Organization of conference and interconference agreements.

(a) * * *

(5) *Article 14—Service Contracts.*

(i) Each conference agreement that contains service contract authority shall specify the method for regulating or prohibiting the use of service contracts by the conference or by individual members.

(ii) Any significant change in the method of regulating service contracts, whether accomplished by a vote of the membership or otherwise, shall not be implemented prior to the filing and effectiveness of an agreement modification reflecting that change.

(iii) For the purpose of this section, a significant change includes one which: permits or prohibits conference service contracts; permits or prohibits individual service contracts; establishes terms or conditions under which conference or individual service contracts may be offered; or permits or prohibits independent action on service contracts.

* * * * *

By the Commission.

John Robert Ewers,

Secretary.

[FR Doc. 86-9809 Filed 5-1-86; 8:45 am]

BILLING CODE 6730-01-M

[6] The voting requirements range from conferences which permit approval by majority vote to conferences which permit individual service contracts only upon a unanimous vote of the members.

[7] The importance of such pre-implementation review is illustrated by the Commission's recent experience with the service contract amendment to the Transpacific Westbound Rate Agreement. On June 10, 1985, the Transpacific Westbound Rate Agreement filed a modification which would have prohibited all new service contracts and the renewal of existing service contracts. The proposed elimination of service contracts produced a storm of protest from shippers (some of whom were parties to existing service contracts) and expressions of concern by members of Congress. Subsequently, the modification was withdrawn.

[8] Section 572.408(b), 46 CFR 572.408(b), states: Except as provided in paragraph (c) of this section, agreement clauses which contemplate a further agreement or give the parties authority to discuss and/or negotiate a further agreement, the terms of which are not fully set forth in the enabling agreement, will be permitted only if the enabling agreement indicates that any such further agreement cannot go into effect unless filed and effective under the Act.

Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations. (Ouray, Colorado); MM Docket No. 86-156, RM-5135.

Adopted: April 14, 1986.

By the Chief, Policy and Rules Division.

Released: April 25, 1986.

1. The Commission has before it for consideration a petition for rule making filed by Janice Mittelmark, seeking the

VOL 51 ISS 85 MY 2 1986 UMI

reallotment of Class C Channel 297 [1] from Silverton, Colorado, to Ouray, Colorado, as that community's second local FM service.

2. A staff engineering study has determined that Channel 289 can be allotted to Ouray in conformity with the minimum distance separation requirements of § 73.207 of the Commission's Rules.

3. Although petitioner indicated she would apply for Channel 297 (see fn. 1, *supra*), in view of our proposed action herein, she should advise in her comments whether she will now apply for Channel 289, if it is allotted.

4. We believe the proposal warrants consideration since it could provide a second local channel at Ouray for the expression of diverse viewpoints and programming. Therefore, we shall seek comments on the proposal to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules, as follows:

City	Channel No.	
	Present	Proposed
Ouray, CO	285A	285A, 289

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

6. Interested parties may file comments on or before June 16, 1986, and reply comments on or before July 1, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: Janice Mittelmark, P.O. Box 2455, Durango, Colorado 81300.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Nancy J. Joyner, Mass Media Bureau (202) 634–6530. However, members of the public should note that form the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(c)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, It is proposed to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

[FR Doc. 86–9853 Filed 5–1–86; 8:45 am]

BILLING CODE 6712-01-M

[1] Petitioner requested the reallotment of Channel 297 from Silverton to Ouray under the provisions of § 73.203(b) of the Commission's Rules. However, that rule was abolished as a result of the Commission's *Suburban Community Policy*, 53 R.R. 2d 982 (1983). Moreover, an application for Channel 297 at Silverton has been filed by Mrs. Betty Retneke (BPH–850711PG) and accepted for tenderability. Therefore, in accordance with established Commission policy, we shall not consider its reallotment to Ouray, unless it could be accorded a clear comparative preference. See, *Martin and Salyersville, Kentucky*, 60 R.R. 2d 802 (1981). However, rather than delay the process for a comparative analysis, we have substituted Class C Channel 289 for consideration herein in an effort to accommodate petitioner's expressed interest in serving Ouray.

[MM Docket No. 86–154; RM–4968; RM–5068; RM–5360]

FM Broadcast Station in Conway, Hot Springs and Wrightsville, AR, Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein considers three mutually-exclusive proposals. The first seeks the allotment of FM Channel 290A to Conway, Arkansas, as that community's third commercial service, in response to a petition filed by KCON Broadcasting Co., Inc. The second requests the substitution of Channel 290C1 for 292A at Hot Springs, Arkansas, and modification of the license of Station KACQ(FM) in response to a request filed by Noalmark Broadcasting Corp. This allotment could provide a second wide area coverage service to that community. The third seeks the allotment of Channel 290A to Wrightsville, Arkansas, as that community's first local broadcast service, in response to a petition filed by Wrightsville Communications Company.

DATES: Comments must be filed on or before June 16, 1986, and reply comments on or before July 1, 1986.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION:

Notice of Proposed Rulemaking

In the matter of amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations (Conway, Hot Springs and Wrightsville, Arkansas), MM Docket No. 86–154, RM–4968, RM–5068, and RM–5360.

Adopted: April 11, 1986.
Released: April 25, 1986.

By the Chief, Policy and Rules Division.

1. The Commission has before it for consideration three mutually exclusive petitions for rule making. KCON Broadcasting Company, Inc. ("KCON") [1] seeks the allotment of Channel 290A to Conway, Arkansas (RM–4968), as that community's third commercial FM service. The second proposal, filed by Noalmark Broadcasting Corporation ("Noalmark"), licensee of Station KACQ(FM) (Channel 292A), Hot Springs, Arkansas, requests the substitution of Channel 290C1 for Channel 292A and modification of its license accordingly, in order to provide that community with its second wide area coverage FM service (RM–5068). The third proposal, filed by Wrightsville Communications Company ("WCC") seeks the allotment of Channel 290A to Wrightsville, Arkansas, as that community's first local broadcast service (RM–5360).

2. Conway (population 20,375),[2] in Faulkner County (population 48,192), is located approximately 41 kilometers (25 miles) northwest of Little Rock, Arkansas. The community currently receives local service from Stations KTOD-FM (Channel 224A) and KMJX(FM) (Channel 286), as well as one fulltime and one daytime-only AM stations. Hot Springs (population 35,781), in Garland County (population 70,531), is located approximately 76 kilometers (47 miles) southwest of Little Rock. (it receives local service from commercial FM Stations KSPA (Channel 244A), KWBO (Channel 248C1) and KACQ (Channel 292A), as well as one fulltime and two daytime only AM stations. Wrightsville (population 350),[3] in Pulaski County (population 340,613), is located approximately 17 kilometers (11 miles) southeast of Little Rock. It presently has no local broadcast service.

3. Section 73.207(b) of the Commission's Rules requires that co-channel Class A stations be separated by a distance of 105 kilometers (65 miles). However, the distance between Conway and Wrightsville is 58 kilometers (36 miles). Likewise, co-channel Class A and C1 stations must be 196 kilometers (122 miles) apart whereas here, the distance between Conway and Hot Springs is 85 kilometers (53 miles) and 78 kilometers (48 miles) between Wrightsville and Hot Springs. In an effort to resolve these conflicts, a staff engineering study was performed. Another channel (245A) was found to be available for allotment to either Conway or Wrightsville. Therefore, all three proposals must be considered comparatively.

4. In view of our initial findings, we shall optionally propose to allot Channel 245A or 290A to Conway or Wrightsville, or substitute Channel 290C1 for Channel 292A at Hot Springs. Channel 245A can be allotted to Conway with a site restriction 9.2 kilometers (5.7 miles) southwest to avoid short-spacing to Station KAWW–FM (Channel 244A), Heber Springs, Arkansas. Channel 245A can be allotted to Wrightsville with a site restriction 10.7 kilometers (6.6 miles) northwest to negate a spacing deficiency to Channel 243A, England, Arkansas, for which an application is pending (851213ME), and to Station KWEH(FM) (Channel 246C1), Camden, Arkansas. Optionally, Channel 290A can be allotted to Conway with a site restriction 3.0 kilometers (1.9 miles) northwest to avoid a conflict with the 16 kilometer protected buffer zone of Station WGKX(FM) (Channel 290), Memphis, Tennessee. Channel 290A can be allotted to Wrightsville with a site restriction 12.4 kilometers (7.7 miles) west to also avoid short-spacing to Station WGKX(FM), Memphis. However, at a transmitter site located that distance from Wrightsville, we must require WCC, if it wishes to use that channel, to provide showings reflecting that city-grade service could be provided. The Hot Springs modification proposal to substitute Channel 290C1 for Channel 292A can be accommodated at petitioner's present transmitter site.

5. Although KCON and WCC each indicated their interest in applying for Channel 290A, in view of our optional proposals herein, they should advise in their comments whether they will now apply for Channel 245A.

6. As we are unaware at this time of any other Class A or C1 channels for the proposed communities,[4] we shall provide each proponent the opportunity to demonstrate in their comments why their proposal should prevail. In this regard, the parties should be guided by the priorities set forth in *Revision of FM Assignment Policies and Procedures*, 90 F.C.C. 2d 88 (1982). We shall also propose to modify the license of Station KACQ(FM), at Hot Springs on its requested channel, as requested by Noalmark, in the event Channel 290C1 is substituted for Channel 292A. Pursuant to Commission precedent, should another interest in the Hot Springs allotment be shown, the modification of Station KACQ(FM) could not be made unless at least one additional equivalent channel is available in the community to accommodate any other expressions of interest. See, *Modification of FM and TV Station Licenses*, 98 F.C.C. 2d 916 (1984).[5]

[1] KCON is the licensee of Station KCON(AM), Conway.

[2] Population figures were taken from the 1980 U.S. Census unless otherwise indicated.

[3] Population figure taken from the Rand McNally Atlas, 1985 Ed. Although the 1980 U.S. Census lists "Talton-Wrightsville" (population 1,494), as a census designated place, it cannot be determined therefrom the actual population attributed to Wrightsville.

[4] WCC should note however that Channel 290A may become available at Wrightsville in the event Stations KKTZ(FM) (Channel 290), Mountain Home, Arkansas and KVMA–FM (Channel 300), Magnolia, Arkansas, do not elect to upgrade their facilities to maintain their Class C status. Therefore, WCC may wish to seek a determination from those stations as to their intentions. If, in fact, they are not intending to move within their 16 kilometer protected buffer, such information from them should be submitted in the rule making context to allow our consideration of the availability of Channel 290A at Wrightsville.

[5] See, *Notice of Proposed Rule Making*, MM Docket 85–313, 50 FR 45439, October 31, 1985, wherein the Commission has under consideration a proposal to modify licenses on the co-channel or adjacent channels, such as Hot Springs, without the

Continued

VOL 51 ISS 85 MY 2 1986 UMI

7. In view of the above, the Commission considers it appropriate to solicit comments on the optional amendments to the FM Table of Allotments, § 73.202(b) of the Commission's Rules, as follows:

City	Channel No.	
	Present	Proposed
Option I		
Conway, AR	256A, and 288A	256A, 240A, and 288A
Hot Springs, AR	244A, 240, and 288A	244A, 240, and 288A.
Option II		
Wrightsville, AR		288A
Hot Springs, AR	244A, 240, and 288A	244A, 240, and 288C1.
Option III		
Conway, AR	288A, and 288A	288A, 240A, and 288A.
Wrightsville, AR		280A.
Option IV		
Conway, AR	256A, and 288A	288A, 288A, and 288A.
Wrightsville, AR		240A.

8. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

9. Interested parties may file comments on or before June 16, 1986, and reply comments on or before July 1, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows:

Dan Winn and Associates, P.O. Box 214, Little Rock, Arizona 72203, (consultant to KCON Broadcasting Co., Inc.).

Richard J. Hayes, Jr., Esq., Law Offices of Richard J. Hayes, Jr., 1300 Black Meadow Rd., Spotsylvania, Virginia 22553, (counsel for Wrightsville Communications Company).

Robert W. Coll, Esq., McKenna, Wilkinson & Kittner, 1150 17th Street, N.W., Washington, D.C. 20036, (counsel for Nealmark Broadcasting Corporation).

10. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 Fed. Reg. 11549, published February 9, 1981.

11. For further information concerning this proceeding, contact Nancy V. Joyner, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission,

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(c)(1), 303(g) and (r), and 307(b) of the Communications Act of 934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC.

[MM Docket No. 86-157; RM-5079]

FM Broadcast Station in Spring Valley, MN, Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes the allotment of FM Channel 286A to Spring Valley, Minnesota, in response to a petition filed by John M. Rolli. This allotment could provide for a first FM broadcast service for the community.

DATES: Comments must be filed on or before June 16, 1986, and reply comments on or before July 1, 1986.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Notice of Proposed Rulemaking

In the matter of amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations (Spring Valley, Minnesota), MM Docket No. 86-157 RM-5079.

Adopted: April 17, 1986.

Released: April 25, 1986.

By the Chief, Policy and Rules Division:

1. A petition for rule making has been filed by John M. Rolli ("petitioner"), seeking the allotment of FM Channel 286A to Spring Valley, Minnesota, as that community's first broadcast service. Petitioner submitted information in support of the proposal and stated his intention to file an application for the channel.

2. Channel 286A can be allocated to Spring Valley, Minnesota, in compliance with the minimum distance separation requirements of § 73.207 of the Commission's Rules.

PART 73—[AMENDED]

§ 73.20 [Amended]

3. In view of the fact that the proposed allocation could provide a first FM broadcast service to Spring Valley, Minnesota, the Commission believes it is appropriate to propose amending the FM Table of Allotments, § 73.202(b) of the Commission's Rules, with respect to the following community:

City	Channel No.	
	Present	Proposed
Spring Valley, MN		286A

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

5. Interested parties may file comments on or before June 16, 1986, and reply comments on or before July 1, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: James E. Price, Vice President, Sterling Communications, Inc., Suite 418 Uptain Building, Chattanooga, Tennessee 37411-4065 (consultant to the petitioner).

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend Sections 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(c)(i), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to the effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four

VOL 51 ISS 85 MY 2 1986 UMI

copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at it headquarters, 1919 M Street, NW., Washington, DC.

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Part 192

[Docket No. PS-67; Notice 2]

Transportation of Natural and Other Gas by Pipeline; Interior Piping

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Withdrawal of Advance Notice of Proposed Rulemaking (ANPRM).

SUMMARY: This notice withdraws a proposal published in the Federal Register, Vol. 45, No. 66, at 22118 on April 3, 1980, to generate information to be used in evaluating the need for Federal regulation of gas piping inside buildings. Current pipeline safety regulations apply to gas distribution lines up to the meter at which point it is transferred to the consumer even where the gas meter is located inside a building. Review of comments to Notice 1 of this docket and comments received at both the December 13, 1983, and the December 10, 1985, Technical Pipeline Safety Standards Committee (TPSSC) meetings has convinced the RSPA that existing regulations defining a gas operator's responsibility for gas piping inside a building are appropriate.

FOR FURTHER INFORMATION CONTACT: Robert F. Langley, (202) 426-2082, regarding the contents of this notice or the Dockets Branch, (202) 426-3148, regarding copies of this notice or other information in the docket.

SUPPLEMENTARY INFORMATION: The National Transportation Safety Board (NTSB) in Safety Recommendation P-76-10 in pipeline accident report NTSB-PAR-76-2 issued on February 19, 1976, recommended that the Department "amend 49 CFR Part 192 to define more realistically an operator's responsibility for gas piping inside buildings." The report (a copy of which is in the docket and may be obtained from the NTSB), described an interior piping accident which involved a pressure tank rupture in an office building in New York City. Although it was not a contributing factor in the accident, NTSB made its recommendation, in part, because the New York State gas pipeline safety regulations stopped at the building wall, while the Federal rules in Part 192 extended to the outlet of the interior meter. To the best of RSPA's knowledge, there have been no similar types of accidents anywhere under RSPA's jurisdiction in the more than 12 years since this accident, and the disparity between State and Federal regulatory coverage of interior piping is limited to New York. The State of New York, meanwhile, has instituted more stringent rules, helping to prevent this type of accident.

A Gas Research Institute Report, "Safety Research Plan for Gas Utilization," done by the Arthur D. Little Corporation in June 1983 (GRI No. 5081-352-0489) delves into gas incidents inside buildings at some length. This report shows that there is a probability of 1,854 fires or explosions occurring on interior piping annually out of the 40,000,000 gas service lines. This figure included fires or explosions occurring at gas appliances and piping beyond RSPA's regulations. The report also showed that the probability of a fatal accident occurring on interior piping serving nearly 50,000,000 customers would be one in 18 years.

To get some idea as to whether or not a safety problem existed with the portion of interior gas piping considered to be within the scope of 49 CFR Part 192 and also gain information to aid in responding to the NTSB safety recommendation regarding interior piping, the Office of Pipeline Safety Regulation issued an ANPRM. The ANPRM was published in the Federal Register as Docket No. PS-67; Notice 1 on April 3, 1980, in Vol. 45, No. 66 at 22118.

According to over 90 percent of the gas distribution operators commenting on the ANPRM, who serve at least 70 percent of the 50,000,000 present day gas customers in the nation, the National Fuel Gas Code, or a local version of it, is in effect for interior piping in the area in which they distribute gas. Usually this Code is given the force of law by local building codes. The National Fuel Gas Code covers the installation of gas piping systems inside buildings. This Code is developed by joint committees of the American National Standards Committee Z223 and the National Fire Protection Association and is classified as ANSI Z223.1 and NFPA 54. The Code states in its scope that:

Coverage of piping systems extends from the point of delivery to the connections with each gas utilization device. For other than undiluted liquefied petroleum gas systems, the *point of delivery is the outlet of the service meter assembly*, or the outlet of the service regulator or service shutoff valve when no meter is provided. For undiluted liquefied petroleum gas systems, the point of delivery is the outlet of the first stage pressure regulator. (emphasis added)

There were 14 questions asked in the ANPRM. These questions dealt with the existing extent and coverage of interior piping by the Part 192 regulations. The questions also dealt with the National Fuel Gas Code and similar local codes and whether or not Federal standards should incorporate the National Fuel Gas Code in Part 192.1 Questions on the relative safety of interior piping also were asked. There were 77 commenters who responded. These included several State regulatory agencies, gas distribution system operators, trade associations, including the National Association of Home Builders, and standards committees, including the Building Officials and Code Administrators International, and the ANSI Z223 Committee.

On the question as to whether State and local codes were covering interior piping in satisfactory manner, 81 percent of the commenters thought that they were and only 4 percent thought something additional was needed. Under the existing pipeline regulatory scheme, State codes for interior piping upstream of the meter are at least as stringent as the Federal standards.

Forty-four percent of the commenters through that Federal standards for interior piping (piping upstream of the meter outlet) should continue to apply but only if readily accessible. Twenty-one percent thought that Federal standards should end at the basement wall or the meter outlet whichever is further upstream. The commenters in favor of continuing Federal regulations up to the meters, if the piping was accessible, did so for continuity since NEPA 54 starts at the gas meter. Those commenters in favor of ending jurisdiction at the entrance to the building served cited the difficulties of policing piping on private property and cost of inspections to assure the safety of piping which they believed that once it was completed, was subject to the control of the property owner.

On the question of incorporating the National Fuel Gas Code into Part 192, over 42 percent of the commenters were against it. Three percent favored this idea.

The TPSSC meeting on December 13, 1983, at which the ANPRM was discussed produced about the same

results as the response from the commenters. Some members thought that REPA should not change the existing regulations without more substantive data with regard to interior accidents. The Committee's report issued January 9, 1984, stated in part: "It was a consensus of the Committee that in the absence of any safety data to the contrary, RSPA should withdraw its proposed rulemaking regarding interior piping." At their December 10, 1985, meeting, the TPSSC voted that stopping the pipeline safety regulations at the building wall would not be reasonable. Members were concerned that such a change could cloud the safety of interior piping. The Committee also felt that gas distribution operators are well aware of their responsibilities for gas piping up to and including the gas meter under the present regulations.

Conclusions

In deciding whether to continue this proceeding beyond the ANPRM stage, RSPA has considered the NTSB recommendation, the comments to the ANPRM, the incidence of interior piping accidents, and the TPSSC views. From the NTSB recommendation, one might conclude that operators either are not aware of their obligations under Federal regulations in regard to interior piping or those obligations are somehow inappropriate. Yet, there was no indication from the commenters or the TPSSC that the former might be true. Also, although some industry commenters would like to be absolved of all responsibility for interior piping, no one has seriously made the case that the applicable Federal rules are too onerous or otherwise in appropriate. Certainly there are some "difficulties" in compliance as in gaining access to run leak or corrosion checks, but transportation of gas to an interior delivery point demands close attention to safety. Further, the impact of the "difficulties" has to be considered in view of the small proportion of interior piping (upstream of meters) that is subject to the RSPA rules.

Were RSPA to relax some of the so called "difficult" rules or to pull away entirely from interior piping jurisdiction, other existing standards would not fill the gap. The National Fuel Gas Code, which applies to other interior piping, starts at the outlet of interior meters (not the building wall) and does not apply to operation and maintenance problems associated with the termination of gas service lines inside buildings. It was this potential clouding fof safety control that formed the basis for the TPSSC vote, and has persuaded RSPA not to relax the present rules.

At the same time, neither the RSPA data nor the GRI study show any need for expanded RSPA involvement with interior piping beyond the limits now set by Part 192.

For these reasons, the proposals presented in Docket PS-67; Notice 1 are hereby withdrawn.

Issued in Washington, DC, on April 28, 1986.

Robert L. Paullin,

Director, Office of Pipeline Safety, Research and Special Programs Administration.

BILLING CODE 4910-60-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1135

[Ex Parte 290 (Sub-2)]

Practice and Procedure; Railroad Cost Recovery Procedures

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking and reopened proceeding.

SUMMARY: The Commission proposes to modify its rules governing railroad cost recovery procedures by requiring railroads to adjust their rates to take into account declines in the rail cost adjustment factor. The recent sharp decline in rail costs has convinced us that we must reexamine our rules to determine whether these adjustments should be adopted. By this notice, the Commission also seeks comments on how the agency can mitigate errors in forecasting costs in a previous quarter, and how compliance with any rate reductions ordered should be monitored.

DATE: Comments are due May 16, 1986. Replies are due May 23, 1986.

FOR FURTHER INFORMATION CONTACT: William T. Bono, Bureau of Accounts, (202) 275-7354

or

Craig M. Keats, Office of General Counsel, (202) 275-7602.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. Infosystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289-4357 (Washington, DC, metropolitan area), or toll-free (800) 424-5403.

This decision will not significantly affect the quality of the human environment or conservation of energy resources. Although we believe that it will not have a significant adverse impact on a substantial number of small entities, we also request comments on this issue.

List of Subjects in 49 CFR Part 1135

Administrative practice and procedures, Railroads, and Reporting and recordkeeping requirements.

Authority: 49 U.S.C. 10321, 10704, 10707a, and 5 U.S.C. 553.

Decided: April 25, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley. Commissioner Andre concurred in the result with a separate expression.

James H. Bayne,

Secretary.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Findings on Petitions and Initiation of Status Reviews

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of petition findings and status review.

SUMMARY: The Service announces 90-day findings in respect to five petitions and a 12-month finding in respect to one petition to amend the Lists of Endangered and Threatened Wildlife and Plants. Status review is initiated for one plant and one moth species that are subjects of petitions.

DATES: The findings announced in this notice were made between July 19, 1985, and January 28, 1986. Comments and information may be submitted until further notice.

ADDRESSES: Information, comments, or questions should be submitted to the Associate Director—Federal Assistance (OES), U.S. Fish and Wildlife Service, Washington, DC 20240. The petitions, findings, supporting data, and comments are available for public inspection, by appointment, during normal business hours at the Service's Office of Endangered Species, Suite 500, 1000 North Glebe Road, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Spinks, Jr., Chief, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, DC 20240 (703/235-2771 or FTS 235-2771).

VOL 51 ISS 85 MY 2 1986 UMI

SUPPLEMENTARY INFORMATION:

Background

Section 4(b)(3)(A) of the Endangered Species Act of 1973, as amended in 1982 (16 U.S.C. 1531 *et seq.*), requires that the Service make a finding on whether a petition to list, delist, or reclassify a species presents substantial scientific or commercial information to demonstrate that the petitioned action may be warranted. To the maximum extent practicable, this finding is to be made within 90 days of the receipt of the petition, and the finding is to be published promptly in the Federal Register. If the finding is positive, the Service is also required to promptly commence a review of the status of the involved species.

Section 4(b)(3)(B) of the Act, as amended, requires that, for any petition to revise the Lists of Endangered and Threatened Wildlife and Plants that contains substantial scientific or commercial information, a finding be made within 12 months of the date of receipt of the petition on whether the petitioned action is (a) not warranted, (b) warranted, or (c) warranted, but precluded from immediate proposal by other pending proposals. Section 4(b)(3)(C) requires that petitions for which the action requested is found to be warranted but precluded should be treated as though reasubmitted on the date of such finding, i.e. requiring a subsequent finding to be made within 12 months. Such 12-month findings are to be published promptly in the Federal Register.

On July 5, 1985 (50 FR 27637), an initial 90-day finding was announced for a petition to list the Samoan fruit bat. Status review for the bat began also with that notice. Status review for the moth species *Eucosma hennei* mentioned below was initiated when the species was included under category 2 of the comprehensive invertebrate notice of review published May 22, 1984 (49 FR 21664).

Findings

A petition from Professor Paul Alan Cox of Brigham Young University, was dated November 19, 1984, and received by the Service on November 27, 1984. It requested determination of endangered status for the Samoan fruit bat (*Pteropus samoensis samoensis*), which is found in American Samoa and Western Samoa. Observations by the petitioner, who spent several years studying this bat in the field, suggested that it had become extremely rare through destruction of its habitat and killing by people for use as food. On July 5, 1985 (50 FR 27637), the Service announced its 90-day finding that the petition had presented substantial information indicating that the requested action may be warranted.

Service personnel carrier out limited field investigations in American Samoa in June, July, and November of 1985, which indicated that the Samoan fruit bat might not be as rare as suggested by the petition. These observations, together with other information recently compiled by the Service, indicate a need for additional studies to assess the status of this bat and to evaluate the factors that may jeopardize its survival. The Service plans to undertake such studies in July 1986 in connection with bird survey work in Samoa.

The petitioned determination of endangered status for the Samoan fruit bat is considered to be warranted, but precluded by other listing activity. Additional data will be gathered, and expeditious progress is being made to list other species that are thought to be of higher priority.

The following 90-day findings are reported in respect to petitions as noted:

1. The Minnesota Department of Natural Resources (Mr. Roger Holmes, Chief, Nongame Program) submitted a petition to list as endangered the American swallow-tailed kite (*Elanoides forficatus*). The complete petition was received on April 17, 1985, and was dated April 5, 1985. The petition documented the extirpation of this large raptor from the central portions of the United States in the late 1800's and early 1900's. Some nesting occurs from Louisiana to South Carolina with most of the population nesting from southern Georgia southward through Florida. No threats to the extant population were documented. The species has apparently remained stable for some 50 years. The Service, therefore, found that no substantial information had been presented that the requested action may be warranted.

2. A petition from Mr. J. B. Hilmon, Associate Deputy Chief, Forest Service, U.S. Department of Agriculture was dated May 3, 1985, and was received by the Service on May 7, 1985. It requested removal of *Agave arizonica* from the List of Endangered and Threatened Plants. The Forest Service submitted two administrative reports in support of its request. The Service considered these in addition to a symposium proceedings paper by Pinkava and Baker entitled "Chromosome and Hybridization Studies in Agave," that reports low percent stainability of *Agave arizonica* pollen, indicating low fertility and a possibility that the plants are hybrids. The Service found that the petition and other available data presented evidence that the petitioned action may be warranted. However, before a final decision is made to consider *Agave arizonica* a hybrid and therefore delist it, the Service will seek additional information and a peer review of all available data by Arizona plant taxonomists and agave experts.

3. A petition from Mr. Bruce S. Manheim, Jr., Environmental Defense Fund, was dated May 21, 1985, and was received by the Service on May 28, 1985. It requested listing of two moth species, *Eucosma hennei* (family Olethreutidae) and *Lorita Abornana* (family Cochylidae), as endangered. The petition claimed that both moth species are presently know only fro El Segundo San Dunes in Los Angeles County, California. The portions of the dunes where the moths are known to occur have been included in planning for development by the City of Los Angeles, Department of Airports. The Service found that the petition presented substantial information indicating that the requested action may be warranted. Status review for *Eucosma hennei* has already been announced, as noted above. Formal status review for *Lorita abornana* begins herewith.

4. A petition from Dr. Tony Povilitis, Director, Campaign for Yellowstone's Bears, was dated July 31, 1985, and was received by the Service on August 6, 1985. It requested that the Yellowstone population of the grizzly bear (*Ursus arctos horribilis)* be reclassified from threatened to endangered under the Endangered Species Act (ESA) of 1973, as amended. The petitioner submitted information on the current status and threats to the Yellowstone grizzly. This information, along with all other data and expert opinions available to the Service, was considered in reviewing this petition.

An Interagency Grizzly Bear Committee (IGBC) was formed in 1983. It adresses the protection and management needs of the grizzly bear. The Service also appointed a grizzly bear Recovery Coordinator (GBRC), Dr. Christopher Servheen, in 1981. Through the IGBC and the efforts of Dr. Servheen, the Service is continuously aware of the current management and status of the grizzly bear.

After a thorough review of the information presented in the petition and all other information available to the Service, the petition was found to not present substantial information indicating the Yellowstone grizzly should be reclassified from threatened to endangered. A threatened species as defined by section 3 of the Act is "any species which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range." An endangered species is defined as "any species which is in danger of extinction . . ." The Service believes that the Yellowstone population of the grizzly bear is not in danger of extinction and is properly classified as threatened. Since 1983, increased management efforts have been mounted to address the threats facing the grizzly bear, including habitat destruction and human-induced mortality. Additional management efforts are planned for the future. The threats to the grizzly bear in the yellowstone ecosystem are recognized in a recovery plan and are being actively addressed by the IGBC.

5. A petition from Mr. Paul R. Neal of the Division of Biological Sciences, State University of New York, Stony Brook, New York, was dated October 8, 1985, and was received by the Service's Albuquerque Regional Office on October 15, 1985. It requested that a plant, *Talinum humile*, be added to the List of Endangered and Threatened Plants. This plant has historically been known from three locations, one each in Arizona, New Mexico, and Federal District (Sierra de Ajusco), Mexico. The type locality in New Mexico was recently searched, but no *Talinum humile* individuals were relocated there. The Service will place this species in category 2 of its comprehensive plant notice of review. Additional field searches and threat information are needed prior to proceeding with a proposed rule. The Service has found that the petitioned action may be warranted. Formal review of the status of *Talinum humile* is initiated with publication of this notice.

Section 4(b)(3)(b)(iii) of the Act states that petitioned actions may be found to be warranted but precluded by other listing actions when it is also found that the Service is making expeditious progress in revising the lists. Expeditious progress in listing endangered and threatened species is being made, and is reported annually in the Federal Register. The most recent progress report was published on January 9, 1986 (51 FR 996).

The Service would appreciate any additional data, comments, and suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning the moth species *Lorita abornana* (family Cochylidae) and the plant *Talinum humile* (family Portulacaceae). These species will be included in the next update of comprehensive invertebrate and plant notices of review, respectively.

Author

This notice was prepared by Dr. George Drewry, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, DC 20240 (703/235-1975 or FTS 235-1975).

Authority

The Authority for this action is the Endangered Species Act (16 U.S.C. 1531 *et seq.*; Pub. L. 93-205, 87 Stat. 884; Pub. L. 94-359, 90 Stat. 911; Pub. L. 95-632, 92 Stat. 3751; Pub. L. 96-159, 93 Stat. 1225; Pub. L. 97-304, 96 Stat. 1411).

List of Subjects in 50 CFR Part 17

Endangered and threatened wildlife, Fish, Marine mammals, Plants, (agriculture).

BILLING CODE 4310-55-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 216

[Docket No. 60231-6031]

Regulations Governing the Taking and Importing of Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Advance Notice of Proposed rulemaking.

SUMMARY: The General Permit issued in 1981 to the Federation of Japan Salmon Fisheries Cooperative Association to incidentally take marine mammals during the mothership salmon gillnet fishery is scheduled to expire on June 9, 1987. This Notice announces the NMFS' tentative schedule for amending the regulations governing this general permit, whether to reissue a new general permit and on holding formal hearings before an Administrative Law Judge to consider these matters.

DATE: See Supplementary Information.

FOR FURTHER INFORMATION CONTACT: Kenneth R. Hollingshead, Office of Protected Species and Habitat Conservation, NMFS, Washington, DC 20235, 202-634-7529.

SUPPLEMENTARY INFORMATION: The General Permit issued in 1981 to the Federation of Japan Salmon Fisheries Cooperative Association to incidentally take 5,500 Dall's porpoise, 25 northern sea lions and 450 northern fur seals annually during the mothership salmon gillnet operations is scheduled to expire on June 9, 1987. The NMFS is initiating a rulemaking process to consider the reissuance of the general permit to the Federation in 1987 and beyond and in anticipation of receiving a new application under the Marine Mammal Protection Act from the Federation. The tentative schedule to consider this issue is as follows:

March 6, 1987—Public scoping meeting under NEPA.
August 8, 1986—Release of DEIS and Notice of Proposed Rulemaking
October 20, 1986—Start of Formal Administrative Law Judge (ALJ) Hearings
November 18, 1986—Close of Briefing Schedule
December 12, 1986—Receipt and release of ALJ recommendations.
January 2, 1987—Exceptions to ALJ Decision.
May 1, 1987—Final Decision by Administrator, NOAA. Release of Final EIS.
June 9, 1987—Effective date of action.

The ex parte communications prohibitions at 5 U.S.C. 557(d) shall begin on August 8, 1986, or at such time that the Formal Hearings are actually noticed by the Agency.

Dated: April 29, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

National Advisory Council on Child Nutrition; Meeting

AGENCY: Food and Nutrition Service.

ACTION: Notice.

SUMMARY: Pursuant to the Federal Advisory Committee Act, Pub. L. 92-463, notice is hereby given that the National Advisory Council on Child Nutrition, established by section 15 of the National School Lunch Act to make a continuing study of the Child Nutrition Programs of the U.S. Department of Agriculture, has scheduled a meeting for June 3-5, 1986.

DATE: The meeting will take place from 9:00 a.m. to 5:00 p.m. on Tuesday and Wednesday, June 3 and 4 and Thursday, June 5 from 9:00 a.m. to noon.

ADDRESS: The meeting will be held at the Days Inn of Crystal City, 2000 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: Mr. James P. Gatley, Child Nutrition Division, Food and Nutrition Service, U.S. Department of Agriculture, 3101 Park Center Drive, Alexandria, Virginia 22302, (703) 756-3620.

SUPPLEMENTARY INFORMATION: The meeting will be devoted primarily to a discussion of current program issues and the development of the 1986 biennial report to the President and the Congress. If time permits, the general public will be allowed to participate in the discussions. The agenda will be available 15 days prior to the meeting. Requests for the agenda should be sent to Mr. George A. Braley, Executive Secretary, National Advisory Council on Child Nutrition, U.S. Department of Agriculture, Food and Nutrition Service, 3101 Park Center Drive, Alexandria, Virginia 22302.

Dated: April 23, 1986.

Robert E. Leard,

Administrator, Food and Nutrition Service.

BILLING CODE 3410-30-M

Foreign Agricultural Service

Import Limitation; Country of Origin Quota Adjustment; Denmark; Condensed Milk

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Notice of Country of Origin Adjustment for Certain Condensed Milk from Denmark.

SUMMARY: Presidential Proclamation 4708 issued December 11, 1979, amended Headnote 3(a) of Part 3 of the Appendix to the Tariff Schedules of the United States to permit the Secretary of Agriculture to make country of origin adjustments for unlicensed quotas that will not be filled by the country of origin listed opposite the quota. This notice implements such an adjustment with respect to the quota quantity assigned to Denmark for condensed milk in airtight containers.

DATE: Effective May 5, 1986.

FOR FURTHER INFORMATION CONTACT: Phillip J. Christie, Head, Import Licensing Group, Dairy, Livestock and Poultry Division, Foreign Agricultural Service, Room 6616 South Building, Department of Agriculture, Washington, DC 20250 or telephone at (202) 447-5270.

SUPPLEMENTARY INFORMATION: This action has been reviewed under Executive Order 12291 and Secretary's Memorandum 1512-1 and has been determined to be "nonmajor" since it will not have any of the significant effects specified in those documents. Furthermore, to the extent, if any, that the provisions of the Regulatory Flexibility Act (5 U.S.C. 601) apply to this notice, the Administrator, Foreign Agricultural Service, hereby certifies that this notice will not have a significant economic impact on a substantial number of small entities. The adjustment of the country of origin from which the quota item specified herein may be entered does not affect the ability of importers to import this quota item, but only expands the number of countries from which the item may be imported. Also, since this action is being taken in recognition of changes in the market which have already occurred, this action will not cause any new economic impact.

An assessment of the impact of this rule on the environment was made and, based on this evaluation, this action is not a major federal action and will have no foreseeable significant effects on the quality of the human environment. Consequently, no environmental impact statement is necessary for this proposed rule.

Part 3 of the Appendix to the Tariff Schedules of the United States (TSUS) sets forth import limitations imposed on certain dairy products, including certain condensed milk. Headnote 3(a)(iii) of that Appendix allows for reallocating the quota amount of a dairy article listed in that Appendix among the countries of origin specified for a given article if it is determined that the quota amount assigned to a particular country is not likely to be entered from that country within a given calendar year. I hereby determine that it is not likely that the amount of condensed milk specified in TSUS Item 949.90 for Denmark will be entered from that country during calendar year 1986.

Notice is hereby given that the 1986 unused quota quantity for condensed milk specified in TSUS Item 949.90 for Denmark may be imported from Canada, Denmark, the Netherlands and Australia for the remainder of the 1986 quota year.

This quota quantity for TSUS Item 949.90 will revert to the original supplying country on January 1, 1987.

Issued at Washington, DC this 24th day of April 1986.

Thomas O. Kay,

Administrator, FAS.

DEPARTMENT OF COMMERCE

Presidential Board of Advisors on Private Sector Initiatives; Open Meeting

AGENCY: Office of the Secretary, Office of the General Counsel and Office of Business Liaison, Commerce.

SUMMARY: The Communications Committee of the Presidential Board of Advisors on Private Sector Initiatives will hold a meeting on May 9, 1986. The Presidential Board of Advisors was established on August 8, 1985 to advise the President and Secretary of Commerce, through the White House Office of Private Sector Initiatives, with respect to the objectives and conduct of private sector initiative policies. This includes methods of increasing public awareness of the importance of public/private partnerships; removing barriers to development of effective social service programs which are administered by private organizations; strengthening the professional resources of the private social service sector; and studying options for promoting the long-term development of private sector initiatives in the United States.

Time and Place: Friday, May 9, 1986, 3:00 p.m., at the National Association of Broadcasters, 1771 N Street, NW., Washington, DC 20007.

FOR FURTHER INFORMATION CONTACT: The Committee Control Officer, Mr. Robert H. Brumley, Deputy General Council, U.S. Department of Commerce, (202/377-4772) or the Alternate Control Officer, Nancy J. Olson, Director Office of Business Liaison, U.S. Department of Commerce (202/377-3942), Main Commerce Building, Washington, DC 20230.

Dated: April 29, 1986.

Nancy J. Olson,

Director, Office of Business Liaison.

Foreign-Trade Zones Board

[Order No. 329]

Resolution and Order Approving the Application of the Hawaii State Department of Planning and Economic Development for a Subzone at the Maui Pineapple Facility in Kahului, HI; Proceedings of the Foreign-Trade Zones Board, Washington, DC

Resolution and Order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 USC 81a-81u), the Foreign-Trade Zones Board has adopted the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the Hawaii State Department of Planning and Economic Development, submitted on behalf of the State of Hawaii, grantee of Foreign-Trade Zone 9, filed with the Foreign-Trade Zones Board (the Board) on October 18, 1985, requesting subzone status for the pineapple cannery of Maui Pineapple Company, Ltd., in Kahului, Maui, Hawaii, within the Kahului Customs port of entry, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that the proposal is in the public interest, approves the application.

The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

Grant of Authority To Establish a Foreign-Trade Subzone in Kahului, Hawaii

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes", as amended (19 USC 81a-81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized and empowered to grant to corporations the privilege of establishing, operating, and maintaining foreign-trade zones in or adjacent to ports of entry under the jurisdiction of the United States;

Whereas, the Board's regulations (15 CFR 400.304) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved, and where a significant public benefit will result;

Whereas, the Hawaii State Department of Planning and Economic Development, on behalf of the State of Hawaii, grantee of Foreign-Trade Zone No. 9, has made application (filed October 18, 1985, Docket 37-85, 50 CFR 45137) in due and proper form to the Board for authority to establish a special-purpose subzone at the pineapple cannery and can-making facility of Maui Pineapple Company, Ltd., in Kahului, Hawaii, within the Kahului Customs port of entry;

Whereas, notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard; and,

Whereas, the Board has found that the requirements of the Act and the Board's regulations are satisfied;

Now, therefore, in accordance with the application filed October 18, 1985, the Board hereby authorizes the establishment of a subzone at the facilities of Maui Pineapple Company in Kahului, Hawaii, designated on the records of the Board as Foreign-Trade Subzone No. 9D at the location mentioned above and more particularly described on the maps and drawings accompanying the application, said grant of authority being subject to the provisions and restrictions of the Act and the Regulations issued thereunder, to the same extent as though the same

VOL 51 ISS 85 MY 2 1986 UMI

were fully set forth herein, and also to the following express conditions and limitations:

Activation of the subzone shall be commenced within a reasonable time from the date of issuance of the grant, and prior thereto, any necessary permits shall be obtained from Federal, State, and municipal authorities.

Officers and employees of the United States shall have free and unrestricted access to and throughout the foreign-trade subzone in the performance of their official duties.

The grant shall not be construed to relieve responsible parties from liability for injury or damage to the person or property of others occasioned by the construction, operation, or maintenance of said subzone, and in no event shall the United States be liable therefor.

The grant is further subject to settlement locally by the District Director of Customs and District Army Engineer with the Grantee regarding compliance with their respective requirements for the protection of the revenue of the United States and the installation of suitable facilities.

In Witness Whereof, the Foreign-Trade Zones Board has caused its name to be signed and its seal to be affixed hereto by its Chairman and Executive Officer or his delegate at Washington, D.C., this 25th day of April 1986, pursuant to Order of the Board.

Foreign-Trade Zones Board

Paul Freedenberg,

Assistant Secretary of Commerce for Trade Administration, Chairman, Committee of Alternates.

BILLING CODE 3510-DS-M

[Docket No. 14-86]

Foreign-Trade Zone 45, Portland, OR; Application for Subzone Floating Point Systems Computer Plant, Beaverton

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Port of Portland, grantee of Foreign-Trade Zone 45, requesting special-purpose subzone status for the computer service operation of Floating Point Systems, Inc., (FPS) in Beaverton, Oregon, within the Portland Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on April 15, 1986.

The FPS plant is located on an 18-acre site at 3601 S.W. Murray Blvd., Beaverton. The facility produces, services, upgrades and repairs special-purpose scientific computers and array processors, employing 1400 persons. Zone procedures would be used for the repair and servicing of FPS products, including many which have been sold abroad and returned to the U.S. for servicing. Certain electronic components for the service and repair operations are sourced abroad.

Zone procedures would exempt FPS from duty payment on computers and foreign components that are reexported. The company would be able to defer duty on foreign components used in the repair and service of computers for the domestic market. The savings will help keep the company's U.S. service operation internationally competitive.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; Clyde Kelley, District Director, U.S. Customs Service, Pacific Region, 511 NW. Broadway, Federal Bldg., Room 198, Portland, OR 97209; and Colonel Gary R. Lord, District Engineer, U.S. Army Engineer District Portland, P.O. Box 2946, Portland, OR 97208.

Comments concerning the proposed subzone are invited from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before May 30, 1986.

A copy of the application is available for public inspection at each of the following locations:

U.S. Dept. of Commerce, District Office, 1220 S.W. 3rd Ave., Room 618, Portland, OR 97204.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1529, 14th and Pennsylvania, NW., Washington, DC 20230.

Dated: April 28, 1986.

John J. De Pauie, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-M

International Trade Administration

Short Supply Review on Certain Steel Wire; Request for Comments

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice and request for comments.

SUMMARY: The Department of Commerce hereby announces its review of a request for a short supply determination under Article 8 of the U.S.-EC Arrangement on Certain Steel Products with respect to PVC-coated galvanized low carbon steel wire.

EFFECTIVE DATE: Comments must be submitted no later than ten days from publication of this notice.

ADDRESS: Send all comments to Nicholas C. Tolerico, Acting Director, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, 14th and Constitution Ave., NW., Washington, DC 20230, Room 3099.

FOR FURTHER INFORMATION CONTACT: Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, 14th and Constitution Ave., NW., Washington, DC 20230, Room 3099, (202) 377-0159.

SUPPLEMENTARY INFORMATION: Article 8 of the U.S.-EC Arrangement on Certain Steel Products provides that if the U.S. ". . . determines that because of abnormal supply or demand factors, the U.S. steel industry will be unable to meet demand in the USA for a particular product (including substantial objective evidence such as allocation, extended delivery periods, or other relevant factors), an additional tonnage shall be allowed for such product. . . ."

We have received a short supply request for PVC-coated galvanized low carbon steel wire in coils for the production of gabions, mattresses and related products. The steel wire ranges from 2.2mm to 3.4mm in diameter, has a zinc coating not less than 260 to 290 g/m², and a PVC coating thickness of 0.5mm to 0.6mm with a minimum acceptable thickness of 0.45mm.

Any party interested in commenting on this request should send written comments as soon as possible, and no later than ten days from publication of this notice. Comments should focus on the economic factors involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. Anyone submitting business proprietary information should clearly identify that portion of their submission and also provide a non-proprietary submission which can be placed in the public file. The public file will be maintained in the Central Records Unit, Import Administration, U.S. Department of Commerce, Room B-099 at the above address.

Dated: April 24, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

[FR Doc. 86-9925 Filed 5-1-86; 8:45 am]

BILLING CODE 3510-DS-M

The University of Toledo; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No. 83-215R. Applicant: The University of Toledo, Toledo, OH 43606. Instrument: Heavy Ion Accelerator. Original notice of this resubmitted application was published in the Federal Register of June 30, 1983.

Comments: None received. Decision: Denied. Instruments of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, are being manufactured in the United States. Reasons: The National Bureau of Standards (NBS) advises in its memorandum dated March 26, 1984, that domestic instruments are available which meet the pertinent specifications given in the application and are therefore scientifically equivalent to the foreign instrument for the applicant's intended use. (See § 301.5(d)(1)(i) of the regulations.)

We had denied the application without prejudice to resubmission in accord with § 301.5(e). NBS had previously recommended that the applicant compare the foreign instrument with domestically made instruments from Veeco Instruments Incorporated and from National Electrostatics Corporation (NEC) and show that these were not scientifically equivalent as required by § 301.5(d)(1)(i). The applicant's resubmission failed to demonstrate that use of these domestic instruments would preclude accomplishment of the intended use.

NBS specifically rejected the "deficiencies" alleged by the applicant in the Veeco Model 300R:

1. The Veeco Model 300R is "extremely easy to modify as all optics and beam lines are at ground potential (rather than at high voltage as in the Danfysik machine)"; and it "is intended to be a research accelerator, not merely an automatic ion implanter."

2. Veeco instruments can "isotopically separate masses 1 to 280 (either atoms or molecules) with a FWIM [Full Width at one Tenth Maximum] of 1 atomic mass unit or better."

3. The Veeco 300R "can accelerate all atomic species including iron group and refractory metals and, because of its flexibility, a 911A source could be adapted."

4. Veeco beam currents (up to 270 amperes) are "equal to or greater than those produced by the foreign article."

The applicant also claimed that NEC instruments were not of domestic manufacture since the ion source portion of the accelerator was made by Danfysik in Denmark. NEC, however, was using the Danfysik equipment as an injector or component for its accelerator systems. Section 301.2(g) states that "a domestic instrument need not be made exclusively for domestic components or accessories."

The applicant raised no technical arguments against the NEC instruments and, in fact, characterized the company as "a manufacturer of high quality large accelerators," implying that this domestic manufacturer was capable of supplying instruments fully acceptable for the intended purposes. The applicant claimed that NEC was ". . . not a routine supplier of small machines" and also stated that "This along with the nature of the first bid by NEC as discussed above, led to their being excluded in the second round." In a first round of bid proposals, three manufacturers (including Danfysik) submitted quotations which, by the applicant's admission, exceeded budget expectations. The applicant subsequently sent out a scaled-down request for quotation (RFQ) allowing for possible technical trade-offs to meet budgetary constraints. Neither of the two domestic manufacturers was sent a copy of the scaled-down RFQ. Moreover, NBS asserts that, contrary to the applicant's statements, NEC has made "many such small accelerators" (memorandum of March 26, 1984).

It is thus clear, at least in the case of NEC, that the applicant neglected at least one domestic manufacturer on the basis of considerations of "cost," "convenience" or "personal preference" or to "accommodate institutional commitments or limitations" (see § 301.2(s)).

On the basis of the foregoing as well as of the NBS finding "that the domestically manufactured instruments or apparatus available from both NEC and Veeco are scientifically equivalent to the foreign article for the applicant's intended purposes," we deny the application.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

Frank W. Creel,

Director Statutory Import Programs Staff.

National Bureau of Standards

National Bureau of Standards' Visiting Committee; Meeting

Pursuant to the Federal Advisory Committee Act, 5 U.S.C. App., notice is hereby given that the National Bureau of Standards' Visiting Committee will meet Monday, June 9, 1986, from 8:30 a.m. to 5:30 p.m., and Tuesday, June 10, 1986, from 8:30 a.m. to 11:30 a.m. in Lecture Room A, Administration Building, National Bureau of Standards, Gaithersburg, Maryland, from 2:00 p.m. to 3:00 p.m. in Room 5854, Department of Commerce, Washington, DC.

The NBS Visiting Committee is composed of five members prominent in the fields of science and technology and appointed by the Secretary of Commerce.

The purpose of the meeting is to review the efficiency of the Bureau's scientific work and the condition of its equipment in order to assist the Committee in reporting to the Secretary of Commerce as required by law.

The public is invited to attend, and the Chairman will entertain comments or questions at an appropriate time during the meeting. Any person wishing to attend the meeting should inform Peggy Webb, Office of the Director, National Bureau of Standards, Gaithersburg, MD 20899, telephone 301-921-2411.

Dated: April 28, 1986.

Ernest Ambler,

Director.

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Advisory Committee on Women in the Services; Meeting

AGENCY: Defense Advisory Committee on Women in the Services (DACOWITS).

ACTION: Notice of Meeting.

SUMMARY: Pursuant to Pub. L. 92–463, notice is hereby given of a forthcoming meeting of the Executive Committee of the Defense Advisory Committee on Women in the Services (DACOWITS).

The purpose of the meeting is to review the Recommendations, Requests for Information, and Continuing Concerns made by the Committee at the 1986 Spring Meeting; discuss current issues relevant to women in the Services; and plan the program for the next semiannual meeting scheduled for 28–30 October 1986 in Williamsburg, Virginia.

All meeting sessions will be open to the public.

DATES: June 5, 1986, 1:30–5:00 p.m. and June 6, 1986, 9:30–11:30 a.m.

ADDRESS: OSD Conference Room 1E801 #1 (June 5); 1E801 #7 (June 6) The Pentagon, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Major Marilla J. Brown, Executive Secretary, DACOWITS, OASD (Force Management and Personnel), The Pentagon, Room 3D769, Washington, DC 20301–4000; telephone (202) 697–2122.

SUPPLEMENTARY INFORMATION: Persons desiring to (1) attend the Executive Committee Meeting or (2) make oral presentations or submit written statements for consideration at the meeting must notify the point of contact listed above no later than May 22, 1986.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

Commercial Activities Inventory Report and Five Year Review Schedule; (OMB A–76 Implementation)

AGENCY: DoD.

ACTION: Notice.

SUMMARY: This notice announces the publication of the DoD Commercial Activities Inventory Report and Five Year Review Schedule for Fiscal Year 1985. This document may be obtained by writing to the Superintendent of Documents, United States Government Printing Office, Washington, DC 20402, referring to stock number 008–000–00453–6, and enclosing a check in the amount of $20.00, payable to the Superintendent of Documents.

SUPPLEMENTARY INFORMATION: This document is published under the provisions of OMB Circular A–76, which requires the Department of Defense to publish an annual inventory report of all commercial activities. The OMB also requires that the Department of Defense publish a five year schedule for reviewing all in-house commercial activities. The purpose of the review is to determine whether the in-house

method of operation should continue or whether an in-house versus contract cost comparison should be performed to determine the most cost effective method of operation.

DEPARTMENT OF ENERGY

Floodplain Involvement Notification for Proposed Remedial Action at the Monticello Uranium Mill Tailings Site, Monticello, UT

AGENCY: Department of Energy.

ACTION: Notice of floodplain involvement and opportunity for public comment.

SUMMARY: The Department of Energy proposes to conduct remedial action at the former Atomic Energy Commission uranium millsite in Monticello, Utah. Monticello lies in the southeast corner of Utah in the northern portion of San Juan County. The millsite will be cleaned up in accordance with the Environmental Protection Agency (EPA) standards for Remedial Action at Inactive Uranium Processing Sites (40 CFR Part 192). The currently proposed remedial action alternative entails removing all contaminated material from within the floodplain and stabilizing approximately 2.4 million tons of tailings contaminated material at the site.

In accordance with DOE regulations for compliance with floodplain/wetlands environmental review requirements (10 CFR Part 1002), DOE will prepare a floodplain assessment to be included in the Environmental Assessment (EA) being prepared for the proposed remedial action. The EA will address disposal of the contaminated material at alternative sites and compare these alternatives to onsite stabilization or performing no remedial action.

Further information is available from the Department of Energy at the address shown below. Public comments or suggestions regarding the proposed activities in the floodplain area are invited.

Requests to receive copies of the Environmental Assessment when published may be sent to the address shown below.

DATE: Any comments are due on or before May 14, 1986.

ADDRESS: Send comments to: W.E. Murphie, U.S. Department of Energy, Division of Facility and Site, Decommissioning Projects, NE–23, Washington, DC 20545.

Dated: April 22, 1986.

BILLING CODE 6450-01-M

Coal Policy Committee of the National Coal Council; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: Coal Policy Committee of the National Coal Council.

Date and Time: Monday, June 2, 1986; 8:30 a.m. to 12:00 Noon.

Place: The Westin Hotel, 2401 M Street NW., Washington, DC 20037.

Contact: Cecilia MacCarthy, U.S. Department of Energy, Office of Fossil Energy (FE–23), Washington; DC 20545. Telephone: 301/353–2847.

Purpose of the Parent Council: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to coal and coal industry issues.

Purpose of the committee: To review requests for advice, information, etc., from the Secretary of Energy to the National Coal Council, and to recommend to the Council studies to be undertaken by the Council.

Tentative Agenda

—Call to Order by Gerald Blackmore, Chairman
—Report on Work Group Reports of studies for the Secretary of Energy
—Discussion of any other business properly brought before the Committee
—Public Comment—10 Minute Rule
—Adjournment

Public Participation: The meeting is open to the public. The Chairman of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Cecilia MacCarthy at the address or telephone number listed above. Requests must be received at least 5 days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda.

Transcripts: Available for public review and copying at the Public Reading Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., between 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

VOL 51 ISS 85 MY 2 1986 UMI

Issued at Washington, DC on April 24, 1986.

Donald L. Bauer,

Acting Assistant Secretary for Fossil Energy.

BILLING CODE 6450-01-M

National Coal Council; Notice of Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: National Coal Council.

Date and Time: Tuesday, June 3, 1986; 9:30 a.m. to 11:30 a.m.

Place: The Westin Hotel, 2401 M Street, NW., Washington, DC 20037.

Contact: Cecilia MacCarthy, U.S. Department of Energy, Office of Fossil Energy (FE-23), Germantown, Maryland, 20545, Telephone: 301/353-2847.

Purpose of the Council

To provide advice, information, and recommendations to the Secretary of Energy on matters relating to coal and coal industry issues.

Tentative Agenda

—Opening Remarks by the Chairman.
—Remarks by Donald L. Bauer, Acting Assistant Secretary for Fossil Energy.
—Coal Policy Committee Report—Presentation, dicussion, and action on reports for the Secretary of Energy.
—Report of Nominating Committee and election of officers.
—Comments from incoming Chairman.
—Discussion of any other business properly brought before the Council.
—Public Comment—10 Minute Rule.
—Adjournment.

Public Participation

The meeting is open to the public. The Chairman of the Council is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Council will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Cecilia MacCarthy at the address or telephone number listed above. Requests must be received at least 5 days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda.

Transcripts

Available for public review and copying at the Public Reading Room, Room 1E-190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 9:00 a.m., and 4:00 p.m. Monday through Friday, except Federal holidays.

Issued at Washington, DC, on April 29, 1986.

J. Robert Franklin,

Deputy Advisory Committee Management Officer.

[FR. Doc. 86-9941 Filed 5-1-86; 8:45 am]

BILLING CODE 6450-01-M

Dose Assessment Advisory Group; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given to the following meeting:

Name: Dose Assessment Advisory Group (DAAG).

Date and Time: Wednesday, May 28, 1986, 8:30 a.m.–5:00 p.m.; Thursday, May 29, 1986, 8:30 a.m.–5:00 p.m.; Friday, May 30, 1986, 8:30 a.m.–4:00 p.m.

Place: U.S. Department of Energy, Nevada Operations Office Auditorium, 2753 South Highland Drive, Las Vegas, Nevada.

Contact: Charles M. Campbell, Deputy Project Manager, Off-Site Radiation Exposure Review Project, Nevada Operations Office, U.S. Department of Energy, Post Office Box 14100, Las Vegas, Nevada 89114, Telephone: (702) 295-0991.

Purpose of the Group: To provide the Secretary of Energy and the Manager, Nevada Operations Office (NV), with advice and recommendations pertaining to the Off-Site Radiation Exposure Review Project (ORERP). This project concerns the evaluation and assessment of the amount of radiation received by members of the off-site population surrounding the Nevada Test Site (NTS) as a result of the nuclear test operations conducted at NTS.

Tentative Agenda

May 28, 1986

—Historical Overview of ORERP.
Origin of ORERP.
Development of Methodology.
—Collection of Historical Information.
Coordination and Information Center.
Document Collection.
Compilation of Historical and Radiological Measurements.
Population and Demographic Information.
Survey of Life-Style, Food Habits and Agricultural Practices.
—Reanalysis of Historical Results.
Dosimetry.
Fallout Patterns.
Boltzmann "Hot Spot."
Gum-Film Network and Archived Soil Samples.
—Techniques for Assessing Historical Fallout Deposition Utilizing Current Measurements.
Soil Sampling from Undisturbed Lawns.
Sampling Lake Sediments.
Analyzing Data from Natural Uranium Resources Evaluation (NURE).
Soil Sampling from Pristine Locations.
—Public Comment and Discussion.

May 29, 1986

—Calculations and Data Bases to Define Deposition in the Phase I Area.
Source-Term Calculations.
Town Data Base.
—Calculations for External Dose.
Shielding, Weathering, Energy Dependence, and Life-Style Factors.
Individual and Collective Dose Estimates for Phase I.
—Uptake of Radionuclides via Ingestion.
Screening Calculations.
Pathway Code for Radionuclide Uptake.
Milk Production and Distribution.
—Calculation of Internal Dose.
Inhalation Pathway.
Ingestion Pathway.
Individual and Collective Dose Estimates for Phase I.
—Model Validation and Issues of Uncertainty.
Town Data Base.
External Dose.
Pathway Analysis.
Internal Dose.
—Public Comment and Discussion.

May 30, 1986

—Dosimetry Reconstruction Beyond 200 Miles.
Soil Sampling Program.
Meteorological Modeling of Fallout Deposition.
Sample Results of Dosimetry Calculations for Phase II.
—Quality Assurance.
ORERP Quality Assurance Plan.
Quality Checking of Data Bases.
Final Disposition of CIC/ORERP Documents.
EML Evaluation of ORERP Soil Program.
—Administrative Summary.
Reporting of Project Results.
DAAG Recommendations.
Synopsis by Project Manager.
Synopsis by DAAG Chairman.
—Public Comment and Discussion.
—Press Conference.

Public Participation: The meeting is open to the public. The Chairperson of the Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Charles Campbell, at the address or telephone number listed above.

Transcripts: Available for public review and copy at the Public Reading Room, Room 1E-190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC on April 25, 1986.

J. Robert Franklin,

Deputy Advisory Committee Management Officer.

[FR Doc. 86-9877 Filed 5-1-86; 8:45 am]

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Issuance of Proposed Decisions and Orders; Period of March 17 through April 11, 1986; Burlile Oil Co. et al.

During the period of March 17 through April 11, 1986, the proposed decisions and orders summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to applications for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decison and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these proposed decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays.

Dated: April 22, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Burlile Oil Company, Gallipolis, Ohio; KEE-0022, reporting requirements

Burlile Oil Company filed an Application for Exception from the provisons of EIA Form EIA-782B. The exception request, if granted, would relieve Burlile from its monthly reporting obligation. On April 8, 1986, the Department of Energy issued Proposed Decision and Order which determined that the exception request be denied.

County Fuel Co., Inc., Baltimore, MD; KEE-0144, motor gasoline

County Fuel Co., Inc. filed an Application for Retroactive Exception from the provisions of the reseller-retailer price rule at 10 CFR 212.93. The exception request, if granted, would excuse the firm from liability for alleged overcharges of $197,305.49, plus interest. On April 8, 1986 the Department of Energy issued a Proposed Decision and Order which determined that the exception request be denied.

[FR Doc. 86-9874 Filed 5-1-86; 8:45 am]

BILLING CODE 6450-01-M

Issuance of Decisions and Orders; Week of March 24 through March 28, 1986; Bill's Oil Co., Inc., et al.

During the week of March 24 through March 28, 1986, the decisions and orders summarized below were issued with respect to applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Requests for Exception

Bill's Oil Company, Inc., 3/26/86; KEE-0008

Bill's Oil Company, Inc. filed an Application for Exception from the requirement to submit Form EIA-782B, entitled "Resellers'/Retailers' Monthly Petroleum Product Sales Report." In considering the request, the DOE found that the firm had not shown that it was more adversely affected by the reporting requirement than other reporting firms. Accordingly, exception relief was denied.

Huron Oil Company, 3/26/86; KEE-0001

On September 30, 1985, Huron Oil Company (Huron) filed an Application for Exception from the requirement to file Form EIA-782B, entitled "Resellers'/Retailers' Monthly Petroleum Product Sales Report." In evaluating the request, the DOE found that the eight hours per month the firm requires to complete the form, in addition to other peculiar hardships, placed a disproportionate burden on Huron. The Department of Energy therefore determined that Huron should be granted an exception which permits the firm to file estimated data reports.

Keystone Fuel Oil Co., 3/26/85; HEE-0104

Keystone Fuel Oil Company filed an application seeking retroactive exception relief from the reseller price regulations formerly codified in 10 CFR Part 212, Subpart F. In a Remedial Order issued on July 13, 1984, the OHA found that Keystone made certain overcharges in its sales of coverod products during the period August 1973 through April 1974. If the application were approved, Keystone would be excused from its refund obligations under the Remedial Order. In this Decision, the OHA found that Keystone realized an unusually high level of profit during the year when the price violations occurred, which were apparently attributable to the excessive markups that Keystone charged its customers. The OHA also found that the firm's petroleum operations have been generally profitable in recent years. The OHA concluded that Keystone's retroactive exception request should be denied because it does not satisfy the retroactive exception relief standards.

Ryno Oil, 3/26/86; HEE-0129

On March 12, 1985, Ryno Oil (Ryno) filed an Application for Exception from the requirement to file Form EIA-782B, entitled "Resellers'/Retailers' Monthly Petroleum Product Sales Report." In evaluating the request, the DOE found that the twelve hours per month the firm requires to complete the form, in addition to other peculiar hardships, placed a disproportionate burden on Ryno. The Department of Energy therefore determined that Ryno should be granted an exception which permits the firm to file estimated data reports.

Interlocutory Order

Economic Regulatory Administration, 3/24/86; KRZ-0026

The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) filed a Motion to Amend a Proposed Remedial Order (PRO) issued to Tonkawa Refining Company on May 31, 1985. The OHA determined that good cause existed for permitting the amendment and that Tonkawa would not be prejudiced thereby. It noted that in both the original and amended versions of the PRO, the nature of the alleged violations were the same. It noted further that the number of barrels of crude oil at issue were identical. It also determined that because ERA's proposed amendments would actually reduce the total amount of money which Tonkawa might be obliged to pay in restitution for the excessive entitlements benefits it allegedly received, it would benefit substantially from the amendment. Finally, the OHA noted that Tonkawa will be afforded the opportunity to file a Reply in which it can respond to the allegations

BEST COPY AVAILABLE

contained in the amended PRO. Accordingly, the motion to amend the PRO was granted.

Supplemental Order

J.R. Cone, 3/24/86; KCX-0009

The Federal Energy Regulatory Commission issued an order responding to the Office of Hearings and Appeals a Remedial Order issued to J.R. Cone. The FERC Order affirmed the Remedial Order in part, but reversed the OHA's findings that (i) Cone improperly considered four wells on the Eubanks Lease as multiply completed; and (ii) received overcharges of $469,650.62 in his sales of crude oil from that lease. On remand, the OHA discussed the standard of proof applicable to enforcement proceedings before the DOE, stating that it had adhered to the "preponderance of the evidence" standard in assessing the merits of the evidence submitted in the Cone proceeding. Finally, the OHA implemented the Commission's order and reduced Cone's overcharges relating to the Eubanks Lease to $280,208.91.

Implementation of Special Refund Procedures

Jimmy's Gas Stations, Inc., 3/27/86; HEF-0102

The DOE issued a Decision and Order implementing a plan for the distribution of $6,275 received as a result of a consent order entered into by the DOE and Jimmy's Gas Stations, Inc. (Jimmy's) on May 12, 1980. The DOE determined that the Jimmy's settlement fund should be distributed to customers who purchased No. 2 heating oil and diesel fuel from Jimmy's during the period November 2, 1973 through May 4, 1974. The specific information requested in refund applications is provided in the Decision.

Key Oil Company, Inc., 3/26/86; HEF-0105

The DOE issued a Decision and Order implementing a plan for the distribution of $69,651 received as a result of a consent order entered into by the DOE and Key Oil Company, Inc. (Key, Inc.) on September 18, 1981. The DOE determined that the Key, Inc. settlement fund should be distributed to customers who purchased motor gasoline from Key, Inc. during the period March 1, 1979 through December 31, 1979. The specific information requested in refund applications is provided in the Decision.

Refund Applications

Aminoil U.S.A., Inc./Land O'Lakes, Inc., 3/26/86; RF139-22

The DOE issued a Decision and Order concerning an Application for Refund filed by an agricultural cooperative, Land O'Lakes, Inc., in connection with the Aminoil U.S.A., Inc. refund proceeding. In considering the application, the DOE found that Land O'Lakes purchased 19,598,198 gallons of propane from Aminoil during the consent order period. The DOE further found that since Land O'Lakes is an agricultural cooperative, it should not be required to provide a detailed demonstration of injury, as long as it certified that it would pass through to its member-customers the total amount of refund received. Having made the proper certification, the DOE granted Land O'Lakes a refund based on 100 percent of its allocable share as determined by the volumetric methodology. The total refund granted was $469,107, representing $291,069 in principal and $178,038 in accrued interest.

Boswell Oil Company/National Steel Corp. Armco Inc., 3/24/86; RF179-4, RF179-15

Applications for refund were filed by two end-users who purchased refined petroleum products from Boswell Oil Company during the consent order period. The applications were evaluated in accordance with the procedures set forth in Boswell Oil Co., 13 DOE ¶ 85,092 (1985). The OHA issued a Decision and Order approving the applications and issuing refunds totalling $18,516.22.

Gulf Oil Corporation/George's Gulf Service, et al., 3/25/86; FR40-80394, et al.

The DOE issued a Decision granting 12 Applications for Refund from the Gulf Oil Corporation consent order fund filed by resellers and retailers of Gulf refined products. In considering the applications, the DOE found that each of the claimants had demonstrated that it would not have been required to pass through to its customers a cost reduction equal to the refund claimed. Accordingly, the firms were granted refunds totalling $19,306 ($16,386 principal plus $2,950 interest).

Gulf Oil Corporation/Mac's Fuel Oil Service, Inc., et al., 3/27/86; RF40-61794, et al.

The DOE issued a Decision and Order granting refunds from the Gulf Oil Corporation deposit fund escrow account to 12 purchasers of Gulf refined petroleum products. The refunds from these firms totaled $17,312.

Gulf Oil Corporation/Navy Resale and Services Support Office, 3/26/86; RF40-1277

The DOE issued a Decision and Order granting a refund from the Gulf Oil Corporation deposit escrow fund to Navy Resale and Services Support Office (NRSSO), a reseller of Gulf refined petroleum products which operates service stations on Navy bases throughout the country. The applicant documented purchases of 11,511,112 gallons of Gulf products. In addition, NRSSO demonstrated that it would not have been required to reduce its selling prices to customers by the amount of the refund claimed. Based on this showing, the DOE granted NRSSO a refund of $10,862, representing $14,044 in principal and $2,848 in accrued interest.

Gulf Oil Corp./Theatres Service Company, et al., 3/28/86; RF40-308, et al.

The DOE issued a Decision and Order concerning seven Applications for Refund filed by end-users of petroleum products purchased from the Gulf Oil Corporation. In its Decision, the DOE granted the seven applications under the standards specified in *Gulf Oil Corp.*, 12 DOE ¶ 85,048 (1984). The refunds granted in this proceeding total $350,368, representing $302,365 in principal and $57,003 in interest.

Harris Enterprises, Inc. Widing Transportation, et al., 3/24/86; RF199-2, et al.

The DOE issued a Decision and Order approving refunds to 19 firms who sought refunds from the fund obtained as a result of a consent order entered into with Harris Enterprises, Inc. Each claimant certified that it purchased Harris petroleum products during the consent order period and stated that it was willing to rely on the information in the audit files in calculating its refund. The DOE determined that the entire escrow account should be proportionately distributed among the applicants according to the methodology set forth in *Harris Enterprises, Inc.*, 13 DOE ¶ 85,179 (1985). The refunds approved in this Decision total $21,300 principal and the total amount of interest accrued on that fund at the time of disbursement.

L & L Oil Company, Inc./Lee & Leon Oil Company, et al., 3/27/86; RF198-1, et al.

The DOE issued a Decision and Order concerning six Applications for Refund filed by Lee & Leon Oil Company, *et al.* Each of the applicants had purchased refined petroleum products from L & L Oil Company, Inc. and each sought a portion of the settlement fund obtained by the DOE through a consent order entered into with L & L. Each of the six firms was identified in the DOE's audit files and was listed in the Appendix to the Decision. *See L&L Oil Company, Inc., Lowe Oil Company, and Moyle Petroleum Company*, 13 DOE ¶ 85,198 (1985). Each of the applicants agreed with the amounts listed in the Appendix, and each of these amounts was under the $5,000 threshold. After examining the applications submitted by the firms, the DOE concluded that each of the firms should receive the refund amount listed in the Appendix, plus its share of accrued interest. The total amount of refunds granted was $11,490.

Seminole Refining, Inc./Sellers Oil Company, Inc., 3/24/86; RF111-13

Sellers Oil Company, Inc. filed an Application for Refund in which the firm sought a portion of the fund obtained by the DOE through a consent order entered into with Seminole Refining, Inc. The firm claimed a refund on the basis of its purchases of No. 2 fuel oil from Seminole during the period July 1, 1977 through August 13, 1980. Since that product was decontrolled effective July 1, 1979, the OHA determined that the firm was not eligible for a refund and that the request for refund should be denied.

Sid Richardson Carbon and Gasoline Company and Richardson Products Company/Manito Oil and Propane, Kerschner's Gas Service, Inc., De Reu Skelgas Company, 3/27/86; RF26-24, RF26-29, RF26-30

The DOE issued a Decision and Order granting refunds from the Sid Richardson Carbon and Gasoline Company and Richardson Products Company deposit escrow account to three purchasers of Sid Richardson propane. Since none of the applicants claimed purchases above the threshold level, the DOE did not require them to submit a detailed showing of injury. The refunds to these firms total $60,928, representing $46,223 principal and $42,706 interest.

Standard Oil Company (Indiana)/American Cyanamid Company, 3/26/86; RF21-12400

The DOE issued a Decision and Order concerning an Application for Refund filed by American Cyanamid Company (ACC), an end-user of No. 6 fuel oil purchased directly from Standard Oil Company (Indiana), commonly known as Amoco, during the period March 1973 through December 1975. In accordance with the procedures established in the Amoco Special Refund Proceeding, the DOE determined that ACC should receive a refund based on the volumes of No. 6 fuel oil it purchased from Amoco during the consent order period. The total refund amount approved in this Decision is $1,728 ($1,300 principal plus $417 interest).

Standard Oil Company (Indiana)/Quality Oil Company, et al., 3/25/86; RF21-12583 et al.

The DOE issued a Decision and Order granting an Application for Refund filed by Quality Oil Company and 168 other firms from the Standard Oil Company (Indiana) consent order fund. The refunds approved in this Decision total $21,180 in principal and $11,924 interest.

Vickers Energy Corp./Minnesota, et al., 3/25/86; RQ1-267, et al.

The DOE issued a Decision approving in part the second-stage refund plans of Minnesota and South Caroline for use of funds from the Vickers, Pennsoil, Belridge, Amoco, Perry Gas, Charter, and Coline escrow accounts. Minnesota plans to use $58,630 plus interest for three energy conservation projects: (1) oat hull test burns, (2) energy conservation assistance for the commercial and industrial sectors, and (3) funding for the Energy Information Center. Because of pending litigation, however, the DOE cannot currently disburse second-stage Vickers and Pennsoil funds, and approval of the plan is contingent upon the DOE's success in this litigation. South Carolina proposes to use $404,600 of principal and interest for four energy-related projects: (1) motor fuel testing, (2) traffic light synchronization, (3) public transit fuel conservation, and (4) vanpool loans. The DOE found these programs restitutionary to injured consumers of motor gasoline and No. 2-D diesel fuel. Accordingly, the refund applications of Minnesota and South Caroline were partially granted.

Dismissals

The following submissions were dismissed:

Name and Case No.

Amerada Hess Corp.—RF189-16, RF189-17
Commonwheel Corp.—RF40-213
Coral Petroleum—RF189-2
Crown Central Petroleum Corp.—KRS-0002
Arthur J. Gobbee—RF225-327
Philip Palme—RF225-57.

Copies of the full text of these decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

BILLING CODE 6450-01-M

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Notice of Implementation of Special Refund Procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy announces the procedures for filing Applications for Refund from a fund of $368,000 obtained from American Pacific International, Inc., in settlement of enforcement proceedings brought by DOE's Economic Regulatory Administration.

DATE AND ADDRESS: Applications for refund must be filed by July 31, 1986, should conspicuously display a reference to case number HEF-0316 and should be addressed to: Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director, Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, DC. 20585, (202) 252-2094.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(c) of the procedural regulations of the Department of Energy (DOE), 10 CFR 205.282(c), notice is hereby given of the issuance of the Decision and Order set out below. The Decision and Order establishes procedures to distribute funds obtained as a result of a settlement between American Pacific International, Inc. and DOE. The Consent Order entered in the case settled all disputes between DOE and American Pacific International concerning possible violations of DOE price regulations with respect to the firm's sales of petroleum products to its customers, and possible violations of the regulations governing the Crude Oil Entitlements program, during the period November 1973 through January 1981.

Any members of the public who believe that they are entitled to a refund in this proceeding may file Applications for Refund. All applications should be filed by July 31, 1986, and should be sent to the address set forth at the beginning of this notice. Applications for refunds must be filed in duplicate and these applications will be made available for public inspection between the hours of 1:00 to 5:00 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E-234, 1000 Independence Avenue, SW., Washington, DC 20585.

Dated: April 22, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Decision and Order

Implementation of Special Refund Procedures

April 22, 1986.

Name of Petitioner: American Pacific International, Inc.

Date of Filing: October 13, 1983.

Case Number: HEF-0316.

On October 13, 1983, the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) filed a petition with the Office of Hearings and Appeals (OHA), requesting that the OHA formulate and implement procedures for distributing funds obtained through the settlement of enforcement proceedings involving American Pacific International, Inc. (API). *See* 10 CFR Part 205, Subpart V. This Decision and Order establishes the final procedures for distributing funds the DOE received from API to qualified refund applicants. Information necessary to prepare motor gasoline refund applications appears in Section II of this Decision. Section II-A sets forth specific requirements applicable to each of the various types of claimants that are likely to file applications. A claimant should take particular note of those requirements applicable to its particular circumstances. Section II-B sets forth the general requirements which apply to all motor gasoline refund applications.

API was a producer of crude oil and a reseller of motor gasoline. DOE audits of API revealed possible regulatory violations in the firm's first sales of crude oil and in its sales of motor gasoline during the period of federal price controls. In order to settle all claims and disputes between API and the DOE, the two parties entered into a consent order on May 13, 1983. Under the terms of the consent order, API agreed to remit $368,000 plus interest to the DOE in 36 monthly installments beginning June 30, 1983, in settlement of alleged violations occurring between November 1, 1973 and January 27, 1981 (the consent order period). These funds

VOL 51 ISS 85 MY 2 1986 UMI

have been held in an interest-bearing escrow account established with the United States Treasury pending a determination by the OHA of their proper distribution. As of March 31, 1986, the API escrow account contained approximately $454,000, including accrued interest, although API has not completed making the scheduled payments.

On February 10, 1986, we issued a Proposed Decision and Order which set forth a tentative plan for distributing the API settlement funds. *See* 51 FR 6463 (February 24, 1986). In the Proposed Decision, we described a two-stage process for disbursing refunds. Specifically, we proposed to distribute funds in the first stage to identifiable purchasers of API motor gasoline who could demonstrate that they were injured by the firm's pricing practices during the consent order period. We further stated that if funds remain after these meritorious claims have been paid, a second-stage refund procedure may become necessary. *See generally Office of Special Counsel*, 10 DOE ¶ 85,048 (1982) (hereinafter cited as *Amoco*).

The purpose of this Decision and Order is to establish the final procedures to be used for filing and processing claims in the first stage of the API proceeding. Because our determination concerning the final disposition of any remaining funds will necessarily depend on the size of the fund, we will not establish second-stage procedures in this Decision. *See Office of Enforcement*, 9 DOE ¶82,508 (1981) *(Caline)*. Accordingly, it would be premature for us to address at this time issues raised by commenters concerning second-stage refunds.[1]

Because the consent order resolves alleged violations involving sales of both crude oil and refined products, we proposed to divide the fund into two pools. *See Amoco*, 10 DOE 88,193–94. As we discussed in the Proposed Decision, from our review of a Proposed Remedial Order (PRO) issued to the firm by ERA, it appears that 39.82% of the alleged overcharges settled by the consent order concerned API's production and sales of crude oil. Accordingly, 39.82 percent of the principal contained in the API escrow account has been set aside in a pool of crude oil funds. The remaining 60.18 percent of the API funds will be made available for distribution to purchasers of API motor gasoline who demonstrate that they were injured by API's alleged violations.

I. Refund Procedures for Crude Oil Claims

API, like other producers of crude oil, was subject to the Mandatory Petroleum Price Regulations set forth in 6 CFR Part 150 and 10 CFR Part 212.[2] To the extent that API miscertified old crude oil as new or stripper well crude oil, the impact of the violations was spread throughout the domestic refining industry by the operation of the Entitlements Program, 10 CFR 211.67. *See, e.g., Union Oil Co.* v. *DOE*, 666 F 2d 797 (Temp. Emer. Ct. App. 1982), *cert. denied*, 459 U.S. 1202 (1983).

Based on the OHA's report to the District court in the Stripper Well Exemption Litigation, *see Report of the Office of Hearings and Appeals, In re: The Department of Energy Stripper Well Exemption Litigation*, MDL No. 378 (D. Kan., filed June 21, 1985), Fed. Energy Guidelines ¶90,567 at 90,620 (1985) (the OHA Stripper Well Report), the DOE announced that no claims for direct restitution would be accepted, and the Department would maintain overcharges associated with such violations in escrow to afford Congress the opportunity to select the means of making indirect restitution. *See* Statement of Restitutionary Policy, 50 FR 27400 (1985), Fed. Energy Guidelines ¶90,508 (1985).

In light of the DOE policy determination, the OHA issued an order in June 1985 announcing that it intended to apply the policy in special refund proceedings involving overcharge funds attributable to Entitlements-period crude oil certification violations. 50 FR 27402 (1985). After soliciting comments from potentially aggrieved parties regarding the OHA's application of the policy to pending refund proceedings, the OHS stated in *Amber Refining, Inc.*, 13 DOE ¶85,217, (1985), that it would apply the Statement of Restitutionary Policy in all crude oil refund cases.

We have reviewed comments filed on behalf of the Comptroller of the State of California which argue that restitution for crude oil overcharges is best effected through distribution of funds to the States for use in energy-related programs. However, in view of the OHA's decision in *Amber Refining*, we have determined that the funds obtained from American Pacific that are attributable to alleged crude oil violations should be pooled with other crude oil funds for distribution in accordance with departmental policies. *See* 50 FR 27402 (1985); 50 FR 27400 (1985); 50 FR 1919 (1985).

II. Refund Procedures for Motor Gasoline Refund Claims

During the first stage of the refund process, the remainder of the API settlement fund will be distributed to purchasers of API motor gasoline who satisfactorily demonstrate that they were injured by API's alleged pricing violations. It appears from examination of audit records that Tesoro Petroleum Corporation bought significant volumes of API motor gasoline during the consent order period, although it is likely that there are other potential claimants as well. From our experience with Subpart V proceedings, we believe that potential claimants will fall into the following categories: (1) end users, i.e., consumers who used the API motor gasoline; (2) regulated entities not subject to the former federal oil price controls which used API products in their businesses or cooperatives which sold API products in their businesses; (3) and refiners, resellers or retailers who resold the API motor gasoline.

As in many prior special refund cases, we are adopting certain presumptions[3] which will permit claimants to participate in the refund process without incurring inordinate expense and will enable OHA to consider the refund applications in the most efficient manner possible.[3]

We are adopting a presumption that the alleged overcharges were dispersed equally in all sales of motor gasoline made by API during the consent order period and that refunds should therefore be made on a pro-rata or volumetric basis. In the absence of better information, this assumption is sound because the DOE price regulations generally required a regulated firm to account for increased costs on a firm-wide basis in determining its prices. However, we also recognize that the impact on an individual purchaser might have been greater. Therefore, any purchaser may file a refund application

[1] Comments concerning second-stage refunds were submitted on behalf of the States of Arkansas, California, Louisiana, North Dakota, Rhode Island, Utah, and West Virginia.

[2] The DOE regulations, in effect from August 19, 1973 until January 27, 1981, governed prices charged in crude oil sales to first purchasers by defining ceiling prices for various tier classifications of crude oil. The regulations permitted producers to sell certain crude oil such as crude oil produced from "stripper well property," at market price levels. When a producer sold crude oil, it was required to certify in writing to the purchaser the respective volumes of crude oil belonging to each tier classification in each purchase. When a refiner processed the crude oil, it was required to report these certifications to the DOE to enable the agency to administer the Crude Oil Entitlements Program. 10 CFR 211.67.

[3] The Subpart V regulations specifically authorize the use of presumptions in special refund proceedings. *See* 10 CFR Part 205, Subpart V.

based on a claim that it suffered a disproportionate share of the alleged overcharges. *See, e.g., Sid Richardson Carbon and Gasoline Co. and Richardson Products Co./Siouxland Propane Co.*, 12 DOE ¶ 85,054 (1984).

Under the volumetric refund approach, a claimant will be eligible to receive a refund equal to the product of the number of gallons purchased times the per gallon refund amount.[4] At the present, however, we cannot determine precisely what the per gallon refund amount will be. Information set forth in the PRO suggests that API may have sold as little as 3.7 million gallons of motor gasoline during the audit period. If this figure represents the totality of API's motor gasoline sales during the consent order period, the per gallon refund would be approximately $.06 per gallon plus a share of the accrued interest. However, we note that information contained in the PRO relating to API's motor gasoline sales encompasses only the period from January 14 through March 31, 1974, whereas the consent order period spans the entire period during which petroleum prices were subject to federal regulation. Thus, there may be additional volumes of motor gasoline to be accounted for in determining a reasonably reliable per gallon refund amount. The Office of Hearings and Appeals has been unable to obtain gasoline sales volume figures for the entire consent order period because the firm has been unable to locate relevant records. *See* Memorandum of Telephone Conversation between Lorraine Loder, Esq. and Meri Arnett-Kremian, OHA Staff Attorney, dated May 20, 1985. For this reason, we will hold all refund applications until the close of the application period in order to determine whether the per gallon refund amount should be reduced in order to insure that sufficient funds are available to pay all valid claims.

(A) Specific Application Requirements for Each Category of Refined Product Refund Applicants

(1) Refund Applications by End Users. We are adopting a finding that end-users or ultimate consumers whose businesses are unrelate to the petroleum industry were injured by the alleged overcharges settled by the API consent order. Unlike regulated firms in the petroleum industry, members of this group generally were not subject to price controls during the consent order period, and they were not required to keep records which justified selling price increases by reference to cost increases. For these reasons, an analysis of the impact of the alleged overcharges on the final prices of non-petroleum goods and services would be beyond the scope of a special refund proceeding. *See Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069 (1984); *Office of enforcement*, 10 DOE ¶ 85,072 (1983) (*PVM Oil Associates*). We have therefore concluded that end-users of API motor gasoline need only document their purchase volumes of API gasoline to make a sufficient showing that they were injured by the alleged overcharges.

(2) Refund Applications by Regulated Firms or Cooperatives.—In addition, we are adopting the presumption that agricultural cooperatives and regulated firms, such as public utilities, that are required to pass on to their customers the benefit of any refund received will be exempted from the requirement that they make a detailed showing of injury. *See Office of Special Counsel*, 9 DOE ¶ 82,538 (1982) *(Tenneco); Tenneco Oil Company/Farmland Industries, Inc.*, 9 DOE ¶ 82,597 (1982). Instead, those firms and cooperative groups should provide with their applications a full explanation of the manner in which refunds would be passed through to their customers and how the appropriate regulatory body or membership group will be advised of the applicant's receipt of refund money. We note, however, that a cooperative's sales of API products to non-members will be treated in the same manner as sales by other resellers.

(3) Refund Applications by Resellers, Retailers and Refiners.—a. *Spot Purchasers.* If a claimant made only spot purchases, we believe that in most circumstances it should not receive a refund since it is unlikely to have experienced injury. Spot purchasers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot market purchases of API product at increased prices unless they were able to pass through the full amount of the quoted selling price at the time of purchase to their own customers. *See Office of Enforcement*, 8 DOE ¶ 82,597 at 85,396–97 (1981) *(Vickers)*. Therefore, a firm which made only spot purchases from API will not receive a refund unless it persents evidence rebutting the spot purchaser presumption and establishes the extent to which it was injured as a result of its purchases of API motor gasoline during the consent order period. *See Amoco*, 10 DOE at 88,200. Spot purchasers will *not* be able to use the presumption of injury for small claims described below.

b. *Refiners, Resellers and Retailers Seeking Refunds of $5,000 or Less.* We are also adopting the presumption that purchasers of API motor gasoline seeking small refunds were injured by API's pricing practices. *See, e.g., Uban Oil Co.*, 9 DOE ¶ 82,541 (1982). With small claims, the cost to the firm of gathering evidence of injury to support a refund claim could exceed the expected refund. Consequently, without simplified procedures, some injured parties would be effectively denied an opportunity to obtain a refund. Under the small-claims presumption, a claimant seeking a refund of $5,000 or less will not be required to submit any evidence of injury beyond establishing the volume of API motor gasoline it purchased during the consent order period.[5] *See Texas Oil & Gas Corp.*, 12 DOE at 88,210; *Marion Corp.*, 12 DOE ¶ 85,014 (1984). In addition to the general information required from all applicants, it need only establish that it is a small-claims applicant.

c. *Refiners, Resellers and Retailers Seeking Refunds Greater than $5,000.* Unlike small-claims applicants, a firm which claims a refund in excess of $5,000 will be required to provide a detailed demonstration of its injury in addition to providing purchase volume informatoin. It will be required to demonstrate that it maintained a "bank" of unrecovered product costs in order to show that it did not pass along the alleged overcharges to its own customers. In addition, a claimant must show that market conditions would not permit it to pass through those increased costs. *See, e.g., Panhandle Eastern Pipeline Co./I.V. Cole Petroleum Co.*, 10 DOE ¶ 85,051 (1983); *Tenneco Oil Co./ Mid-Continent Systems, Inc.*, 10 DOE ¶ 85,000 (1982). For periods in which the DOE regulations did not require retailers or resellers to compute cost bands, a firm will only be required to show the market conditions prevented it from recovering increased costs. Such a showing might be made through a demonstration of lowered profit margins, decreased market shares, or depressed sales volume during the

[4] A volumetric refund amount will be calcuated by dividing the motor gasoline portion of the settlement amount by our estimate of the total gallonage of motor gasoline sold by API during the period encompassed by the consent order.

[5] Claimants whose monthly purchases during the period for which a refund is claimed result in a volumetric refund of greater than $5,000 but who cannot establish that they did not pass through the price increases to their customers, or who limit their claims to the threshold amount, will be eligible for a refund of the $5,000 threshold amount without being required to submit additional evidence of indury. *See* Office of enforcement, 10 DOE ¶ 85,029 at 88,122 (1982) (Ada); Vickers, 8 DOE at 85,396.

VOL 51 ISS 85 MY 2 1986 UMI

period of purchases from the consent order firm.

(B) General Refund Application Requirements

In addition to the specific requirements outlined above, all refund applicants should furnish the information set forth below.

1. An application for refund must be in writing, signed by the applicant, and specify that it pertains to the American Pacific International, Inc. Special Refund Proceeding, Case No. HEF–0316.

2. Each applicant should furnish its name, street or post office address, and its telephone number. If the applicant is a business firm, it should furnish all other names under which it operated during the period for which the claim is being filed.

3. Each applicant should specify how it used the product—i.e., whether it was a refiner, reseller, retailer or an end-user.

4. Each applicant must submit a monthly purchase schedule for API motor gasoline purchases during the consent order period, November 1, 1973 through January 27, 1981.

5. If an applicant purchased API motor gasoline from a reseller, it must establish its basis for belief that the motor gasoline originated with API and identify the reseller from whom the product was purchased. Indirect purchasers who either fall within a class of applicant whose injury is presumed, or who can prove injury, may be eligible for a refund if the reseller of API products passed through the alleged API overcharges to its own customers.

6. The application for refund should contain the name, address, and telephone number of the person who prepared the application. If the preparer was someone other than the applicant, the applicant should furnish us with the name and telephone number of a contact person familiar with the facts set forth in the application who we may contact for additional information concerning the application. Unless otherwise specified, the refund check will be issued to the preparer.

7. If the applicant is affiliated or associated with API in any manner, it must so indicate and provide information explaining the nature of its relationship with the consent order firm.

8. If the applicant has been involved in enforcement proceedings brought by the DOE, it must provide a summary of the present status of the proceeding, or if the matter is no longer pending, it must indicate how the proceeding was resolved.

9. If the applicant is a firm which did not actually purchase gasoline from API, but is a successor to an API customer, the applicant must provide evidence establishing that it, rather than API's former customer, is entitled to a refund.

10. Each application must include the following statement: "I swear (or affirm) that the information submitted is true and accurate to the best of my knowledge and belief." *See* 10 CFR 205.283(c); 18 U.S.C. 1001.

11. All applications for refund must be filed in duplicate. A copy of each application will be available for public inspection in the Public Reference Room of the Office of Hearings and Appeals, Forrestal Building, Room 1E–234, 1000 Independence Avenue, SW., Washington, DC. Any applicant who believes that its application contains confidential information must so indicate on the first page of its application and submit two additional copies of its application from which the confidential information has been deleted, together with a statement specifying why any such information is privileged or confidential.

12. Applications should be sent to: Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

13. Applications must be postmarked within 90 days after publication of this Decision and Order in the **Federal Register**. *See* 10 CFR 205.286. All applications for refund received within the time limit specified will be processed pursuant to 10 CFR 205.284 and the procedures set forth in this Decision and Order.

It is Therefore Ordered That:

(1) Applications for Refunds from the fund remitted to the Department of Energy by American Pacific International, Inc. pursuant to the consent order executed on May 13, 1983 may now be filed.

(2) All applications must be filed no later than 90 days after publication of this Decision and Order in the **Federal Register**.

Dated: April 22, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

[FR Doc. 86–9871 Filed 5–1–86; 8:45 am]

BILLING CODE 6450–01–M

Implementation of Second Stage Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Notice of implementation of second stage special refund procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy announces the procedures to be used by state governments and autonomous American Indian tribes for filing Second Stage Applications for Refund from a fund of $30,938,071 obtained from Standard Oil Company (Indiana), now known as Amoco Corporation, in settlement of enforcement proceedings brought by the DOE.

ADDRESS: Applications for refund should conspicuously display a reference to case number HQF–0588, and should be addressed to: Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director, Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–2094.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(c) of the procedural regulations of the Department of Energy, 10 CFR 205.282(c), notice is hereby given of the issuance of the Decision and Order set out below. The Decision and Order establishes procedures to distribute funds remaining after the conclusion of the first stage refund proceeding obtained as a result of a settlement between Standard Oil Company (Indiana), now known as Amoco Corporation, and DOE. The Consent Order entered in the case settled nearly all disputes between DOE and Amoco concerning possible violations of DOE price regulations with respect to the firm's sales of crude oil and refined petroleum products during the period March 1973 through December 1979.

The state governments listed in the Appendix to the Decision and Order set out below may file Applications for Refund. In addition, autonomous American Indian tribal groups may submit separate applications for appropriate portions of the refunds which would otherwise go to the states bordering their reservations. All Applications should be sent to the address set forth at the beginning of this notice. Applications for refunds must be filed in duplicate and these applications will be made available for public inspection between the hours of 1:00 and 5:00 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E–234, 1000 Independence Avenue, SW., Washington, DC 20585.

Dated: April 24, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Decision and Order

Second-Stage Refund Procedures

April 24, 1986.

Name of petitioner: Standard Oil Company (Indiana).

Date of filing: June 21, 1985.

Case number: HQF–0588.

This determination announces completion of the first-stage refund process for distributing $72 million plus interest which the Department of Energy (DOE) received under a 1980 consent order from Standard Oil Company (Indiana), now known as Amoco Corporation. Approximately $30.94 million attributable to refined product sales during the consent order period remains in the Amoco escrow account after all claims have been satisfied. This Decision discusses how these unclaimed funds will be distributed.

I. Background

The funds at issue in this proceeding were obtained from Amoco through a February 14, 1980 consent order with the DOE. *See* 45 FR 12287 (1980); *See also* 45 FR 26747 (1980). The consent order made available approximately $72 million for distribution under special refund procedures established by the OHA. *See Office of Special Counsel*, 10 DOE ¶ 85,048 (1982) at 88,193.

Final procedures for refunding the money in the Amoco escrow account to injured consumers were established in *Office of Special Counsel*, 10 DOE ¶ 85,048 (1982) (hereinafter cited as *Amoco I*). The OHA divided the settlement fund of $72 million plus interest into two parts: one part (30.7 percent, or $22.1 million) was allowable to Amoco's crude oil sales. The other part (69.3% or $49.9 million) was used to pay claims filed by purchasers of Amoco refined products.

As of March 31, 1986, the OHA had received 12,580 first-stage claims from injured parties and disbursed nearly $30.9 million in principal and interest from the interest-bearing Amoco escrow account to claimants. Virtually all of these claims have now been adjudicated, a sufficient reserve for remaining claims has been calculated, and new applications will no longer be accepted.

On November 10, 1982, the OHA determined that unclaimed funds from the motor gasoline and middle distillate refund pools should be distributed to governments of the states in which these Amoco products were sold to be used for the benefit of injured consumers.[1] *Standard Oil Co. (Indiana)*, 11 DOE ¶ 85,185 (1983) (hereinafter cited as *Amoco II*). At that time $24 million ($21 million for motor gasoline and $3 million for middle distillates) was made available to states to distribute to energy consumers within their states. To date, the OHA has disbursed over $22 million in Amoco refunds to 39 state governments and the District of Columbia and $16,133 to eight federal native American tribal reservations through the second-stage refund process.[2]

II. Remaining Funds

At this point, $70.37 million remains in the Amoco escrow account. Of that amount, $38.03 million[3] represents the current reserve for distribution in accordance with DOE policy for escrow funds attributable alleged crude oil violations. An additional $1.40 million is reserved for second stage refunds allocated in *Amoco II* but not yet disbursed. That leaves $30.94 million, including interest, attributable to refined products.

The following table indicates the source of that amount, after all disbursements to date:

Product pool	Amount
Motor gasoline	$15,407,461
Natural gas liquids	7,334,232
Residual fuel oil and related products	3,889,615
Middle distillates	2,032,327
Jet fuel and aviation gasoline	2,274,436
Total	$30,938,071

III. Distribution of Remaining Funds

The funds remaining from the product pools should be distributed to state governments for indirect restitution. Only states in which Amoco sold the product concerned are eligible to participate, *Amoco I* at 88,202. Each state's share is based on the relative impact of the alleged Amoco overcharges or, in other words, proportional to the ratio which statewide sales of that Amoco product during the consent order period bears to national sales of the Amoco product. This information is summarized in the Appendix. This impact differs from the distribution of refined product sales generally. According to reports which Amoco filed with the Energy Information Administration (EIA), which listed Amoco's sales in each of the 48 contiguous states for each refined product, Amoco's sales were heavily concentrated in a few states, especially in the industrial midwest and Texas. For example, Amoco sold almost one-third of all its products in only three Midwestern states: Illinois, Michigan, and Indiana. Amoco sold 14.5 percent of all of its products in Illinois, 9.9 percent in Michigan, and 6.3 percent in Indiana. Sales in Texas accounted for another 10.7 percent of Amoco's nationwide sales of petroleum products other than crude oil. Sales in these four states—Illinois, Indiana, Michigan, and Texas—accounted for 41.4 percent of all sales made by Amoco during the relevant period. By contrast, these four states accounted for only 18 percent of the total refined products sold nationwide.

As in *Amoco II*, certain autonomous American Indian tribes are eligible to receive some portion of the second-stage refund moneys for the consumers they represent. *See note 1, supra.* The federally-recognized Indian tribes are self-governing political entities that are autonomous from the states within whose borders their reservations lie. *Worcester v. Georgia*, 31 U.S. 515 (1832); *William v. Lee*, 358 U.S. 217 (1959). Consequently, we will accept plans from tribal organizations for using a share of the Amoco funds attributable to products consumed by members residing on their reservations. Those plans should meet the general requirements for state plans which are outlined in this decision. Tribal plans should also include information indicating that tribal members residing on the reservation are not eligible to participate in state programs being funded by the Amoco second-stage refund moneys and a proposal for allocating a portion of state funds to the tribal organization. *See, e.g., Standard Oil Co. (Indiana)/The Navajo Nation*, 13 DOE ¶ 85,266 (1985) and cases cited therein. Of course, many residents of reservations may already be served

[1] Since federally recognized native American tribal organizations are self-governing political entities that are autonomous from the states within whose borders their reservations lie and often administer energy programs that are independent of state programs, tribal organizations were permitted to use portions of the states' shares of the Amoco motor gasoline and middle distillate refunds. *Amoco II* at 88,299,300. The same principles will be applied in this decision.

[2] Some states have only received portions of the refunds allotted to them. In these instances, the states have been required to revise and resubmit portions of their restitutionary plans. *See, e.g., Standard Oil Co. (Indiana)/Iowa*, 12 DOE ¶ 85,005 (1985).

[3] That sum is derived by multiplying 30.7% by the total current equity value ($123,869,459.14) of the Amoco escrow account. The DOE's Statement of Restitutionary Policy governs these funds. 50 FR 27402 (July 2, 1985). The policy statement announced that the Department would maintain crude oil funds in escrow to afford the Congress the opportunity to select the means of making indirect restitution. Should the Congress decline to act on the issue by the fall of 1986, the DOE stated that the funds should be paid to the miscellaneous receipts account of the United States Treasury in order to benefit all Americans.

VOL 51 ISS 85 MY 2 1986 UMI

through agreements between tribal organizations and the respective state governments, and those tribal organizations need not apply for refund money separately from state governments.

IV. Application Procedure

Funds will be disbursed upon the approval of a plan for spending the money submitted by a jurisdiction in which Amoco products were consumed, as set forth in the Appendix. These plans should meet the general restitutionary objective of this proceeding. Plans will be scrutinized to ensure that administrative costs are minimized. Refunds may be used for new energy-related projects, but they must not be used to implement projects or programs that would be funded regardless of this distribution. In other words, the refund money distributed must be used to supplement, not supplant, any state or federal funds which are already budgeted tor those purposes. Each program must be implemented within a reasonable period following receipt of the funds. Any interest earned after refund moneys have been disbursed shall be allotted to the projects for the purposes approved by OHA.

States should notify affected members of the public that the state is eligible to receive a refund in this case. *See Charter Co.*, 12 DOE ¶ 85,206 (1985) at 88,677–8. The public should be informed about the type of restitutionary plan which each state proposes to submit for approval of the OHA, and accorded an opportunity to contribute its ideas in the course of that process. Each application submitted must contain a statement describing the type of notice that was provided in the course of preparing the proposed plan. *Id.*

Each plan submitted should follow the broad guidelines discussed above, and must include the following information: (1) A description of the programs to be funded; (2) the time frame for implementation of the programs; (3) a statement explaining whether each program is an enlargement of an existing program or a new project; (4) an explanation of the manner in which consumers of refined petroleum products will benefit from the programs; (5) a statement certifying that the submitting agency has authority under state law to submit the plan; (6) a statement certifying either (a) that the tribal organizations responsible for administering reservations located within a state have agreed that the state's proposal will provide an equitable share of the allocated funds for tribal members residing on the reservation or (b) that those tribal organizations will file a separate proposed plan; (7) a statement describing the type of public notice that was provided by the state government in the course of preparing the proposed plan; and (8) a statement committing the agency or office responsible for administering the plan to filing with the OHA a post-plan report, which include a certification that the funds were spent in accordance with the DOE-approval plan. For further information concerning plan approvals, see *Standard Oil Co. (Indiana)/Maryland*, 13 DOE ¶ 85,075 (1985).

V. Conclusion

This determination concludes the distribution of $72 million plus interest to injured purchasers of Amoco products. All first-stage claims remaining have been satisfied, and an additional $30 million in principal and interest will be distributed in a second-staged refund proceeding. State governments and qualified American Indian tribal groups are invited to apply for these funds.

It Is Therefore Ordered That:

(1) The states set forth in the Appendix to this Decision and Order and qualified American Indian tribal groups may submit plans for the use of $30.9 million remaining in the Amoco escrow account. Each state's share of those funds including interest as of March 31, 1986 is set forth in the Appendix.

(2) This is a final order of the Department of Energy.

George B. Breznay,

Director, Office of Hearings and Appeals.

Dated: April 24, 1986.

APPENDIX.—STATE'S SHARES OF UNCLAIMED AMOCO FUNDS

State	Percent of Amoco's sales in state	State share
Alabama	1.7	$525,947
Alaska	0.0	0
Arizona	0.0	0
Arkansas	0.6	185,629
California	0.3	92,814
Colorado	1.3	402,195
Connecticut	0.7	216,566

BILLING CODE 6450-01-M

Modification of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Notice of Implementation of Special Refund Procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy announces that it is extending the deadline for filing Applications for Refund from funds obtained from Mobil Oil Corporation in settlement of enforcement proceedings brought by DOE's Economic Regulatory Administration.

DATE AND ADDRESS: Applications for refund must be postmarked by August 1, 1986, should conspicuously display a reference to case number HEF-0508, and should be addressed to: Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director, Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–2094.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(c) of the procedural regulations of the Department of Energy, 10 CFR 205.282(c), notice was given of the issuance of a Decision and Order which implemented special refund procedures on December 24, 1985. 50 FR 53470 (December 31, 1985). The Decision and Order established procedures to distribute funds obtained as a result of a settlement between Mobil Oil Corporation and the DOE. The settlement resolved all disputes between DOE and Mobile concerning possible violations of DOE price and allocation regulations with respect to the firm's sales of refined petroleum products to its customers during the period March 1973 through January 1981, and its sales of crude oil during the period June 1979 through January 1981.

Any members of the public who believe that they are entitled to a refund in this proceeding may file Applications for Refund. The Department of Energy is hereby extending the deadline for receiving such applications. Applications will now be accepted beyond the deadline of May 1, 1986, as announced in the December 24, 1985 Decision and Order. All applications should be postmarked by August 1, 1986, and should be sent to the address set forth at the beginning of this notice. Applications filed after that date will be accepted only if due cause for delay is demonstrated. Applications for refunds must be filed in duplicate and these applications will be made available for public inspection between the hours of 1:00 and 5:00 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E–234, 1000 Independence Avenue, SW., Washington, DC 20585.

Dated: April 22, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

ENVIRONMENTAL PROTECTION AGENCY

[ER-FRL-3010-9]

Environmental Impact Statements; Availability

Responsible Agency: Office of Federal Activities, General Information (202) 382–5073 or (202) 382–5075. Availability of Environmental Impact Statements filed April 21, 1986 through April 25, 1986 Pursuant to 40 CFR 1506.9.

EIS No. 860161, Draft, FHW, CA, CA–85 Transportation Corridor Construction, between US 101 in San Jose and I–280 near Stevens Creek Boulevard in Cupertino, Santa Clara County, Due: June 23, 1986, Contact: Dave Eyres (916) 551–1314.

EIS No. 860162, Draft, SCS, OK, Dry Creek Watershed, Protection and Flood Prevention Plan, Lincoln County, Due: June 18, 1986, Contact: Roland Willis (405) 624–4360.

EIS No. 860163, Final, FHW, MT, I–15 Beltview Interchange Construction, I–15 to Colonial Drive, Lewis and Clark County, Due: June 2, 1986, Contact: William Dunbar (406) 444–5310.

EIS No. 860164, Draft, NRC, CA, Humboldt Bay Power Plant, Unit 3, Decommission, Approval, Humboldt County, Due: June 16, 1986, Contact: Peter Erickson (301) 492–8194.

EIS No. 860165, Draft, Joint Lead, AFS, BLM, CA, Lassen National Forest, Geothermal Exploration, Development, and Production, Leasing, Due: June 16, 1986, Contact: Curt Spalding (916) 257–2151.

EIS No. 860166, Final, FHW, TN, Tn–386 Extension, I–65 to Hendersonville Bypass, Construction, Davidson and Sumner Counties, Due: June 2, 1986, Contact: Thomas Ptak (615) 736–5394.

EIS No. 860167, Draft, IBR, UT, Uinta Basin Unit Construction and Operation, Colorado River Water Quality Improvement Program, Duchesne and Uintah Counties, Due: July 28, 1986, Contact: Jay Henry (801) 379–1172.

EIS No. 860168, DSuppl, BLM, WY, Grass Creek and Cody Resource Areas, Wilderness Suitability, Owl Creek Wilderness Study Area, Designation, Hot Springs County, Due: July 31, 1986, Contact: Tim Smith (307) 347–9871.

Amended Notice:

EIS No. 860126, Final, BLM, AK, Central Yukon Planning Area, Land and Resource Management Plan, Due: May 15, 1986, Published FR 4–11–86, Review period extended.

Dated: April 29, 1986.

David G. Davis,

Acting Director, Office of Federal Activities.

BILLING CODE 6560-50-M

[ER-FRL-3011-1]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared April 14, 1986 through April 18, 1986 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382–5075/76. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in Federal Register February 7, 1986 (51 FR 4804).

Draft EISs

ERP No. D–AFS–K65068–CA, Rating EC2, Tahoe Nat'l Forest, Land and Resource Mgmt. Plan, CA. SUMMARY: EPA expressed concerns that forest activities such as timber harvests and vegetative type conversions will degrade water quality, and suggested that timing and guidelines applied to these activities be modified to protect water quality.

ERP No. D–COE–C36103–NY, Rating EC2, Sauquoit Creek Flood Control Plan, NY. SUMMARY: EPA has reviewed the main report and the draft EIS and concurs with the selected high-flow diversion channel alternative. However, there are environmental concerns regarding the implementation and extent of the wetlands mitigation and adequacy of the discussion of cumulative aquatic and wetland impacts.

ERP No. DS–COE–F35029–MN, Rating LO, Upper Mississippi River Lower Pool 5 Channel Maintenance and Weaver Bottoms Rehabilitation Plan, Dredged Material Maintenance, MN. SUMMARY: EPA has no objections to the proposed activity:

ERP No. D–JUS–L81007–OR, Rating EC2, Sheridan Federal Correctional Institution Complex, Construction and Operation, OR. SUMMARY: The draft EIS presents a somewhat confusing discussion of the water supply for the proposed correctional facility. It is not clear how water would be supplied to the facilty, or how supplying this water need would affect the natural or socio-economic environments; nevertheless, the draft EIS provides a good evaluation of the environmental consequences of the action and means for mitigating its impacts.

Final EISs

ERP No. F–AFS–E65034–AL, Alabama Nat'l Forests, Land and Resource Mgmt. Plan, AL. SUMMARY: EPA has no serious objections to the implementation of the preferred alternative. EPA's major concerns relate to the monitoring and follow-up on the use of Best Management Practices (BMP's) to ensure the protection of the Forest's environmental quality. In particular, we are suggesting on-going water quality monitoring—both long-term sampling of a cross-section of watersheds and statistical sampling of regular forest

events (e.g. road construction, timber management; etc.).

ERP No. F-AFS-C65063-80, Ouachita Nat'l Forest, Land and Resource Mgmt. Plan, AL. SUMMARY: EPA has no objections to the proposed action as described.

ERP No. F-CDB-K89059-CA, San Bernadino Enterprise Zone Application, Designation and CDB Grant, CA. SUMMARY: EPA had no comments to offer on this final EIS.

ERP No. F-FHW-L50002-WA, US 101/ Palix River Bridge Replacement and Approach and County Road Connections Realignment, 404 Permit Sect. 9 (CGD) Permit, WA. SUMMARY: The final EIS fully resolved EPA's environmental concerns and a more environmentally benign alternative was selected as the preferred alternative. EPA commended the lead agency for producing an especially clear and readable decision making document.

Dated: April 29, 1986.

David G. Davis,

Acting Director, Office of Federal Activities.

Open Meeting of the New Source Performance Standards for Residential Wood Combustion Units, Negotiated Rulemaking Advisory Committee

As required by section 9(a)(2) of the Federal Advisory Committee Act Pub. L. 92-463), EPA is giving notice of an open meeting of the Advisory Committee on New Source Performance Standards for Residential Wood Combustion Units.

The next meeting is scheduled on May 19 and 20, 1986, and will be held at the Capitol Park International, North Lobby Center, 800 Fourth Street, SW., Washington, DC 20024. Each day the meeting will begin at 9:00 a.m. and will run until completion.

The purpose of the May meeting is to work on the following substantive issues: test methods (sampling train, gas flow measurement procedures); stove certification procedures (notification requirements, submittal of data, EPA approval); and decisions on which laboratories will do certification testing and how those laboratories are selected and accredited. At this meeting, we anticipate the group will also begin working on the draft language of the proposed rule.

If interested in attending, or in receiving more information, please contact Kathy Tyson at (202) 382-5352.

Dated: April 24, 1986.

Milton Russell,

Assistant Administrator for Policy, Planning and Evaluation.

Toxic Substances; Fatty Acid Ester; Test Marketing Exemption Application

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5 (a) or (b) of the Toxic Substances Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which must either be approved or denied within 45 days of receipt, are discussed in EPA's final rule published in the Federal Register of May 13, 1983 (48 FR 21722). This notice, issued under section 5(h)(6) of TSCA, announces receipt of one application for an exemption, provides a summary, and requests comments on the appropriateness of granting the exemption.

DATE: Written comments by: May 19, 1986.

ADDRESS: Written comments, identified by the document control number "[OPTS-59219]" and the specific TME number should be sent to: Document Control Officer (TS-790), Confidential Data Branch, Information Management Division, Office of Toxic Substances, Environmental Protection Agency, Rm. R-201, 401 M Street, S.W, Washington, DC 20460, (202) 382-3532.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-611, 401 M Street, S.W, Washington, DC 20460, (202) 382-3725.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the TME received by EPA. The complete non-confidential document is available in the Public Reading Room E-107 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

Toxic Substances; Certain Chemicals Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the Federal Register of May 13, 1983 (48 FR 21722). In the Federal Register of November 11, 1984, (49 FR 48066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. PMNs for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of nine such PMNs and provides a summary of each.

DATES: Close of Review Period:

Toxicity Data. No data submitted.
Exposure. Manufacture: dermal, a total of 10 workers, up to 4 hrs/da, up to 18 da/yr.
Environmental release/Disposal. Release unknown. Disposal by POTW, approved landfull, heat recovered, in plant treatment, Clean Air Act, Clean Water Act and/or Resource Conservation and Recovery Act (RCRA).

P 86-010

Manufacturer. Confidential.
Chemical. (G) Substituted phenol.
Use/Production. (G) Contained use. Prod. range: Confidential.
Toxicity Data. No data submitted.

Exposure. Manufacture: dermal, a total of 30 workers, up to 4 hrs/da, up to 85 da/yr.
Environmental Release/Disposal. Release to air and water. Disposal by POTW, in plant treatment, recycle or burning and Clean Water Act.

P 86-001

Importer. Confidential.
Chemical. (S) Cuprate (4-), [5-(acetylamino)-4-hydroxy-3-[[5-hydroxy-6-[[(2-hydroxy-4-[[2-(sulfooxy)ethyl]sulfonyl]phenyl]azo]-7-sulfo-2-naphthalenyl]azo]-2, 7-naphthalene disulfonate(6-)]-tetrasodium salt.
Use/Import. (S) Reactive dye for textiles. Import range: 30,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. No exposure.
Environmental Release/Disposal. No release.

P 86-002

Importer. Confidential.
Chemical. (S) Cupate (4-)[2[[2,4-dihydroxy-3-[[2-hydroxy-5-[[2-(silfooxy)ethyl]sulfonyl]phenyl]azo]-pheny]azo]-4,8-naphthalene disulfonate(-6)]-trisodium salt.
Use/Import. (S) Reactive dye for textiles. Import range: 30,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. No exposure.
Environmental Release/Disposal. No release.

4P 86-003

Manufacturer. Amoco Corporation.
Chemical. (G) Succinate ester amide.
Use/Production. (G) Lubricant oil additive. Prod. range: Confidential.
Toxicity Data. Irritation: Skin—Not corrosive.
Exposure. Confidential.
Environmental Release Disposal. No release.

P 86-004

Manufacturer. Rohm and Haas Company.
Chemical. (G) Polymer of alkyl methacrylate and substituted methacrylamide.
Use/Production. (G) Lubricant additive. Prod. range: Confidential.
Toxicity Data. No data on the PMN substance submitted.
Exposure. Manufacture: a total of 4 workers, up to 45 min/da, up to 9 da/yr.
Environmental Release/Disposal. .5 to 1.8 kg/batch released to control technology. Disposal by incineration.

P 86-005

Manufacturer. Confidential.
Chemical. (G) Functionalized ethene copolymer.
Use/Production. (S) Industrial and commercial plastics additive. Prod. range: 80,000-73,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal, a total of 13 workers, up to 1 hr/da, up to 333 da/yr.
Environmental Release/Disposal. 22 kg/day released to land. Disposal by incisertion or landfill.

P 86-006

Importer. SEH America.
Chemical. (G) Mercaptoalkyl, alkylpolysiloxane.
Use/Import. (G) Open system, non-dispersive application. Import range: Confidential.
Toxicity Data. No data submitted.
Exposure. Processing: dermal, a total of 50 workers, up to 8 hrs/da, up to 240 da/yr.
Environmental Release/Disposal. No data submitted.

P 86-007

Importer. SEH America.
Chemical. (G) Siloxanes and silicones, methyl, mercaptoalkyl hydrolysis products with tetraethoxysilane.
Use/Import. (G) Open system, non-dispersive application. Import range: Confidential.
Toxicity Data. No data submitted.
Exposure. Processing: dermal, a total of 50 workers, up to 8 hrs/da, up 240 da/yr.
Environmental Release/Disposal. No data submitted.

P 86-008

Manufacturer. Confidential.
Chemical. (G) Ester copolymer.
Use/Production. (G) Contained use. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal, a total of 30 workers, up to 4 hrs/da, up to 27 da/yr.
Environmental Release/Disposal. Release unknown. Disposal by POTW, landfill, heat recovered by Clean Air Act, Clean Water Act, RCRA, and/or in-plant treatment.

P 86-009

Manufacturer. Confidential.
Chemical. (G) Alkylated aromatic compound.
Use/Production. (G) Contained use. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal, a total of 30 workers, up to 4 hrs/da, up to 75 da/yr.
Environmental Release/Disposal. Release unknown. Disposal by POTW, landfill, heat recovered by Clean Air Act, Clean Water Act, RCRA, and/or in-plant treatment.

P 86-010

Manufacturer. Confidential.
Chemical. (G) Substituted alkyl arylamine.
Use/Production. (S) Site-limited isolated intermediate. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: a total of 2 workers.
Environmental Release/Disposal. Confidential. Disposal by POTW.

P 86-011

Importer. Ajinomoto U.S.A., Inc.
Chemical. (G) Amine adduct of epoxy resin.
Use/Import. (S) industrial and commercial curing agent and accelerator for epoxy resin. Import range: 1,200-6,000 kg/yr.
Toxicity Data. Acute oral: 20 g/kg; Irritation: Skin—Mild; Skin sensitization: Negative.
Exposure. Use: dermal and inhalation, a total of 5 workers, up to 8 hrs/da, up to 240 da/yr.
Environmental Release/Disposal. Release to air and water.

P 86-012

Importer. Ajinomoto U.S.A., Inc.
Chemical. (G) Amine adduct of epoxy resin.
Use/Import. (S) Industrial and commercial curing agent and accelerator for epoxy resin. Import range: 1,200-6,000 kg/yr.
Toxicity Data. Acute oral: 20 g/kg; Irritation: Skin—Mild; Skin sensitization: Negative.
Exposure. Use: dermal and inhalation, a total of 5 workers, up to 8 hrs/da, up to 240 da/yr.
Environmental Release/Disposal. Release to air and water.

Manufacturer. Lawter International, Inc.
Chemical. (G) Linseed oil based terephthalic alkyd.
Use/Production. (S) Industrial printing ink vehicle. Prod. range: 22,000-30,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal, a total of 10 workers, up to 10 hrs/da, up to 3 da/yr.
Environmental Release/Disposal. 0.1 to 2 kg/day released to air and water with 0.5 to 2 kg/day to land. Disposal by POTW and approved landfill.

P 86-619

Manufacturer. Confidential.
Chemical. (G) Substituted phenyl, substituted triazolyl (substituted) alkanamide.
Use/Production. (G) Contained use in an article. Prod. range: 650 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture and processing: dermal, a total of 26 workers, up to 1.0 hr/da, up to 5 da/yr.
Environmental Release/Disposal. No release. Less than 1 kg/batch disposed by biological treatment with less than 3 kg/batch incinerated.

P 86-620

Manufacturer. Confidential.
Chemical. (G) Substituted-3-sulfoalkylbenzothiazole, salt.
Use/Production. (G) Chemical intermediate. Prod. range: 450-500 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture, processing and use: dermal, a total of 9 workers, up to 0.7 hr/da, up to 4 da/yr.
Environmental Release/Disposal. No release. Less than 2 kg/batch incinerated.

P 86-621

Manufacturer. Confidential.
Chemical. (G) (Substituted aromatic heterocyclic) substituted-3-sulfoalkyl.
Use/Production. (G) Chemical intermediate. Prod. range: 200 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture and processing: dermal, a total of 48 workers, up to 1.0 hr/da, up to 10 da/yr.
Environmental Release-Disposal. No release. Less than 0.5 kg/batch disposed by biological treatment with less than 1 kg/batch incinerated.

Dated: April 18, 1986.

Denise Devoe,
Acting Director.

BILLING CODE 6560-50-M

FARM CREDIT ADMINISTRATION

Organization; Farm Credit System Capital Corporation

AGENCY: Farm Credit Administration.

ACTION: Notice; Amendment to Articles of Incorporation of the Farm Credit System Capital Corporation.

SUMMARY: On April 14, 1986, the Farm Credit Administration ("FCA") amended Article III of the Articles of Incorporation of the Farm Credit System Capital Corporation ("Corporation"), chartered by the FCA on February 24, 1986 (51 FR 7121), pursuant to Title IV, Part D1, section 4.28A of the Farm Credit Act of 1971, as amended ("Act"), relating to the principal offices of the Corporation. As amended, Article III provides that the principal business offices of the Corporation shall be located in the greater metropolitan area of Kansas City, specifies that the business and operations of the Corporation shall be conducted from such offices, and provides that all meetings of the board of directors of the Corporation shall be held in that area, except that a meeting of the board of directors may be held outside the metropolitan area of Kansas City upon a resolution adopted by at least 80 percent of the members of the board. The Articles of Incorporation were also amended to provide that the respective initial terms of the board of directors of the Corporation shall end on December 31, 1986 and December 31, 1987, and that subsequent terms of related and appointed directors shall be for 2 calendar years.

The FCA has determined that Kansas City is a central and strategic location for servicing the loans and other assets likely to be purchased and administered by the Corporation, and from which the business operations and board meetings of the Corporation can be conveniently and efficiently conducted. The FCA believes that the interests of the Corporation will best be served by having the Corporation's principal business offices in a city other than one in which the principal offices of another Farm Credit System ("System") institution is located, and by assuring that meetings of the board of directors of the Corporation are held, as a matter of course, in the Corporation's area in which its principal business offices are located and not generally in conjunction with board meetings of tother System institutions. However, the FCA also believes that the board should be able to hold occasional meetings outside that area.

In order to implement the amendment to Article III of the Articles of Incorporation the FCA has also amended paragraph (c) of 12 CFR 611.1142 to delete reference in that section to the principal offices of the Corporation and to make the language of the section consistent with the related amendment to Article III of the Corporation's Articles of Incorporation. (Published elsewhere in today's Federal Register). The FCA believes that the related amendment to the Articles of Incorporation adequately address matters related to the location of meetings of the board of directors of the Corporation and that no reference is necessary in the regulation.

The aforementioned amendments were made pursuant to section 4.28A of the Act, § 611.1140(a) of the regulations of the FCA (51 FR 8666) and Article X of the Articles of Incorporation of the Corporation, and were effective immediately upon their execution by the Acting Chairman of the Farm Credit Administration Board. The texts of the

articles of incorporation as amended are set forth below.

Kenneth J. Auberger,
Acting Chairman.

Articles of Incorporation of The Farm Credit System Capital Corporation

* * * * *

Article III—Duration And Office

* * * * *

Section 2. Principal Office. The principal business offices of the Corporation shall be located in the greater metropolitan area of Kansas City, from which offices the business and operations of the Corporation shall be conducted. All meetings of the board of directors of the Corporation shall be held in the greater metropolitan area of Kansas City, except that the board may hold any meeting outside such area upon a resolution adopted by at least 80 percent of the members of the board.

* * * * *

Article VII.—Board of Directors

* * * * *

Section 4. Term. The initial term of the first appointed director and the director elected to the position in section 3(c) above shall end December 31, 1986. The initial terms for every other elected or appointed director shall end December 31, 1987. Thereafter, each elected or appointed director shall serve for a term of two calendar years. All directors shall serve until his or her successor becomes appointed or elected and qualified, unless the office becomes vacant or the director is removed, dies, resigns, or is otherwise unable to serve in accordance with the Bylaws or the FCA regulations. Any appointed or elected director may serve any number of terms, unless removed.

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal

VOL 51 ISS 85 MY 2 1986 UMI

Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 202–010485–015

Title: United States Atlantic & Gulf Ports/Italy, France and Spain Freight Conference.

Parties:

Compania Trasatlantica Espanola, S.A.
Costa Line
Farrell Lines, Inc.
Med-America Express Service
Lykes Bros. Steamship Corp.
Sea-Land Service, Inc.
Zim Israel Navigation Co., Ltd.

Synopsis: The proposed amendment would modify the agreement to permit any member, until May 31, 1986, to withdraw from the Conference without penalty on one day's notice. The parties have requested a shortened review period.

Agreement No.: 217–010703–003.

Title: Hyundai Merchant Marine Co., Ltd./Hanjin Container Lines, Ltd., Space Charter and Sailing Agreement.

Parties:

Hyundai Merchant Marine Co., Ltd.
Hanjin Container Lines, Ltd.

Synopsis: The proposed amendment would modify the agreement to substitute the MV Pacific Progress for the vessel MV Pacific Express operating in the Korea/Taiwan/Hong Kong route which slightly increases vessel capacity from 2499 TEU's to 2766 TEU's. The parties have requested a shortened review period.

Agreement No.: 224–010916.

Title: Port of Fernandina Terminal Agreement

Parties:

Nassau Shipping Company, Inc. (Operator)
Ocean Highway and Port Authority of Nassau County (Port Authority)

Synopsis: The proposed agreement would permit the Operator to (1) provide services such as stevedoring, warehousing, storage and reclaim; and (2) handle cargo of all types in and out of the Port of Fernandina and include the collection of all fees. The term of the agreement is fifteen (15) years. The parties have requested a shortened review period.

Agreement No.: 024–010919.

Title: Global Terminal/Hale Container Line Terminal Agreement.

Parties:

Global Terminal & Container Services, Inc. (Global)
Hale Container Line (Hale)

Synopsis: The proposed agreement would permit the Global to provide terminal and stevedoring services at its marine terminal facility located in the Port of New York for containers to be loaded onto, or discharged from barges owned, operated, chartered or controlled by Hale in its container barge feeder service.

Agreement No.: 023–010920.

Title: Port of Portland Terminal Agreement.

Parties:

The Port of Portland (Port)
Matson Navigation Company, Inc. (Matson)

Synopsis: The proposed agreement would permit the Port to utilize a Lash/Cargo Stow Computer Program for which Matson is authorized to grant sublicenses in the performance of terminal and stevedoring services for Matson vessels calling at the Port.

By Order of the Federal Maritime Commission.

Dated: April 29, 1986.

John Robert Ewers,

Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Central Financial Corp. et al.; Applications to Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23 (a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulations Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 23, 1986.

A. Federal Reserve Bank of Boston (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Central Financial Corporation,* Randolph, Vermont; to engage directly in management consulting services to depository institutions pursuant to § 225.25(b)(11) of the Board's Regulation Y. These activities will be conducted in Vermont.

B. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Illinois Neighborhood Development Corporation,* Chicago, Illinois; to engage *de novo* through its subsidiary TNI Development Corporation, Chicago, Illinois, in organization, development and investment in housing development projects. These activities will be conducted in Illinois. Comments on this application must be received not later than May 20, 1986.

2. *Summcorp,* Fort Wayne, Indiana; to engage *de novo* through its subsidiary Summcorp Financial Services, Inc., Fort Wayne, Indiana, in securities brokerage activities.

C. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Ameritex Bancshares Corporation,* Dallas, Texas; to engage *de novo* through its subsidiary Ameritex Service Corporation, Dallas, Texas, in the activity of providing to others financially related data processing, data transmission services, facilities and data bases or access to them pursuant to § 225.25(b)(7) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, April 28, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

Graham Shares of Waverly, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than May 23, 1986.

A. Federal Reserve Bank of Minneapolis (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Graham Shares of Waverly, Inc.,* Waverly, Minnesota; to become a bank holding company by acquiring 100 percent of the voting shares of Citizens State Bank of Waverly, Waverly, Minnesota.

B. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Kosman, Inc.,* Scottsbluff, Nebraska; to become a bank holding company by acquiring 10 percent of the voting shares of Western National Bank, Scottsbluff, Nebraska, and 32.1 percent of the voting shares of Scottsbluff National Corporation, Scottsbluff, Nebraska, and thereby indirectly acquire Scottsbluff National Bank and Trust Company, Scottsbluff, Nebraska.

C. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *San Diego Bancshares, Inc.,* San Diego, Texas; to become a bank holding company by acquiring 99.05 percent of the voting shares of First State Bank of San Diego, San Diego, Texas.

Board of Governors of the Federal Reserve System, April 28, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 4150-04-M

Public Health Service

Office of the Assistant Secretary for Health; Statement of Organization, Functions and Delegations of Authority

Part H, Public Health Service (PHS), Chapter HA (Office of the Assistant Secretary for Health) of the Statement of Organization, Functions and Delegations of Authority for the Department of Health and Human Services (DHHS) (42 FR 61318, December 2, 1977, as amended most recently at 50 FR 50847, December 12, 1985), is amended to reflect a reorganization within the National Center for Health Statistics (NCHS), Office of the Assistant Secretary for Health. Specifically, budget activities will be transferred from the Office of Management, Office of Resource Management, Division of Financial Management, OASH Financial Management Branch, to NCHS, Office of Management.

Under Part H, Chapter HA, Office of the Assistant Secretary for Health (OASH), Section HA-20 Functions, under the heading for *the National Center for Health Statistics (HAS),* revise the functional statement for the *Office of Management (HAS13)* by deleting "financial" from item (5); ",and" before item (10); and, adding a new item (11) "and, (11) serves as principal advisor in areas of financial management activities and manages a system of budgetary, expenditure and employment controls."

Effective Date: April 28, 1986.

Wilford J. Forbush,

Director, Office of Management.

[FR Doc. 86-9882 Filed 5-1-86; 8:45 am]

BILLING CODE 4160-17-M

Office of the Assistant Secretary for Health; Statement of Organization, Functions and Delegations of Authority

Part H, Public Health Service (PHS) of the Statement of Organization, Functions and Delegations of Authority of the Department of Health and Human Services, Chapter HD (Public Health Service Regional Offices, HD1–HDX), (44 FR 21711, April 11, 1979, as amended most recently at 49 FR 35251, September 6, 1984), is amended to reflect a reorganization in Region IV, Atlanta, Georgia. The Division of Health Services (Region IV) is abolished and its functions are realigned into two divisions: Division of Community Health Services and Division of Family Health and Professional Services. This alignment will provide for a structure that will eliminate duplication of effort by more accurately grouping distinguishable responsibilities and functions to meet the needs of current health policies and programs. There are no organization changes in the remaining nine regional offices.

Public Health Service Regional Offices

Under Chapter HD, Public Health Service Regional Offices, Section HD-00 Mission, title and statement delete Section HD-10 Organization and substitute the following:

Section HD-10 Organization. The Public Health Service Regional Offices (HD1–HDX) consist of:

Office of Regional Health Administrator (HD1–HDX)
Office of Engineering Services (HD*E) [1]
Office of Grants Management (HD*J)
Division of Preventive Health Services (HD*U)
Division of Health Services Delivery (HD*IV) [2]
Division of Community Health Services (HD*C) [2]
Division of Family Health and Professional Services (HD*P) [2]
Division of Health Resources Development (HD*W)
Division of Federal Employee Occupational Health (HD*H)

Under Section HD-20 Functions, Public Health Service (PHS) Regional Offices (HD1–HDX) following the title for the *Office of Engineering Services (HD*E)* change the footnote to 1 stating "Regions II, VI and X."

*After the title for the Division of Health Services Delivery (HD*V),* add a footnote 2 stating "Division in all regions except Region IV."

*After the statement for the Division of Health Services Delivery (HD*V)* add the following title, statements, and footnotes for Region IV only:

Division of Community Health Services (HD4C) [3]

The Division: (1) Directs and coordinates program and activities designed to promote and provide quality health services within the region; (2) provides or arranges professional consultation, guidance, and technical assistance in assigned program areas, including interpretation of national policies and guidelines to contractors and applicants for Federal assistance; (3) promotes and directs activities designed to increase health care capacity and to increase access to quality health services for the medically underserved; (4) services as regional focal point for promoting and directing efforts to integrate services delivery projects in a more comprehensive manner to maximize services available in health scarcity areas; (5) verified accuracy and analyzes programmatic data with respect to health service programs; (6) reviews and recommends action on grant applications and contract proposals, and provides continuous programmatic monitoring of division grants and contracts for compliance with applicable laws, regulations, policies, and performance standards; (7) provides for development, implementation, and monitoring of the annual regional work plan related to assigned program areas, including setting objectives responsive to national and regional priorities and assignments of division resources required to attain these objectives; (8) coordinates with other regional office staff to develop and consolidate objectives which cross program and division lines; (9) serves as a source of expertise in the PHS

[1] Offices located in Regions II, VI, and X.
[2] Division in all regions except Region IV.
[3] Division in Region IV.

Regional Office on assigned program areas and as regional program liaison with PHS headquarters on technical/programmatic areas; (10) establishes effective communication and working relationships with health related organizations of States and other jurisdictions; and (11) serves as a focal point for information on health service programs and related efforts within the region including voluntary, professional and other private sector activities.

Division of Family Health and Professional Services (HD4P) [3]

The Division: (1) Directs and coordinates program and activities designed to promote and provide quality family health services within the region; (2) provides or arranges professional consultation, guidance, and technical assistance in assigned program areas, including interpretation of national policies and guidelines to contractors and applicants for Federal assistance; (3) serves as the regional focal point for promoting and directing efforts to improve the quality of health care provided in PHS supported programs; (4) develops and maintains systems of quality assurance for PHS funded programs; (5) verifies accuracy and analyzes programmatic data with repect to family health programs; (6) reviews and recommends action on grant applications and contract proposals, and provides continuous programmatic monitoring of division grants and contracts for compliance with applicable laws, regulations, policies, and performance standards; (7) provides for development, implementation, and monitoring of the annual work plan related to assigned program areas, including setting objectives responsive to national and regional priorities and assignments of division resources required to attain these objectives; (8) coordinates with other regional staff to develop and consolidate objectives which cross program and division lines; (9) serves as a source of expertise in the PHS Regional Office on assigned program areas and as regional program liaison with PHS Headquarters on technical programmatic areas; (10) establishes effective communication and working relationships with health related organizations of States and other jurisdictions; (11) develops and manages professional staff development program for Regional Office and PHS grantees; and (12) serves as focal point for information on family health programs and related efforts within the region including voluntary, professional and other private sector activities.

Dated: April 22, 1986.

Food and Drug Administration

Consumer Participation; Open Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the following consumer exchange meeting: Minneapolis District Office, chaired by John Feldman, District Director. The topics to be discussed are Health Fraud and Health Claims for Food.

DATE: Friday, May 16, 1986, 10 a.m. to 12 m.

ADDRESS: University of Minnesota, Rochester, Friedell Bldg., Rm. CD, 1200 South Broadway, Rochester, MN 55904.

FOR FURTHER INFORMATION CONTACT: Donald W. Aird, Consumer Affairs Officer, Food and Drug Administration, 240 Hennepin Ave., Minneapolis, MN 55401, 612-349-3900.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to encourage dialogue between consumers and FDA officials, to identify and set priorities for current and future health concerns, to enhance relationships between local consumers and FDA's District Offices, and to contribute to the agency's policymaking decisions on vital issues.

Dated: April 28, 1986.

John M. Taylor,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 86-9841 Filed 5-1-86; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 84M-0248]

National Patent Development Corp.; Premarket Approval of the Caridex ™ Caries Removal System

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by National Patent Development Corporation, New Brunswick, NJ, for premarket approval, under the Medical Device Amendments of 1976, of the GK-101E Caries Removal Agent/System. After reviewing the recommendation of the Dental Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant of the approval of the application. After CDRH approved the application, the application holder submitted to FDA a supplement to the application requesting FDA's approval of certain labeling revisions and distribution of the device by a subsidiary, Princeton Dental Products, Inc., New Brunswick, NJ, under the trademark name Caridex ™ Caries Removal System. After reviewing the supplemental application, CDRH notified the applicant of its approval.

DATE: Petitions for administrative review by June 2, 1986.

ADDRESS: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: David A. Segerson, Center for Devices and Radiological Health (HFZ-470), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-8185.

SUPPLEMENTARY INFORMATION: On July 1, 1983, the National Patent Development Corporation, New Brunswick, NJ 08901, submitted to CDRH an application for premarket approval of the GK-101E Caries Removal Agent/System. The device is intended for use with conventional dental instruments for removal of dental caries where the applicator tip of the GK-101E Caries Removal Agent/System can directly contact the carious lesion, to reduce use of a dental drill.

On October 21, 1983, the Dental Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On July 6, 1984, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

On May 13, 1985, FDA filed a supplemental application submitted by the National Patent Development Corporation requesting FDA's approval to change the name of the device, to make certain labeling revisions, and to distribute the device through a subsidiary, Princeton Dental Products, Inc., 789 Jersey Ave., New Brunswick, NJ 08901. On August 28, 1985, CDRH approved the supplemental application by a letter to the applicant from the Director, Division of Obstetrics/Gynecology, Ear, Nose and Throat, and Dental Devices, Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval of the original

VOL 51 ISS 85 MY 2 1986 UMI

application is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact David A. Segerson (HFZ–470), address above.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the Federal Register. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before June 2, 1986, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h), 90 Stat. 554–555, 571 (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10 and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: April 25, 1986.

John C. Villforth,

Director, Center for Devices and Radiological Health.

BILLING CODE 4160-01-M

Office of Human Development Services

Child Abuse and Neglect Prevention Activities

AGENCY: Office of Human Development Services (HDS), HHS.

ACTION: Notice of the availability of Federal funds to support child abuse and neglect prevention activities.

SUMMARY: FY 1985 Federal funds ("challenge grants") are now available to those States that in the previous State or Federal fiscal year, FY 1984, had established or maintained trust funds or other funding mechanisms (including appropriations) available only for child abuse and neglect prevention activities. "States" are defined as the several States, the District of Columbia, and the Commonwealth of Puerto Rico. This Notice sets forth the application and other requirements for these grants.

No funds are proposed for this program in FY 1987. Challenge grants are intended to be a one year transition into the Administration's proposed consolidated Family Crisis and Protective Services (FCPS) program in FY 1987. The FCPS program will give States greater flexibility in addressing the related issues of family violence and child abuse.

DATES: Applications must be received by July 1, 1986. Address applications to: Challenge Grants, National Center on Child Abuse and Neglect, Attention: Mary McKeough, Box 1182, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: Jay Olson (202) 245–2859 or Mary McKeough (202) 245–2856.

SUPPLEMENTARY INFORMATION:

Background

On October 12, 1984, Pub. L. 98–473, the continuing appropriations bill for FY 1985, was enacted. The purpose of sections 402 through 409 of that bill is, by providing Federal challenge grants, to encourage States to establish and maintain trust funds or other funding mechanisms, including appropriations, to support child abuse and neglect prevention activities. On August 15, 1985, Pub. L. 99–88, the Supplemental Appropriations Act of 1985, appropriated $5 million for FY 1985 to support these provisions and extended the availability of these funds through FY 1986.

At the time this legislation was enacted, Congress estimated that, approximately 20–25 States had set up trust funds or other funding mechanisms to support child abuse and neglect prevention activities.

Child abuse and neglect prevention activities include the activities specified in section 405:

(1) Providing statewide educational and public informational seminars for the purpose of developing appropriate public awareness regarding the problems of child abuse and neglect;

(2) Encouraging professional persons and groups to recognize and deal with problems of child abuse and neglect;

(3) Making information about the problems of child abuse and neglect available to the public and to organizations and agencies which deal with problems of child abuse and neglect; and

(4) Encouraging the development of community prevention programs, including:

(A) Community based educational programs on parenting, prenatal care, perinatal bonding, child development, basic child care, care of children with special needs, coping with family stress, personal safety and sexual abuse prevention training for children, and self-care training for latchkey children; and

(B) Community-based programs relating to crisis care, aid to parents, child-abuse counseling, peer support groups for abusive parents and their children, lay health visitors, respite or crisis child care, and early identification of families where the potential for child abuse and neglect exists.

Eligibility

States as defined in section 403 are eligible to apply for a grant for these FY 1985 funds if the State had established and maintained in the previous State or Federal fiscal year (FY 1984) a trust fund or other funding mechanism (including appropriations) available only for child abuse prevention activities. We want to emphasize that, based on section 405 which refers to State activities "in the previous fiscal year," these FY 1985 funds can be made available only based on FY 1984 activities. The term "State" as defined in section 403(2) means each of the several States, the District of Columbia, and the Commonwealth of Puerto Rico.

Funds Available and Fiscal Requirements

Pub. L. 99–177, the Gramm-Rudman-Hollings legislation reduces the $5 million appropriated for these grants by 4.3% to $4.785 million.

Section 406(a)(1) of Pub. L. 98–473 provides that any grant to an eligible State shall be the lesser of two amounts:

(1) Twenty five percent of the total amount made available by such State for child abuse and neglect prevention activities and collected in the previous Federal fiscal year (1984) in a trust fund or any other funding mechanism. This amount can include appropriations but cannot include interest income from the principal of such a fund or funding mechanism.

or

(2) An amount equal to 50 cents times the number of children in the State according to the most current data available to the Secretary. (Section 406(a)(2) defines "children" as "individuals who have not attained the State's age of majority.")

In computing a State's allocation, we will use the Bureau of the Census population statistics contained in its publication "Current Population Reports" (Series P–25, No. 970, issued June 1985) which is the most recent satisfactory data available from the Department of Commerce.

Funds available will be divided among the eligible States on a pro-rata basis based on the statutory formula if the amount appropriated is insufficient to fund each State in full.

The Supplemental Appropriations Act specified that the funds appropriated for FY 1985 would remain avilable until September 30, 1986. States must expend these funds by September 30, 1987.

Application Requirements

The application requirements for these grants do not go beyond the requirements of the statute but do require minimum documentation in order to assure compliance. We have cited each requirement to the specific section of the law and suggest that this notice be read in conjunction with the statutes. No application forms or other materials will be needed in order to prepare an application. A State may submit its application in any format it chooses.

The Secretary will approve any application that meets the requirements of section 406(b) and will not disapprove an application unless the State has been given an opportunity to correct any deficiencies (section 406(b)(2)). Any additional materials required to satisfy the requirements of section 406(b) must be submitted within 30 days of the date the State is notified of the deficiency.

The application must be prepared by the agency specified in paragraph one below, signed by the individual authorized to act for the State in administering these funds, and must contain the following information and assurances:

1. The name and address of the trust fund advisory board responsible for administering and awarding these grants to eligible recipients within the State to carry out child abuse and neglect prevention activities, and the name and address of a contact person (section 406(b)(1)(A)).

or

In States that do not have trust funds, the name and address of the State liaison agency to the National Center on Child Abuse and Neglect (section 2 of the Child Abuse Prevention and Treatment Act) and the name and address of a contact person (section 406(b)(1)(A)).

2. A copy of the State law or legal authority:

(a) Establishing the trust fund or other funding mechanism (section 405);

(b) Documenting that the proceeds of the trust fund or other funding mechanism are used only for child abuse and neglect prevention activities (section 405);

Some States have established trust funds for both child abuse and neglect and domestic violence prevention activities. In such cases, Federal funds under this program are available based only on the funds available for the child abuse and neglect prevention activities; and

(c) Defining the State's age of majority (section 406(a)(2) and (b)(1)).

3. Documentation or certification that the trust fund (or other funding mechanism) was in operation during FY 1984 (section 405).

4. Documentation or certification of the total amount of funds collected or allotted for child abuse and neglect prevention activities in fiscal year 1984 in the trust fund or other funding mechanism, including appropriations. This total may not include interest income from the principal of such fund (section 406(a)(1)(A)).

5. An assurance that any funds received under this statutory authority will not be used to meet the non-Federal matching requirement of any other Federal law (section 406(b)(1)—(B)).

6. An assurance that the State will comply with Departmental recordkeeping and reporting requirements and general requirements for the administration of grants under 45 CFR Part 74, and that the Comptroller General of the United States and his authorized representatives will have access to these records for purposes of audit and examination (sections 406(b)(1)(C) and 408).

7. An assurance that, by December 30, 1987, the State will submit a report to the Assistant Secretary for Human Development Services on the purposes for which the funds were spent, including a description of the specific programs, projects, and activities funded (section 406(b)(1)(C) and section 409).

8. The date that the application was made available to the State E.O. 12372 process for review or a statement that the program has not been selected by the State for review.

9. A brief description of the intended use of these funds (section 406(b)(1)).

Notification Under Executive Order 12372

This program is covered under Executive Order 12372, "Intergovernmental Review of Federal Programs" and 45 CFR Part 100, "Intergovernmental Review of Department of Health and Human Services Programs and Activities." Under the Order, States may design their own processes for reviewing and commenting on proposed Federal assistance under covered programs.

A Single Point of Contact (SPOC) has been established in all States and territories except Alaska, Nebraska, Idaho, American Samoa, and Palau. Applicants from any of these areas need take no action regarding E.O. 12372. Otherwise, applicants must submit the required material to the SPOCs to obtain their comments for consideration by HDS as part of the application review and award process.

SPOCs have sixty (60) days starting from the application deadline to comment on applications for financial assistance under this program. Applicants should contact their SPOCs as soon as possible to alert them of the prospective applications and receive instructions regarding the process. Required material should be sent to the SPOC as early as possible. HDS will notify the cognizant SPOC of any application received which has no indication that the SPOC has had an opportunity for review. It is imperative that the applicant submit the required materials to the SPOC and indicate the date of this submittal in the application.

SPOCs are encouraged to eliminate the submission of routine endorsements as official recommendations. Additionally, SPOCs are requested to clearly differentiate between advisory comments and those recommendations

BEST COPY AVAILABLE

VOL 51 ISS 85 MY 2 1986 UMI

which they expect HDS to accept or accommodate.

SPOCs will submit their comments directly to: Challenge Grants, National Center on Child Abuse and Neglect, Attention: Mary McKeough, Box 1182, Washington, DC 20012.

A list of the Single Points of Contact for each State and territory is included at the end of this announcement.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96-511), the application requirements in this Notice have been submitted to the Office of Management and Budget for approval.

Bureau of Land Management

[F-14830-A]

Alaska Native Claims Selection; NANA Regional Corp., Inc.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (ANCSA), 43, U.S.C. 1601, 1613(a), will be issued to NANA Regional Corporation, Inc., for 0.39 acres. The lands involved are in the vicinity of Selawik, Alaska, located within U.S. Survey No. 4492, Tract A, block 8, Lot 31.

A notice of the decision will be published once a week for four (4) consecutive weeks, in the Tundra Times. Copies of the decision may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513. ((907) 271–5960).

Any party claiming a property interest which is adversely affected by the decision shall have until June 2, 1986 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal can be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E shall be deemed to have waived their rights.

Joe J. Labey,

Section Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-JA-M

[W-81777]

Wyoming; Proposed Spanish Point Cave Withdrawal; Public Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of a public meeting.

SUMMARY: Pursuant to 43 CFR 2310.3–1(6)(2)(v) a public meeting will be held on Tuesday, June 10, 1986 at 7:00 p.m. at the Worland District Office, 101 South 23rd Street, Worland, Wyoming, to accept public comment on the proposed Spanish Point Cave Withdrawal. The proposed withdrawal affects 6,449 acres of federal mineral estate beneath private surface, and lands administered by the Bureau of Land Management and the Forest Service. These lands are located in Big Horn County, north of Hyattville, Wyoming. The withdrawal will segregate these lands from the operation of the nondiscretionary land laws, including mining claim location under the General Mining Law of 1872, as amended, in order to protect important water recharge and cave areas associated with the Tres Charros and Great Expectations Cave Systems.

ADDRESSES: Written comments may be mailed prior to June 10, 1986 to: Wyoming State Director (931), Bureau of Land Management P.O. Box 1828, Cheyenne, Wyoming 82003. Written or oral comments may be submitted at the public meeting on June 10, 1986, at 101 South 23rd Street, Worland, Wyoming.

FOR FURTHER INFORMATION CONTACT: Tamara Gertsch, Bureau of Land Management, Wyoming State Office, Branch of Land Resources (931), P.O. Box 1828, Cheyenne, Wyoming 82003, (307) 772–2089.

Dated: April 23, 1986.

Chester E. Conard,

District Manager.

BILLING CODE 4310-DQ-M

[Nev-054560]

Proposed Continuation of Withdrawal; Nevada

Correction

In FR Doc. 86-8224 beginning on page 15552 in the issue of Thursday, April 24, 1986, make the following corrections:

On page 15553, in the first column, in the twenty-seventh line of the Mount Diablo Meridian, Nevada, land description, delete the second "SE¼NE¼," and in the thirty-third line, "Sec. 32 N" should read "Sec. 32".

BILLING CODE 1505-01-M

[OR-2945]

Oregon; Proposed Continuation of Withdrawal

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Forest Service, U.S. Department of Agriculture, proposes that a land withdrawal for campgrounds and administrative site continue for an additional 20 years. The lands would remain closed to mining but have been and would remain open to surface entry and mineral leasing.

FOR FURTHER INFORMATION CONTACT: Champ Vaughan, BLM Oregon State Office, P.O. Box 2965, Portland, Oregon 97208 (Telephone 503–231–6905).

SUPPLEMENTARY INFORMATION: The Forest Service, U.S. Department of Agriculture, proposes that the existing land withdrawal made by Pubic Land Order No. 4557 of November 19, 1968, be continued for a period of 20 years pursuant to Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714.

The lands involved are located approximately 20 miles southwest of La Grande and aggregate 296.57 acres within T. 5 S., Rgs. 35 and 36 E., and T. 6 S., R. 36 E., W.M., Union County, Oregon.

The purpose of the withdrawal is to protect the Woodley and River Campgrounds and the Grande Ronde Guard Station Administrative site within the Wallowa-Whitman National Forest. The withdrawal segregates the lands from operation of the mining laws, but not from operation of the public land laws or the mineral leasing laws. No change is proposed in the purpose or segregative effect of the withdrawal.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal continuation may present their views in writing to the undersigned officer at the address specified above.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President and Congress, who will determine whether or not the withdrawal will be continued and if so, for how long. The final determination on the continuation of the withdrawal will be published in the Federal Register. The existing withdrawal will continue until such final determination is made.

B. LaVelle Black,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-33-M

Fish and Wildlife Service

Endangered and Threatened Species; Receipt of Applications for Permits

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

PRT–705711

Applicant: Ray M. Morgan, Lake Charles, LA

The applicant requests a permit to import a sport-hunted trophy of a bontebok *(Damaliscus dorcas dorcas)*, culled from the captive herd of Mr. P.F. Rademeyer of the Republic of South Africa, for the purpose of enhancement of propagation.

PRT–705101

Applicant: Fred Wiedenfeld, San Antonio, TX

The applicant requests a permit to import a sport-hunted trophy of a bontebok *(Damaliscus dorcas dorcas)*, culled from the captive herd of Mr. V. Pringle in Cape Province, Republic of South Africa, for the purpose of enhancement of propagation.

PRT–679823

Applicant: U.S. Fish and Wildlife Service, Regional Director, Region 5, Newton Corner, MA

The applicant requests an amendment to their current permit to take additional species within their region for scientific purposes and the enhancement of propagation or survival in accordance with Recovery Plans, listing, or other Service work for those species.

PRT–705204

Applicant: Buffalo Zoo, Buffalo, NY

The applicant requests a permit to import one female lowland gorilla *(Gorilla gorilla)* from the Granby Zoo, Quebec, Canada. This animal was caught in the wild in Cameroon, Africa in 1983.

PRT–706144

Applicant: Dr. Don Melnick, Columbia Univ., New York, NY

The applicant requests a permit to import 150 to 200 blood samples of black rhinos *(Diceros bicornis)* and Northern white rhinos *(Ceratotherium simum cottoni)* from Kenya Zimbabwe, Africa, for scientific research.

PRT–704949

Applicant: Zoological Society of San Diego, San Diego, CA

The applicant requests a permit to import blood and/or tissue from wild-caught, endangered felids for purposes of determining disease prevalence and exposure to infectious organisms to enhance propagation of the species.

PRT–705626

Applicant: Otter Conservation & Research Center, Inc., Ellabell, GA

VOL 51 ISS 85 MY 2 1986 UMI

The applicant requests a permit to import 2 female long-tailed otters *(Lutra longicaudis)* taken from the wild in Panama for enhancement of propagation of the species.

PRT-705823

Applicant: Cedar Grove Farm, St. Paul, MN

The applicant requests a permit to import one captive-bred snow leopard *(Panthera unicia)* from West Germany for the purpose of enhancement of propagation and survival of the species.

PRT-705233

Applicant: Dr. Patrick T. Redig, University of Minnesota, St. Paul, MN

The applicant requests a permit to import up to 50 live captive born peregrine falcons *(Falco peregrinus anatum)* per year through 1989 for the purpose of enhancement of survival through reintroduction. Additionally, the applicant requests permission to recapture 3 released birds 2–4 weeks after hacking for the purpose of providing future broodstock for enhancement of propagation. Along with this the applicant wishes to import carcasses of 4 adults, 6 chicks and 5 addled eggs to be used to enhance survival through conservation education.

Documents and other information submitted with these applications are available to the public during normal business hours (7:45 am to 4:15 pm) Room 611, 1000 North Glebe Road, Arlington, Virginia 22201, or by writing to the Director, U.S. Fish and Wildlife Service of the above address.

Interested persons may comment on any of these applications within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate PRT number when submitting comments.

Dated: April 28,1986.

Larry LaRochelle,

Chief, Permit Branch, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service.

BILLING CODE 4310-55-M

Minerals Management Service

Appeals Decisions: Assertion of Privilege Concerning Proprietary Data; Availability

AGENCY: Minerals Management Service, Interior.

ACTION: Notice.

Pursuant to 30 CFR Part 290, the Director, Minerals Management Service (MMS), issues decisions in appeals from final decisions or orders by other MMS personnel under R.S. 463, 25 U.S.C. 2; R.S. 465, 25 U.S.C. 9; the Mineral Lands Leasing Act, as amended, 30 U.S.C. 181 *et seq.;* the Act of February 7, 1927, 30 U.S.C. 285; the Mineral Leasing Act for Acquired Lands, as amended 30 U.S.C. 351 *et seq.;* the Outer Continental Shelf Lands Act, as amended, 43 U.S.C. 1331 *et seq.;* the Geothermal Steam Act of 1970, 30 U.S.C. 1001 *et seq.;* the Federal Oil and Gas Royalty Management Act of 1982, 30 U.S.C. 1701 *et seq.;* section 2 of Reorganization Plan No. 3 of 1950 (64 stat. 1262); Secretarial Order No. 3071 of January 19, 1982, as amended; and Secretarial Order No. 3087, as amended.

Notice is hereby given that copies of the Director's decisions are available for public inspection during regular business hours at the Division of Appeals, Office of Program Review, MMS, 12203 Sunrise Valley Drive, Reston, Va. 22091. Copies of the decisions may be obtained in accordance with the procedures in 43 CFR Part 2. Proprietary data contained in decisions will be withheld as appropriate.

The Division of Appeals also maintains an index of the Director's decisions which is available to the public in the same manner as the decisions themselves.

Consideration is being given to the publication of the decisions by a private nonprofit entity on a subscription basis. Affected persons are hereby requested to advise the Division of Appeals of any claims of privilege concerning particular proprietary data contained in specific decisions in which they may have been involved. Such claims (together with the statutory basis therefor) must be filed with the Division of Appeals within 60 days after publication of this Notice in the **Federal Register**. In the absence of such filing, any privilege against public disclosure of proprietary data contained in such decisions may be considered to have been waived.

All assertions of privilege filed with the Division of Appeals will be evaluated in accordance with applicable legal principles.

Because of its great volume, publication of a historic index of decisions is impracticable. However, as noted above, such an index is available for inspection and pursuant to 43 CFR Part 2.

FOR FURTHER INFORMATION CONTACT: David Schuenke, Acting Chief, Division of Appeals, Office of Program Review, Minerals Management Service, 12203 Sunrise Valley Drive, Reston, Virginia 22091 (703–648–7729).

Donald T. Sant,

Assistant Director for Program Review.

BILLING CODE 4310-MR-M

National Park Service

Missouri National Recreational River Advisory Group; Notice of Meeting

Notice is hereby given, in accordance with the Federal Advisory Committee Act, 86 Stat. 770, 5 U.S.C. App. 1, as amended by the Act of September 13, 1976, 90 Stat. 1247, that a meeting of the Missouri National Recreational River Advisory Group will be held May 15, 1986, beginning at 10 a.m. at the Lewis and Clark Lake Visitors Center at Gavins Point Dam near Yankton, South Dakota.

The group was established on October 26, 1981, pursuant to Pub. L. 95–625 (92 Stat. 3529) as amended by Pub. L. 96–344 (94 Stat. 1137), 16 U.S.C. 1274, to meet and consult with the Secretary of the Interior on matters relating to the administration and development of the Missouri National Recreational River.

Matter to be discussed at the meeting will include revised cost-sharing formula for operation and maintenance of projects in the recreational river, Farm Debt Restructure and Easement Set-Aside Program of the Farmers Home Administration, and development of a biological assessment pursuant to section 7 of the Rare and Endangered Species Act.

The meeting will be open to the public. Interested persons may submit written statements or request information concerning this meeting from David H. Shonk, Associate Regional Director, Cooperative Activities, Midwest Region, National Park Service, 1709 Jackson Street, Omaha, Nebraska 68102, telephone 402–221–4855 (FTS 864–4855). Minutes of the meeting will be available for public inspection at the Midwest Regional Office 4 weeks after the meeting.

Dated: April 22, 1986.

Warren H. Hill,

Acting Regional Director, Midwest Region.

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Notice of intent to prepare an environmental impact statement and announcement of a period during which written comments regarding the scope of the environmental-impact-statement analysis will be received.

SUMMARY: Notice is hereby given that the Office of Surface Mining Reclamation and Enforcement (OSMRE) and the Montana Department of State Lands (DSL) intend to jointly prepare an environmental impact statement (EIS) on the permit application Peabody Coal Company (PCC) has submitted to OSMRE and the State of Montana for its proposal to expand the Big Sky mine into Area B. The EIS will evaluate the alternative actions of approval, disapproval, and no action that are available to the Department of the Interior and the State of Montana regarding PCC's proposal. It will also evaluate other alternative actions that OSMRE and Montana DSL may develop on the basis of comments they may receive during the scoping process. The EIS will assist the Department of the Interior and the State of Montana in making a decision on PCC's application to surface mine coal southwest of Colstrip, Montana. OSMRE and Montana DSL request that other agencies and the public submit written comments or statements to them concerning the scope of the EIS analysis.

DATES: Written comments or statements concerning the scope of the EIS will be accepted through May 30, 1986, as the locations given under "**ADDRESSES.**"

ADDRESSES: Written comments or statements concerning the scope of the EIS should be mailed or hand-delivered to either Allen D. Klein, Administrator, Attn: Acting Chief, Environmental Analysis Branch, OSMRE, Western Technical Center, Second Floor, Brooks Towers, 1020–15th Street, Denver, Colorado 80202, or Kit Walther, Chief, Environmental Analysis Bureau, Montana DSL, 1539 11th Street, Capitol Station, Helena, Montana 59620.

Copies of PCC's permit application, mining plan, and reclamation plan are available for review at the OSMRE and Montana DSL offices listed above and at the OSMRE Casper Field Office, 100 East "B" Street, Room 2128, Federal Building, Casper, Wyoming.

FOR FURTHER INFORMATION CONTACT: Floyd McMullen, Environmental Analysis Branch (telephone: 303–844–2451 (commercial) or 564–2451 (FTS)), at the Denver, Colorado, location given under "**ADDRESSES.**"

SUPPLEMENTARY INFORMATION: PCC's Big Sky mine is an existing surface coal mine located approximately 120 miles east of Billings, Montana, and 5 miles southsouthwest of Colstrip, Montana. PCC intends the mine to eventually cover 8,096 acres of land, of which 2,574 acres have already been or are in the process of being permitted by OSMRE and Montana DSL within Area A of the mine.

PCC is currently seeking approval to mine 83 million tons to coal at the Area B expansion of the mine over a 22-year period at an average rate of approximately 4 million tons per year. The proposed expansion would add 5,522 acres to the Big Sky mine permit area in secs. 23, 24, and 25, T. 1 N., R. 40 E., and secs. 19, 21, 22, and 27 through 33, T. 1 N., R. 41 E., Montana Principal Meridian; 2,270 of these 5,522 acres would be disturbed by mining activities.

OSMRE and Montana DSL are preparing the EIS both to evaluate alternative actions available to the Department of the Interior and the State of Montana on PCC's permit application and to identify and analyze the environmental impacts that would be associated with implementing each such action. The major alternative actions OSMRE and Montana DSL have thus far identified for consideration are (1) approval of the permit application with such conditions, if any, as would assure its compliance with requirements of the Surface Mining Control and Reclamation Act of 1977, the Montana Strip and Underground Mine Reclamation Act, 82–201, *et seq.*, the 1981 Montana Permanent Strip and Underground Mine Reclamation Rules, the Montana Cooperative Agreement with the Department of the Interior (30 CFR 926), and other Federal and State laws; (2) disapproval of the permit application; and (3) no action. OSMRE and Montana DSL may develop other alternative actions on the basis of comments they may receive regarding the scope of the EIS analysis.

OSMRE and Montana DSL are requesting that any interested party submit written comments or statements regarding the scope of the analysis. Comments/statements received by OSMRE and Montana DSL will assist those agencies in gathering information and in defining the scope of issues and concerns to be evaluated in the EIS.

Dated: April 28, 1986.

Brent Wahlquist,

Assistant Director, Program Operations.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–231]

Certain Soft Sculpture Dolls Popularly Known as "Cabbage Patch Kids," Related Literature and Packaging Therefor; Initial Determination Terminating Respondents on the Basis of Settlement Agreement

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondents on the basis of a settlement agreement: Osco Drug, Inc. (Osco) and Sav-On-Drugs, Inc. (Sav-On).

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties in April 25, 1986.

Copies of the initial determination, the settlement agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202–523–0161. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002.

Written Comments

Interested persons may file written comments with the Commission concerning termination of the aforementioned respondents. The original and 14 copies of all such comments must be filed with the

VOL 51 ISS 85 MY 2 1986 UMI

Secretary to the Commission, 701 E Street, NW., Washington, DC 20436, no later than 10 days after publication of this notice in the Federal Register. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Ruby J. Dionne, Office of the Secretary, U.S. International Trade Commission, telephone 202-523-0176.

Issued: April 28, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Pollution Control; Consent Decree: PPG Industries, Inc.

In accordance with Departmental policy, 28 CFR § 50.7, notice is hereby given that on April 9, 1986 a proposed consent decreee in *United States* v. *PPG Industries, Inc.*, Civil Action No. CV86-0768 was lodged with the United States District Court for the Western District of Louisiana. The proposed consent decree concerns a complaint filed by the United States that alleged violations of the Clean Water Act, 33 U.S.C. 1251-1376, by PPG Industries at its Lake Charles plant due to poor operation practices during routine transfer operations. The complaint sought injunctive relief to require defendant to improve its operation practices and civil penalties for past violations. The consent decree provides that PPG Industries will improve its operation practices and comply with its National Pollutant Discharge Elimination System permit under the Clean Water Act. PPG Industries is also required to pay a civil penalty of $35,700 in settlement of the government's civil penalty claims.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *PPG Industries, Inc.*, D.J. Ref. 90-5-1-1-2440.

The proposed consent decree may be examined at the office of the United States Attorney, Western District of Louisiana, Room 306, Federal Bldg. & U.S. Courthouse, 705 Jefferson St., Lafayette, Louisiana 70501 and at the Region Six Office of the Environmental Protection Agency, InterFirst Two Building, 1201 Elm Street, Dallas, Texas 75270. Copies of the consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue NW., Washington, DC 20530. A copy of the proposed consent decree may be obtained from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 86-9865 Filed 5-1-86; 8:45 am]

BILLING CODE 4410-01-M

Antitrust Division

Proposed Modification of Final Decree

Notice if hereby given that American Pharmaceutical Association has filed with the United States District Court for the Western District of Michigan a motion to modify the final decree in *United States* v. *American Pharmaceutical Association and Michigan State Pharmaceutical Association*, Civil No. G75-558 CA5; and Michigan State Pharmaceutical Association has filed an affidavit of compliance with the decree; and the Department of Justic ("Department"), in a stipulation also filed with the Court, has consented to modification of the judgment, but has reserved the right to withdraw its consent for at least seventy (70) days aftter the publication of this notice. The complaint in this case (filed on November 11, 1975) alleged that the defendants had engaged in a combination and conspiracy to eliminate competition among their members in the sale of prescription drugs and pharmacists' services. The decree (entered on June 18, 1981) enjoins the defandants from: (1) Entering into or in any other way furthering any agreement or conspiracy to limit price or any other type of advertising of prescription drugs (other than false and misleading advertising) or of the provision of pharmactists' services; (2) adopting or enforcing any Code of Ethics or other standard or policy statement that states or implies that price advertising of prescription drugs is unethical, unprofessional or contrary to its policy; and (3) taking any action concerning any person where such action is based on a failure or refusal to restrict price advertising of prescription drugs.

The modification will allow APhA to comment to Congress or other state or federal administrative agencies on prescription drug advertising directed to the public by drug manufacturers. At the same time, APhA will have to make clear that any comments it makes are not intended to discourage pharmacists from advertising prescription drugs.

The Department has filed with the court a a memorandum setting forth the reasons why the Department believes that modification of the judgment would serve the public interest. Copies of the complaint and final judgment, American Pharmaceutical Association's motion papers, Michigan State Pharmaceutical Association's affidavit, the stipulation containing the Government's consent, the Department's memorandum and all further papers filed with the court in connection with this motion will be available for inspection in the Legal Procedure Unit of the Antitrust Division, Room 7233, Department of Justice, 10th Street and Pennsylvania Avenue, NW., Washington, DC 20530 (telephone 202/633-2481), and at the Office the of Clerk of the United States District Court for the Western District of Michigan, Federal Building, Grand Rapids, Michigan 49503. Copies of any of these materials may be obtained from the Legal Procedure Unit upon request and payment of the copying fee set by Department of Justice regulations.

Interested persons may submit comments regarding the proposed termination of the decree to the Department. Such comments must be received within sixty days, and will be filed with the court. Comments should be addressed to John W. Clark, Chief, Professions and Intellectual Property, Antitrust Division, Department of Justice, Washington, DC 20530 (telephone 202/724-6335).

Dated: April 24, 1986.

Joseph H. Widmar,

Director of Operation, Antitrust Division.

BILLING CODE 4410-01-M

Drug Enforcement Administration

Manufacturer of Controlled Substances; Ganes Chemicals, Inc.

Pursuant to § 1301.43(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on January 27, 1986, Ganes Chemicals, Inc.; Lessee of Siegfried Chemical, Industrial Park Road, Pennsville, New Jersey 08070, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Amobarbital (2125)	II
Pentobarbital (2270)	II
Secobarbital (2315)	II

VOL 51 ISS 85 MY 2 1986 UMI

Drug	Schedule
Methadone (9250)	II
Methadone-Intermediate, 4-cyano-2-dimethylamino-4, 4-diphenyl butane (9254)	II
Bulk dextropropoxyphene (non-dosage forms) (9273)	II

Any other such applicant and any person who is presently registered with DEA to manufacture such substances, may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, NW., Washington, DC 20537, Attention: DEA Federal Register Representative (Room 1112), and must be filed no later than (June 2, 1986).

Dated: April 26, 1986.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

BILLING CODE 4410-09-M

[Docket No. 85-38]

Larry L. Kompus, M.D.; Denial of Application

On July 3, 1985, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA) directed an order to show cause to Larry L. Kompus, M.D., 4166 Stoddard Road, Orchard Lake, Michigan 48033 (Respondent). The order sought to deny an application for registration with the DEA under 21 U.S.C. 823(f) executed by Respondent on March 20, 1985. The statutory predicate for the order was the conviction of Respondent on January 15, 1980, in the State of Michigan, Circuit Court for the County of Oakland, of delivery of a controlled substance (non-narcotic) and delivery of Tuinal. These are felonies relating to controlled substances. Respondent, through counsel, requested a hearing on the issues raised by the order to show cause and the Matter was docketed before Administration Law Judge Francis L. Young. Following prehearing procedures, there was a hearing before Judge Young in Detroit, Michigan on November 7, 1985. Judge Young issued his opinion and recommended ruling on January 13, 1986 and transmitted the record to the Administrator on February 10, 1986. Neither side filed exceptions. The Administrator hereby enters this final order based on the record and the findings of fact of the Administrative Law Judge.

The Administrator finds that the investigation of Respondent began in January, 1979, when a young man, accompanied by his attorney, came to the Bloomfield Township, Michigan, Police Department. The young man related to a detective that he had been a patient of Respondent in 1975 and was admitted to a local hospital for treatment of drug and alcohol abuse. Respondent was a psychiatrist specializing in drug detoxification. The young man told the detective that he had been a patient of Respondent from 1975 until December, 1978, a month before. Supposedly Respondent was treating him for drug abuse. The young man told the detective that Respondent had engaged in homosexual relations with him during this three year period, sometimes in Respondent's office and sometimes in hotels in the metropolitan Detroit area. The young man also said that Respondent had given him quantities of controlled substances to consume and sell. The young man had told this same information to a nurse at a local hospital just a few weeks before his coming to the Bloomfield Police Department, which gave rise to an investigation of Respondent by the hospital. Respondent contacted the young man to discuss the matter with him, and the young man and his attorney in turn came to the police with the information.

The relationship between Dr. Kompus and this man originally had the hallmarks of a legitimate patient-physician relationship, but degenerated into one in which Respondent traded drugs and other things to the man for sexual favors. For example, Judge Young found that the young man wanted a handgun. Respondent wrote a letter to the Royal Oak, Michigan, Police Department, telling the department that the man was capable of handling a weapon. Respondent wrote that letter immediately after the young man permitted Respondent to perform oral sex on him in Respondent's office.

Respondent prescribed Quaaludes (methagualone) and "reds", presumably Tuinal, as well as Placidyl and Valium, for the young man. Respondent told the young man not to fill the prescriptions at the same pharmacy so that Respondent would not "get into trouble." A canvass of area pharmacies by the Bloomfield Police uncovered prescriptions for Tuinal, Quaalude and Placidyl written by Respondent during the summer and fall of 1978 for this young man.

The Administrative Law Judge further found that a typical session between Respondent and this young man would involve Respondent renting a movie projector and showing pornographic films depicting homosexual behavior. They would check into a hotel room and Respondent would give the young man a red pill Respondent alleged was an aphrodisiac. Respondent would also bring alcohol and Stelazine, a non-controlled psychoactive substance. The young man would sometimes bring hashish and marijuana. The men would consume the drugs and alcohol and engage in homosexual activities.

Under the direction of the detective, the young man telephoned Respondent and asked to set up an appointment to speak with him. The officer had obtained a search warrant, as required by Michigan law, for the consensual taping. During the conversation that followed, Respondent told the young man that the investigation at the hospital was getting him into trouble. Respondent pressured the young man to write a letter to the hospital authorities saying that the young man had imagined the homosexual activities that gave rise to the complaint. Respondent gave the young man a total of $80 following this conversation and a prescription for Elavil, another non-controlled psychoactive substance.

Respondent and the young man agreed to meet at the Renaissance center Hotel in Detroit to further discuss the letter Respondent told the man to write. Officers arrested Respondent at the hotel. He had planned to have another sexual encounter with the young man on this occasion; the police found the alleged aphrodisiac, alcohol and Stelazine in the hotel room.

The Administrator further finds that investigation by the Bloomfield Police led them to another young man with whom Respondent had engaged in sexual relations while supposedly treating him. Respondent told this second young man, following psychological testing, that he had homosexual tendencies. Such news distressed this man, since he was engaged in a heterosexual relationship with a woman at the time and feared that he had contracted venereal disease from her. At this session at Respondent's office, Respondent told this second young man to undress totally, and ended the session by kissing the young man on the lips. This young man had a history of drug abuse and had never engaged in homosexual activities before he encountered Respondent, who was supposedly treating him for drug abuse. When the Bloomfield detective served a subpoena on this young man in early 1980, his mental state had deteriorated to the point that he was unable to communicate.

The Administrator further finds that Respondent was also sexually involved with a third young man. Again, Respondent was supposedly treating him for drug and alcohol abuse. This young man was blond and blue-eyed, and of small statue. He was 17 years old when Respondent first treated him. Respondent supplied him with Quaalude, Tuinal and Second prescriptions. He and Respondent went on a hunting trip to Harrison, Michigan in November, 1979. Respondent brought along pornographic movies and they engaged in homosexual activities in a motel room. Respondent had registered them as father and son. On one occasion, after refusing several times, this third young man gave in to Respondent's opportuning and dressed in women's undergarments.

The Administrator adopts the finding of the Administrative Law Judge that the preponderance of the evidence establishes that these young men did not manifest any predisposition toward homosexuality prior to becoming involved with Dr. Kompus.

In January, 1980, Respondent pled *nolo contendere* to the controlled substance related felonies and to attempted third degree criminal sexual conduct. He was sentenced to concurrent prison terms of from one to seven years. Respondent actually served about ten months.

The Michigan Board of Medicine summarily suspended Respondent's medical license in early 1979. The summary suspension was dissolved on February 22, 1979, when the Board found that Respondent's ability to practice medicine did not constitute an emergency threat to the public health, safety and welfare. Following a hearing, the Board revoked Respondent's license in August, 1980. In the interim, Respondent agreed to retrict the use of drugs in his practice. Respondent did not surrender a DEA Certificate of Registration previously issued to him until November, 1980. The Board granted Respondent a limited license in 1983, one of the terms being that he remain under the care of a psychiatrist.

The Administrator notes that Respondent is fully licensed to handle controlled substances, with no limitations whatsoever, by the State of Michigan.

Respondent worked briefly at a Veterans' Administration hospital in the Detroit area until he left the position following an exposé of his actions by a Detroit newspaper.

The psychiatrist treating Respondent testified at some length during the hearing. He testified that Respondent's involvements with these patients stemmed from his unhappy relationship with his father, which led to a burning desire to be close to a man. the Administrative Law Judge noted that this same psychiatrist testified in September, 1979, only eight months after Respondent's arrest, that Dr. Kompus "could practice psychiatry with reasonable skill and safety". The Administrator shares the observation of the Administrative Law Judge that this opinion, given so early in the treatment of Respondent, seriously undermines the credibility of the psychiatrist as to his opinion about Respondent's present condition.

Respondent seeks registration in Schedules III, IV and V so he can continue his specialty of drug and alcohol detoxification and treatment. Judge Young found that Dalmane and Librium, two of the drugs Respondent claims he needs in his professional practice, have a street value in Detroit, currently selling for $2 to $5 per dosage unit.

The Administrative Law Judge recommended that the application submitted by Respondent be denied, even as to the limited number of controlled substances Respondent seeks in his practice. The Administrator wholeheartedly adopts this recommendation. The administrator also concurs in this observation of the Administrative Law Judge: "Few, if any, cases coming before this Administrative Law Judge in the past ten years have presented facts showing professional wrongs aproaching the enormity of those in this case. The actions of this Respondent were those of a very sick man."

Examining the criteria in 21 U.S.C. 823(f) he is required to consider in determining whether to register a practitioner, the Administrator finds that the registration of Respondent is most emphatically not in the public interest. This order discussed at length Respondent's experience in dispensing controlled substances and his conviction record relating to controlled substances, two of the factors the Administrator is required to consider. 21 U.S.C. 823(f)(2) and (3). The Administrative Law Judge and the administrator both find the fifth factor, "Such other conduct which may threaten the public health and safety", to be relevant. Judge Young expressed it succinctly: "Surely a psychiatrist's engaging in homosexual conduct with patients coming to him for help in matters of substance abuse constitutes such conduct—particularly so when the psychiatrist uses those substances to obtain his personal gratification."

Dr. Kompus used contolled substances that he prescribed with his DEA registration to help him pursue his own deviant wishes at the expense of the sick individuals who had come to him for help. Even the limited registration sought by Respondent is inappropriate, given his history and convictions. The Administrator can find scant assurance in this record that Respondent will not regress to his past horrific conduct, which involved the DEA registration with which he was entrusted. The Administrator is charged with protecting the public. In this most egregious of cases, he would be abdicating his responsibilities if he were to register Larry Kompus, M.D., in any schedule or for any controlled substance.

Having considered the evidence in the record, the Administrator, under the powers given the Attorney General in 21 U.S.C. 823 and 824 and delegated to the Administrator in 21 U.S.C. 871 and 28 CFR Part 0.100, hereby denies the application for registration executed by Larry L. Kompus, M.D., on March 2, 1985, for the reason that respondent's registration is inconsistent with the public interest, and for the further statutory reason that Respondent was convicted a felony relating to controlled substances. Said denial is effective immediately.

John C. Lawn,

Administrator.

April 28, 1986.

BILLING CODE 4410-09-M

[Docket No. 85-37]

Ozie T. Faison d/b/a Smith Discount Drugs; Denial of Application

On June 17, 1985, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), directed an order to show cause to Ozie T. Faison, Jr., d/b/a Smith Discount Drugs, 1046 Broad Street, New Bern, North Carolina, 28560 (Respondent). The order to show cause sought to deny an application executed on March 28, 1985, by Ozie T. Faison, Jr., R.Ph, the practicing pharmacist at Smith Discount Drugs. The statutory predicate for the order to show cause under 21 U.S.C. 823(f) was the conviction of Ozie T. Faison, Jr., in the United States District Court for the Eastern District of North Carolina, of conspiracy to distribute Schedule II controlled

VOL 51 ISS 85 MY 2 1986 UMI

substances in violation of 21 U.S.C. 846, a felony relating to controlled substances. Respondent pharmacy, through counsel, requested a hearing on the issues raised by the order to show cause and the matter was docketed before Administrative Law Judge Francis L. Young. Following prehearing procedures, a hearing was held before Judge Young in Washington, DC, on November 13, 1985. Judge Young issued his opinion and recommended ruling on January 14, 1986. Neither side filed exceptions to the recommended ruling. The Administrator hereby enters his final order based on the findings of fact of the Administrative Law Judge.

The Administrator finds that Ozie T. Faison, Jr., was convicted of conspiring with a physician, John Eldridge Littman, M.D., to distribute Schedule II controlled substances. Faison was a corporate officer of Smith Discount Drugs from October, 1980 through July, 1981, and Dr. Littman was a 50% owner of the pharmacy during this time, the period of activities for which both were convicted.

The Administrator further finds that during the spring and summer of 1981, a young woman sold Dilaudid three times to DEA Special Agents in New Bern, North Carolina. She purchased the Dilaudid from Dr. Littman, who in turn had obtained it from Faison at Smith Discount Drugs. The woman sold the Dilaudid to the Agents for $2,000 for a bottle of 100. She was arrested after the third such sale. Following the arrest, a Special Agent of the North Carolina State Bureau of Investigation (SBI) conducted an audit of several Schedule II controlled substances at Respondent pharmacy. This audit revealed a shortage of 300 Dilaudid 4mg., or 15.79%, and 1,460 Sopor 300 mg., or 35.61% of the total for which the pharmacy was accountable.

During a second audit of the pharmacy, the Agent conducting the audit noticed a questionable sequence of Dilaudid prescriptions. Dr. Littman had written prescriptions for 890 Dilaudid between October, 1980 and June, 1981. He wrote the prescriptions for 30, 30 and 40 dosage units per month, except for October, 1980, when he wrote three prescriptions for 30 Dilaudid each. The prescription bore dates that were consecutive or nearly consecutive. In attempting to verify the prescriptions, the SBI Agent learned that several of the addresses on the prescriptions were fictitious, while a number of the "patients" were non-existent or did not live at the addresses indicated. These were the only Dilaudid prescriptions in the pharmacy. Faison admitted to the Agent that it was "unusual" for a "patient" to have two different addresses, since the store was a neighborhood pharmacy and Faison tried to know a majority of his customers.

The Administrator adopts the finding of the Administrative Law Judge that Faison received $1,000 from Dr. Littman for each bottle of 100 Dilaudid he sold to Dr. Littman, although the regular retail price of Dilaudid for legitimately dispensed Dilaudid was $40 per 100. Dilaudid was selling on the streets of New Bern at that time for between $35 and $50 per tablet. Faison maintained at the hearing that he only received the legitimate $40 from Dr. Littman.

As to the other shortages, the Administrator finds that Faison offered various explanations to the SBI Agent. Faison told the Agent that a shortage of Sopor, then a Schedule II controlled substance, occurred when patients brought in bottles for refills and he would forget to fill out prescriptions for signature by a physician, usually Dr. Littman. This explanation indicates that Faison apparently made a practice of writing out the prescriptions and saving them for Dr. Littman's signature. Such a practice is intolerable with regard to a Schedule II substance. Faison also said that he gave quantities of Sopor to two individuals who badgered him for the drug without any prescription. Faison gave quantities of Eskatrol to two female truck drivers who sought the drug to remain awake. This is clearly unlawful. Faison also indicated to the Agent that while his statements about Dr. Littman, an older man and long-time business associate of his father, were true, Faison could not testify in court against Dr. Littman. Faison invited the Agent to return to the pharmacy so that he could supply him with a new story. The Agent declined this invitation.

In mitigation, Faison testified at the hearing that he knew something was wrong with the way in which Dr. Littman was prescribing Dilaudid, but he did nothing since he trusted Dr. Littman and had known him since childhood. Faison was 35 years old at the time of the crimes of which he was convicted and a recent graduate of the University of North Carolina School of Pharmacy. Respondent also presented a character witness and several written statements that Faison enjoys an excellent reputation in the community. Smith Discount Drugs is the only black-owned pharmacy in New Bern and without a DEA registration, would most likely have to close.

The Administrator adopts the findings of fact of the Administrative Law Judge. It is clear that this pharmacy, through Ozie Faison, Jr., abused its controlled substances privileges and caused the diversion of controlled substances into illegitimate channels. Faison now seeks to resume operation at the same pharmacy. His record in the handling of controlled substances is so poor that the Administrator must follow the recommendation of the Administrative Law Judge and deny this application.

Judge Young states that Faison was hardly an immature youngster when he began the practice of pharmacy at Smith Discount Drugs. Within 18 months of taking charge at the pharmacy, he connived with a physician to send about 900 known dosage units of Dilaudid into illegal channels. In addition, Faison liberally dispensed other controlled substances without prescriptions, or in response to prescriptions he knew were suspect. This record is one of an individual who should not be entrusted with a DEA Certificate of Registration.

The Administrator is not unmindful of the unique position of Smith Discount Drugs in the life of New Bern. However, the record in this case clearly shows that Faison cannot be trusted with the handling of controlled substances. The public interest would not be served by the registration of this pharmacy.

Having considered the record in this matter, the Administrator, as the delegee of the Attorney General under 21 U.S.C. 871 and 28 CFR Part 0.100, hereby denies under 21 U.S.S. 823 and 824 the application for DEA registration executed by Ozie T. Faison, Jr., d/b/a Smith Discount Drugs dated March 25, 1985, said denial effective immediately.

John C. Lawn,
Administrator.
April 28, 1986.

BILLING CODE 4410-09-M

Manufacturer of Controlled Substances; Application; Penick Corp.

Pursuant to § 1301.43(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on February 26, 1986, Penick Corporation, 158 Mount Olivet Avenue, Newark, New Jersey 07114, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Pholcodine (9314)	II
Alphacetylmethadol (9603)	I
Codeine (9050)	II
Dihydrocodeine (9120)	II
Oxycodone (9143)	II
Diphenoxylate (9170)	II

Drug	Schedule
Hydrocodone (9193)	II
Pethidine (meperidine) (9230)	II
Methadone (9250)	II
Methadone-Intermediate, 4-cyano-2-dimethylamino-4,4-diphenyl butane (9254)	II
Morphine (9300)	II
Thebaine (9333)	II
Opium extracts (9610)	II
Opium fluid extracts (9610)	II
Tincture of opium (9630)	II
Powdered opium (9639)	II
Granulated opium (9640)	II
Mixed alkaloids of opium (9648)	II
Concentrate of poppy straw (9670)	II
Phenazocine (9715)	II
Fentanyl (9801)	II

Any other such applicant and any person who is presently registered with DEA to manufacture such substances, may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, NW., Washington, DC 20537, Attention: DEA Federal Register Representative (Room 1112), and must be filed no later than June 2, 1986.

Dated: April 28, 1986.

Gene R. Haislip,
Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone 202 523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N-1301, Washington, DC 20210. Comments should also be sent to the OMB reviewer, Nancy Wentzler, Telephone 202 395-6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, Washington, DC 20503.

Any member of the public who wants to comment on a recordkeeping/reporting requirement which as been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

New Collection

Bureau of Labor Statistics

New York Business Birth Survey
BLS 790 BBS
Other—one time
State and local government; Business or other for profit;
Federal agencies or employees; Non-profit institutions;
Small business or organizations.
2040 responses; 408 hours; 1 form

The Current Employment Statistics Survey, which produces national employment, hours and earnings data by industry, has a lagtime in estimating new business employment. This survey will lessen this lagtime and provide more acurate estimates of new business employment.

Extension

Employment Standards Administration

Certification by School Official
1215-0061; CM-981
Annually
State or local governments; Non-profit institutions
3,000 responses; 500 hours; 1 form

CM-981 is completed by a school official to verify if a beneficiary's dependent, aged 16 to 23, qualifies as a full-time dependent student.

Notice of Issuance of Insurance Policy
1215-0059; CM-921
Annually
Businesses or other for-profit; Small businesses or organizations
5,000 responses; 833 hours; 1 form

The CM-921 provides insurance carriers with the means to supply DCMWC with information which shows that a responsible coal mine operator is insured pursuant to the requirements set forth by the Black Lung Benefits Reform Act of 1972.

Bureau of Labor Statistics

Report on Employment, Payroll, and Hours
1220-0011; BLS-790 A, B, B-M, C, E, H, J-F, J-Fd, J-L, and S
Monthly
State or local governments, businesses or other for-profit, Federal agencies or employees, non-profit institutions, small businesses or organizations
3,276,000 responses; 380,680 hours; 10 forms

The Current Employment Statistics program provides estimates of current monthly employment, hours, and earnings, by industry, State, and MSA. Data provided are fundamental inputs in the economic decision process at all levels of government, private enterprise, and organized labor. The estimates are vital to the calculation of the Gross National Product and the Federal Reserve Board's Index of Industrial Production.

Reinstatement

Employment and Training Administration

Petition for Adjustment Assistance
1205-0192; ETA 8560 & ETA 8559
On occasion
Individuals or households; Business or other for-profit;
Small businesses or organizations
1,100 respondents; 275 hours; 1 form

VOL 51 ISS 85 MY 2 1986 UMI

These petitions are filed by American workers applying to U.S. Department of Labor for eligibility to receive work trade adjustment assistance in accordance with provisions of the Trade Act of 1974 as amended. The petition initiates action on the part of the Department to determine if workers are eligible.

Signed at Washington, DC, this 29th day of April, 1986.

Paul E. Larson,

Departmental Clearance Officer.

Employment and Training Administration

State Employment Security Agency System Administrative Financing; Roundtable Meeting

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and purpose for a meeting of the Roundtable on the administrative financing mechanism for the State Employment Security Agency (SESA) programs.

DATE: May 9, 1986, 9:00 a.m. to 5:00 p.m.

ADDRESS: Frances Perkins Building, Room S2215-C, 200 Constitution Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Carolyn M. Golding, Director, Unemployment Insurance Service, Employment and Training Administration, 601 D Street, NW., Washington, DC 20213 (202/376-6836).

SUPPLEMENTARY INFORMATION: The Roundtable first met on March 25, 1986, and reviewed the results of the public comments on the SESA administrative financing system. The group agreed that the Employment and Training Administration and a technical workgroup composed of State and Federal staff should proceed on a two-track approach of developing both short-term and long-term changes to the present system.

The purpose of this meeting is to review the status of the final package of short-term changes on which the Department of Labor is proceeding. The Roundtable will also continue its exploration of long-term options for change.

Signed at Washington, DC, on April 29, 1986.

Roger D. Semerad,

Assistant Secretary of Labor.

BILLING CODE 4510-30-M

Employment Standards Administration

Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedes decisions thereto, contain no expiration dates and are effective from their date of notice in the Federal Register, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29

CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S-3504, Washington, DC 20210.

New General Wage Determination Decisions

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 80 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. The Subscription cost is $277 per volume. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC, this 25th day of April 1986.

James L. Valin,

Assistant Administrator.

BILLING CODE 4510-27-M

Mine Safety and Health Administration

Summary of Decisions Granting in Whole or in Part Petitions for Modification

AGENCY: Mine Safety and Health Administration (MSHA), Labor.

ACTION: Notice of affirmative decisions issued by the Administrators for Coal Mine Safety and Health and Metal and Nonmetal Mine Safety and Health on petitions for modification of the application of mandatory safety standards.

SUMMARY: Under section 101(c) of the Federal Mine Safety and Health Act of 1977, the Secretary of Labor may modify the application of a mandatory safety standard to a mine if the Secretary determines either or both of the following: That an alternate method exists at the petitioner's mine that will guarantee no less protection for the miners affected than that provided by the standard, or that the application of the standard to the petitioner's mine will result in a diminution of safety to the affected miners.

Summaries of petitions received by the Secretary appear periodically in the Federal Register. Final decisions on these petitions are based upon the petitioner's statement, comments and information submitted by interested persons and a field investigation of the conditions at the petitioner's mine. The Secretary has granted or partially granted the requests for modification submitted by the petitioners listed below. In some instances the decisions are conditioned upon the petitioner's

VOL 51 ISS 85 MY 2 1986 UMI

compliance with stipulations stated in the decision.

FOR FURTHER INFORMATION CONTACT: The petitions and copies of the final decisions are available for examination by the public in the Office of Standards, Regulations and Variances, MSHA, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203.

Dated: April 24, 1986.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

AFFIRMATIVE DECISIONS ON PETITIONS FOR MODIFICATION

Docket No.	FR Notice	Petitioner	Regulations affected	Summary of findings
M-76-141-C	FR 13699	Alabama By-Products Corp.	30 CFR 75.1710	Use of cabs or canopies on the mine's electric face equipment in specified low mining heights would result in a diminution of safety. Granted with conditions.
M-86-129-C	FR 16699	Consol Pennsylvania Coal Co	30 CFR 75.1700	Plugging and mining through abandoned oil and gas wells with specified precautions in lieu of establishing and maintaining barriers around such wells considered acceptable alternate method. Granted with conditions.
M-83-174-C	FR 13761	Consolidation Coal Company	30 CFR 75.330	Use of air from the belt entry to ventilate the working face considered acceptable alternate method. Granted with conditions.
M-84-97-C	FR 22577	Olga Coal Company	30 CFR 75.305	Petitioner's proposed to establish an air measurement station where the quantity, quality and the direction of the air current will be measured by a certified person considered acceptable alternate method. Granted with conditions.
M-84-145-C	FR 40489	Kit Energy Corporation	30 CFR 75.1100	Petitioner's proposed to install a low-level carbon monoxide detection system in all belt entries used as intake air courses and to enclose the affected installations in fireproof structures considered acceptable alternate method. Granted in part with conditions.
M-84-169-C	FR 40581	Peabody Coal Company	30 CFR 75.1710	Use of cabs or canopies in specified low mining heights would result in a diminution of safety. Granted.
M-84-171-C	FR 28100	Eastern Associated Coal Corporation	30 CFR 75.1704-2(e)(3)	Petitioner's proposed to store SCSR's while miners use the belts for escapeps considered acceptable alternative. Granted with conditions.
M-84-175-C	FR 40508	Wolf Creek Collieries Company	30 CFR 75.902	Petitioner's proposed to use belt power conductors in lieu of low- and medium-voltage ground check monitor circuits considered acceptable alternate method. Granted with conditions.
M-84-177-C	FR 39050	Barnes & Tucker Company	30 CFR 75.305	Petitioner's proposed to establish inlet and outlet monitoring stations to measure the air on a weekly basis considered acceptable alternative. Granted with conditions.
M-84-207-C	FR 40497	Consolidation Coal Co.	30 CFR 75.1106	Petitioner's proposed to enclose the electric equipment in a fireproof structure and install an automatic dry chemical fire suppression device activated by heat considered acceptable alternate method. Granted with conditions.
M-84-216-C	49 FR 44824	Consolidation Coal Company	30 CFR 75.305	Petitioner's proposed to establish a ventilation evaluation point at a specified location to take air and gas measurements considered acceptable alternate method. Granted with conditions.
M-84-237-C	49 FR 47139	Consolidation Coal Company	30 CFR 75.1106	Petitioner's proposed to enclose the electric equipment in a fireproof structure, equipped with automatic-closing doors activated by thermal-devices, considered acceptable alternate method. Granted with conditions.
M-84-248-C	50 FR 575	Southern Ohio Coal Company	30 CFR 75.1200	Petitioner's proposed to plug and mine through abandoned wells penetrating the coal bed considered acceptable alternate method. Granted with conditions.
M-84-273-C	50 FR 10980	A & F Coal Company, Inc.	30 CFR 75.503	Use of fabricated metal locking devices in lieu of padlocks to secure battery plugs to machine mounted battery receptacles on permissible, mobile, battery-powered machines considered acceptable alternate method. Granted with conditions.
M-85-11-C	50 FR 13988	Consolidation Coal Company	30 CFR 75.326	Use of air from the belt entry to ventilate the working face considered acceptable alternate method. Granted with conditions.
M-85-12-C	50 FR 13988	Consolidation Coal Company	30 CFR 75.1103-4(a)	Installation of a fire detection system using low-level carbon monoxide monitoring devices in all belt entries used as intake air courses considered acceptable alternate method. Granted with conditions.
M-85-17-C	50 FR 27074	Renegade Coal Company	30 CFR 75.301	Proposed airflow reduction, which would maintain a safe and healthful atmosphere, considered acceptable alternate method. Granted with conditions.
M-85-32-C	50 FR 37788	K. & L. Coal Company	30 CFR 75.301	Proposed airflow reduction, which would maintain a safe and healthful atmosphere, considered acceptable alternate method. Granted with conditions.
M-85-49-C	50 FR 32124	Emery Mining Corporation	30 CFR 75.1101-8	Petitioner's proposal to use a single line of automatic water sprinklers for its fire protection system at main and secondary belt conveyor drives considered acceptable alternative, granted with conditions.
M-85-60-C	50 FR 32123	Consolidation Coal Company	30 CFR 75.1700	Plugging and mining through abandoned oil and gas wells with specified precautions in lieu of establishing and maintaining barriers around such wells considered acceptable alternate method. Granted with conditions.
M-85-16-M	50 FR 32123	Tennaco Minerals Company	30 CFR 75.1704G	Petitioner's proposal to develop rooms up to 350 feet before crosscuts or a breakthrough occurs during the retreating phase of panel extraction considered acceptable alternate method. Granted with conditions.
M-85-12-M	50 FR 33122	Chevron Resources Company	30 CFR 75.9008	Petitioner's proposal to use a side boom for positioning pipe along a right-of-way in lieu of ROPS considered acceptable alternate method. Granted with conditions.

BILLING CODE 4510-43-M

NATIONAL COMMISSION FOR EMPLOYMENT POLICY

Hearing

ACTION: Notice of hearing.

SUMMARY: Under the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given of a public hearing of the National Commission for Employment Policy in the Ballroom of the Crowne Plaza Holiday Inn at 9985 W. Century Boulevard, Los Angeles, California.

DATE: Thursday, May 22, 1986, 8:00 a.m. to noon.

Status: The hearing is open to the public.

Matters to be discussed: Commission members will hear testimony from various witnesses representing both the public and private sectors. They will focus on the implementation of the Job Training and Partnership Act in the state of California and on economic development and labor market issues, pertinent especially to the region but also to the nation in general.

FOR FURTHER INFORMATION, CONTACT: Mr. Scott W. Gordon, Director, National Commission for Employment Policy, 1522 K Street NW., Suite 300, Washington, DC 20005, (202) 724-1545.

SUPPLEMENTARY INFORMATION: The National Commission for Employment Policy is authorized by the Job Training Partnership Act (Pub. L. 97-300). The Act gives the Commission the broad responsibility of advising the President and the Congress. Handicapped individuals wishing to attend should contact the Commission so that appropriate accommodations can be made. No public testimony will be authorized except by those asked to do so prior to the hearing date. However, written testimony for the record will be accepted at the Commission offices through June 16, 1986. Copies of the testimony and material prepared for the hearing will be available for public inspection at the Commission's offices, 1522 K St. NW., Suite 300, Washington, DC 20005.

Signed this 25th day of April, 1986.

Scott W. Gordon,

Director.

BILLING CODE 4510-30-M

Meeting

ACTION: Notice of meeting.

SUMMARY: Under the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given of a public meeting of the National Commission for Employment Policy in the Ballroom of the Crowne Plaza Holiday Inn at 9985 W. Century Blvd. Los Angeles, California.

DATE: Thursday, May 22, 1986 1:30 P.M. to 4:30 P.M.

Status: The meeting is open to the public.

Matters to be discussed: Commission members will discuss their policy priorities regarding research and organization for FY 86. Other discussion includes the status of the Commission's *11th Annual Report*, the JTPA-summary report, the outreach program, and findings and policy recommendations concerning adjustment to structural changes in the economy.

FOR FURTHER INFORMATION, CONTACT: Mr. Scott W. Gordon, Director, National Commission for Employment Policy, 1522 K Street, NW, Suite 300, Washington, DC 20005 (202) 724-1545.

SUPPLEMENTARY INFORMATION: The National Commission for Employment Policy is authorized by the Job Training Partnership Act (Pub. L. 97-300). The Act gives the Commission the broad responsibility of advising the President and the Congress, Handicapped individuals wishing to attend should contact the Commission so that appropriate accommodations can be made.

Copies of the minutes and materials prepared for the meeting will be available for public inspection at the Commission's offices, 1522 K St. NW, Suite 300, Washington, DC 20005.

Signed this 25th day of April, 1986.

Scott W. Gordon,

Director.

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

Agency Information Collection Activities Under OMB Review

AGENCY: National Endowment for the Humanities.

ACTION: Notice.

SUMMARY: The National Endowment for the Humanities (NEH) has sent to the Office of Management and Budget (OMB) the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

DATE: Comments on this information collection must be submitted by ———.

ADDRESSES: Send comments to Ms. Ingrid Foreman, Management Assistant, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, (202-786-0233) or Ms. Judy McIntosh, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., Room 3208, Washington, DC 20503, (202-395-6880).

FOR FURTHER INFORMATION CONTACT: Ms. Ingrid Foreman, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue, NW., Washington, DC 20506 (202-786-0233) from whom copies of forms and supporting documents are available.

SUPPLEMENTARY INFORMATION: All of the entries are grouped into new forms, revisions, or extensions. Each entry is issued by NEH and contains the following information: (1) The title of the form; (2) the agency form number, if applicable; (3) how often the form must be filled out; (4) who will be required or asked to report; (5) what form will be used for; (6) an estimate of the number of responses; (7) an estimate of the total number of hours needed to fill out the form. None of these entries are subject to 44 U.S.C. 3504(h).

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Advanced Scientific Computing; Meeting

In accordance with the Federal Advisory Committee Act, as amended Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Advanced Scientific Computing
Dates and Times:
May 22—8:00 A.M.—5:00 P.M.
May 23—8:00 A.M.—3:00 P.M.
Place: Room 540, National Science Foundation, 1800 G Street NW., Washington, DC 20550
Type of Meeting:

Open

May 22—8:00 A.M.—4:00 P.M.
May 23—8:00 A.M.—3:00 P.M.

Closed

May 22—4:00 P.M.—5:00 P.M.
Contact Person: Dr. John W.D. Connolly, National Science Foundation, Washington, DC 20550, Phone: 202/357-7558
Summary of Minutes: May be obtained from John W.D. Connolly
Purpose of Meeting: To provide advice and recommendations concerning NSF support of advanced scientific computing.
Agenda: The open session will be focused on planning and policy issues. These will include a review of recent actions and budget priorities. The closed session will discuss pending proposals.
Reason for Closing: The closed session of the meeting will deal with a discussion of proposals containing the names of applicant institutions and principal investigators and privileged institutions and privileged information from the files pertaining to the proposals. These matters are within exemptions (4) and (6) of U.S.C. 552b(c), Government in the Sunshine Act.
Authority to Close Meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Director of NSF on July 6, 1979.

M. Rebecca Winkler,
Committee Management Officer.
April 28, 1986.

NUCLEAR REGULATORY COMMISSION

[Docket No. STN 50-529]

Palo Verde Nuclear Generating Station, Unit 2; Arizona Public Service Company, et al. Issuance of Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission), has issued Facility Operating License No. NPF-51, (License) to Arizona Public Service Company, Salt River Project Agricultural Improvement and Power District, El Paso Electric Company, Southern California Edison Company, Public Service Company of New Mexico, Los Angeles Department of Water and Power, and Southern California Public Authority. This License authorizes operation of the Palo Verde Nuclear Generating Station, Unit 2 (facility) at reactor core power levels not in excess of 3800 megawatts thermal in accordance with the provisions of the License, the Technical Specifications and the Environmental Protection Plan. On December 9, 1985, the Commission issued Facility Operating License No. NPF-46, which authorized operation of Palo Verde Nuclear Generating Station, Unit 2 at power levels not in excess of 190 megawatts thermal. Facility Operating License No. NPF-51 supercedes Facility Operating License No. NPF-46.

Palo Verde Nuclear Generating Station, Unit 2 is a pressurized water reactor which utilizes a CESSAR standard plant design and is located at the licensees' site in Maricopa County, Arizona approximately 36 miles west of the city of Phoenix.

The application for the license, as amended, complies with the standards and requirements of the Atomic Act of 1954, as amended (the Act), and the Commission's regulations. The issuance of this License has been authorized by the Atomic Safety and Licensing Board in its Initial Decision, dated December 30, 1982, and by the Commission at its meeting on April 23, 1986. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the License. Prior public notice of the overall action involving the proposed issuance of an operating license was published in the Federal Register on July 11, 1980 (45 FR 46941) as clarified in a notice published July 25, 1980 (45 FR 49732).

The Commission has determined that the issuance of this License will not result in any environmental impacts other than those evaluated in the Final Environmental Statement since the activity authorized by the License is encompassed by the overall action evaluated in the Final Environmental Statement.

For further details with respect to this section, see (1) Facility Operating License No. NPF-51, with Technical Specifications (NUREG-1181) and Environmental Protection Plan; (2) the report of the Advisory Committee on Reactor Safeguards dated December 15, 1981; (3) the Commission's Safety Evaluation Report on Palo Verde dated November 1981; Supplement Nos. 1 through 10 dated February 1982, May 1982, September 1982, March 1983, October 1984, December 1984, May 1985, December 1985, and April 1986, respectively; (4) the Commission's related Safety Evaluation Report on CESSAR dated November 1981; Supplement No. 1 dated March 1983; Supplement No. 2 September 1983; (5) the Final Safety Analysis Report and amendments thereto; (6) the Environmental Report and supplements thereto; (7) the Draft Environmental Statement dated October 1981, (8) the Final Environmental Statement dated March 1982; and (9) the Initial Decision issued by the Atomic Safety and Licensing Board dated December 30, 1982.

The documents are available for public inspection at the Commission's Public Document Room, 1717 H. Street, NW., Washington, DC, and the Phoenix Public Library, Business, Science and Technology Department, 12 East McDowell Road, Phoenix, Arizona 85004. A copy of Facility Operating License No. NPF-51 may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director Division of PWR Licensing-B. Copies of the Safety Evaluation Report and its Supplements 1 through 10 (NUREG-0857), the Final Environmental Statement (NUREG-0841) and the Technical Specifications (NUREG-1181) may be purchased by calling (202) 275-2060 or (202) 275-2171 or by writing to the Superintendent of Documents, U.S. Government Printing Office, Post Office Box 37082, Washington, DC 20013-7082. NUREG-0857 may also be purchased from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161.

Dated at Bethesda, Maryland, the 24th day of April, 1986.

For The Nuclear Regulatory Commission.

George W. Knighton,
Director, PWR Project Directorate No. 7, Division of PWR Licensing-B.

BILLING CODE 7590-01-M

[Docket No. 50-289]

Applications, Issuance of Amendments to Facility Operating License and Final Determination of No Significant Hazards Consideration; GPU Nuclear Corp.

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 116 to Facility Operating License No. DPR-50 issued to GPU Nuclear Corporation (the licensee), which revised the Technical Specifications for operation of Three Mile Island Nuclear Station, Unit 1 (the facility), located in Dauphin County, Pennsylvania. The amendment is effective as of the date of issuance.

This amendment revises the repair limits for the steam generator tubes under a very restrictive set of circumstances as described in the request. Basically, for certain defects located on the primary side of the tubes, the amendment changes the mandatory repair limit from 40% to 50% throughwall penetration providing the defect is less than 0.55 inches long. The amendment is also only effective until the next refueling outage at which time the steam generator tube repair criteria will be re-evaluated.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the

VOL 51 ISS 85 MY 2 1986 UMI

Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with this action was published in the Federal Register (51 FR 7157) on February 28, 1986. A request for a hearing was filed on March 10, 1986, by Three Mile Island Alert, Inc.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any persons, in advance of the holding and completion of any required hearing, where it is determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the Safety Evaluation related to this action. Accordingly, as described above, the amendment has been issued and made immediately effective and any hearing will be held after issuance.

The Commission has determined that this amendment satisfies the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no evironmental impact statement or environmental assessment need be prepared for this amendment.

For further details with respect to this action see: (1) The application for amendment dated February 4, 1986, (2) Amendment No. 116 to Facility Operating License No. DPR–50 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 18th day of April 1986.

For the Nuclear Regulatory Commission.

John F. Stolz,

Director, PWR Project Directorate No. 6, Division of PWR Licensing–B.

BILLING CODE 7590–01–M

OFFICE OF PERSONNEL MANAGEMENT

Excepted Service

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: This gives notice of positions placed or revoked under Schedules A, B, and C in the excepted service, as required by civil service rule VI, Exceptions from the Competitive Service.

FOR FURTHER INFORMATION CONTACT: Tracy Spencer, 202–632–6817.

SUPPLEMENTARY INFORMATION: The Office of Personnel Management published its last monthly notice updating appointing authorities established or revoked under the Excepted Service provisions of 5 CFR Part 213 on March 25, 1986 (51 FR 10289). Individual authorities established or revoked under Schedules A, B, or C between March 1, 1986, and March 31, 1986, appear in a listing below. Future notices will be published on the fourth Tuesday of each month, or as soon as possible thereafter. A consolidated listing of all authorities will be published as of June 30 of each year.

Schedule A

No Schedule A exceptions were established during March. However, the following exception is revoked:

Department of the Army

Schedule A excepted appointing authority for temporary and intermittent laborers and munitions handlers engaged in handling ordnance materials was revoked, effective March 21, 1986, because it is no longer used.

Schedule B

The following exceptions are established:

Department of Navy

One Director and four Research Psychologists at the GS–15 or professor level in the Defense Personnel Security Research and Education Center. Effective March 26, 1986.

National Endowment for the Humanities

One Humanist Administrator (Assistant Director), Texts Program, Division of Research Programs. Effective March 26, 1986.

One Humanist Administrator, Tools Program, Reference Materials Program, Division of Research Programs. Effective March 26, 1986.

One Humanist Administrator, Access Program, Reference Materials Program, Division of Research Programs. Effective March 26, 1986.

One Humanist Administrator, Project Research, Interpretive Research Program, Division of Research Programs. Effective March 26, 1986.

One Humanist Administrator, Humanities, Science, and Technology Program, Interpretive Research Program, Division of Research Programs. Effective March 26, 1986.

Schedule C

The following exceptions are established:

Department of Agriculture

One Confidential Assistant to the Administrator, Agricultural Stabilization and Conservation Service. Effective March 5, 1986.

One Private Secretary to the Deputy Assistant Secretary for Food and Consumer Services. Effective March 7, 1986.

One Confidential Assistant to the Secretary. Effective March 11, 1986.

Department of Commerce

One Confidential Aide to the Special Assistant to the Secretary. Effective March 4, 1986.

One Confidential Assistant to the Deputy Assistant Secretary, International Economic Policy. Effective March 14, 1986.

One Special Assistant to the Administrator, National Oceanic and Atmospheric Administration. Effective March 14, 1986.

One Congressional Affairs Officer to the Director, Minority Business Development Agency. Effective March 14, 1986.

One Supervisory Public Affairs Specialist to the Under Secretary for the International Trade Administration. Effective March 14, 1986.

One Congressional Liaison Specialist to the Under Secretary for the International Trade Administration. Effective March 17, 1986.

One Secretary (Typing) to the Special Assistant to the Secretary. Effective March 21, 1986.

One Confidential Assistant to the Deputy Administrator, National Oceanic and Atmospheric Administration. Effective March 26, 1986.

One Confidential Aide to the Deputy Under Secretary for Travel and Tourism. Effective March 28, 1986.

Department of Defense

One Private Secretary to the Deputy Under Secretary of Defense, Defense Test and Evaluation. Effective March 14, 1986.

One Private Secretary to the Deputy Under Secretary of Defense, Strategic and Theater Nuclear Forces. Effective March 17, 1986.

One Private Secretary to the Director for Strategic Defense Initiative Organization. Effective March 20, 1986.

One Special Assistant to the Deputy Assistant Secretary of Defense, Near Eastern and South Eastern Affairs. Effective March 21, 1986.

Department of Education

One Special Assistant to the Director, Legislative Liaison Staff, Office of Legislation. Effective March 27, 1986.

Department of Energy

One Staff Assistant to the Special Assistant to the Secretary of Energy. Effective March 6, 1986.

One Legal Advisor to a Member of the Federal Energy Regulatory Commission. Effective March 11, 1986.

One Public Affairs Specialist to the Director, Division of Public Affairs. Effective March 24, 1986.

Department of Health and Human Services

One Special Assistant to the Director of Public Affairs, Office of Human Development Services. Effective March 10, 1986.

One Special Assistant to the Associate Commissioner for Governmental Affairs, Social Security Administration. Effective March 10, 1986.

One Special Assistant to the Commissioner, Administration for Children, Youth and Families, Office of Human Development Services. Effective March 11, 1986.

One Special Assistant to the Chief of Staff. Effective March 17, 1986.

One Confidential Assistant to the Deputy Administrator, Health Care Financing Administration. Effective March 20, 1986.

One Staff Assistant to the Associate Commissioner, Office of Governmental Affairs, Social Security Administration. Effective March 21, 1986.

Department of the Interior

One Deputy Assistant Secretary to the Assistant Secretary for Land and Minerals Management. Effective March 7, 1986.

One Special Assistant to the Assistant Secretary for Territorial and International Affairs. Effective March 7, 1986.

One Public Affairs Specialist to the Deputy Assistant Secretary, Land and Minerals Management. Effective March 14, 1986.

One Congressional Liaison Specialist to the Director, Office of Surface Mining Reclamation and Enforcement. Effective March 17, 1986.

One Congressional Liaison Officer to the Director, Minerals Management Service. Effective March 26, 1986.

One Special Assistant to the Commissioner, Bureau of Reclamation. Effective March 28, 1986.

Department of Justice

One Special Assistant to the Assistant Attorney General, Office of Legal Counsel. Effective March 4, 1986.

One Deputy Assistant Attorney General, Office of Legal Policy. Effective March 4, 1986.

One Confidential Assistant to the Deputy Associate Attorney General. Effective March 4, 1986.

Two Staff Assistants to the Attorney General. Effective March 14, 1986.

One Confidential Assistant to the Deputy Assistant Attorney General, Office of Legislative Affairs. Effective March 21, 1986.

One Confidential Assistant to the Deputy Associate Attorney General. Effective March 27, 1986.

Department of Labor

One Special Assistant to the Assistant Secretary for Occupational Safety and Health. Effective March 11, 1986.

One Special Assistant to the Deputy Under Secretary for Employment Standards. Effective March 24, 1986.

Department of the Navy

One Private Secretary to the Secretary of the Navy. Effective March 21, 1986.

Department of State

One Special Assistant to the Assistant Secretary, Bureau of East Asian Affairs. Effective March 27, 1986.

Department of the Treasury

One Staff Assistant to the Assistant Secretary (Management). Effective March 12, 1986.

One Confidential Assistant to the Deputy Assistant Secretary (Public Liaison). Effective March 17, 1986.

U.S. Arms Control and Disarmament Agency

One Secretary (Steno) to the Special Advisor to the President and Secretary of State on Arms Control Matters. Effective March 28, 1986.

Council of Economic Advisers

One Secretary to the Member. Effective March 14, 1986.

Environmental Protection Agency

One Special Assistant to the Executive Assistant to the Administrator. Effective March 14, 1986.

Federal Mine Safety and Health Review Commission

One Attorney-Advisor to the Chairman. Effective March 21, 1986.

One Confidential Secretary to a Commissioner. Effective March 24, 1986.

One Confidential Assistant to the Chairman. Effective March 28, 1986.

Federal Maritime Commission

One Secretary (Typing) to a Commissioner. Effective March 11, 1986.

One Secretary to the Chairman. Effective March 28, 1986.

General Services Administration

One Confidential Assistant to the General Counsel. Effective March 31, 1986.

National Transportation Safety Board

One Special Assistant to a Member. Effective March 11, 1986.

President's Commission on White House Fellowships

One Special Assistant to the Director. Effective March 27, 1986.

United States Tax Court

One Secretary (Confidential Assistant) to a Judge. Effective March 27, 1986.

United States Information Agency

One Special Assistant to the Director, Office of Public Liaison. Effective March 7, 1986.

One Program Assistant to the Coordinator, U.S.-Soviet Exchange Initiative. Effective March 28, 1986.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-23179 SR-AMEX-85-4]

Self-Regulatory Organizations; American Stock Exchange, Inc.; Order Approving Proposed Rule Change

The American Stock Exchange, Inc. ("Amex") submitted on March 21, 1985, copies of a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder, to amend Amex Rule 602 (Designation of Arbitrators), Rule 605 (Initiation of Proceedings), Rule 606 (Rules of General Application) and Rule 601 (Panel of Arbitrators) relating to arbitration procedures.[1] Amex also proposes to amend Amex Disciplinary Rule 12 (Disclosure of the Result of Disciplinary Proceeding).[2]

The proposed amendment to Amex Rule 602(a) would provide the Exchange's Director of Hearings with discretion to appoint a panel of three or five arbitrators in cases where the amount in controversy is less than $500,000. The Amex states that this change is proposed because of the increase in the number of cases in which $100,000 or more is claimed.[3] Where the amount in controversy is $500,000 or more, the arbitration panel shall consist of five arbitrators, except that the Amex would permit the parties to agree in writing to a panel of three rather than five arbitrators.

Rule 605(b), as amended, would permit the arbitration panel to impose a sanction on a party to an arbitration proceeding who fails to file an answer within the allotted time period from receipt of service. The proposed change would permit an adversary party to file a written objection requesting that the arbitrators, in their discretion, bar the respondent from presenting any matter, arguments or defenses at the hearing. This provision would not prohibit the respondent from submitting a response at the time of the hearing. The arbitration panel would make the final determination as to whether such a response would be accepted.

Amex Rule 606(e), as amended, would require a party requesting adjournment after the panel of arbitrators has been appointed to pay a fee equal to the filing fee, but not exceeding $100. The panel of arbitrators would have the discretion to waive the fee.

Amex Rule 601, as amended, would permit the Chairman of the Exchange to select and approve Exchange arbitrators. This would eliminate the current requirement that arbitrators must be approved by the Amex Board of Governors.

The proposed change to Amex Disciplinary Rule 12 would apply to summary proceedings conducted by Amex Disciplinary Committees the requirement that the results of such proceedings be publicly announced unless the offense relates solely to minor administrative requirements of the Exchange and does not materially affect the public interest or the interest of investors. This publication requirement currently applies only to the results of formal disciplinary proceedings conducted by Amex Disciplinary Panels.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by issuance of a Commission release (Securities Exchange Act Release No. 21910, March 29, 1985) and by publication in the **Federal Register** (50 FR 14063, April 9, 1985). No written comments were received by the Commission on the proposed rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6, and the rules and the regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 28, 1986.
John Wheeler,
Secretary.

DEPARTMENT OF STATE

[Public Notice 962]

Agency Forms Submitted for OMB Review

AGENCY: Department of State.

ACTION: In accordance with the provisions of the Paperwork Reduction Act of 1980, the Department has submitted a proposed collection of information to the Office of Management and Budget for review.

SUMMARY: The following summarizes the information collection proposal submitted to OMB:

Title of information collection—
Application/License for Temporary Import of Unclassified Defense Articles
Form Number—DSP-61.
Type of Request—Extension.
Frequency—On occasion.
Respondents—Importers of defense materials.
Estimated number of responses—2,076.
Estimated number of hours needed to respond—713.

Section 3504(h) of Pub. L. 96-511 does not apply.

Additional Information or Comments: Copies of the proposed forms and supporting documents may be obtained from Gail J. Cook (202) 647-3538. Comments and questions should be directed to (OMB) Francine Picoult (202) 395-7231.

Dated: April 18, 1986.
Donald J. Bouchard,
Assistant Secretary for Administration.
[FR Doc. 9902 Filed 5-1-86; 8:45 am]
BILLING CODE 4710-24-M

[1] According to Amex, the proposed amendments to Amex's arbitration rules would bring them into conformity with the recent amendments made to the Uniform Arbitration Code of the Securities Industry Conference on Arbitration ("SICA"). In this regard, the Commission has also received proposed rule changes providing for amendments similar to those proposed by Amex from the New York Stock Exchange, Inc. (File No. SR-NYSE-85-3); the National Association of Securities Dealers (File No. SR-NASD-85-9); the Chicago Board Options Exchange (File No. SR-CBOE-85-46 notice of which was given in Securities Exchange Act Release No. 222749, December 30, 1985; 51 FR 708); the Midwest Stock Exchange, Inc. (File No. SR-MSE-86-2); and the Pacific Stock Exchange, Inc. (File No. SR-PSE-86-6).

[2] On December 30, 1985, Amex submitted Amendment No. 1 to the proposed rule change which, at the request of the Commission staff, supplements the Exchange's statement of the purpose of, and statutory basis for, the proposed changes in the arbitration rules. The substance of these revisions is incorporated into the description of the proposed changes set forth below.

[3] Currently, Amex rule 605(a) provides that where the amount in controversy does not exceed $100,000 the Arbitration Director may appoint a panel of from three to five arbitrators. Where the amount in controversy exceeds $100,000, the rule currently requires the appointment of a panel of five arbitrators.

[Public Notice 963]

Privacy Act of 1974; Altered System of Records

Notice is hereby given that the Department of State proposes to alter an existing system of records pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a(o)) and the Office of Management and Budget Circular No. A-130, Appendix I. The Department's report was filed with the Office of Management and Budget on April , 1986.

The altered system is entitled "Family Liaison Office Centralized Data Bank of Family Member Skills and Direct Communication Network Records, STATE-49." The existing system, the "Skills Catalogue Records, STATE-49," will be altered by changing the name; by broadening the categories of individuals covered by the system to include "family members of employees of U.S. foreign affairs agencies covered by the Foreign Service Act of 1980 and their sponsors" rather than "specifically family members of Department of State, Agency for International Development, and International Communications Agency personnel"; by expanding the categories of records in the system to encompass more extensive biographic data on the family members, in addition to specific data regarding the employed sponsor; by adding the most recent authority; by extending retrievability to include all data items within the system; by including the computer system manager; and by limiting the record source categories to the individual family member and the sponsor's Official Personnel File. The purpose of these alterations is to revitalize and streamline the family member employment program and to facilitate direct communication with spouses through the utilization of an automated system which interfaces with the personnel systems of the foreign affairs agencies. Any persons interested in commenting on the altered system of records may do so by submitting comments in writing to the Information and Privacy Coordinator, Foreign Affairs Information Management Center, Room 1239, Department of State, 2201 C Street, N.W., Washington, D.C. 20520. The Department intends to implement the new system sixty days after publication of this notice. The altered system, the "Family Liaison Office Central Data Bank of Family Member Skills and Direct Communication Network Records," will read as set forth below.

Dated: April 21, 1986.
For the Secretary of State.
Donald J. Bouchard,
Assistant Secretary for Administration.

State-49

System name: Family Liaison Office Centralized Data Bank of Family Member Skills and Direct Communication Network Records.

Security classification: Unclassified.

System location: Department of State, 2201 C Street, N.W., Washington, D.C. 20520.

Categories of individuals covered by the system: Family members of employees of U.S. foreign affairs agencies covered by the Foreign Service Act of 1980 and their sponsors.

Categories of records in the system: Family member's name, Social Security Account Number, country of birth, citizenship, level and date of security clearance, GS/FS rating code, work preference code, current mailing address, location code of assignment, and other biographic data including educational background, language skills, specialized training, area of expertise, and work experience; sponsor's name, Social Security Account Number, transfer eligibility date, and foreign affairs agency name and code.

Authority for maintenance of the system: 22 U.S.C. 2693 and 4026.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The Family Liaison Office will use this record system to assist family members of employees of U.S. foreign affairs agencies in acquiring employment and other services. Information from this system will be made available to personnel offices of other Government agencies having employment opportunities. Information may also be disclosed to multinational corporations, international organizations, business firms, foundations, foreign governments, and families at overseas posts who are interested in hiring family members to perform a task commensurate with their work experience or to utilize their services in performing voluntary work.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Hard copy, computer media.

Retrievability: By individual name of family member or sponsors, as well as by each of the data items listed as a category in this description.

Safeguards: All employees of the Department of State have undergone a background security investigation. Access to the Department of State and its annexes is controlled by security guards, and admission is limited to those individuals possessing a valid identification card or individuals under proper escort. All records containing personal information are maintained in secured file cabinets or in restricted areas, access to which is limited to authorized personnel. All records containing personal information on a computerized data base are accessible only through computer media under Department of State jurisdiction and placed in restricted areas access to which is limited to authorized personnel. Access to computerized files is password-protected and under the direct responsibility of the system manager. The system manager has the capability of printing audit trails of access from the computer media, thereby permitting regular ad hoc monitoring of computer usage.

Retention and disposal: These records will be maintained in the system for as long as the individual is interested in participating in the employment services and/or the Direct Communication Network provided by the Family Liaison Office. More specific information may be obtained by writing to Director, Foreign Affairs Information Management Center, Room 1239, Department of State, 2201 C Street, N.W., Washington, D.C. 20520.

System manager(s) and address: Director, Family Liaison Office, and Chief, Personnel Management, Operating Systems Division, Department of State, 2201 C Street, N.W., Washington, D.C. 20520.

Notification procedure: Individuals who have reason to believe that the FLO Centralized Data Bank of Family Member Skills and Direct Communication Network Records might contain records pertaining to them should write to the Information and Privacy Coordinator, Foreign Affairs Information Management Center, Room 1239, Department of State, 2201 C Street, N.W. Washington, D.C. 20520. The individual must specify that she/he wishes the records of the FLO Centralized Data Bank of Family Member Skills and Direct Communication Network to be checked. At a minimum, the individual must include: date and place of birth; current mailing address and zip code; signature.

Record access procedures: Individuals who wish to gain access to or amend records pertaining to themselves should write to the Information and Privacy Coordinator, Foreign Affairs Information Management Center (address above).

Contesting record procedures: (See above).

Record source categories: The individual family member for all data

VOL 51 ISS 85 MY 2 1986 UMI

elements with the exception of the current mailing address, location code of assignment, and sponsors's transfer eligibility data, all of which will be transferred automatically from the sponsor's Official Personnel File.

Systems exempted from certain provisions of the Act: None.

BILLING CODE 4710-04-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Monterey Peninsula Airport; Receipt of Noise Compatibility Program and Request for Review

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces formal receipt of the proposed Monterey Peninsula Airport (MRY) noise compatibility program under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193) and 14 CFR Part 150. The proposed MRY noise compatibility program was submitted to the Western-Pacific Regional Director on January 15, 1986, for review and approval under Part 150 in conjunction with noise exposure maps which were found acceptable by the FAA on March 26, 1986. This program will be approved or disapproved by the Administrator on or before October 3, 1986.

EFFECTIVE DATE: The effective date of the start of the formal 180-day review period for the MRY noise compatibility program is April 7, 1986.

FOR FURTHER INFORMATION CONTACT: L. Yvonne Gibson, Airport Planner, AWP-611.5, Federal Aviation Administration, Western-Pacific Region, P.O. Box 92007, World Way Postal Center, Los Angeles, California 90009, (213) 297-1621.

SUPPLEMENTAL INFORMATION: An airport operator who has submitted noise exposure maps that are accepted by FAA as meeting the criteria published in Part 150 may also submit a noise compatibility program for FAA approval. The program must set forth the measures the airport operator has taken or proposes to take for the reduction of existing noncompatibility land uses and for the prevention of the introduction of additional noncompatible uses.

Monterey Peninsula Airport (MRY) submitted to the FAA on January 15, 1986, a proposed noise compatibility program conducted at MRY from October 10, 1984, to January 8, 1986. It was requested that the FAA approve the submittal to be implemented jointly by the airport, the airport users and the surrounding communities, as a noise compatibility program under section 104(b) of the Aviation Safety and Noise Abatement Act of 1979.

Upon the March 26, 1986, acceptance of the MRY noise exposure maps and completion of the preliminary review of the submitted materials for a noise compatibility program, the FAA has formally received the noise compatibility program for MRY. Preliminary review indicates that the submittal conforms to the requirements of Part 150 for noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program by the Administrator. The formal review period, limited by law to a maximum of 180 days, will be completed on or before October 3, 1986.

The proposed program includes recommended measures relating to flight procedures for noise control purposes which are exempt from the 180-day review procedures. The FAA's detailed evaluation of these measures will be conducted under the provisions of Part 150, § 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, and are reasonably consistent with obtaining the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible land uses.

Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments, other than those properly addressed to local land use authorities, will be considered by the FAA to the extent practicable. Because the FAA may approve a proposed noise compatibility program in less than 180 days, no formal comment period has been established. Comments received subsequent to FAA approval or disapproval, even if received beyond the 180-day limit, will be acknowledged and considered in evaluating project applications to implement elements of the program. Copies of the proposed noise compatibility program are available for examination at the following locations:

Federal Aviation Administration, 800 Independence Avenue, SW., Room 617, Washington, DC 20591.

Federal Aviation Administration, Western-Pacific Region, Airports Division, 15000 Aviation Boulevard, Room 6E25, Hawthorne, California 90261.

Mr. O.N. Ford, District Manager, Monterey Peninsula Airport District, P.O. Box 550, Monterey, CA 93940.

Questions may be directed to the individual named above under the heading, "FOR FURTHER INFORMATION CONTACT."

Issued in Hawthorne, California, on April 22, 1986.

B. Keith Potts,

Acting Director.

[FR Doc. 86-9828 Filed 5-1-86; 8:45 am]

BILLING CODE 4910-13-M

Federal Railroad Administration

Petitions for Exemption or Waiver of Compliance, Tioga Centeral Rail Excusion, et al.

In accordance with 49 CFR §§ 211.9 and 211.41, notice is hereby given that the Federal Railroad Administration (FRA) has received requests for an exemption from or waiver of compliance with certain requirements of its safety standards. The indivisual poetitions are described below, including the party seeking relief, the regulatory provisions involved, and the nature of the relief being requested.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the commeat period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (e.g., Waiver Petition Docket Number RST-84-21) and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590. Communications received before June 18, 1986 will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hour (9 a.m.-5 p.m.) in Room 8201 Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

The individual petitions seeking an exemption or waiver of compliance are as follows:

Tioga Central Rail Excursion

(Waiver Petition Docket Number RSGM-86-5)

The Tioga Central Rail Excusion (TCRX) seeks a permanent waiver of compliance with certain provisions of the Safety Glazing Standards (49 CFR Part 223) for one locomotive, Number 14. The locomotive operates on approximately 15 miles of track located in an entirely rural area between Owego, New York, and Harford, New York. The TCRX feels that compliance with FRA safety glazing requirements is unnecessary due to the area of operation.

Chicago, West Pullman and Southern Railroad Company

(Waiver Petition Docket Number RSGM-86-6)

The Chicago, West Pullman and Southern Railroad Company (CWP) seeks a permanent waiver of compliance with certain provisions of the Safety Glazing Standards (49 CFR Part 223) for two locomotives and one caboose. The CWP operates a switching service on approximately 31 miles of track within and between various commercial facilities in the Chicago area. The petitioner states that they have not encountered any acts of vandalism concerning this equipment and feels that compliance with FRA safety glazing requirements is not necessary.

Southern Pacific Transportation Company

(Waiver Petition Docket Number RSGM-86-7)

The Southern Pacific Transportation Company (SP) seeks a permanent waiver of compliance with certain provisions of the Safety Glazing Standards (49 CFR Part 223) for approximately 385 locomotives. The SP indicates that the glazing in these locomotives meets the requirements of 49 CFR Part 223 with the exception of proper permanent marking of each piece of glazing material. The petitioner states that efforts to mark the glazing with adhesive back stickers has proved ineffective and alternate methods such as acid itching have been rejected due to potential safety hazards.

The railroad is, therefore, seeking a waiver of compliance of Part 223, Appendix A.16.C(1), (2), and (3) covering marking of glazing material.

Falls Creek Railroad Company

(Waiver Petition Docket Number RSGM-86-8)

The Falls Creek Railroad Company (FCRK) seeks a permanent waiver of compliance with certain provisions of the Safety Glazing Standards (49 CFR Part 223) for two locomotives. The locomotives operate on approximately 4 miles of track in a rural area between Falls Creek, Pennsylvania, and Brockway, Pennsylvania. The railroad runs on an average of two days a month and states that they have never had any accidents or acts of vandalism. The petitioner, therefore, feels that compliance with FRA safety glazing requirements is unnecessary.

Grafton and Upton Railroad Company

(Waiver Petition Docket Number RSGM-86-9)

The Grafton and Upton Railroad Company (GU) seeks a permanent waiver of compliance with certain provisions of the Safety Glazing Standards (49 CFR Part 223) for one locomotive. The locomotive, owned by the Northern Equipment Company, will operate on approximately 15 miles of GU track located in a rural and lightly populated area near Worchester, Massachusetts. The GU states that during the past 25 years there have not been any incidents of vandalism involving broken window glazing from objects thrown at locomotives from either the right-of-way or the yards. The petitioner, therefore, feels that compliance with FRA safety glazing requirements is unnecessary.

Issued in Washington, DC, on April 24, 1986.

J.W. Walsh,

Associate Administrator for Safety.

[FR Doc. 86-9845 Filed 5-1-86; 8:45 am]

BILLING CODE 4910-06-M

National Highway Traffic Safety Administration

National Driver Register Advisory Committee; Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463, 5 U.S.C. App. I), notice is hereby given of a meeting of the National Driver Register Advisory Committee to be held on May 20, 1986, in Washington, DC. The meeting will be held at the DOT Headquarters Building from 8:30 a.m. to 4:00 p.m. in room 4234. Issues to be discussed are: An update of the recent activities of the NDR; the proposed implementation of a "National Commercial Motor Vehicle Operator's License", and discussions with Problem Driver Pointer System and Rapid Response System Pilot State Representatives.

The meeting is open to the interested public, but may be limited in attendance to the space available. Members of the public may present a written statement to the Committee at any time. With the approval of the Chairperson, members of the public may present oral statements at the meeting. Additional information is available from the NHTSA Executive Secretariat, Room 5221, 400 Seventh Street, SW., Washington, DC 20590, telephone 202-426-2570.

Issued in Washington, DC on: April 29, 1986.

Carole S. Guzzetta,

Director, Executive Secretariat.

BILLING CODE 4910-59-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Income Taxes; 1987 Electronic Filing Test; Forms 1040, 1040A and 1040EZ Returns

AGENCY: Internal Revenue Service, Treasury.

ACTION: Electronic filing test.

SUMMARY: The Internal Revenue Service plans to broaden electronic filing of individual income tax returns in 1987. Under this approach, qualified returns preparers will be permitted to electronically transmit tax year 1986 individual income tax returns to the IRS on behalf of their clients. Under the 1987 program, most of the commonly-used forms and schedules will be accepted; electronic returns can be filed from seven metropolitan areas; and taxpayers filing in three of those areas can elect to have their refunds directly deposited in their bank, savings and loan or credit union account. Firms which prepare returns in one or more of the seven designated metropolitan areas and are interested in participating in the 1987 pilot, and other interested parties, should contact the Service to request detailed specifications.

DATE: Expressions of interest and requests for copies of specifications should be submitted by June 30, 1986.

ADDRESS: Assistant Commission (Planning, Finance and Research), Internal Revenue Service, 1111 Constitution Avenue NW, Washington, DC 20224 (Attn: Electronic Filing

VOL 51 ISS 85 MY 2 1986 UMI

Project). Telephone 202–566–7541 (not a toll-free number).

SUPPLEMENTARY INFORMATION In 1987, Forms 1040EZ, 1040A and 1040 can be filed electronically. Forms 1040 can include Schedules A, B, C, D, E, G, R, SE and W, and Forms 2106, 2119, 2441, 3468, 3903, 4562, 6251, 6252 and 8283. The seven metropolitan areas to be included in the 1987 test are Albany-Schenectady-Troy, New York; Sacramento, California; Milwaukee, Wisconsin; Norfolk-Virginia Beach-Newport News, Virginia; Phoenix, Arizona; Raleigh-Durham-Fayetteville, North Carolina and Cincinnati, Ohio. In addition taxpayers filing in the latter three areas will be permitted to elect to have their refunds directly deposited into their bank, savings and loan or credit union accounts.

The principal advantage of electronic filing are (1) Most taxpayers will receive refunds two or three weeks faster than if their returns had been filed in the form of paper documents, (2) returns preparers will be able to serve their clients more efficiently, (3) the cost to IRS of processing, storing and retrieving these returns will be reduced substantially, and (4) taxpayers participating in direct deposit will obtain their refunds quickly and more conveniently.

A participating electronic filer must meet the following basic qualifications:

1. Prepared at least 100 tax returns for compensation in 1985,
2. used computers to prepare individual income tax returns for tax years 1984 and 1985, either directly or through a service bureau,
3. has substantial communication experience under IBM 3780 RJE bi-synchronous protocol at 4800 BAUD through a dial-up modem, or associated with another firm which has such experience, and
4. has a tax preparation office in one or more of the designated metropolitan areas included in the 1987 pilot.

Electronic preparation offices must be located within the following areas:

Areas	Counties/cities included
Cincinnati/Dayton/ Springfield Ohio.	Counties of Adams, Brown, Butler, Clark, Clermont, Clinton, Fayette, Greene, Hamilton, Highland, Miami, Montgomery, Preble and Warren in Ohio.
Phoenix, Arizona	Counties of Boone, Campbell and Kenton in Kentucky. Dearborn County in Indiana. Maricopa County.
Raleigh/Durham/ Fayetteville.	Counties of Chatham, Cumberland, Durham, Franklin, Harnett, Johnston, Lee, Orange, and Wake in North Carolina.
Albany/Schenectady/ Troy.	Counties of Albany, Fulton, Greene, Montgomery, Rensselaer, Saratoga, Schenectady, Warren and Washington.
Milwaukee, Wisconsin	Counties of Kenosha, Milwaukee, Ozaukee, Racine, Sheboygan, Walworth, Washington and Waukesha.
Sacramento/Stockton, California.	Counties of El Dorado, Placer, Sacramento, San Joaquin, Sutter, Yolo, and Yuba.
Norfolk/Virginia Beach/ Newport News, Virginia.	Cities of Chesapeake, Hampton, Newport News, Norfolk, Portsmouth, Poquoson, Suffolk, Virginia Beach and York County.

While there is no geographic restriction on the taxpayers participating in electronic filing, preparers may not actively solicit business outside of the designated areas.

John L. Wedick, Jr.,

Assistant Commissioner, (Planning, Finance and Research).

1

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

DATE AND TIME: 2:00 p.m. (eastern time), Monday, May 12, 1986.

PLACE: Clarence M. Mitchell, Jr., Conference Room No. 200–C on the 2nd Floor of the Columbia Plaza Office Building, 2401 "E" Street, NW., Washington, DC 20507.

STATUS: Closed to the public.

MATTERS TO BE CONSIDERED:

Closed

1. Litigation Authorization; General Counsel Recommendations
2. Discussion of Subpoena Determinations

Note.—Any matter not discussed or concluded may be carried over to a later meeting. (In addition to publishing notices on EEOC Commission meetings in the **Federal Register**, the Commission also provides a recorded announcement a full week in advance on future Commission sessions. Please telephone (202) 634–6748 at all times for information on these meetings.)

CONTACT PERSON FOR MORE INFORMATION: Cynthia C. Matthews, Executive Officer at (202) 634–6748.

Dated: April 30, 1986.

Cynthia C. Matthews,

Executive Officer, Executive Secretariat.

This Notice Issued April 30, 1986.

[FR Doc. 86–10008 Filed 4–30–86; 8:45 am]

BILLING CODE 6750–06–M

2

FEDERAL RESERVE SYSTEM

TIME AND DATE: 10:00 a.m., Wednesday, May 7, 1986.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Street, NW, Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Federal Reserve Bank and Branch director appointments.
2. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
3. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3207. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: April 30, 1986.

James McAfee,

Associate Secretary of the Board.

FOREIGN CLAIMS SETTLEMENT COMMISSION

Announcement in Regard to Commission Meetings and Hearings

The Foreign Claims Settlement Commission, pursuant to its regulations (45 CFR Part 504, and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice in regard to the scheduling of open meetings and oral hearings for the transaction of Commission business and other matters specified, as follows:

DATE AND TIME: Monday, May 19, 1986 at 10:30 a.m.

SUBJECT MATTER: Consideration of claims filed under the Ethiopian Claims Program.

Subject matter listed above, not disposed of at the scheduled meeting, may be carried over to the agenda of the following meeting.

All meetings are held at the Foreign Claims Settlement Commission, 1111–20th Street, NW., Washington DC. Requests for information, or advance notices of intention to observe a meeting, may be directed to: Administrative Officer, Foreign, Claims Settlement Commission, 1111–20th Street, NW., Room 409, Washington, DC 20579. Telephone: (202) 653–6155.

Dated at Washington, DC, on April 30, 1986

Judith H. Lock,

Administrative Officer.

Part II

Environmental Protection Agency

40 CFR Parts 260, 264, 265, and 270
Standards Applicable to Owners and Operators of Hazardous Waste Treatment, Storage, and Disposal Facilities; Closure, Post-Closure and Financial Responsibility Requirements; Final Rule

VOL 51 ISS 85 MAY 2 1986 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 260, 264, 265, and 270

[SWH-FRL 2981-6]

Standards Applicable to Owners and Operators of Hazardous Waste Treatment, Storage, and Disposal Facilities; Closure/Post-Closure and Financial Responsibility Requirements

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: On March 19, 1985, the Environmental Protection Agency (EPA) proposed to amend portions of the closure and post-closure care and financial responsibility requirements applicable to owners and operators of hazardous waste treatment, storage, and disposal facilities (TSDFs) (50 *FR* 11068). EPA is today promulgating the amendments in final form. Many of the amendments conform to a settlement agreement signed by EPA and petitioners in *American Iron and Steel Institute* v. *U.S. Environmental Protection Agency*, renamed *Atlantic Cement Company Incorporated* v. *U.S. Environmental Protection Agency* (D.C. Cir., No. 81–1387 and Consolidated Cases). The remainder of the amendments are designed to clarify the regulations and to address issues that have arisen as EPA has implemented the regulations.

DATES: These regulations shall become effective on October 29, 1986, except for § 270.14(b)(14), which shall be effective on May 2, 1986.

Wording changes for financial instruments issued before the effective date of these regulations must be made at the same time changes are required under §§ 264.142(b), 264.144(b), 265.142(b), and 265.144(b).

ADDRESSES: The public docket for this rulemaking is available for public inspection at Room S–212–E, U.S. EPA, 401 M Street SW., Washington, DC. 20460 from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding holidays. The docket number is F–86–FCPC. Call (202) 475–9327 to make an appointment with the docket clerk. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services.

FOR FURTHER INFORMATION CONTACT: The RCRA Hotline toll free at (800) 424–9346 or in Washington at (202) 382–3000; or Nancy D. McLaughlin, Office of Solid Waste (WH–562), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (202) 475–6677.

SUPPLEMENTARY INFORMATION: The contents of today's preamble are listed in the following outline:

I. Background
A. Subtitle C of the Resource Conservation and Recovery Act (RCRA)
B. Regulations Affected by Today's Amendments
C. Atlantic Cement Company, Incorporated (*ACCI*) Litigation and Settlement
D. Subparts G and H Implementation Experience
E. Hazardous and Solid Waste Amendments of 1984 Codification Rule

II. Analysis of Rules
A. Definitions (Part 260)
1. Active Life of the Facility (§ 260.10)
2. Final Closure (§ 260.10)
3. Hazardous Waste Management Unit (§ 260.10)
4. Partial Closure (§ 260.10)
B. Standards for Permitted Facilities (Part 264) and Conforming Changes to Interim Status Standards (Part 265)
1. Closure and Post-Closure Care (Subpart G)
a. Closure performance standard (§§ 265.111 and 265.111)
b. Requirement to furnish closure and post-closure plans to the Regional Administrator (§§ 264.112(a), 264.118(c), 265.112(a) and 265.118(b))
c. Clarification of contents of closure plan (§§ 264.112(b) and 265.112(b))
d. Description of removal or decontamination of facility structures and soils in closure plan (§§ 264.112(b)(4) and 265.112(b)(4))
e. Requirements to estimate the expected year of closure (§§ 264.112(b)(7) and 265.112(b)(7))
f. Amendments to closure and post-closure plans (§§ 264.112(c), 264.118(d), 265.112(c) and 265.118(d))
g. Notification of partial closure and final closure (§§ 264.112(d) and 265.112(d))
h. Removal of hazardous wastes and decontamination or dismantling of equipment (§§ 264.112(e) and 265.112(e))
i. Time allowed for closure (§§ 264.113 and 265.113)
j. Disposal or decontamination of equipment, structures, and soils (§§ 264.114 and 265.114)
k. Certification of closure (§§ 264.115 and 265.115)
l. Survey plat (§§ 264.116 and 265.116)
m. Post-closure care and use of property (§§ 264.117 and 265.117)
n. Post-closure plans (§§ 264.118 and 265.118)
o. Post-closure notices (§§ 264.119 and 265.119)
p. Certification of completion of post-closure care (§§ 264.120 and 265.120)
2. Financial Assurance Requirements (Subpart H)
a. Cost estimates for closure and post-closure care (§§ 264.142(a), 264.144(a), 265.142(a) and 265.144(a))
b. Anniversary date for updating cost estimates for inflation (§§ 264.142(b), 264.144(b), 265.142(b) and 265.144(b))
c. Revisions to the cost estimates (§§ 264.142(c), 264.144(c), 265.142(c) and 265.144(c))
d. Post-closure cost estimate (§§ 264.144(c), and 265.144(c))
e. Trust fund pay-in period (§§ 264.143(a)(3) and 265.143(a)(3))
f. Reimbursements for closure and post-closure expenditures from trust fund and issuance (§§ 264.143(a)(10), 264.143(e)(5), 264.145(a)(11), 264.145(e)(5), 265.143(a)(10), 265.143(d)(5), 265.145(a)(11), and 265.145(d)(5))
g. Final order required (§§ 264.143(b)(4)(ii), 264.145(b)(4)(ii), 265.143(b)(4)(ii) and 265.145(b)(4)(ii))
h. Final administrative determination required (§§ 264.143 (c)(5) and (d)(8), 264.145 (c)(5) and (d)(9), and 265.143(c)(8), 265.145(b)(5) and 265.145(c)(9))
i. Cost estimates for owners or operators using the financial test or corporate guarantee must include UIC cost estimates for Class I wells (§§ 264.143(f)(1)(i) (B) and (D) and (f)(1)(ii) (B) and (D), 264.145(f)(1)(i) (B) and (D) and (f)(1)(ii) (B) and (D), 265.143(e)(1)(i) (B) and (D) and (e)(1)(ii) (B) and (D), 265.145(e)(1)(i) (B) and (D) and (e)(1)(ii) (B) and (D))
j. Cost estimates must account for all facilities covered by the financial test or corporate guarantee (§§ 264.143(f)(2), 264.145(f)(2), 265.143(e)(2) and 265.145(e)(2))
k. Release of the owner or operator from the requirements of financial assurance for closure and post-closure care (§§ 264.143(i), 264.145(i), 265.143(h), and 265.145(h))
l. Period of liability coverage (§§ 264.147(e) and 265.147(e))
m. Wording of instruments (§ 264.151)
C. Interim Status Standards (Part 265)
1. Applicability of Requirements (§ 265.110)
2. Waste Pile Closure Requirements Included by Reference in the Closure Performance Standard (§ 265.111(c))
3. Submission of Interim Status Closure and Post-Closure Plans (§§ 265.112(d), 265.118(e))
4. Written Statements by Regional Administrator of Reasons for Refusing to Approve or Reasons for Modifying Closure or Post-Closure Plan (§§ 265.112(d) and 265.118(f))
D. Typographical Errors
E. Permitting Standards (Part 270)
1. Contents of Part B: General Requirements (§§ 270.14(b) (14), (15) and (16))
2. Minor Modifications of Permits (§ 270.42(d))
3. Changes During Interim Status (§ 270.72(d))

III. State Authority
A. Applicability of Rules in Authorized States
B. Effect on State Authorization

IV. Executive Order 12291
V. Paperwork Reduction Act
VI. Regulatory Flexibility Act
VII. Supporting Documents
VIII. Effective Date

I. Background

A. Subtitle C of the Resource Conservation and Recovery Act (RCRA)

Subtitle C of RCRA creates a "cradle-to-grave" management system to ensure that hazardous wastes are transported, treated, stored, and disposed of in a manner that ensures the protection of human health and the environment. Section 3004 of Subtitle C requires the Administrator of EPA to promulgate regulations establishing such performance standards applicable to owners and operators of hazardous waste treatment, storage, or disposal facilities (TSDFs), as may be necessary to protect human health and the environment. Section 3005 requires the Administrator to promulgate regulations requiring each person owning or operating a TSDF to have a permit, and to establish requirements for permit applications.

Under Section 3005(a), on the effective date of the Section 3004 standards, all treatment, storage and disposal of hazardous waste is prohibited except in accordance with a permit that implements the Section 3004 standards. Recognizing, however, that not all permits would be issued within six months of the promulgation of Section 3004 standards, Congress created "interim status" in Section 3005(e) of RCRA. Owners and operators of existing hazardous waste TSDFs who qualify for interim status will be treated as having been issued a permit until EPA takes final administrative action on their permit application. Interim status does not relieve a facility owner or operator of complying with Section 3004 standards. The privilege of carrying on operations in the absence of a permit carries with it the responsibility of complying with appropriate portions of the Section 3004 standards.

B. Regulations Affected by Today's Amendments

EPA has issued several sets of regulations to implement the various sections of Subtitle C. Part 260 of 40 CFR, among other provisions, includes definitions that apply to all other parts of the regulations. Part 264 provides standards for owners and operators of TSDFs that have been issued RCRA permits. Part 265 provides interim status standards for owners and operators of TSDFs. Part 270 establishes permitting procedures for TSDFs. These four parts are amended by today's final rule.

C. Atlantic Cement Company, Incorporated (ACCI) Litigation and Settlement

Shortly after EPA promulgated the January 12, 1981 regulations, which, among other requirements, included standards for closure and post-closure care and financial assurance, individual companies and industry trade associations filed 17 separate lawsuits challenging those standards. These cases were consolidated as *American Iron and Steel Institute* v. *U.S. Environmental Protection Agency* (D.C. Cir., No. 81–1387 and Consolidated Cases). On August 16, 1984, the parties (with the exception of several parties who voluntarily dismissed their lawsuits) filed a settlement agreement with the Court. The American Iron and Steel Institute voluntarily dismissed its lawsuit rather than join in the settlement; the case has been renamed *Atlantic Cement Company Incorporated* v. *U.S. Environmental Protection Agency* ("ACCI Litigation").

Under the terms of the settlement agreement, EPA agreed to propose and take final action upon certain amendments to the closure and post-closure regulations that were promulgated on January 12, 1981. The rules proposed on March 19, 1985 contained amendments conforming to the *ACCI* settlement agreement. Among the regulations EPA is promulgating today are amendments to 40 CFR Parts 260, 264, 265, and 270 that are in most cases consistent with the *ACCI* settlement agreement. In addition, certain of these amendments require conforming amendments to financial responsibility regulations in Subpart H of Parts 264 and 265. Those changes are also being made today.

D. Subparts G and H Implementation Experience

Since January 12, 1981, EPA and authorized states have developed considerable experience with the implementation of Subparts G and H. Based on this implementation experience, EPA is today making additional changes to 40 CFR Parts 260, 264, 265, and 270.

E. Hazardous and Solid Waste Amendments of 1984 Codification Rule

On July 15, 1985, EPA published in 50 *FR* 28702 final rules implementing provisions included in the Hazardous and Solid Waste Amendments of 1984 (HSWA) (hereinafter referred to as the "codification rule"). Some of today's final rules have been promulgated to conform to HSWA and to the requirements of the July 15, 1985 codification rule.

II. Analysis of Rules

The following sections of this preamble include discussions of the major issues and summaries of the comments received in response to the March 19, 1985 proposed rule, as well as explanations of EPA's rationale for promulgating the final rules. The preamble is arranged in a section-by-section sequence for ease of reference. Because many of the regulatory amendments to Interim Status Standards (Part 265) are parallel to the Standards for Permitted Facilities (Part 264), only those changes to the Part 265 Interim Status Standards that differ from the Part 264 standards are addressed separately.

A. Definitions (Part 260)

1. Active Life of the Facility (§ 260.10).

In the March 19, 1985 proposed rule, the Agency proposed to redefine "active life" to extend the period from the initial receipt of hazardous wastes until the Regional Administrator receives certification of final closure. Sections 264.112(b) and 265.112(b) previously defined active life of a facility as that period during which wastes are periodically received.

The key concern raised by the commenters was that certain requirements applicable to operating facilities may not be practical or feasible to conduct during the closure period (e.g., inspections, paperwork requirements).

The Agency does not agree that defining the closure period as part of the active life would be burdensome or require activities not otherwise required at the facility. For example, §§ 264.73 and 265.73 now require that the owner or operator maintain the operating record until closure of the facility. The Agency would also expect an owner or operator to conduct inspections as part of a routine closure activities. As discussed in the preamble to the proposed rule, the Agency is primarily concerned with ensuring that all monitoring activities are continued until closure is completed. Therefore, the Agency is promulgating the definition of active life of the facility as proposed.

2. Final Closure (§ 260.10)

In order to clarify the distinction between partial closure and final closure, the Agency proposed to define final closure as closure of all hazardous waste management units at a facility not otherwise covered by the provisions of

VOL 51 ISS 85 MY 2 1986 UMI

§ 262.34 (exemptions from Subpart G requirements for facilities accumulating hazardous wastes for less than 90 days), in accordance with Subpart G requirements. Closure of the last unit of the facility would be defined as final closure of the facility. No comments were received on this proposal, and the Agency is promulgating the definition as proposed.

3. Hazardous Waste Management Unit (§ 260.10)

The Agency proposed to define a new term—"hazardous waste management unit"—as the smallest area of land on or in which hazardous waste is placed, or the smallest structure on or in which hazardous waste is placed, that isolates hazardous waste within a facility. The proposed definition was designed to be consistent with the preamble to the July 26, 1982 land disposal regulations (47 *FR* 32289), expanded to include storage and treatment tanks and container storage units. The following were defined as hazardous waste management units in the March 19, 1985 proposed rule: a landfill cell, surface impoundment, waste pile, land treatment area, incinerator, tank system (i.e., individual tank and its associated piping and underlying containment system), and a container storage area (i.e., the containers and the land or pad on which they are placed).

A number of commenters were concerned that the proposed definition was still somewhat ambiguous. In particular, the definition did not adequately distinguish between landfill cells, which were defined in the proposed rule as units, and subcells, which are integral subsections of cells and should not be closed separately from the cell as a whole. Another commenter expressed concern that the term "isolates" in the definition implies that all units necessarily isolate wastes, which may not always be the case (e.g., land treatment area).

The Agency agrees that the proposed definition is somewhat ambiguous and not completely consistent with the definition of unit included in the July 26, 1982 preamble. Moreover, the Agency wishes to make the definition consistent with the codification rule. (See 50 *FR* 28706 and 28712, July 15, 1985). Therefore, today's rule defines hazardous waste management unit as a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is a significant likelihood of mixing hazardous waste constituents in the same area. Units include: surface impoundments, waste piles, landfill cells, incinerators, land treatment areas, tanks and their associated piping and underlying containment systems, and container storage areas (i.e., the container and any underlying pad). As discussed in the preamble to the proposed rule, the Agency does not consider each container to be a unit.

4. Partial Closure (§ 260.10).

The March 19, 1985 proposed rule redefined partial closure as closure of a hazardous waste management unit. Partial closures may involve: (1) closing a hazardous waste management unit while another hazardous waste management unit at the facility continues operating (e.g., a surface impoundment or container storage area is closed but a landfill continues to operate), or (2) closing one or more hazardous waste management units while other units associated with the same process remain operational (e.g., one landfill cell of a ten-cell landfill is closed, one tank and its underlying piping is removed from a tank farm). Closure of the *last* hazardous waste management unit at the facility would be considered a *final* closure rather than a partial closure.

The Agency received no substantive comments on the proposed definition of partial closure. The definition is being adopted substantially as proposed, with the following change: In the list of examples, "tank system" has been changed to "tank (including its associated piping and underlying containment system)".

B. Standards for Permitted Facilities (Part 264) and Conforming Changes to Interim Status Standards (Part 265)

1. Closure and Post-Closure Care (Subpart G).

a. *Closure performance standard (§§ 264.111 and 265.111).* The previous sections 264.111 and 265.111 established general closure performance standards applicable to all TSDFs that specified that a facility must be closed in a manner that (1) minimizes the need for further maintenance, and (2) controls, minimizes or eliminates, to the extent necessary to prevent threats to human health and the environment, post-closure escape of hazardous wastes, hazardous waste constituents, leachate, contaminated rainfall, or hazardous waste decomposition products to the ground or surface waters or to the atmosphere. The language in § 265.111 differed slightly and specified that the facility must be closed in a manner "that . . . controls, minimizes or eliminates, to the extent necessary to *protect* human health and the environment. . . ."

In the March 19, 1985 preamble, the Agency proposed to (1) incorporate into the general standard a reference to the process-specific closure standards included in 40 CFR §§ 264.178, 264.197, 264.228, 264.258, 264.280, 264.310, 264.351, and the parallel interim status provisions; (2) make the language in § 265.111 parallel to that in § 264.111; (3) revise the language to require that hazardous constituents, as well as hazardous waste constituents, be appropriately managed at closure; and (4) make a minor change to the wording of the regulation for purposes of clarification.

The Agency proposed to incorporate reference to the specific technical closure requirements into the performance standard to ensure that owners or operators of TSDFs comply with both the general performance standard and the applicable process-specific standards. No comments were submitted on this proposal. The Agency is promulgating the language of §§ 264.111(c) and 265.111(c) substantially as proposed. The reference to § 265.178 in § 265.111(c) has been dropped because there are no process-specific standards for container storage facilities in interim status; in addition, references to §§ 265.381 and 265.404 which had been inadvertently omitted from the proposed rule, are inlcuded in § 265.111(c).

Because the Agency believes that for clarity and consistency the closure performance standard for interim status and permitted facilities should be parallel, the Agency proposed to amend § 265.111(b) to make the language parallel to that in § 264.111(b). One commenter stated that the use of the phrase "prevent threats" could require an owner or operator to conduct closure activities that were not cost-effective and should be replaced by a site-specific risk assessment.

The Agency believes that the environmental goals of closure should be the same for both interim status and permitted facilities. Although the previous language of the closure performance standard in Parts 264 and 265 differed slightly, as discussed in the preamble to the proposed rule, the Agency interpreted them as having the same meaning. As a result, the Agency proposed to amend § 265.111 to be consistent with the Part 264 standards and included the language "to prevent threats".

For the sake of clarity and to be consistent with the statutory language in RCRA mandating EPA to promulgate standards to *protect* human health and the environment, however, the final rule

amends the language of § 264.111(b) to be consistent with the wording of § 265.111(b). The language in § 264.111(b) now specifies that the facility must be closed in a manner "that . . . controls, minimizes, or eliminates, to the extent necessary to protect human health and the environment" the post-closure escape of hazardous wastes, hazardous constituents, etc.

The Agency also proposed to expand the language in §§ 264.111(b) and 265.111(b) to require that closure must control, minimize or eliminate, to the extent necessary, the post-closure escape of *hazardous constituents* instead of only hazardous waste constituents as the previous regulation required. One commenter opposed the proposal on the grounds that requiring owners and operators to address all Appendix VIII constituents rather than only hazardous waste constituents could have costly implications for closure and post-closure care. Moreover, the commenter argued that the Agency did not provide a rationale for this change in the March 19, 1985 proposed rule.

The Agency believes it is necessary to include hazardous constituents in the closure performance standard to ensure that *all* contamination is adequately addressed at closure. Furthermore, this change is consistent with the HSWA. For example, RCRA Section 3004(u) requires corrective action for all releases of hazardous wastes or *hazardous constituents* from any solid waste management unit. Similarly, Section 3001(f) requires the Agency in evaluating delisting petitions to consider, among other things, constituents other than those for which the waste was listed as hazardous. As a result of these considerations, the Agency is adopting §§ 264.111(b) and 265.111(b) as proposed.

Finally, the Agency proposed to clarify the wording in §§ 264.111(b) and 265.111(b) by replacing the phrase "contaminated rainfall" with "contaminated run-off." No comments were received and this change is being promulgated as proposed. In addition, the phrase "waste decomposition products" was changed to "*hazardous* waste decomposition products." Wastes which are not hazardous are not subject to the closure performance standards.

b. *Requirement to furnish closure and post-closure plans to the Regional Administrator (§§ 264.112(a), 264.118(c), 265.112(a), 265.118(b)).* Sections 264.112(a), 264.118(a), 265.112(a), and 265.118(a) previously required the owner or operator of a TSDF to keep a copy of the closure and post-closure plan and all revisions at the facility until closure is completed and certified. (In the case of permitted facilities and interim status facilities with approved plans, the approved plans were to be kept on-site.) Post-closure plans were to be retained at the facility until the post-closure care period began. Petitioners in the *ACCI* litigation argued that a hazardous waste management facility may not be properly equipped to maintain files at the facility and safeguard closure and post-closure plans and that the plans could be kept more efficiently and safely at nearby offices of the owner or operator of the facility. The EPA, however, was concerned that the plans be available on-site to an inspector on the day of inspection.

The Agency proposed to drop the requirement that the closure and post-closure plans be kept at the facility, but to require that they be furnished to the Regional Administrator upon request, including request by mail, and during site inspections, on the day of inspection. This was consistent with the terms of the *ACCI* settlement.

Most of the commenters focused on the applicability of the requirements to permitted facilities, arguing that if the Agency already has a copy of the plan on file, requiring it to be made available on the day of inspection is unnecessary. Another argued that plans should be kept at the facility during the closure period to make them readily available for an unannounced inspection at that time.

The Agency agrees with those commenters who argued that for facilities with approved closure and post-closure plans on file, it is not necessary to make them available on the day of inspection. For interim status facilities, however, the plans may not have been reviewed and it is important that they be available on the day of inspection. Even in the case of unannounced inspections, it should be possible to deliver a copy of the plan to the facility within the same day. Therefore, the Agency is promulgating §§ 264.112(a) and 264.118(c) to require that the plans be furnished only upon request, including request by mail; §§ 265.112(a) and 265.118(b) require that for interim status facilities with *approved* closure and post-closure plans, the plans must be furnished upon request, including request by mail. For facilities without approved plans, the plans must also be provided during site inspections.

Under the requirements of §§ 264.228 and 264.258, an owner or operator of a surface impoundment or waste pile not designed in accordance with the specified liner design standards must prepare a contingent closure and post-closure plan for closure as a landfill. To ensure that such owners and operators recognize that these contingent plans are subject to the requirements of Part 264 Subpart G, the final rule modifies the proposed rule slightly. The final rule clarifies that if a facility is required to have a contingent closure and post-closure plan under § 264.228 or § 264.258, these plans are also subject to the requirements of §§ 264.112 and 264.118.

In some cases, owners or operators of surface impoundments or waste piles not otherwise required to prepare contingent closure and post-closure plans may be required to close their units or facilities as landfills. To clarify that these facilities also must have post-closure plans, the final rule specifies in §§ 264.118(a) and 265.118(a) that an owner or operator must prepare a post-closure plan within 90 days of the date that the owner or operator or Regional Administrator determines that the facility must be closed as a landfill.

c. *Clarification of contents of closure plan (§§ 264.112(b), 265.112(b)).* The Agency proposed a number of changes to §§ 264.112(a) and 265.112(a) to make explicit the level of detail that must be included in the closure plan to eliminate potential ambiguities in the closure plan requirements. First, the proposed rule clarified that the plan must address explicitly the activities to be conducted at all partial closures as well as final closure. The proposed rule also stated in §§ 264.112(b)(6) and 265.112(b)(6) that a schedule for closure activities must be provided for closure of each unit as well as for final closure. In addition, the proposed rule also elaborated on the types of information that should be included in the plan.

For example, the owner or operator must include in the plan not only an estimate of the maximum inventory over the life of the facility, but also a detailed description of the procedures that will be used to handle the hazardous wastes during partial and final closure (e.g., all proposed methods for removing, transporting, treating, or disposing of hazardous wastes at partial and final closure). The plan must also address all ancillary activities necessary during the partial and final closure periods, such as ground-water monitoring, leachate collection, and run-on and run-off control, as applicable.

The Agency received a number of comments supporting increased level of detail in the plans. Most of these commenters favored including even more specificity in the closure plan regulations (e.g., criteria for "how clean is clean"). A number of commenters however, also disagreed with the

VOL 51 ISS 85 MY 2 1986 UMI

Agency's proposed amendments, arguing that the level of detail proposed is unnecessary and burdensome, especially if the plan must be changed several times to reflect future changes in technology. One commenter expressed concern that the level of detail specified, combined with the permit modification procedures required to make changes to the plan, could lock an owner or operator into an outmoded closure plan.

The Agency believes that it is necessary to require detailed closure and post-closure plans to ensure accurate cost estimates and adequate financial assurance. Implementation experience has shown that poorly detailed plans have been accompanied by inadequate cost estimates. The plans should include sufficient detail to allow a third party to conduct closure or post-closure care in accordance with the plan if the owner or operator fails to do so. Therefore, the Agency is promulgating the final rule as proposed.

The Agency disagrees with those commenters who contend that requiring a greater level of detail will force owners or operators to revise their plans frequently. The types of changes that would require a revision to the closure plan are likely to be the result of a change in facility design or routine operations (e.g., a change in the cover design, off-site vs. on-site management of wastes at closure, closure of a surface impoundment or waste pile as a landfill). These types of changes are unlikely to occur frequently. The Agency does not intend that the owner or operator should revise the plan for insignificant changes (e.g., a change in the particular off-site facility used to handle wastes at closure or the contractor used to install the final cover). The Agency also does not intend this requirement to preclude an owner or operator from revising the plan as appropriate to incorporate technological innovations or to lock owners or operators into outmoded closure plans.

A number of commenters requested that the Agency address "how clean is clean" and include this standard as part of the closure requirements. The Agency is currently developing a policy on this broad issue outside the scope of this rulemaking.

d. *Description of removal or decontamination of facility structures and soils in closure plan (§§ 264.112(b)(4), 265.112(b)(4)).* Sections 264.112(a)(3) and 265.112(a)(3) previously required owners or operators to include a description of the steps needed to decontaminate facility equipment at closure. The proposed amendment expanded this provision to require that the closure plan also must include a description of steps necessary to decontaminate or remove contaminated facility structures, containment systems, and soils in a manner that satisfies the closure performance standard. The plan must include, but not be limited to, a description of the methods for decontaminating the facility, sampling and testing procedures, and criteria to be used for evaluating contamination levels.

Because responsible owners or operators will clean up drips and spills associated with hazardous waste management activities as they occur (see, e.g., 40 CFR § 264.175), many of the activities described in the closure plan for removing or decontaminating soils should be similar to those conducted during the operating life of the facility as part of routine operations. For some types of units (e.g., tanks or container storage), soil testing may not be a routine operating activity and may not be conducted until closure. For these types of units it is especially important that the plan address how the owner or operator intends to determine the extent of soil contamination at closure. The Agency's intent is that the plan should address cleanup of the maximum extent of contamination (including contaminated soil) resulting from the facility's hazardous waste operations that the owner or operator expects to be on-site anytime over the active life of the facility.

While most commenters agreed with the proposal to address contaminated soils, some suggested clarifications. Some commenters were concerned about the ambiguity of the terms "contaminated" and "containment systems." The language might be construed to require decontamination or removal of leachate collection systems and liners. It was suggested that the regulation identify the equipment and structures subject to the decontamination requirement. Another commenter stated that the preamble to the proposed rule implied that the plan must address soil contamination from production activities, which is outside the scope of RCRA.

The Agency agrees that the plan must address soil contamination *only* from hazardous waste management operations. The Agency also does not intend this rule to require that an owner or operator remove structures otherwise required by process-specific requirements to be maintained and used after closure. For example, if an owner or operator closes a surface impoundment as a landfill, the Agency does not intend that the owner or operator remove the containment system as part of closure decontamination procedures. (Similarly, the overlying hazardous wastes are not removed when a disposal facility is closed.) The Agency believes that the language of the proposed rule can be interpreted reasonably and it is not necessary to list in the regulation every piece of equipment and facility that must be decontaminated at every type of facility. As a result, the Agency is promulgating the final rule as proposed.

e. *Requirements to estimate the expected year of closure (§§ 264.112(b)(7) and 265.112(b)(7)).* Sections 264.112(a)(4) and 265.112(a)(4) previously required each owner or operator of a TSDF to include in its written closure plan an estimate of the expected year of closure. Petitioners in the *ACCI* litigation argued that compliance with that provision was unnecessarily burdensome for owners or operators of on-site TSDFs, such as storage and treatment facilities associated with industrial processes. In the case of those facilities, the expected date of closure may not be determined by the hazardous waste management activities but by the primary industrial activity with which the facility is associated, the closure date of which, in many cases, may be difficult to predict.

The Agency was concerned that in the case of owners or operators using trust funds to provide financial assurance, an estimate of the expected year of closure is necessary to enable both the owners or operators and EPA to determine whether appropriate payments have been made into the trust fund. In addition, for interim status facilities without approved closure plans, an estimate of the year of closure is important to allow the Agency the opportunity to conduct facility inspections near the end of the facility's life and ensure that closure will be performed in a manner that will protect human health and the environment. Therefore, the Agency proposed to amend the regulation to require only those owners or operators of permitted facilities who use trust funds to establish financial assurance under § 264.143 and whose facilities are expected to close prior to expiration of their initial permit to estimate the expected year of closure. For owners or operators of interim status facilities, those without approved closure plans or those who use trust funds to demonstrate financial assurance and whose remaining operating life is less than 20 years, would be required to estimate the year of closure.

Most commenters agreed with the Agency's proposed amendment to limit the requirement to owners or operators using trust funds; some questioned retaining the requirement for all interim status facilities without approved closure plans. Those commenters who opposed the proposal argued that it is difficult to predict closure and a date should not be required. Consistent with the discussion in the March 19, 1985 preamble, the Agency feels that a date of closure is imperative for owners or operators using trust funds and for facilities without approved plans and is promulgating the rule as proposed.

f. *Amendments to closure and post-closure plans (§§ 264.112(c), 264.118(d), 265.112(c) and 265.118(d)).* Sections 264.112(b) and 265.112(b) previously allowed an owner or operator to amend the closure plan at any time during the active life of the facility if there was a change in operating plans or facility design which affected the closure plan or if there was a change in the expected year of closure. The Agency proposed amendments to make this regulation consistent with other proposed regulatory amendments. In addition, the proposed amendments established procedures and deadlines for requesting modifications to closure and post-closure plans.

The definition of active life now includes the closure period. Therefore, the language of the previous regulation would have allowed an owner or operator to request modifications to the closure plans during the operating life of the facility through the closure period. To minimize threats to human health and the environment, the Agency considers it important to avoid undue delays in the completion of closure once activities have begun. Therefore, the Agency proposed §§ 264.112(c) and 265.112(c) allowing an owner or operator to modify the closure plans only *prior* to the notification of partial or final closure, or during closure only if unexpected events occur during the closure period that affect the closure plan (e.g., adverse weather conditions, fire, or more extensive soil contamination than anticipated resulting in the need to close the unit as a disposal unit rather than as a storage unit). Consistent with the proposed amendment to §§ 264.112(b)(7) and 265.112(b)(7), the Agency also proposed that the closure and post-closure plans must be amended if there is a change in the expected year of closure *only* for those facilities required to include an expected year of closure in the plan.

One commenter argued that allowing owners or operators to revise their closure plans during closure only to account for "unexpected events" is too restrictive and would preclude the owner or operator from changing the plan to reflect optimum closure methods identified after notification of closure. While the Agency wishes to provide flexibility to owners or operators in developing closure plans and implementing closure, it does not want to prolong the closure period unnecessarily once the unit has ceased operating and is prepared to close. Therefore, the Agency believes that changes in the plan that the owner or operator could reasonably have anticipated should be make *prior* to the beginning of closure. For example, owners or operators should have sufficient time prior to the notification of closure to revise the closure plan to reflect optimum closure methods. Therefore, the Agency believes that changes made during the closure period should be limited only to those events that the owner or operator reasonably could not have expected.

Another commenter was concerned that allowing the plan to be modified during closure *only* if *unexpected* events occur during the closure period could preclude owners or operators of surface impoundments or waste piles required to close as landfills but not otherwise required to have contingent closure plans from amending their plans. The Agency does not agree with this interpretation. The Agency believes that if the owner or operator or Regional Administrator determines *prior* to closure that the unit or facility must be closed as a landfill, this determination would qualify as a change in facility operation or design. Therefore, the owner or operator must amend the closure plan as required by §§ 264.112(c)(2)(i) and 265.112(c)(1)(i) to reflect the fact that the facility is now a disposal facility. If the determination was not foreseen prior to the time of partial or final closure, this determination could be considered an "unexpected" event requiring a modification to the closure plan as specified in §§ 264.112(c)(2)(iii) and 265.112(c)(1)(iii).

To clarify this requirement and avoid potential ambiguities, the final rule specifies in §§ 264.112(c)(3), 264.118(d)(3), 265.112(c)(2), and 265.118(d)(2) that an owner or operator of a surface impoundment or waste pile not otherwise required to prepare a contingent closure or post-closure plan, must revise the closure plan and prepare a post-closure plan following a determination that the unit or facility must be closed as a landfill.

Another commenter stated that modifications to the closure plan during the closure period should be required only if the unexpected event adversely affects human health and the environment. The Agency disagrees on the grounds that the purpose of the closure plan is to describe the activities that will be conducted at closure in the event that a third party is required to conduct closure and to serve as a basis for cost estimates for financial responsibility. In addition, because the purpose of the closure certification is to ensure that closure has been performed in accordance with the approved closure plan, the plan should be modified to reflect the activities that are performed.

In light of the above considerations, the Agency is promulgating today's final rule as proposed to require that plans be modified *prior* to the notification of closure or approval of the plans, whichever is later, or during closure if unexpected events occur during the closure period that affect the plans.

The Agency also proposed a number of procedural changes to the Parts 264 and 265 regulations for modifying closure and post-closure plans. First, the proposed §§ 264.112(c) and 264.118(e) clarified that an owner or operator of a permitted facility must use the permit modification procedures specified in Parts 124 and 270 to amend the closure or post-closure plans. Second, proposed §§ 265.112(c) and 265.118(g) required owners or operators of interim status facilities with approved plans to submit a request to the Regional Administrator to amend the plan. The proposed rule gave the Regional Administrator the discretion to provide the owner or operator and the public, through a newspaper notice, the opportunity to submit written comments and/or to hold a public hearing on the amendment to the plan.

Many commenters were concerned with the procedural requirements proposed for modifying the plans. Several argued that the Part 270 permit modification requirements are too cumbersome for minor changes in the plan. Another was concerned that modifications to interim status plans should be subject to public participation and should not be left to the Regional Administrator's discretion.

The Agency agrees with many of the commenters that the minor modification procedures in Part 270 are too limited in scope. As part of a forthcoming rulemaking on permit modifications, the Agency will expand the provisions of §270.42 to identify the types of plan amendments that would be considered minor modifications.

The Agency also believes that the modification procedures for interim status facilities with approved closure

VOL 51 ISS 85 MY 2 1986 UMI

and post-closure plans should be consistent with those for permitted facilities. Therefore, the final rule specifies in §§ 265.112(c)(3) and 265.118(d)(3) that the criteria of §§ 270.41 and 270.42 must be used to determine if a change to the approved closure plan is a "major" or "minor" change. Major changes to the plans are subject to the public participation procedures of §§ 265.112(d)(4) and 265.118(f); minor changes to the plans are not subject to public participation, which is consistent with the procedures of § 270.42.

Another commenter suggested that the Agency establish deadlines for acting upon written requests to modify closure and post-closure plans, after which time, if no action had been taken, the modification would be automatically approved (the commenter suggested 60 days from the day of request). The Agency agrees that it should act expeditiously in approving or disapproving amendments to the plan. However, the Agency cannot agree that the amendment should be considered automatically approved if the Regional Administrator fails to make a determination within the allotted time frame. As a result, §§ 264.112(c), 265.112(c), 264.118(d), 265.118(d) and 265.118(g) have been revised to adopt deadlines for reviewing requests for modifications but do not provide for automatic approval of modifications when the Regional Administrator fails to meet a deadline. For permitted facilities, the Regional Administrator must comply with the procedures established in Parts 124 and 270; for interim status facilities, the deadlines of §§ 265.112(d)(4) and 265.118(f) will apply.

The proposed amendments to the Parts 264 and 265 regulations also specified deadlines for requesting closure and post-closure plan modifications, to ensure that all requests are made in a timely fashion and that the level of financial assurance is adjusted, as necessary, to reflect any approved changes. The proposed rule stated that an owner or operator of a permitted facility or an interim status facility with an approved closure or post-closure plan must submit a written request to the Regional Administrator for approval of a closure or post-closure plan modification within 60 days prior to the change in facility design or operation that resulted in a change in the plan, or within 60 days after an unexpected event has occurred that requires a change to the plans. If an unexpected event occurs during partial or final closure that will affect the closure plan, a request to modify the closure plan must be made within 30 days. As discussed above, requirements applicable to amending plans also apply to owners or operators of surface impoundments or waste piles not otherwise required to prepare contingent plans. Consistent with these requirements, §§ 264.112(c)(3) and 265.112(c)(3) now specify that an owner or operator of a surface impoundment or waste pile not otherwise required to prepare contingent plans must submit a revised closure plan to the Regional Administrator for approval no later than 60 days after the determination is made that the unit or facility must be closed as a landfill. If the determination is made during partial or final closure, the revised plan must be submitted no later than 30 days after the determination is made. For interim status facilities without approved closure plans, owners or operators must prepare a revised closure plan and maintain it at the facility and submit it to the Regional Administrator upon request.

Owners or operators of surface impoundments or waste piles not otherwise required to prepare contingent post-closure plans must submit them to the Regional Administrator for approval no later than 90 days after the determination that the unit or facility must be closed as a landfill. Owners or operators of interim status facilities without approved plans are not required to submit the plan.

The final rule also modifies slightly the language in the proposed rule to make explicit that under § 264.112(c)(3) and 264.118(d), the owner or operator must submit a copy of the revised plan with the written request for a permit application. Similarly, for interim status facilities with approved plans, the revised plan must be submitted to the Regional Administrator for approval.

In analyzing the procedures for modifying the closure and post-closure plans, the Agency also considered whether the Regional Administrator should be given the authority to amend the closure or post-closure plan, especially in circumstances where unexpected events require plan modifications. The Agency believes that the Regional Administrator should be granted the authority to request modifications of the plans. Modifications that are considered "major" under the criteria of §§ 270.41 and 270.42 are subject to Parts 124 and 270 requirements for permitted facilities and to the provisions of §§ 265.112 and 265.118 for interim status facilities.

Consistent with deadlines in §§ 264.112(c)(3), 264.118(d)(3), 265.112(c)(3) and 265.118(d)(3), an owner or operator must submit the modified plan no later than 60 days after the Regional Administrator's request or 30 days if the request is made during partial or final closure. These provisions are included in today's final rule in §§ 264.112(c)(4), 264.118(d)(4), 265.112(c)(4), and 265.118(d)(4).

g. *Notification of partial closure and final closure (§§ 264.112(d), 265.112(d)).* Sections 264.112(c) and 265.112(c) formerly required owners or operators of TSDFs to notify the Regional Administrator at least 180 days prior to the date they expected to begin closure. The following changes were proposed: (1) clarification that the notification requirements apply to partial closures of hazardous waste disposal units and final closure of all TSDFs; (2) modification of some deadlines for notifying the Regional Administrator of partial and final closures, and (3) definition of the "expected date of closure."

The *ACCI* petitioners were concerned that subjecting partial closures of non-land disposal facilities to notification requirements would disrupt routine business operations. The Agency wishes to encourage partial closures and at the same time ensure that partial closures are conducted in accordance with an approved plan. The Agency believes that for permitted facilities and interim status facilities with approved closure plans, it should be possible at the time of final closure to evaluate whether previous closures of non-disposal units have been in accordance with the approved plan. In the case of interim status facilities that do not have approved closure plans, the owner or operator will still be responsible for ensuring that all partial closure activities of incinerators, tanks, and container storage areas are consistent with the closure performance standard of § 265.111 and any process-specific closure standards.

Moreover, all previous partial closure activities will be subject to review when the plans are subsequently approved. For example, if at the time of final closure the Agency determines that additional soil decontamination is required at units that were previously partially closed, the owner or operator will be responsible for completing this activity. In light of these requirements, the Agency proposed to limit the notification requirement to partial closures of hazardous waste disposal units and final closure of non-disposal units. This provision is consistent with the provisions of § 265.112(e) discussed below. No comments were submitted on this proposal and the Agency is promulgating the final rule as proposed.

The proposed rule also amended the deadlines for notification of partial closure for disposal units and final closure, in response to the concerns of petitioners in the *ACCI* litigation. The petitioners argued that the 180-day notice period is unreasonable for many types of facilities and unnecessary for the Agency's purposes (i.e., adequate time to schedule facility inspections). The Agency agreed that for facilities with approved closure plans 180 days prior notice of closure may be unnecessary. The Agency therefore proposed § 264.112(d)(1), which would require the owner or operator to notify the Regional Administrator at least 60 days prior to the date he expects to begin closure of a landfill, land treatment, surface impoundment, or waste pile unit, or final closure of a facility with these types of units. An owner or operator must notify the Regional Administrator at least 45 days prior to the date he expects to begin final closure of a facility with only an incinerator, container storage, or tank units remaining to be closed.

For interim status facilities *without* approved closure plans, the Agency proposed a 180-day notification requirement for partial closure of a landfill, land treatment facility, surface impoundment, or waste pile unit, or final closure of a facility with such units to allow sufficient time to review the plans. For interim status land disposal facilities with approved closure plans (i.e., those that received approval of the entire plan prior to a previous partial closure), the Agency proposed to reduce the notification period to 60 days to be consistent with the deadlines applicable to permitted facilities.

The Agency also proposed, consistent with the interim status deadlines in the *ACCI* settlement agreement, that an owner or operator of an interim status facility without an approved closure plan provide at least 45 days notice prior to the date he expects to begin final closure of a facility with only tanks, incinerators, or container storage areas remaining to be closed.

Several commenters objected to the changes in deadlines, arguing that the same deadlines should apply to all TSDFs. Some argued that a 45-day notice period for tanks, container storage areas, and incinerators does not allow sufficient time for public participation, while others contended that 45 or 90 days is adequate notice for all types of facilities.

The Agency considered these comments and is promulgating the deadlines as proposed. The Agency believes that review of the plans for interim status land disposal units without approved plans is likely to be complex and a 180-day notification requirement is appropriate. Although the Agency recognizes that it may not always be possible to complete the review process for interim status facilities that include only tanks, container storage, and incinerators within 45 days, the provisions of § 265.112(e) allow the owner or operator to remove all hazardous wastes and decontaminate the equipment prior to the completion of the approval process. However, the owner or operator will not be discharged from all obligations or be released from financial responsibility until the closure plan has been approved and a certification of compliance with the approved plan has been submitted.

The third proposed change clarified the definition of the "expected date of closure." The previous regulation stated in a comment to §§ 264.112(c) and 265.112(c) that the expected date of closure should be interpreted as within 30 days of receipt of the "final volume of wastes." The Agency proposed to require explicitly in §§ 264.112(d)(2) and 265.112(d)(2) that an owner or operator notify the Regional Administrator within 30 days after the date on which a hazardous waste management unit received the known final volume of hazardous waste, or, if it is likely that the unit will receive additional hazardous wastes, within one year of receipt of the most recent volume of hazardous waste. To provide flexibility to long-term storage operations, the Agency also proposed to allow an owner or operator of a tank or container storage facility the opportunity to request an extension to the one-year limit if he can demonstrate that he has the capacity to receive additional hazardous wastes and is taking all steps necessary to protect human health and the environment in the interim, including compliance with all applicable permit conditions or interim status requirements.

Several comments were submitted on the proposed requirement. Although an extension to the one-year deadline was proposed for tank and container storage facilities, some commenters felt the requirement still imposed unnecessary burdens on other types of facilities that infrequently handled hazardous wastes (e.g., a storage facility used for hazardous wastes generated as a result of a spill or for off-specification commercial products). Commenters also questioned the need for owners or operators of facilities otherwise in compliance with all applicable regulations to close if hazardous wastes have not been accepted within a year. One commenter suggested that tank and container storage units be exempt from the requirements rather than be required to request extensions to the deadlines. Another commenter was concerned that the variance provisions may discourage resource recovery by requiring owners or operators to close their facilities if additional capacity is not available at their facility and technologies are not available within the allotted deadlines.

The Agency agrees that if hazardous waste management units have the capacity to receive additional hazardous wastes and are otherwise in compliance with all operating requirements they should not necessarily be required to close if hazardous wastes have not been received within a year.

If the Agency is concerned that a particular unit or facility may pose a threat to human health and the environment, if it remains open, a number of other authorities exist to allow the Agency to force a facility to close. For example, the Agency may call in the Part B of a facility in interim status, and require that the facility close if it does not satisfy permitting criteria. Moreover, a number of land disposal facilities may be required to close in response to HSWA provisions. In addition, because the owner or operator is required to maintain financial assurance for closure until final closure has been certified, funds will be available if the owner or operator fails to cover the costs when he does close the facility. In light of these considerations, the final rule extends the variance provisions to all hazardous waste management units.

The Agency does not believe, however, that facilities should be *exempt* from the deadline requirements. To ensure that the owner or operator does not use the variance provision as a way to prolong unnecessarily the commencement of closure, the Agency is allowing the variance *only* if the facility has additional capacity available and the owner or operator demonstrates compliance with all applicable regulations. In the case of a storage facility filled to capacity but intending to employ resource recovery that is not yet on-line, the Agency would extend the one-year variance on the closure deadlines if the owner or operator could demonstrate that on-site resource recovery capacity would be available to handle these hazardous wastes. If the wastes were intended to be sent to an off-site facility that was not yet in operation, unless the owner or operator could demonstrate that the off-site services would be available within a

VOL 51 ISS 85 MY 2 1986 UMI

year, he would be required to use alternate technologies to handle the hazardous wastes to avoid prolonging the closure period unnecessarily.

h. *Removal of hazardous wastes and decontamination or dismantling of equipment (§§ 264.112(e) and 265.112(e)).* Sections 264.112 and 265.112 previously did not address whether activities such as removing hazardous waste and decontaminating or dismantling equipment could be undertaken prior to closure. The proposed amendment clarified this issue.

Petitioners in the *ACCI* litigation argued that requiring 180-day notification and, in the case of interim status facilities, requiring the completion of all closure plan approval procedures before any hazardous wastes can be removed or facility equipment can be dismantled, unreasonably interferes with routine business operations. In addition, the petitioners argued that postponing the removal of wastes for 180 days or until the approval of the closure plan, whichever is later, might be environmentally unsound.

Consistent with these two concerns, EPA proposed new subsections §§ 264.112(e) and 265.112(e) providing that nothing in §§ 264.112 or 265.112 shall preclude the owner or operator from removing hazardous wastes and decontaminating or dismantling equipment in accordance with the approved closure plan at any time before or after notification of partial or final closure. Because the approved closure plan is part of the permit conditions, all such activities at permitted facilities, regardless of when they are undertaken, must be in accordance with the approved closure plan. In the case of interim status facilities, the activities must be in accordance with the subsequently approved closure plan.

The Agency received several comments in response to this Section. Many petitioners objected to the requirement that the removal of hazardous wastes and dismantling of equipment at interim status facilities be in accordance with the *approved* closure plan, arguing that it was contrary to the intent of the *ACCI* settlement agreement. They contended that this requirement either forced an owner or operator of an interim status facility to submit the plan for approval prior to these activities, or subjected him to *post hoc* judgments if the subsequently approved plan differed from the activities previously undertaken. Other commenters opposed allowing owners or operators of interim status facilities to remove hazardous wastes or dismantle equipment without prior approval on the grounds that the provision could be subject to abuse, resulting in potential environmental threats. Others suggested that, at a minimum, the Agency should be notified of such actions so that an inspection can be scheduled.

The Agency does not agree that requiring the removal of hazardous wastes or decontamination of equipment to be in accordance with the approved closure plan is inconsistent with the provisions of the settlement agreement. The Agency agreed with the petitioners in the *ACCI* litigation that, under the previous rules challenged by the petitioners, the owner or operator is not precluded from removing wastes and decontaminating and/or dismantling equipment at any time without providing notice to EPA and, for interim status facilities, prior to submission of a closure plan. Moreover, the Agency agreed with petitioners that it is environmentally sound to remove hazardous wastes as quickly as possible to minimize threats. As a result, the Agency agreed to make this point explicit in the regulations and proposed §§ 264.112(e) and 265.112(e).

The Agency, however, never intended nor agreed that the Agency should be precluded from ensuring that such activities meet the closure standards. The Agency believes that any such activities, like any other hazardous waste management activities, must be in accordance with the regulatory requirements established under RCRA. The Agency does not believe that this requirement will result in an undue burden on owners or operators, even for interim status facilities without approved closure plans. As long as the removal of hazardous wastes and the dismantling or decontamination of equipment conducted prior to the submission of the closure plan are consistent with the closure requirements set forth in the Part 265 regulations, these activities would be approved in the subsequent closure plan and would not render unacceptable activities previously undertaken. Activities would only be rendered unacceptable if they are inconsistent with the closure regulations.

Moreover, the Agency believes that the types of activities that would be included in removing hazardous wastes or dismantling or decontaminating equipment can easily be handled in an environmentally responsible manner that does not give rise to the need for any second-guessing by a regulatory agency. In the infrequent situations where the adequacy of such an activity may be open to serious question, prior Agency review is appropriate and the facility is encouraged to submit its closure plan for approval prior to the commencement of the activity to ensure that the activity satisfies the closure performance standard. In any event, the choice is left to the owner or operator whether to seek approval prior to conducting the activity or to proceed without Agency review and approval.

The Agency does not agree with those commenters who criticized the provision on the grounds that it may allow owners or operators undue discretion in conducting closure activities prior to notification. The language in §§ 264.112(e) and 265.112(e) explicitly limits the types of activities that can be undertaken prior to notification of the removal of hazardous wastes and decontamination/dismantling of equipment. It thus precludes the possibility that an owner or operator could conduct other types of activities that must be subject to EPA notice (e.g., cover installation).

The Agency considered whether to require explicitly in §§ 264.112(e) and 265.112(e) that documentation be prepared to support activities conducted prior to notification. The Agency decided that such a requirement is not necessary for a number of reasons. First, for hazardous wastes sent off-site, the owner or operator is required under § 262.40 to maintain copies of the manifests accompanying the shipments. Second, for wastes handled on-site, information on how it was managed must be included in the operating record as specified in §§ 264.73 and 265.73. Finally, because an independent registered professional engineer must certify that the entire facility has been closed in accordance with the approved closure plan, the owner or operator will need to provide the engineer with appropriate documentation demonstrating that all previous activities have been performed in accordance with the approved closure plan. Therefore, this section is promulgated as proposed.

i. *Time allowed for closure (§§ 264.113 and 265.113).* Sections 264.113(a) and 265.113(a) previously required the owner or operator to treat, remove from the site, or dispose of all hazardous wastes in accordance with the approved closure plan within 90 days after receiving the final volume of hazardous wastes. The Regional Administrator was authorized to extend the deadline if the owner or operator demonstrated, among other things, that there was a reasonable likelihood that a person other than the owner or operator would recommence operation of the facility, and the owner or operator had taken and would continue to take all steps necessary to prevent threats to human health and the environment. Sections 264.113(b) and 265.113(b) required the owner or operator to complete closure activities within 180 days after receiving the final volume of wastes unless the Regional Administrator granted a longer period.

Petitioners in the *ACCI* litigation argued that the deadlines imposed by §§ 264.113 and 265.113 might preclude the *original* owner or operator from temporarily suspending operations as a result of fluctuations in the market or economic conditions. The Agency agreed with these concerns and proposed to amend §§ 264.113(a)(1)(ii)(B), 265.113(a)(1)(ii)(B), 264.113(b)(1)(ii)(B), and 265.113(b)(1)(ii)(B) to allow an owner or operator two one-year extensions to the deadlines for removing hazardous wastes and completing closure. These extensions may be granted if the owner or operator can demonstrate that the partial or final closure will take longer than 90 days (for removal of hazardous wastes) or 180 days (to complete closure) *or:* (1) the facility has the capacity to receive additional hazardous wastes; (2) there is a reasonable likelihood that the owner or operator or another person will recommence operation of the facility; (3) closure would be incompatible with continued operation of the facility; and (4) the necessary steps have been and will be taken to ensure protection of human health and the environment, including compliance with all applicable permit conditions or interim status requirements.

The proposed rule specified that requests for extensions must be made at least 30 days prior to the expiration of the 90-day period established in §§ 264.113(a) and 265.113(a) and the 180-day period established in §§ 264.113(b) and 265.113(b), or within 90 days of the effective date of the regulation, whichever is later. In addition, for interim status facilities the proposed rule stated that extensions must be granted in accordance with the procedures of § 265.112(d).

One commenter correctly noted that the proposed rule was inconsistent with the terms of the *ACCI* settlement. First, in § 265.113(a), the proposal inadvertently omitted the language in the agreement which specified that the 90-day period would be triggered by the approval of the closure plan, if that is later than the final receipt of hazardous wastes. Second, the 180-day period for completing closure was inadvertently shortened to 90 days in §265.113(b). Third, requiring owners or operators to follow the elaborate procedures in § 265.112(d) to extend the time for completion of interim status closure activities would be burdensome and contrary to the parties' intent. Fourth, the settlement did not specify the maximum length of the time extension; the proposed rule included a maximum time period of 2½ years for the completion of closure. (A number of commenters also contended that, to avoid imposing unnecessary burdens on owners or operators, no deadlines should be specified.)

The Agency is making a number of changes from the proposal that will result in a final rule that is consistent with the *ACCI* settlement language. First, the final rule includes the language inadvertently omitted from the proposed rule. The specified 90-day period in § 265.113(a) will begin only after the approval of the closure plan, if that is later than the final receipt of hazardous waste. This will ensure that a reasonable compliance period is provided after the closure requirements are fixed in an approved plan. Second, § 265.113(b) retains the previous period of 180 days to complete closure.

The Agency also agrees with some commenters that including the phrase "using the procedures of § 265.112(d)" in § 265.113 (a) and (b) would have required overly elaborate procedures for what is essentially a minor change to the closure activities. Under the provisions of § 270.42, an extension to the closure period is considered a minor modification for permitted facilities. EPA believes the requirements for interim status facilities should be consistent with the Part 264 standards. As a result, an extension of the closure period for interim status facilities is not subject to the detailed procedures of § 265.112(d).

The Agency also agrees that limiting the length of the closure period to a maximum of 2½ years may be inconsistent with the settlement provisions. Moreover, if the unit or facility has additional capacity to receive additional hazardous wastes and the owner or operator is in compliance with all applicable operating requirements, an owner or operator should not be restricted to the 2½ years for completing closure. Consistent with the discussion above for allowing variances to the expected date of closure for all types of hazardous waste management units, the Agency has a number of authorities already available to ensure that a unit or facility does not pose a threat to human health and the environment. Therefore, the final rule states that the Regional Administrator may approve an extension to the 90- or 180-day periods subject to the conditions of §§ 264.113 and 265.113.

The Agency received a number of other comments applicable to schedules for closing the facility. One commenter noted that a request to extend the closure period should be an option in the permit application. This option, however, is already available to the owner or operator under § 270.32.

Another commenter expressed concern that the requirement to request an extension to the closure period within 90 days of the effective date of the final rule would not provide adequate time to make the required demonstration. In general, the Agency believes that owners and operators should be able to anticipate the likelihood that an extension will be necessary. Moreover, the effective date of today's promulgation is six months from today which should provide more than adequate notice to owners or operators. Because the effective date is six months after promulgation, the final rule drops the provision allowing the owner or operator to request an extension within 90 days of the effective date of the regulation if that is later than the deadlines for removing all hazardous wastes upon completing closure.

In the March 19, 1985 proposed rule, the Agency also proposed to require that closure be completed within 180 days after the final receipt of *hazardous* wastes rather than after the final receipt of wastes. The change makes §§ 264.113(b) and 265.113(b) consistent with §§ 264.113(a) and 265.113(a). Paragraph (a) requires that owners or operators treat, remove from the site, or dispose of on-site, all hazardous wastes in accordance with the approved closure plan within 90 days after receiving the final volume of hazardous wastes. Paragraph (b) requires that the owner or operator complete those activities within 180 days of receiving the final volume of wastes. The Agency was concerned that owners or operators might misinterpret paragraph (b) and delay compliance with the closure performance standards by ceasing to handle hazardous wastes but continuing to manage non-hazardous wastes. The change to §§ 264.113(b) and 265.113(b) is also consistent with the language in §§ 264.112(d)(2) and 265.112(d)(2). These latter sections explain that the date, when the owner or operator expects to begin closure, is no later than 30 days after the date on which a hazardous waste management unit receives the final volume of *hazardous* wastes (or under certain circumstances, one year

VOL 51 ISS 85 MY 2 1986 UMI

after receipt of the most recent volume of hazardous wastes). It is only logical that if the expected date to begin closure is after the receipt of the final volume of *hazardous* wastes, the date to complete closure would also be after the final receipt of hazardous waste.

One commenter challenged this proposed change, contending that this is inconsistent with the Congressional intent evidenced in the HSWA legislative history regarding closure of surface impoundments. The Agency disagrees with the commentor's reading of HSWA and its legislative history. HSWA contains no provisions addressing the question of whether disposal surface impoundments that cease to accept hazardous waste should be required to close or allowed to stay open to receive non-hazardous waste. HSWA merely addresses retrofitting requirements for surface impoundments by adding Section 3005(j) of RCRA, which requires interim status surface impoundments that receive, store or treat hazardous waste after November 1, 1988 to retrofit to install double liners and leachate collection systems. The legislative history contains a brief discussion that indicates that this provision does not require the closure of an impoundment that ceases to receive hazardous waste but continues to receive non-hazardous wastes, and that requiring such closure would not be proper if the management of the impoundment is protective of human health and the environment.

The legislative history of Section 3005(j) of RCRA merely evidences the fact that Section 3005(j) itself does not mandate closure of interim status surface impoundments that cease to receive hazardous waste. It leaves unimpaired EPA's pre-existing authority to establish by regulation appropriate closure requirements for interim status surface impoundments as necessary to protect human health and the environment. EPA's analysis, set forth below, concludes that the expeditious closure of hazardous waste disposal surface impoundments after they are no longer receiving hazardous waste for disposal would significantly improve protection of human health and the environment. Requiring such closure is thus consistent with Section 3005(j) of RCRA and its legislative history.

The hazardous waste regulations incorporate a two-part "prevention and care" system whose overall goal is to minimize the formation and migration of leachate to the adjacent subsurface soil, ground water, or surface water. The regulatory goal of minimizing the formation and migration of leachate is achieved through the design and operating standards that require (1) the use of a liner that is designed and installed to prevent any migration of waste out of the unit to the adjacent subsurface soil or ground water or surface water throughout the active life of the unit; (2) the installation of leachate collection and removal systems and run-on controls for waste piles and landfills, and the removal or solidification of hazardous wastes and hazardous waste residues at closure for surface impoundments; and (3) the placement of a final cover (cap) placed on top to minimize the percolation of liquids into the unit. EPA is relying principally on the final cover (cap) rather than the bottom liner to provide post-closure protection of ground water.

While the regulations contain provisions for waivers from the liner and leachate collection and removal requirements, no such waivers were allowed for the closure provisions. In addition to providing ground-water protection, the final cover also: (a) Prevents the "bathtub" effect (i.e., filling with leachate and over-flowing); (b) protects surface water from run-off; and (c) discourages direct access to the hazardous waste.

EPA guidance calls for placing final covers at closure or for landfills, preferably, as filling of the cell ends. The purpose of the cover is to minimize infiltration of rain water and the subsequent formation and migration of leachate from the unit. Because liners are intended to perform during the active life of the unit and are not expected to provide long term protection, final covers play a particularly important role in long-term protection of human health and the environment. In addition, many older units are not lined, so early placement of the final cover may be the only way to reduce leachate generation from the unit.

While some units may have liners and leachate collection systems, the expected life of these systems is limited, leachate collection systems can become clogged, and all liners will eventually leak. Therefore, the cap is critical for the long term control of the unit. In addition, while new surface impoundments are required to have leak detection systems, most existing units do not and, therefore, it is often not known whether the unit is leaking until it is detected by ground-water monitoring. Therefore, the cap should be applied to these as soon as possible to minimize infiltration.

In light of these considerations, the final rule retains the proposed requirements to require that closure be completed within 180 days of the final receipt of hazardous waste.

In the proposed rule, the Agency requested comments on the desirability of defining a "reasonable likelihood" for purposes of §§ 264.113 (a) and (b) and 265.113 (a) and (b). One commenter was concerned that the proposed language allowed too much discretion on the part of the permitting agency and the permittee, and that a more objective standard, such as a purchase agreement, should be applied. Another commenter stated that the Agency should wait to develop the "reasonable likelihood" standard until it has accumulated experience with the provision. In the absence of additional information, the Agency is not establishing standards for determining what constitutes a "reasonable likelihood."

j. *Disposal or decontamination of equipment, structures, and soils (§§ 264.114 and 265.114).* Sections 264.114 and 265.114 previously required owners and operators to dispose of or decontaminate all facility equipment and structures. The proposed rule required owners or operators to remove all contaminated soils as part of partial and final closure, as needed.

The comments made concerning these proposed changes were similar to those made on §§ 264.112(b) and 265.112(b). One commenter was concerned that the requirements could be interpreted to require that if it was not possible to remove all contaminated soil from a tank facility, the tank would have to be demolished and the facility converted into a landfill. The Agency believes that at most tank facilities it should be possible to remove all the contamination. In those cases where soil contamination is so extensive as to preclude its removal, stringent closure requirements would indeed be appropriate. HSWA clearly contemplates that contamination remaining at closure must be corrected in a manner that protects human health and the environment (e.g., Section 208 of HSWA, 3004(u) of RCRA). Therefore, the Agency is promulgating §§ 264.114 and 265.114 substantially as proposed. The final rule also clarifies that if the owner or operator removes any hazardous wastes or hazardous constituents during partial or final closure, he may become a generator subject to additional regulations.

k. *Certification of closure (§§ 264.115 and 265.115).* Sections 264.115 and 265.115 previously provided that when closure is completed, an owner or operator must submit certifications from himself and from an independent registered professional engineer that the facility has been closed in accordance with the specifications in the approved closure plan. Petitioners in the *ACCI* litigation challenged the need for an *independent* engineer on the grounds that an in-house engineer would be in the best position to observe closure activities. As agreed to in the *ACCI* settlement, the Agency proposed to drop the requirement that the registered professional engineer be independent.

Some commenters supported the proposal to drop the "independent" requirement while others favored retaining the existing rule. The Agency has reconsidered the issue and is dropping the proposed rule to allow an in-house registered professional engineer to certify closure. Because certification of final closure is the final step in the closure process and triggers the release of the owner or operator from financial responsibility requirements for closure and the third-party liability coverage requirements of §§ 264.147 and 265.147, the Agency believes that the certification should be made by a person who is least subject to conscious or subconscious pressures to certify to the adequacy of a closure that in fact is not in accordance with the approved closure plan. The Agency's position in this regard is consistent with other types of certification programs which require certifications to be made by independent parties. For example, the Securities and Exchange Commission requires that all publicly-traded companies provide independent audits of financial information. Similarly, grants issued under the Clean Water Act must be accompanied by independent audits.

The Agency also proposed a requirement that owners and operators certify partial closures for the closure of each hazardous waste surface impoundment, waste pile, land treatment, and landfill unit; certification of incinerators, tanks, and container storage units could be submitted any time prior to, or at final closure. Deadlines were also proposed for submitting certifications—45 days after the completion of each partial closure, if applicable, and 30 days after final closure. Documentation supporting the certification must be furnished to the Regional Administrator upon request.

The Agency received several comments on the proposed rule to certify, as they are performed, partial closures of all units except tanks, incinerators, and container storage. Most commenters agreed that partial closures should be certified. Some supported the proposal that certification of tanks, containers, and incinerators should not be required until final closure on the grounds that this is consistent with the provisions of §§ 264.112(e) and 265.112(e), which allows an owner or operator to remove wastes or decontaminate equipment without prior notification. Moreover, unlike land disposal units, it should be easy to certify these types of units at final closure. Others, however, argued that *all* partial closures must be certified as soon as they are performed to ensure protection of human health and the environment. The Agency does not consider it necessary to certify these types of units as they are closed and, consistent with the provisions of §§ 264.112(d) and (e) and 265.112(d) and (e), the final rule does not require certification of tanks, container storage, and incinerators until final closure.

A number of commenters disagreed with the proposed deadlines for submitting certifications, arguing that no distinctions should be made between partial and final closure, and that 45 days may be too short. The Agency agrees and is amending the final rule to require certifications for partial and final closures to be submitted within 60 days of the completion of partial or final closure, as applicable.

One commenter also was concerned about the lack of a deadline for maintaining documentation supporting the independent registered professional engineer's certification. The Agency agrees and is requiring that documentation be furnished upon request to the Regional Administrator until the owner or operator is released from financial assurance requirements under §§ 264.143(i) and 265.143(h).

In the proposed rule, the Agency requested comments on three issues relating to closure certification: (1) should the regulations specify the qualifications of engineers who may certify closure; (2) what types of supporting documentation should be required for certification and should they be submitted to the Agency; and (3) should the Regional Administrator formally approve the certification.

A number of comments were submitted on these issues. Most commenters opposed specifying the type of engineer that would be qualified to certify closure, although one commenter suggested that the language in the certification should state explicitly that the engineer has the appropriate qualifications to certify closure. The Agency generally agrees with these commenters and is not specifying qualifications for engineers.

In response to the Agency's request for comments on the appropriateness of requiring that supporting documentation be submitted with the closure certification, one commenter argued that the submission of documentation was unnecessary, while another was concerned that unless the documentation was submitted, it would not be available for public review.

The Agency recognizes the concern of the commenter for ensuring that the documentation be readily available to the public for review. However, rather than requiring that all documentation be submitted, the Regional Administrator may request submission of the documentation if there is a request from the public for review or if the Regional Administrator determines that there is a need for the Agency to review it. Therefore, all interested parties will have access to documentation upon request. In addition, the Regional Administrator may request that documentation be submitted at any other time under the provisions of §§ 264.74 and 265.74.

The Agency received one comment supporting Agency approval of the certification. The Agency has considered this issue further and, in light of the burdens and costs associated with developing criteria and procedures for formally approving the certification, the Agency is not promulgating such procedures at this time. However, the Regional Administrator has the discretion under the authority of §§ 264.143(i) and 265.143(h) not to release the owner or operator from financial responsibility requirements if he has reason to believe that partial or final closure has not been in accordance with the approved closure plan.

l. *Survey plat (§§ 264.116 and 265.116).* Sections 264.119 and 265.119 required the owner or operator of a disposal facility to submit to the local zoning authority, or the authority with jurisdiction over local land use, within 90 days after closure is completed, a survey plat indicating the location and dimensions of landfill cells or other disposal areas with respect to permanently surveyed benchmarks. Because the survey plat must note the location and dimensions of each disposal area, it must be prepared prior to the completion of closure of that unit. Therefore, the Agency proposed to require that the survey plat be submitted to the appropriate local land use authority no later than the certification of closure of each hazardous waste disposal unit. The Agency also added a requirement that the plat must be prepared and certified by a professional land surveyor, to ensure that the surveyor is licensed by a State and can

BEST COPY AVAILABLE

VOL 51 ISS 85 MY 2 1986 UMI

be held legally responsible for the survey work.

One commenter questioned the applicability of the survey plat requirement to injection wells. Another challenged the need to submit a plat after each partial closure, arguing that as long as the plat is submitted prior to final closure, adequate protection will be provided. Another commenter was concerned that the deadline for filing the plat was inadequate.

The Agency agrees that the survey plat requirement is not applicable to injection wells. Injection wells are not subject to the requirements of Subparts G and H and therefore are not required to comply with the survey plat provisions (see §§ 264.1(d) and 265.430(a)).

The Agency disagrees with the argument that the plat need not be filed until final closure. First, the Agency is concerned that the local land authority should have information on closed units in a timely fashion in the event that a closed portion of a facility is sold prior to final closure. Second, since the plat must be prepared prior to the completion of the partial closure, the Agency does not consider it burdensome to require it to be submitted at that time. Therefore, the Agency is promulgating §§ 264.116 and 256.116 to require that the survey plat be filed after closure of each hazardous waste disposal unit.

The Agency agrees that the proposed 45-day deadline may not always be adequate. The proposed regulation used the certification date as the deadline for submission of the survey plat. Since the certification date has been extended from 45 days to 60 days, the deadline for filing the survey plat is now within 60 days after completion of partial or final closure. No changes were required to the proposed language of §§ 264.116 and 265.116.

m. *Post-closure care and use of property (§§ 264.117 and 265.117).* Sections 264.117(a) and 265.117(a) previously required post-closure care to continue for 30 years after the date of completing closure. In addition, the regulation allowed requests to reduce or extend the period based on cause to be submitted during the post-closure care period. The previous regulations did not specify whether the period began with closure of a single unit or of the entire facility. Because of the importance of beginning post-closure monitoring and maintenance activities as soon as a hazardous waste management unit has been closed, the Agency proposed to require that the post-closure care period for each hazardous waste management unit subject to post-closure care requirements begin after the closure of each unit.

In determining when the 30-year post-closure care period should begin, the Agency proposed that the 30-year care period apply to each unit (i.e., partial closure) rather than to the entire facility to reduce the burden on an owner or operator who partially closes units prior to closure. The Regional Administrator, however, still retained the authority under the proposed §§ 264.117 and 265.117 to extend the length of the post-closure care period as necessary to protect human health and the environment. Moreover, if the Regional Administrator extended the post-closure care period for any unit during the active life of the facility (i.e., prior to receipt of certification of final closure), the post-closure cost estimate and level of financial assurance must also be adjusted.

The Agency did not receive many comments on the proposal to trigger the beginning of the 30-year post-closure care period with partial closure. Two commenters were concerned that it would be difficult to correlate monitoring results with specific units and, as a result, the 30-year period should be triggered at final closure of the facility. The Agency agrees that at some facilities it may be difficult or impossible to differentiate monitoring results for different units. Therefore, unless the owner or operator can demonstrate that separate monitoring systems are established for each unit, the Regional Administrator may decide to extend the post-closure period for that unit to be consistent with the post-closure care period for the remainder of the units. In developing the final rule, the Agency reconsidered the provisions for requesting reductions or extensions of the post-closure period. Although the Agency believes that in many cases, sufficient data may not be available prior to the beginning of the post-closure care period to support a petition to reduce or extend the period, the Agency does not wish to impose unnecessary requirements. Therefore, §§ 264.117(a)(2), 265.117(a)(2) and 264.118(g) of the final rule allow the Regional Administrator to reduce or extend the post-closure care period based on cause at any time.

n. *Post-closure plans (§§ 264.118, and 265.118).* Sections 264.118(a) and 265.118(a) required owners or operators of hazardous waste disposal facilities to have post-closure plans. In addition, under §§ 264.228(c) and 264.258(c), storage and treatment surface impoundments and waste piles that do not meet the liner design standards are required to prepare contingent closure and post-closure plans in the event that they are closed as landfill facilities.

Because the Agency was concerned that interim status impoundments and waste piles and permitted impoundments and waste piles that meet the design standard may still be required to close as landfills, the Agency proposed in §§ 264.118(b) and 265.118(a) that *these* facilities must prepare post-closure plans if they become subject to post-closure care.

One commenter noted that for interim status surface impoundments and waste piles that do not meet the liner design standard, owners or operators should be able to anticipate prior to the time of closure that they will be unable to remove all contaminated soils, and will be required to close their facilities as landfills. Under the proposed rule, such owners or operators would not be required to prepare revised closure plans or post-closure plans until the time of closure, thus delaying the closure process. This commenter suggested that the regulations require owners and operators of interim status surface impoundments and waste piles that do not meet the design standard of §§ 264.228 and 264.258 to prepare contingent closure and post-closure plans. This would be consistent with the requirements of §§ 264.228 and 264.258 applicable to permitted facilities.

The Agency agrees that it may not be possible to remove *all* contamination at interim status surface impoundments and waste piles not designed in accordance with the liner design standards of §§ 264.228 or 264.258. Requiring that such facilities revise closure plans and prepare post-closure plans would ensure that the owners or operators have adequately planned for closure of the facility as a landfill.

However, owners and operators of interim status facilities with surface impoundments or waste piles were required to make certain certifications and submissions as specified in Section 213 of the Hazardous and Solid Waste Amendments (HSWA, the "Loss of Interim Status" provision), or the facility's interim status would be terminated. Approximately two-thirds of such facilities failed to meet those requirements, and thus had their interim status terminated. Consequently, those owners and operators were required to submit their closure plans by November 23, 1985 and begin closure. The Agency expects that most of the remaining third of these land-based facilities will continue to operate and become subject to the Part 264 standards through the permitting process.

Today's final rule specifies in §§ 265.118(a) and 264.118(a) that an owner or operator of an interim status facility with a surface impoundment or waste pile or a permitted facility with a surface impoundment or waste pile which is *not* required to prepare a contingent plan must submit a post-closure plan to the Regional Administrator for approval within 90 days of the determination that the unit must be closed as a landfill. This is consistent with the proposed rule. In addition, these facilities must submit revised closure plans in accordance with the requirements of §§ 264.112(c) and 265.112(c).

The Agency is also now clarifying in §§ 264.118(a) and 265.118(d) that owners or operators of permitted facilities must comply with all Parts 124 and 270 procedures applicable to modifying the conditions of their permit. Owners or operators of interim status facilities must submit their post-closure plans in accordance with the provisions of § 265.118(d).

The Agency also has clarified in the final rule in §§ 264.118(b) and 265.118(c) that the post-closure plan must explicitly address the post-closure care activities and the frequency of these activities applicable to each disposal unit.

o. *Post-closure notices (§§ 264.119 and 265.119).* Sections 264.119 and 265.119 previously required the owner or operator of a facility subject to post-closure care to submit to the local zoning authority, or the authority with jurisdiction over local land use, and to the Regional Administrator a record of the wastes disposed of within each cell or area of a land disposal facility within 90 days after final closure. Sections 264.120 and 265.120 required that a notation be filed on the deed to the property indicating its use as a disposal facility and indicating that the plat and record of wastes had been filed with the appropriate local land use authority.

The Agency proposed to (1) extend the requirements to partial closure activities; and (2) require owners or operators to request permission from the Regional Administrator if they wish to remove hazardous wastes during the post-closure care period and to remove the notice from the deed.

The Agency considers the deed notation to be an important means of ensuring that prospective and subsequent owners of the property are informed of the presence of hazardous wastes, the existence of federal restrictions on land use, and the availability of the survey plat and waste record from the local land use authority. Therefore, the Agency proposed to require that no later than 60 days after the certification of closure of each hazardous waste disposal unit, the owner or operator record the notation on the deed and submit to the Regional Administrator both the certification stating that the notation has been recorded and a copy of the recorded document. Consistent with this requirement, the Agency proposed that the record of waste also be filed with the local land authority and the Regional Administrator within 60 days after closure of each hazardous waste disposal unit.

A number of comments were received on the deadlines for submitting the record of waste to the local land authority and for filing the notices in the deed. Suggestions included: submitting notices and the record of wastes to the local land authority at final closure only; filing the notice in the deed after the first partial closure and verifying its accuracy at final closure; and filing a notice in the deed prior to transfer of ownership. One commenter expressed concern, that, in many jurisdictions, filing a notice in the deed after each partial closure may be especially burdensome because of the need to transact a dummy "sale" as a condition of filing a deed notation.

The Agency disagrees that submitting the record of hazardous waste to the local land authority and Regional Administrator within 60 days after each partial closure of a hazardous waste disposal unit would be burdensome. Under §§ 264.73 and 265.73, an owner or operator must record, as it becomes available, and maintain in the facility operating record information on the types and quantities of hazardous wastes handled at the facility and the location of hazardous waste within each disposal area. Therefore, the owner or operator would simply be required to submit a copy of readily available records to the local land authority and the Regional Administrator. In light of these considerations, the final rule retains the requirement that within 60 days after the certification of closure of each hazardous waste disposal unit the owner or operator must submit to the local zoning authority, or the authority with jurisdiction over local land use, and to the Regional Administrator, a record of the type, location, and quantity of hazardous wastes disposed of within that disposal cell or unit.

The Agency agrees with those commenters who argued that filing a notice in the deed after closure of each hazardous waste disposal unit could impose significant burdens, especially if "dummy" sales were required, and would not be necessary to ensure that future purchasers of the land were aware of the land's prior uses. Filing a notice after the first partial closure of a hazardous waste disposal unit and verification of the accuracy of the notice after closure of the last disposal unit should adequately alert all future owners of the land's prior use. Therefore §§ 264.119(b) and 265.119(b) are revised to require that the notice in the deed, as well as the certification to Regional Administrator that the notice has been filed, be filed within 60 days after certification of closure of the first hazardous waste disposal unit. Sixty days after closure of the last disposal unit, the deed and notice to the local land authority must be amended, as necessary. It should be noted that these post-closure notice requirements do not affect the partial closure certification requirements of §§264.115 and 265.115; all partial closures of hazardous waste disposal units must be certified as they are performed.

Section 264.120(b) previously provided that if the owner or operator of a hazardous waste facility subsequently removed all hazardous wastes and waste residues, the liner (if any), and all contaminated underlying and surrounding soils, he could either remove the deed notation required by § 264.120(a), or add a notation indicating that the hazardous wastes have been removed. No similar provisions were allowed for interim status facilities.

The Agency proposed in § 264.119(c) that an owner or operator of a permitted facility must request a modification to the post-closure permit in accordance with Part 270 requirements prior to removing hazardous wastes. For interim status facilities, the proposed language of § 265.119(c) specified that if an owner or operator wishes to remove hazardous wastes, he must request the approval of the Regional Administrator prior to the removal of the hazardous wastes to amend the approved post-closure plan. In addition, the owner or operator must demonstrate compliance with the criteria in §§ 264.117(c) and 265.117(c) for post-closure use of property. Moreover, because the owner or operator would be conducting hazardous waste management activities, he must comply with all applicable generator requirements and with all post-closure permit conditions, if applicable.

One commenter suggested that a subsequent owner or operator who wishes to remove hazardous wastes should notify the previous owner or operator as well as the generators of the wastes in order to alert them of activities of the facility which could subsequently result in future Superfund

VOL 51 ISS 85 MY 2 1986 UMI

liabilities. The Agency has refrained from adopting this approach because it is not relevant to the standards in Section 3004 of RCRA of protecting human health and the environment.

Finally, the proposed rule required the owner or operator to seek Regional Administrator approval before deleting the deed notation or placing a new notation in the deed regarding removal of the wastes. One commenter argued that this requirement could delay future sales of TSDFs. Because the Agency wishes to ensure that all hazardous wastes have been adequately removed prior to removal of the notice to the deed, the Agency is promulgating the rule as proposed.

In the preamble to the proposed rule, the Agency requested comments on notifying parties with rights-of-way on property used to dispose of hazardous wastes of its prior use. One commenter suggested that TSDF owners or operators should be responsible for notifying such parties, including parties with subsurface rights. While the Agency agrees that it is important to ensure that all interested parties are aware of the prior uses of land used to dispose of hazardous wastes, it does not want to impose unnecessary burdens on owners or operators. The Agency therefore investigated whether state laws currently requires notice to the holders of rights-of-way, easements, or subsurface rights of changes to the land by the owner that could affect their interests or safety.

It appears that in most States there is no duty to inform, but there is a duty not to take actions that render the exercise of the right unreasonable or burdensome. Private rules of property and tort, however, will vary concerning notice. In addition, it is likely that the facility will be subject to security measures as specified by §§ 264.117(b) and §§ 265.117(b) and that these security measures will provide notice to parties who have rights-of-way on land used to dispose of hazardous wastes or subsurface rights on the land. Therefore, the Agency is continuing to analyze options for ensuring that all parties are provided adequate notice of hazardous waste disposal activities. This does not, however, relieve the owner or operator of potential liabilities with respect to such parties.

p. *Certification of completion of post-closure care (§§ 264.120 and 265.120).* The previous regulations did not require that the owner or operator certify that post-closure care activities have been conducted in accordance with the approved post-closure plan. Because of the importance of ensuring that post-closure care has been conducted properly prior to releasing the owner or operator from these obligations (including post-closure care financial responsibility), the Agency proposed that an owner or operator submit to the Regional Administrator within 30 days after completing the established post-closure care period for each disposal unit, a certification signed by him stating that all post-closure care activities have been conducted in accordance with the approved post-closure plan. The Agency also requested comments on the desirability of requiring post-closure certifications on an annual or periodic basis (e.g., every five years) rather than only at the end of the 30-year post-closure care period.

Some commenters questioned the need for any post-closure care certification, arguing that the information provided would duplicate data already available to the Agency (e.g., monitoring results Agency inspection reports). Most of the commenters focused on the appropriate frequency of these certifications. Suggestions included: once at the end of the post-closure care period associated with each unit; every five years; and annually. One commenter requested that an extension to the 30-day period for submitting certifications be provided. Finally, it was suggested that the certification be performed by an independent registered professional engineer consistent with the closure certification.

The Agency remains convinced that certification of post-closure care is necessary both to ensure that the post-closure care activities are conducted in accordance with the approved plan, and to trigger the release of the owner or operator from financial assurance obligations under §§ 264.145(i) and 265.145(h). The Agency agrees with some commenters that annual or periodic certifications may not be necessary and thus is requiring that the the certification be submitted at the end of the post-closure care period of each unit. The Agency is also extending the deadline for submitting the certification to 60 days after the completion of the established post-closure care period for each unit. In developing the final rule, the Agency made two other changes to the proposed rule. First, the Agency added a requirement that the certification be submitted by registered mail, to ensure that a dated record of the submission is available. This requirement is consistent with the closure certification which must be submitted by registered mail. Second, the Agency is convinced that an independent registered professional engineer should also certify the completion of the post-closure care period. This requirement would parallel the closure certification requirement in §§ 264.115 and 265.115. Therefore, §§ 264.120 and 265.120 require that an owner or operator submit a certification prepared by himself and an independent professional engineer stating that the post-closure care activities have been conducted in accordance with the approved post-closure plan.

2. Financial Assurance Requirements (Subpart H)

a. *Cost estimates for closure and post-closure care (§§ 264.142(a), 264.144(a), 265.142(a) and 265.144(a)).* The previous provisions in §§ 264.142(a), 264.144(a), 265.142(a) and 265.144(a) required owners or operators to prepare written estimates of the costs of closure and post-closure care. The previous regulations did not specify the level of detail and did not indicate whether cost estimates should be based on the cost to the owner or operator of supplying his own labor and equipment (first-party costs) or the cost of hiring contractor labor and renting equipment (third-party costs). The previous regulations also did not address whether credit for salvage value from hazardous waste equipment and the like would be credited toward the cost estimate.

In developing the final rules, the Agency has been made aware of confusion over the level of detail required in the cost estimates. The previous regulations stated that the owner or operator must prepare a written cost estimate but did not specify the level of detail. As a result, some have argued that a bottom line estimate should be sufficient. Because the cost estimates are based directly upon the closure and post-closure plans and serve as the basis for financial assurance, the cost estimates must contain sufficient detail to allow them to be evaluated. The Agency expects the detailed cost estimates to support the detailed activities described in the closure and post-closure plans. The Agency is today amending §§ 264.142(a), 265.142(a), 264.144(a), and 265.144(a) to clarify that a detailed cost estimate is required.

In the March 19, 1985 proposed rule, the Agency specified that closure and post-closure cost estimates be based on the costs to the owner or operator of hiring a third party to perform closure or post-closure care activities. The Agency reasoned that use of third-party costs would ensure that if an owner or operator failed to conduct closure or post-closure care, adequate funds would be available to hire a third party to do so. The Agency also proposed to specify explicitly that salvage value may not be

incorporated into the closure cost estimate.

A number of commenters supported the Agency's proposal to require third-party costs. Other commenters opposed the proposed change on three separate grounds: use of third-party costs will increase the cost estimates considerably; cost estimates generated by a third party will not be as accurate as estimates prepared by the owner or operator; and third-party costs will be difficult to generate due to the limited number of contractors available. It also was argued that parties using the financial test should not be required to use third-party costs.

The Agency firmly believes that the cost estimates must be based on third-party costs to ensure that adequate funds are available to cover the costs of closure and post-closure care in the event that the owner or operator fails to cover the costs. The Agency recognizes, however, that in some cases, using third-party costs could increase the size of the estimate. This is especially likely with respect to the costs of on-site vs. off-site disposal of hazardous wastes. Because the objective is to ensure that sufficient funds are available to cover the costs of closure if the owner or operator fails to do so, the Agency will allow the cost estimate to incorporate the costs of on-site disposal of hazardous wastes by a third party if the owner or operator can demonstrate that on-site capacity will always be available over the life of the facility. This will minimize the additional costs of a third-party requirement. Aside from these on-site vs. off-site disposal costs, basing the cost estimate on first or third-party costs will not make much difference for land disposal units. The cost estimates will be similar because many of the activities required for closure will be done by a third party whether or not the cost estimate is first or third-party based. For example, firms may not have the expertise to place a final cover on a landfill themselves or they may not wish to do so because the company selling the materials for the cover normally will not guarantee its impermeability unless it (or its authorized representative) installs it. Certification costs will also be similar whether the cost estimate is based on first or third-party costs as EPA requires that an independent registered professional engineer must certify closure.

The Agency does not agree with commenters who argued that contractor estimates will not be as accurate as estimates made by the owner or operator or that it will be difficult to develop third-party cost estimates because of a lack of contractors. The proposed rule did not require that the cost estimate be prepared by a contractor, but rather required that the cost estimate incorporate the costs incurred if a contractor performed the work. Therefore, the owner or operator may develop the cost estimate using costs estimating manuals or personal experience (e.g., prices charged for off-site management of hazardous wastes). Furthermore, the Agency has found, in developing cost estimates for closure and post-closure care, that standard cost estimating manuals as well as information from contractors are readily available to develop third-party estimates. The Agency believes, therefore, that cost estimates based on third-party costs will be *more* accurate as general information exists on contractor costs which does not exist for first-party costs.

The Agency also remains convinced that eligibility to use the financial test as demonstration of financial assurance should be based on third-party costs. First, the third-party cost estimates are likely to be more accurate than those based on first-party costs. Second, the financial test is intended to ensure that an owner or operator who passes the test has the financial capability to establish one of the alternative forms of assurance should he later fail the test. The criteria of the test that are dependent on the size of the cost estimates are intended to provide an adequate margin of safety so that the alternative mechanisms can be established before any potential insolvency occurs. Because the other forms of financial assurance will be based on third-party costs, the multiples must also be based on third-party costs.

In light of these considerations, the Agency is promulgating a third-party cost estimate requirement in today's final rule. The final rule specifies explicitly that the cost estimate may incorporate the costs of on-site disposal of hazardous wastes by a third party if the owner or operator can demonstrate that capacity will always be available over the life of the facility.

The final rule adds a definition of a third party to Subpart H. For purposes of Subpart H, §§ 264.142(a)(2), 264.144(a)(1), 265.142(a)(2) and 265.144(a)(1) state that a third party is a party who is neither a parent nor a subsidiary of the owner or operator.

On the issue of salvage value, the Agency proposed to disallow salvage value as a credit when calculating cost estimates on the grounds that the Agency cannot be assured that the hazardous wastes will be saleable or that a third party will take them at no charge at closure. One commenter supported the proposal while one argued that salvage value should be allowed if brokers or dealers for used equipment can be identified. The Agency still is convinced that allowing salvage value to be credited towards the cost estimate is inconsistent with the goal of ensuring that adequate funds are available in the event that the owner or operator fails to cover the costs. As a result, in the final rule, §§ 264.142(a)(3) and 265.142(a)(3) prohibit the incorporation of salvage value in the closure cost estimates.

In addition to disallowing a credit for salvage value for hazardous wastes, the Agency also is specifying explicitly in the final rule that an owner or operator cannot assume that at closure a third party will take hazardous wastes at no charge. Consistent with the arguments above, the Agency cannot be assured that if an owner or operator fails to close the facility, a third-party would take the hazardous waste at no charge. To avoid potential ambiguities in the regulatory language, the Agency is explicitly stating in §§ 264.142(a)(4) and 265.142(a)(4) that an owner or operator may not incorporate in the closure cost estimate a zero cost for handling hazardous wastes with potential value.

b. *Anniversary date for updating cost estimates for inflation (§§ 264.142(b), 264.144(b), 265.142(b) and 265.144(b)).* The previous regulations required owners or operators to update their closure and post-closure cost estimates for inflation within 30 days after the anniversary of the date that the first cost estimates were prepared. To ensure that the financial assurance instrument accounts for the most recent cost estimate (including updates to inflation), the Agency proposed to require owners or operators to revise their cost estimates within 60 days *prior* to the anniversary date of the establishment of their financial assurance instrument. For firms using the financial test, the cost estimate should be updated within 30 days of the end of the firm's fiscal year and before submission of updated information to the Regional Administrator as specified in §§ 264.143(f)(3) and 265.143(e)(3).

Most commenters supported the proposal to update the cost estimates prior to the anniversary date of the establishment of the financial instrument and, as a result, the Agency is promulgating the rule as proposed.

The Agency also proposed in the March 19, 1985 promulgation to allow owners or operators the option of recalculating the cost estimates based on current costs as an alternative to

VOL 51 ISS 85 MY 2 1986 UMI

using the Implicit Price Deflator for GNP published in the *Survey of Current Business*. In addition, the Agency proposed to require that owners or operators use the most recently published annual Implicit Price Deflator in order to reflect the most recent inflation.

One commenter suggested that owners or operators be *required* to recalculate annually the cost estimate based on current costs on the grounds that the Implicit Price Deflator will not account for increases in costs due to reasons other than inflation (e.g., increases in costs of landfilling). While the Agency agrees that requiring owners or operators to recalculate the cost estimate annually based on current costs may result in the most accurate estimate, the Agency recognizes that this could impose a significant burden on owners or operators and would not always be necessary. Therefore, the Agency is promulgating the rule as proposed.

c. *Revisions to the cost estimates (§§ 264.142(c), 264.144(c), 265.142(c) and 265.144(c)).* The previous regulations required the owner or operator to revise the closure and post-closure cost estimates during the operating life of the facility whenever a change in the plans increases the costs of closure or post-closure care. No deadlines were imposed for revising the estimates.

The Agency proposed to require that owners or operators with approved plans adjust their cost estimates within 30 days after the Regional Administrator has approved the modification if the change increases the costs of closure or post-closure care. For interim status facilities without approved closure or post-closure plans, the adjustment must be made within 30 days of the change in the plans if the change increases the cost estimates. Section 264.142(c) of the proposed regulations inadvertently required that the revision be made if the change in the closure plan *affects* the cost of closure. The final rule has been revised to correct this inconsistency. It now reads as it did originally, that the revision is required if the change in the closure plan *increases* the cost of closure.

d. *Post-closure cost estimates (§§ 264.144(c) and 265.144(c)).* Sections 264.144(c) and 265.144(c) previously required the owner or operator to revise the post-closure cost estimates during the operating life of the facility whenever a change in the post-closure plan increased the cost of post-closure care. The previous rules did not define operating life.

The Agency intended that post-closure financial assurance be adjusted as necessary until the facility was closed. Consistent with the new definition of active life, the Agency proposed to require that the post-closure cost estimate be revised as necessary during the active life of the facility. The Agency received no comments to this proposed change and is promulgating §§ 264.144(c) and 265.144(c) as proposed.

e. *Trust fund pay-in period (§§ 264.143(a)(3) and 265.143(a)(3)).* The existing language of § 264.143(a)(3) requires the payments to the trust fund to be made over the term of the initial permit or over the remaining life of the facility, whichever is shorter. For interim status facilities, the pay-in period is 20 years or the remaining operating life of the facility, whichever is shorter. Although the trust fund may cover a number of units with different operating lives, the current regulation ties the pay-in period to the life of the facility rather than to particular units. In the March 19, 1985 proposal, the Agency requested comments on approaches to handling the trust fund pay-in period for multiple process facilities.

Some commenters argued that the pay-in period should be based on the shortest operating life of any unit at a multiple process facility; others suggested retaining the existing requirements. One commenter recommended that, within three years, the trust fund should contain enough funds to close the unit likely to incur the highest closure costs.

As discussed in the preamble to the January 12, 1981 Subpart H regulations, the Agency allowed a 20-year pay-in period to minimize the potential adverse economic impacts on smaller firms most likely to be using trust funds (See 46 *FR* 2823). The Agency is concerned that if the trust fund pay-in period is based on the shortest operating life of a unit of the facility, owners or operators intending to partially close facilities in the near future would face very high costs. For example, if an owner or operator closed a landfill cell after one year rather than at the end of the facility's operating life, he would be required to fully fund the trust fund much earlier than originally intended. Moreover, the Agency is concerned that such an accelerated pay-in period could discourage owners or operators from partially closing their facilities. Therefore, the Agency intends to examine further such questions as the cost effects and enforcement implications of changing the trust fund pay-in period for such facilities before proposing any changes to the current requirements.

f. *Reimbursement for closure and post-closure expenditures from trust fund and insurance (§§ 264.143(a)(10), 264.143(e)(5), 264.145(a)(11), 264.145(e)(5), 265.143(a)(10), 265.143(d)(5), 265.145(a)(11) and 265.145(d)(5)).* The previous closure/post-closure trust fund and insurance provisions allowed an owner or operator, or any other person authorized to conduct closure or post-closure care, to request reimbursement for expenditures from the trust fund or insurance policy by submitting itemized bills to the Regional Administrator. Within 60 days, the Regional Administrator would instruct the trustee or insurer to make reimbursements, if he determined that the activities were in accordance with the approved plans or were otherwise justified. The Regional Administrator could withhold reimbursements if he determined that the total costs of closure would exceed the value of the trust or insurance policy.

In response to a concern from the *ACCI* petitioners that a decision to withhold reimbursements should be supported by a written explanation that can serve as a record for review, the proposed rule required the Regional Administrator to provide a detailed written statement of reasons to the owner or operator if he does not instruct the trustee or insurer to make requested reimbursements. The proposed rule also specified provisions for handling reimbursements for partial closure activities. Under the proposed rule, an owner or operator could be reimbursed for partial closure activities if the partial closure reduced the maximum extent of operation of the facility and the Regional Administrator found that the activities had been in accordance with the approved plan or were otherwise justified.

Commenters generally supported the proposal to require a detailed written statement of reasons why the Regional Administrator was withholding reimbursement. A few commenters were concerned that the Regional Administrator should not be allowed to withhold reimbursements for minor violations of the closure or post-closure plan and/or permit requirements. Other commenters argued that the Regional Administrator should not be allowed to withhold more than 20 percent of the funds, and that reimbursements should be automatic unless, within a specified time, the Regional Administrator provides a statement of reasons for refusing the reimbursements.

It was also suggested that reimbursements for partial closures should be allowed if there are adequate funds remaining in the trust fund or insurance policy to cover the maximum

costs of closing the facility over its remaining life.

The Agency agrees with commenters that the regulations should not preclude reimbursements for minor paperwork violations. The Agency believes, however, that the proposed regulatory language provides the necessary flexibility to the Regional Administrator by allowing reimbursements if the activities are in accordance with the approved plan, or if the activities are otherwise justified. Therefore, the final rule specifies that an owner or operator is eligible for reimbursements if the activities have been performed in accordance with the approved plans or are otherwise justified. As discussed below, reimbursements will be made only if sufficient funds are remaining in the trust fund or insurance policy.

The Agency does not agree that the Regional Administrator should be allowed to withhold only up to 20 percent of the value of the trust fund or insurance policy. As discussed in the preamble to the April 7, 1982 rules, (See 47 *FR* 15040), the Agency is concerned that in some instances where the cost estimate is found to be seriously inadequate, more than 20 percent should be held in reserve. The Agency also disagrees with the suggestion that reimbursements should be made automatically if the Regional Administrator does not act upon the request within a specified length of time. Because of the complexity of certain closure activities and the importance of ensuring that the activities protect human health and the environment, the Agency considers it inappropriate to establish such deadlines. Therefore, the Agency is promulgating the rule substantially as proposed.

The Agency is making a clarifying change to the language in the final rule. The proposed rule allowed reimbursements if partial closure reduced the maximum extent of operation. In developing the final rule for reimbursement provisions, the Agency considered it more appropriate to examine the amount of funds remaining in the fund than the maximum extent of operation. As a result, the final rule specifies that an owner or operator may request reimbursements only if sufficient funds, exclusive of future inflation adjustments, are remaining in the trust fund or insurance policy to cover the maximum costs of closing the facility at any time over its remaining life.

g. *Final administrative order required (§§264.143(b)(4)(ii), 264.145(b)(4)(ii), 265.143(b)(4)(ii) and 265.145(b)(4)(ii)).* The previous regulations provided that an owner or operator may satisfy the financial assurance requirements for closure and/or post-closure care by obtaining a financial guarantee surety bond. The bond provides that if the owner or operator fails to fund a standby trust fund in an amount equal to the penal sum of the bond within 15 days after an order to begin closure or post-closure care is issued by the Regional Administrator or by a court, the surety will become liable. In response to the *ACCI* petitioners, the Agency proposed to provide additional procedural protections to owners or operators by requiring that a *final* administrative order is necessary before action can be required by the surety. EPA wishes to emphasize that only final *administrative* action, not judicial review, is required in all these cases.

No comments were received concerning this amendment, and the Agency is promulgating the rule as proposed.

h. *Final administrative determination required (§§ 264.143(c)(5) and (d)(8), 264.145(c)(5) and (d)(9), 265.143(c)(8), 265.145(b)(5) and 265.145(c)(9)).* The Part 264 regulations provide that an owner or operator may demonstrate financial assurance for closure and/or post-closure care by obtaining a surety bond guaranteeing performance. Under Parts 264 and 265, an owner or operator also could satisfy the financial assurance requirements by obtaining a letter of credit. Under the terms of the performance bond and letter of credit, the surety or bank issuing the letter of credit would become liable on the bond or letter of credit obligation when the owner or operator fails to perform closure or post-closure care as guaranteed by the bond or letter of credit. The previous regulations provided that such a failure was indicated by a determination made pursuant to Section 3008 of RCRA that the owner or operator has failed to perform final closure or post-closure care in accordance with the closure or post-closure plan and other applicable requirements. In response to concerns of the *ACCI* petitioners, the Agency proposed to require that a "final" administrative determination under Section 3008 of RCRA be required before the surety must perform closure or post-closure care or deposit the penal sum of the bond into a trust fund or the Regional Administrator may draw on a letter of credit.

No comments were received concerning this amendment. However, as explained above, the final rule specifies that the determination must be a final determination.

i. *Cost estimates for owners or operators using the financial test or corporate guarantee must include UIC cost estimates for Class I wells (§§ 264.143(f)(1)(i) (B) and (D) and (f)(1)(ii) (B) and (D), 264.145(f)(1)(i) (B) and (D) and (f)(1)(ii) (B) and (D), 265.143(e)(1)(i) (B) and (D) and (e)(1)(ii) (B) and (D), 265.145(e)(1)(i) (B) and (D), and 265.145(e)(1)(ii) (B) and (D)).* On March 19, 1985, the Agency proposed a requirement that an owner or operator seeking to use the financial test to demonstrate financial responsibility must include the most current cost estimates of the plugging and abandonment costs of Class I underground injection control (UIC) facilities, if applicable, when calculating the sum of closure and post-closure cost estimates for the financial test. EPA has established in 40 CFR Part 144 financial responsibility requirements for the owners or operators of Class I UIC facilities paralleling those established in 40 CFR Parts 264 and 265, including the same set of criteria for passing the financial test. Neither the UIC financial test nor the RCRA financial test, however, currently requires inclusion of the most current cost estimates for the other program. EPA was concerned that a firm able to pass the UIC and RCRA financial tests separately might not have the financial strength to take the required actions if UIC plugging and abandonment and RCRA closure and/or post-closure care activities were required simultaneously. Therefore, the Agency proposed that the most current cost estimates prepared as part of the Part 144 requirements be included in the total cost estimate required under 40 CFR Subpart H to evaluate whether a firm is able to pass the financial test.

Commenters generally favored the inclusion of UIC plugging and abandonment cost estimates in the Subpart H financial test requirements, and the Agency is promulgating the rule as proposed. In addition, the Agency is promulgating the proposed language in §§ 264.141 and 265.141 which defines the "current plugging and abandonment cost estimate" as the most recent cost estimates prepared under § 144.62.

j. *Cost estimates must account for all facilities covered by the financial test and corporate guarantee (§§ 264.143(f)(2), 264.145(f)(2), 265.143(e)(2) and 265.145(e)(2)).* The previous regulations specified that the phrase "current closure and post-closure cost estimates" as used in paragraph (f)(1) of §§ 264.143 and 264.145, and paragraph (e)(1) of §§ 265.143 and 265.145, refers to the cost estimates required to be shown in paragraphs 1–4 of the letter from the owner's or operator's chief financial officer (*See*

VOL 51 ISS 85 MY 2 1986 UMI

§ 264.151(f)). The Agency proposed a minor change to include by reference the UIC cost estimates.

No comments were received concerning this proposal, and the Agency is adopting the rule as proposed.

K. Release of the owner or operator from the requirements of financial assurance for closure and post-closure care (§§ 265.143(i), 264.145(i), 265.143(h) and 265.145(h)). Previously, §§ 265.143(i) and 265.143(h) required the owner or operator to submit certification to the Regional Administrator from himself and from an independent registered professional engineer that closure had been accomplished in accordance with the closure plan. Within 60 days after receiving the certifications, unless the Regional Administrator had reason to believe that closure was not in accordance with the plan, the Regional Administrator was required to notify the owner or operator that he is no longer required to maintain financial assurance for closure. Sections 264.145(i) and 265.145(h) specified that the owner or operator was relieved of his post-closure financial assurance obligations when the owner or operator has completed, to the satisfaction of the Regional Administrator, all post-closure care requirements.

The Agency proposed to drop the reference to the "independent" registered professional engineer in §§ 264.143(i) and 265.143(h) to be consistent with the proposed changes to §§ 264.115 and 265.115. The proposed rule also added a requirement to §§ 264.143(i), 264.145(i), 265.143(h), and 265.145(h) that the Regional Administrator must provide the owner or operator with a detailed written statement of any reasons to believe that closure or post-closure care has not been in accordance with the approved plans.

For the same reasons that the final rule is retaining the independent registered professional engineer certification requirement, the final rule also retains the reference to the independant registered professional engineer in §§ 264.143(i) and 265.143(h). Similarly, because the final rule requires in §§ 264.120 and 265.120 that an owner or operator must submit a certification from himself and an independent registered professional engineer that post-closure care has been completed in accordance with the approved post-closure plan, §§ 264.145(i) and §§ 265.145(h) are revised to specify that within 60 days after receiving the required post-closure care certifications the Regional Administrator will notify the owner or operator in writing that he is no longer required to maintain financial assurance for post-closure care for that unit (or facility). Today's rule promulgates as proposed the requirement that the Regional Administrator must provide the owner or operator with a detailed written statement of any reasons to believe that closure or post-closure care has not been in accordance with the approved plans.

l. Period of liability coverage (§§ 264.147(e) and 265.147(e)). The regulations previously required owners or operators to provide sudden accidental and, if applicable, nonsudden accidental liability coverage until certifications of closure have been received by the Regional Administrator. Because the Agency proposed to require that partial closures of disposal units be certified, units within a facility may be closed and certified while other units continue to operate. The Agency does not consider it appropriate to alter the amount of financial assurance required for sudden or nonsudden liability coverage as a result of such partial closures. Therefore, the proposed rule clarified that an owner or operator must provide liability coverage continuously as required until the certification of *final* closure is received by the Regional Administrator.

The Agency also believes that release from liability coverage requirements should be consistent with the procedures for releasing the owner or operator from closure financial responsibility requirements under §§ 264.143(i) and 265.143(h). Therefore, today's final rule states that owners or operators must maintain liability coverage until the Regional Administrator notifies the owner or operator in writing that he is released from this obligation.

m. Wording of instruments (§ 264.151). On March 19, 1985 the Agency proposed two changes to the wording of the instruments allowed under §§ 264.143, 264.145, 265.143, and 265.145. These changes, intended to ensure consistency with the other amendments in the proposal, modified § 264.151(b) to provide that the surety is responsible for funding the standby trust fund within 15 days after a "final" order to begin closure has been issued, and modified § 264.151(f) by adding an additional paragraph requiring owners and operators using the financial test to list the most current cost estimates associated with their Class I UIC facilities under the Part 144 financial responsibility requirements.

Because some owners or operators may use the financial test to cover closure and post-closure costs as well as liability coverage, the final rule adds a parallel paragraph to § 264.151(f), new paragraph (g), to require these owners or operators to list cost estimates associated with their Class I UIC facilities under the Part 144 final responsibility requirements.

Those firms with surety bonds or letters from the chief financial officer issued before the effective date of these regulations must change those instruments to reflect these wording changes as §§ 264.143, 265.143, 264.145 and 265.145 require that the wording of these instruments be identical to the applicable wording in §264.151. For owners or operators using surety bonds, the wording changes must be made within 60 days prior to the anniversary date of the establishment of the financial instrument(s), as per §§ 264.142(b), 265.142(b), 264.144(b) and 265.144(b). For owners or operators using the financial test or corporate guarantee, the changes must be made within 30 days after the close of the firm's fiscal year and before submission of updated information to the Regional Administrator, as specified in §§ 264.142(f), 265.142(e), 264.145(f), and 265.145(e).

C. Interim Status Standards (Part 265)

1. Applicability of Requirements (§ 265.110(b))

Section 265.110(b) specified that the post-closure care regulations apply to all hazardous waste disposal facilities. Surface impoundments and waste piles that are unable to remove all hazardous wastes are required under §§ 265.228 and 265.258 to be closed as landfills and must comply with the post-closure care requirements. Therefore, in order to clarify the applicability of §§ 265.117–265.120, the Agency proposed in § 265.110(b) that the post-closure care requirements apply to the owners or operators of all hazardous waste disposal facilities and piles and surface impoundments for which the owner or operator intends to remove the wastes at closure but is required to close the facility as a landfill.

The Agency received no comments on this clarification and is promulgating the final rule as proposed.

2. Waste Pile Closure Requirements Included by Reference in the Closure Performance Standard (§ 265.111(c))

Section 265.112(a)(1) previously required the closure plan to include a description of how and when the facility will be partially closed, if applicable, and finally closed. The description must specify how the applicable requirements of the closure performance standard specified in § 265.111 and the process-specific standards in Subparts J through Q will be met. The Agency proposed to incorporate the technical standards in the process-specific regulations into the closure performance standard in § 265.111 and to revise § 265.111 to include a reference to § 265.258, which establishes closure requirements for waste piles. Closure requirements specific to waste pile facilities had not been promulgated prior to the promulgation of the Subpart G regulations, and thus were not previously referenced.

No comments were received concerning this proposal, and the Agency is adopting the rule as proposed.

3. Submission of Interim Status Closure and Post-Closure Plans (§§ 265.112(d), 265.118(e))

Sections 265.112(c) and 265.118(c) required owners or operators to submit their closure and post-closure plans 180 days prior to final closure. The proposed amendment specified that owners or operators of facilities with a landfill, surface impoundment, waste pile, or land treatment unit must submit their closure and post-closure plans for review and approval 180 days prior to the first partial closure. Facilities with only container storage, storage or treatment tanks, or incinerators must submit the closure plan 45 days prior to final closure. After the closure plan has been approved, the owner or operator is required to notify the Regional Administrator prior to all partial closures of landfills, surface impoundments, waste piles, and land treatment units and prior to final closure. Unless changes are made to the approved closure plan, however, the proposed rule did not require the owner or operator to seek reapproval of the closure plan for each subsequent partial closure or final closure.

Some commenters suggested that owners or operators be required to submit only that portion of the closure plan applicable to the unit being closed. The Agency disagrees with this suggestion. All owners or operators of interim status facilities were required to have their plans available on-site by May 19, 1981. Therefore, no additional burden is imposed on the owner or operator by requiring that the entire plan be submitted.

The Agency believes that it is necessary that the entire plan be submitted to ensure that the plans adequately address the activities required at the entire facility. Especially if the owner or operator intends to handle some of the hazardous wastes on-site, it is essential to ensure that the facility has incorporated these requirements into the closure plan. If necessary to ensure protection of human health and the environment, the Regional Administrator may approve only that portion of the plan applicable to the partial closure.

4. Written Statements by Regional Administrator of Reasons for Refusing to Approve or Reasons for Modifying Closure or Post-Closure Plan (§§ 265.112(d)(4), 265.118(f))

Sections 265.112(d) and 265.118(d) previously specified that the Regional Administrator would approve, modify, or disapprove the closure plan and, if applicable, post-closure plan within 90 days of their receipt from the owner or operator. If the Regional Administrator did not approve the plan, the owner or operator was required to modify the plan or submit a new plan for approval within 60 days. If the Regional Administrator modified the plan, this modified plan became the approved closure and post-closure plan.

In response to the contention of the *ACC/* petitioners that this provision provided the Regional Administrator with undue discretion, the Agency proposed in §§ 265.112(d) and 265.118(f) to require the Regional Administrator to provide a detailed written statement of reasons for refusing to approve or reasons for modifying a closure or post-closure plan. In addition, to be consistent with the provisions of § 265.112(d) applicable to approving the closure plan, the Agency also proposed in § 265.118(f) that the Regional Administrator will hold a public hearing on approving the post-closure plan whenever such a hearing would clarify the issues.

The commenters generally favored these proposed changes and the Agency is promulgating the rule as proposed.

D. Typographical Errors

The final rule corrects a number of typographical errors included in the proposed rule.

E. Permitting Standards (Part 270)

1. Contents of Part B: General Requirements (§§ 270.14(b) (14), (15), and (16))

Section 270.14(b)(14) specified that the Part B application must include documentation that the notice in the deed required under § 264.120 has been filed. Because many Part B applications will be filed prior to closure of a hazardous waste disposal unit, it will not be possible to include documentation indicating that the notices have been filed. Therefore, the Agency proposed to amend § 270.14(b)(14) to require documentation to be included in the Part B application only for facilities with hazardous waste disposal units closed prior to the submission of the application. In addition, because the notice in the deed requirement is now included in § 264.119, the reference in § 270.14(b)(14) to § 264.120 has also been amended.

Section 270.14(b) (15) and (16) previously specified that the Part B application must include a copy of the most recent closure and post-closure cost estimates as required by §§ 264.142 and 264.144 and documentation required to demonstrate closure and post-closure financial assurance in accordance with the requirements of §§ 264.143 and 264.145, if applicable. Sections 264.143 and 264.145 require that for new facilities, demonstration of financial assurance must be made at least 60 days prior to the initial receipt of hazardous wastes. Because an owner or operator of a new facility may submit the Part B application more than 60 days prior to the initial receipt of hazardous wastes, the Agency also proposed to amend §§ 270.14(b) (15) and (16) to specify that a copy of the demonstration of financial assurance must be included with the submission of the Part B application, or at least 60 days prior to the initial receipt of hazardous wastes, whichever is later.

The Agency received no comments on any of these proposed changes and is promulgating them as proposed.

2. Minor Modifications of Permits (§ 270.42(d))

Section 270.42(d) previously stated that a change in ownership or operational control of a facility may be considered a minor permit modification provided that the Director determines that no other change is necessary in the permit and that a written agreement has been submitted to the Director which specifies the date for transfer of permit responsibility, coverage, and liability between the current and new permittees. The Agency wishes to ensure that facilities are transferred to financially viable firms and thus proposed to require that the new owner demonstrate compliance with the Subpart H regulations within three months of the transfer of ownership. The preamble inadvertently stated that the proposed rule allowed for a six-month deadline for demonstrating financial assurance although the proposed rule referred to the requirements of § 270.72 which proposed a three-month deadline.

VOL 51 ISS 85 MY 2 1986 UMI

Some commenters argued that a six-month time limit was too short while others argued that it was too long. Another commenter was concerned that the regulation did not state whether the old owner or operator remains responsible if the new owner or operator fails to demonstrate financial assurance within the allotted time period. Finally, one commenter noted that the reference to the deadlines in § 270.72, which address requirements for interim status facilities, is confusing for permitted facilities.

The Agency disagrees with those commenters who argued that six months is insufficient time to demonstrate financial assurance. The Agency is extending the three-month period allowed in the proposed rule to six months. EPA is also clarifying the Agency's intent that the old owner or operator is responsible for financial assurance obligations if the new owner or operator fails to meet his obligations. Finally, the final rule clarifies the language of § 270.42. The proposal included a reference in § 270.42 to the deadlines of § 270.72. Because § 270.72 refers to interim status facilities, the Agency was concerned that owners or operators may not recognize that the deadlines in § 270.72 also applied to permitted facilities under § 270.42. To avoid potential ambiguities, the final rule states explicitly in § 270.42(d) that the new owner or operator must demonstrate financial assurance within six months of the transfer of ownership.

3. Changes During Interim Status (§ 270.72(d))

Section 270.72(d) stated that when there is a transfer of ownership or operational control of an interim status facility, the old owner or operator is responsible for complying with the Subpart H requirements until the new owner or operator demonstrates compliance with the financial responsibility requirements. Consistent with the proposed changes to § 270.42(d) for permitted facilities, the Agency proposed to require that the new owner or operator demonstrate financial assurance within three months of the transfer of ownership.

For the reasons discussed above, the Agency is allowing the new owner or operator six months to demonstrate financial assurance. The old owner or operator is responsible for financial assurance until the new owner or operator fulfills his obligations under Subpart H.

III. State Authority

A. Applicability of Rules in Authorized States

Under Section 3006 of RCRA, EPA may authorize qualified States to administer and enforce the RCRA program within the State. (*See* 40 CFR Part 271 for the standards and requirements for authorization.) Following authorization, EPA retains enforcement authority under Sections 3008, 7003 and 3013 of RCRA, although authorized States have primary enforcement responsibility.

Prior to HSWA amending RCRA, a State with final authorization administered its hazardous waste program entirely in lieu of the Federal program. The Federal requirements no longer applied in the authorized State, and EPA could not issue permits for any facilities in a State where the State was authorized to permit. When new, more stringent Federal requirements were promulgated or enacted, the State was obligated to enact equivalent authority within specified time frames. New Federal requirements did not take effect in an authorized State until the State adopted the requirements as State law.

In contrast, under newly enacted Section 3006(g) of RCRA, 42 U.S.C. 6928(g), new requirements and prohibitions imposed by the HSWA take effect in authorized States at the same time that they take effect in nonauthorized States. EPA is directed to carry out those requirements and prohibitions in authorized States, including the issuance of permits, until the State is granted authorization to do so. While States must still adopt HSWA-related provisions as State law to retain final authorization, the HSWA are applied in authorized States in the interim.

B. Effect on State Authorizations

Today's announcement promulgates standards that will not be effective in authorized States since the requirements will not be imposed pursuant to the HSWA. Thus, the requirements will be applicable only in those States that do not have final authorization. In authorized States, the requirements will not be applicable until the State revises its program to adopt equivalent requirements under State law.

40 CFR 271.21(e)(2) requires that States that have final authorization must revise their programs to include equivalent standards within a year of promulgation of these standards if only regulatory changes are necessary, or within two years of promulgation if statutory changes are necessary. These deadlines can be extended in exceptional cases (40 CFR 271.21(e)(3)). Once EPA approves the revision, the State requirements become Subtitle C RCRA requirements.

States with authorized RCRA programs may already have requirements similar to those in today's rule. These State requirements have not been assessed against the Federal regulations being promulgated today to determine whether they meet the tests for authorization. Thus, a State is not authorized to carry out these requirements in lieu of EPA until the State requirements are approved. Of course, States with existing standards may continue to administer and enforce their standards as a matter of State law.

States that submit official applications for final authorization less than 12 months after promulgation of these standards may be approved without including equivalent standards. However, once authorized, a State must revise its program to include equivalent standards within the time period discussed above. The process and schedule for revision of State programs is described in 40 CFR § 271.21.

It should be noted that authorized States are only required to revise their programs when EPA promulgates standards more stringent than the existing standards. Under Section 3009 of RCRA, States are allowed to impose standards which are more stringent than those in Federal program. Some of the standards promulgated today are considered to be less stringent than or reduce the scope of the previous Federal requirements. Those provisions appear in Sections: 264.112(a), 264.118(a), 265.112(a), 265.118(a), 264.112(b)(7), 264.112(e), 265.112(e), 264.113, 265.113, 264.115, 265.115, 264.143(a)(10), 264.143(e)(5), 264.145(a)(11), 264.145(e)(5), 265.143(a)(10), 265.143(d)(5), 265.145(a)(11), 265.145(d)(5), 264.143(b)(4)(ii), 264.145(b)(4)(ii), 265.143(b)(4)(ii), 265.145(b)(4)(ii), 264.143(c)(5), 264.143(d)(8), 264.145(c)(5), 264.145(d)(9), 265.143(c)(8), 265.145(c)(9), 265.112(b)(7), 264.112(d), 265.112(d), 265.118(e), and 265.118(f). Authorized States will not be required to revise their programs to adopt requirements equivalent or substantially equivalent to the provisions identified above.

IV. Executive Order 12291

This regulation was submitted to the Office of Management and Budget for review as required by Executive Order 12291. The regulatory amendments being promulgated today to Subparts G and H are not "major rules." Some of the amendments are technical corrections designed to clarify the intent of the regulations issued January 12, 1981. The changes are not likely to result in a significant increase in costs and thus are not a major rule. No Regulatory Impact analysis has been prepared.

V. Paperwork Reduction Act

The information collection requirements contained in this rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* and have been assigned OMB control number 2050-0036.

VI. Regulatory Flexibility Act

Under the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*), Federal agencies must, in developing regulations, analyze their impact on small entities (small businesses, small government jurisdictions, and small organizations). Many of the changes promulgated today clarify the existing regulations and thus result in no additional costs. For those amendments that will result in an increase in costs, the costs are not significant enough to impact adversely the viability of small entities.

Accordingly, I certify that this regulation will not have a significant impact on a substantial number of small entities.

VII. Supporting Documents

A background document was prepared for the Subpart G closure and post-closure care regulations and for the financial assurance regulations promulgated on January 12, 1981. In addition, background documents were prepared for the financial assurance regulations published on April 7, 1982. Supporting materials, including a background document, discussing the most significant issues raised by the amendments promulgated today have been prepared and are included in the docket for these regulations.

The supporting materials are available for review in the public docket, Room S-212-E U.S. EPA, 401 M Street, SW., Washington, D.C. 20460 from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding holidays.

EPA will prepare guidance manuals to assist owners or operators and regulatory officials and will make them available from EPA Headquarters and the Regional Offices.

VIII. Effective Date

Section 3010(b) of RCRA provides that EPA's hazardous waste regulations and revisions thereto take effect six months after their promulgation. The purpose of this requirement is to allow sufficient lead time for the regulated community to prepare to comply with major new regulatory requirements. Section 553(d) of the Administrative Procedures Act prohibits "publication of service of a substantive rule . . . less than 30 days before its effective date except for good cause." For the amendment to § 270.14(b)(14) promulgated today, however, the Agency believes that an effective date six months or 30 days after promulgation would cause substantial and unnecessary disruption in the implementation of the regulations and would be contrary to the interest of the regulated community and the public.

Today's amendment to § 270.14(b)(14) requires that an owner or operator seeking a permit submit documentation that notices required under § 264.119 have been filed only for hazardous waste disposal units that have been closed. The previous regulations required that documentation of such notices be submitted for the entire facility, whether or not units have been closed at the time the permit application is submitted.

The Agency believes it makes little sense that the intended relief from this requirement be delayed for six months. This is especially true in light of the requirement that owners or operators of land disposal facilities submit their permit applications by November 8, 1985 (see HSWA § 213). Consequently, the Agency is setting an effective date of May 2, 1986, for the amendment to § 270.14(b)(14) promulgated in this rulemaking action.

Dated: March 8, 1986.

Approved:

Lee M. Thomas,

Administrator.

For the reasons set out in the preamble, Title 40 of the Code of Federal Regulations is to be amended as follows:

PART 260—HAZARDOUS WASTE MANAGEMENT SYSTEM: GENERAL

40 CFR Part 260 is amended as follows:

1. The authority citation for Part 260 continues to read as follows:

Authority: Secs. 1008, 2002(a), 3001 through 3007, 3010, 3014, 3015, 3017, 3018, 3019, and 7004, of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6921 through 6927, 6930, 6934, 6935, 6937, 6938, 6939 and 6974).

Subpart B—Definitions

2. In 40 CFR Part 260 Subpart B, § 260.10 is amended by adding the following terms alphabetically to the existing list of terms:

§ 260.10 Definitions.

* * * * *

"Active life" of a facility means the period from the initial receipt of hazardous waste at the facility until the Regional Administrator receives certification of final closure.

"Final closure" means the closure of all hazardous waste management units at the facility in accordance with all applicable closure requirements so that hazardous waste management activities under Parts 264 and 265 of this Chapter are no longer conducted at the facility unless subject to the provisions in § 262.34.

"Hazardous waste management unit" is a contiguous area of land on or in which hazardous waste is placed, or the largest area in which there is significant likelihood of mixing hazardous waste constituents in the same area. Examples of hazardous waste management units include a surface impoundment, a waste pile, a land treatment area, a landfill cell, an incinerator, a tank and its associated piping and underlying containment system and a container storage area. A container alone does not constitute a unit; the unit includes containers and the land or pad upon which they are placed.

"Partial closure" means the closure of a hazardous waste management unit in accordance with the applicable closure requirements of Parts 264 and 265 of this Chapter at a facility that contains other active hazardous waste management units. For example, partial closure may include the closure of a tank (including its associated piping and underlying containment systems), landfill cell, surface impoundment, waste pile, or other hazardous waste management unit, while other units of the same facility continue to operate.

* * * * *

PART 264—STANDARDS FOR OWNERS AND OPERATORS OF HAZARDOUS WASTE TREATMENT, STORAGE, AND DISPOSAL FACILITIES

40 CFR Part 264 is amended as follows:

1. The authority citation for Part 264 continues to read as follows:

Authority: Secs. 1008, 2002(a), 3004 and 3005 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6924 and 6925).

VOL 51 ISS 85 MY 2 1986 UMI

2. 40 CFR Part 264 Subpart G, §§ 264.110–264.120 are revised to read as follows:

Subpart G—Closure and Post-Closure

Sec.
264.110 Applicability.
264.111 Closure performance standard.
264.112 Closure plan; amendment of plan.
264.113 Closure; time allowed for closure.
264.114 Disposal or decontamination of equipment, structures and soils.
264.115 Certification of closure.
264.116 Survey plat.
264.117 Post-closure care and use of property.
264.118 Post-closure plan; amendment of plan.
264.119 Post-closure notices.
264.120 Certification of completion of post-closure care.

Subpart G—Closure and Post-Closure

§ 264.110 Applicability.

Except as § 264.1 provides otherwise:

(a) Sections 264.111–264.115 (which concern closure) apply to the owners and operators of all hazardous waste management facilities; and

(b) Sections 264.116–264.120 (which concern post-closure care) apply to the owners and operators of:

(1) All hazardous waste disposal facilities; and

(2) Waste piles and surface impoundments from which the owner or operator intends to remove the wastes at closure to the extent that these sections are made applicable to such facilities in §§ 264.228 or 264.258.

§ 264.111 Closure performance standard.

The owner or operator must close the facility in a manner that:

(a) Minimizes the need for further maintenance; and

(b) Controls, minimizes or eliminates, to the extent necessary to protect human health and the environment, post-closure escape of hazardous waste, hazardous constituents, leachate, contaminated run-off, or hazardous waste decomposition products to the ground or surface waters or to the atmosphere; and

(c) Complies with the closure requirements of this Subpart including, but not limited to, the requirements of §§ 264.178, 264.197, 264.228, 264.258, 264.280, 264.310 and 264.351.

§ 264.112 Closure plan; amendment of plan.

(a) *Written plan.* (1) The owner or operator of a hazardous waste management facility must have a written closure plan. In addition, certain surface impoundments and waste piles from which the owner or operator intends to remove or decontaminate the hazardous waste at partial or final closure are required by §§ 264.228(c)(1)(i) and 264.258(c)(1)(i) to have contingent closure plans. The plan must be submitted with the permit application, in accordance with § 270.14(b)(13) of this Chapter, and approved by the Regional Administrator as part of the permit issuance procedures under Part 124 of this Chapter. In accordance with § 270.32 of this Chapter, the approved closure plan will become a condition of any RCRA permit.

(2) The Regional Administrator's approval of the plan must ensure that the approved closure plan is consistent with §§ 264.111–264.115 and the applicable requirements of §§ 264.90 *et seq.*, 264.178, 264.197, 264.228, 264.258, 264.280, 264.310, and 264.351. Until final closure is completed and certified in accordance with § 264.115, a copy of the approved plan and all approved revisions must be furnished to the Regional Administrator upon request, including request by mail.

(b) *Content of plan.* The plan must identify steps necessary to perform partial and/or final closure of the facility at any point during its active life. The closure plan must include, at least:

(1) A description of how each hazardous waste management unit at the facility will be closed in accordance with § 264.111;

(2) A description of how final closure of the facility will be conducted in accordance with § 264.111. The description must identify the maximum extent of the operations which will be unclosed during the active life of the facility; and

(3) An estimate of the maximum inventory of hazardous wastes ever on-site over the active life of the facility and a detailed description of the methods to be used during partial closures and final closure, including, but not limited to, methods for removing, transporting, treating, storing, or disposing of all hazardous wastes, and identification of the type(s) of the off-site hazardous waste management units to be used, if applicable; and

(4) A detailed description of the steps needed to remove or decontaminate all hazardous waste residues and contaminated containment system components, equipment, structures, and soils during partial and final closure, including, but not limited to, procedures for cleaning equipment and removing contaminated soils, methods for sampling and testing surrounding soils, and criteria for determining the extent of decontamination required to satisfy the closure performance standard; and

(5) A detailed description of other activities necessary during the closure period to ensure that all partial closures and final closure satisfy the closure performance standards, including, but not limited to, ground-water monitoring, leachate collection, and run-on and run-off control; and

(6) A schedule for closure of each hazardous waste management unit and for final closure of the facility. The schedule must include, at a minimum, the total time required to close each hazardous waste management unit and the time required for intervening closure activities which will allow tracking of the progress of partial and final closure. (For example, in the case of a landfill unit, estimates of the time required to treat or dispose of all hazardous waste inventory and of the time required to place a final cover must be included.)

(7) For facilities that use trust funds to establish financial assurance under §§ 264.143 or 264.145 and that are expected to close prior to the expiration of the permit, an estimate of the expected year of final closure.

(c) *Amendment of plan.* The owner or operator must submit a written request for a permit modification to authorize a change in operating plans, facility design, or the approved closure plan in accordance with the procedures in Parts 124 and 270. The written request must include a copy of the amended closure plan for approval by the Regional Administrator.

(1) The owner or operator may submit a written request to the Regional Administrator for a permit modification to amend the closure plan at any time prior to the notification of partial or final closure of the facility.

(2) The owner or operator must submit a written request for a permit modification to authorize a change in the approved closure plan whenever:

(i) Changes in operating plans or facility design affect the closure plan, or

(ii) There is a change in the expected year of closure, if applicable, or

(iii) In conducting partial or final closure activities, unexpected events require a modification of the approved closure plan.

(3) The owner or operator must submit a written request for a permit modification including a copy of the amended closure plan for approval at least 60 days prior to the proposed change in facility design or operation, or no later than 60 days after an unexpected event has occurred which has affected the closure plan. If an unexpected event occurs during the partial or final closure period, the owner or operator must request a permit

modification no later than 30 days after the unexpected event. An owner or operator of a surface impoundment or waste pile that intends to remove all hazardous waste at closure and is not otherwise required to prepare a contingent closure plan under §§ 264.228(c)(1)(i) or 264.258(c)(1)(i), must submit an amended closure plan to the Regional Administrator no later than 60 days from the date that the owner or operator or Regional Administrator determines that the hazardous waste management unit must be closed as a landfill, subject to the requirements of § 264.310, or no later than 30 days from that date if the determination is made during partial or final closure. The Regional Administrator will approve, disapprove, or modify this amended plan in accordance with the procedures in Parts 124 and 270. In accordance with § 270.32 of this Chapter, the approved closure plan will become a condition of any RCRA permit issued.

(4) The Regional Administrator may request modifications to the plan under the conditions described in § 264.112(c)(2). The owner or operator must submit the modified plan within 60 days of the Regional Administrator's request, or within 30 days if the change in facility conditions occurs during partial or final closure. Any modifications requested by the Regional Administrator will be approved in accordance with the procedures in Parts 124 and 270.

(d) *Notification of partial closure and final closure.*

(1) The owner or operator must notify the Regional Administrator in writing at least 60 days prior to the date on which he expects to begin closure of a surface impoundment, waste pile, land treatment or landfill unit, or final closure of a facility with such a unit. The owner or operator must notify the Regional Administrator in writing at least 45 days prior to the date on which he expects to begin final closure of a facility with only treatment or storage tanks, container storage, or incinerator units to be closed.

(2) The date when he "expects to begin closure" must be either no later than 30 days after the date on which any hazardous waste management unit receives the known final volume of hazardous wastes or, if there is a reasonable possibility that the hazardous waste management unit will receive additional hazardous wastes, no later than one year after the date on which the unit received the most recent volume of hazardous waste. If the owner or operator of a hazardous waste management unit can demonstrate to the Regional Administrator that the hazardous waste management unit or facility has the capacity to receive additional hazardous wastes and he has taken, and will continue to take, all steps to prevent threats to human health and the environment, including compliance with all applicable permit requirements, the Regional Administrator may approve an extension to this one-year limit.

(3) If the facility's permit is terminated, or if the facility is otherwise ordered, by judicial decree or final order under Section 3008 of RCRA, to cease receiving hazardous wastes or to close, then the requirements of this paragraph do not apply. However, the owner or operator must close the facility in accordance with the deadlines established in § 264.113.

(e) *Removal of wastes and decontamination or dismantling of equipment.* Nothing in this Section shall preclude the owner or operator from removing hazardous wastes and decontaminating or dismantling equipment in accordance with the approved partial or final closure plan at any time before or after notification of partial or final closure.

§ 264.113 Closure; time allowed for closure.

(a) Within 90 days after receiving the final volume of hazardous wastes at a hazardous waste management unit or facility, the owner or operator must treat, remove from the unit or facility, or dispose of on-site, all hazardous wastes in accordance with the approved closure plan. The Regional Administrator may approve a longer period if the owner or operator complies with all applicable requirements for requesting a modification to the permit and demonstrates that:

(1)(i) The activities required to comply with this paragraph will, of necessity, take longer than 90 days to complete; or

(ii)(A) The hazardous waste management unit or facility has the capacity to receive additional hazardous wastes; and

(B) There is a reasonable likelihood that he or another person will recommence operation of the hazardous waste management unit or the facility within one year; and

(C) Closure of the hazardous waste management unit or facility would be incompatible with continued operation of the site; and

(2) He has taken and will continue to take all steps to prevent threats to human health and the environment, including compliance with all applicable permit requirements.

(b) The owner or operator must complete partial and final closure activities in accordance with the approved closure plan and within 180 days after receiving the final volume of hazardous wastes at the hazardous waste management unit or facility. The Regional Administrator may approve an extension to the closure period if the owner or operator complies with all applicable requirements for requesting a modification to the permit and demonstrates that:

(1)(i) The partial or final closure activities will, of necessity, take longer than 180 days to complete; or

(ii)(A) The hazardous waste management unit or facility has the capacity to receive additional hazardous wastes; and

(B) There is reasonable likelihood that he or another person will recommence operation of the hazardous waste management unit or the facility within one year; and

(C) Closure of the hazardous waste management unit or facility would be incompatible with continued operation of the site; and

(2) He has taken and will continue to take all steps to prevent threats to human health and the environment from the unclosed but not operating hazardous waste management unit or facility, including compliance with all applicable permit requirements.

(c) The demonstrations referred to in § 264.113(a) and (b) must be made as follows: (1) The demonstrations in paragraph (a) must be made at least 30 days prior to the expiration of the 90-day period in paragraph (a); and (2) the demonstration in paragraph (b) must be made at least 30 days prior to the expiration of the 180-day period in paragraph (b).

§ 264.114 Disposal or decontamination of equipment, structures and soils.

During the partial and final closure periods, all contaminated equipment, structures and soils must be properly disposed of or decontaminated unless otherwise specified in §§ 264.228, 264.258, 264.280, or 264.310. By removing any hazardous wastes or hazardous constituents during partial and final closure, the owner or operator may become a generator of hazardous waste and must handle that waste in accordance with all applicable requirements of Part 262 of this Chapter.

§ 264.115 Certification of closure.

Within 60 days of completion of closure of each hazardous waste surface impoundment, waste pile, land treatment, and landfill unit, and within 60 days of the completion of final closure, the owner or operator must submit to the Regional Administrator, by

VOL 51 ISS 85 MY 2 1986 UMI

registered mail, a certification that the hazardous waste management unit or facility, as applicable, has been closed in accordance with the specifications in the approved closure plan. The certification must be signed by the owner or operator and by an independent registered professional engineer. Documentation supporting the independent registered professional engineer's certification must be furnished to the Regional Administrator upon request until he releases the owner or operator from the financial assurance requirements for closure under § 264.143(i).

§ 264.116 Survey plat.

No later than the submission of the certification of closure of each hazardous waste disposal unit, the owner or operator must submit to the local zoning authority, or the authority with jurisdiction over local land use, and to the Regional Administrator, a survey plat indicating the location and dimensions of landfills cells or other hazardous waste disposal units with respect to permanently surveyed benchmarks. This plat must be prepared and certified by a professional land surveyor. The plat filed with the local zoning authority, or the authority with jurisdiction over local land use, must contain a note, prominently displayed, which states the owner's or operator's obligation to restrict disturbance of the hazardous waste disposal unit in accordance with the applicable Subpart G regulations.

§ 264.117 Post-closure care and use of property.

(a)(1) Post-closure care for each hazardous waste management unit subject to the requirements of §§ 264.117–264.120 must begin after completion of closure of the unit and continue for 30 years after that date and must consist of at least the following:

(i) Monitoring and reporting in accordance with the requirements of Subparts F, K, L, M, and N of this Part; and

(ii) Maintenance and monitoring of waste containment systems in accordance with the requirements of Subparts F, K, L, M, and N of this Part.

(2) Any time preceding partial closure of a hazardous waste management unit subject to post-closure care requirements or final closure, or any time during the post-closure period for a particular unit, the Regional Administrator may, in accordance with the permit modification procedures in Parts 124 and 270:

(i) Shorten the post-closure care period applicable to the hazardous waste management unit, or facility, if all disposal units have been closed, if he finds that the reduced period is sufficient to protect human health and the environment (e.g., leachate or ground-water monitoring results, characteristics of the hazardous wastes, application of advanced technology, or alternative disposal, treatment, or re-use techniques indicate that the hazardous waste management unit or facility is secure); or

(ii) Extend the post-closure care period applicable to the hazardous waste management unit or facility if he finds that the extended period is necessary to protect human health and the environment (e.g., leachate or ground-water monitoring results indicate a potential for migration of hazardous wastes at levels which may be harmful to human health and the environment).

(b) The Regional Administrator may require, at partial and final closure, continuation of any of the security requirements of § 264.14 during part or all of the post-closure period when:

(1) Hazardous wastes may remain exposed after completion of partial or final closure; or

(2) Access by the public or domestic livestock may pose a hazard to human health.

(c) Post-closure use of property on or in which hazardous wastes remain after partial or final closure must never be allowed to disturb the integrity of the final cover, liner(s), or any other components of the containment system, or the function of the facility's monitoring systems, unless the Regional Administrator finds that the disturbance:

(1) Is necessary to the proposed use of the property, and will not increase the potential hazard to human health or the environment; or

(2) Is necessary to reduce a threat to human health or the environment.

(d) All post-closure care activities must be in accordance with the provisions of the approved post-closure plan as specified in § 264.118.

§ 264.118 Post-closure plan; amendment of plan.

(a) *Written Plan.* The owner or operator of a hazardous waste disposal unit must have a written post-closure plan. In addition, certain surface impoundments and waste piles from which the owner or operator intends to remove or decontaminate the hazardous wastes at partial or final closure are required by §§ 264.228(c)(1)(ii) and 264.258(c)(1)(ii) to have contingent post-closure plans. Owners or operators of surface impoundments and waste piles not otherwise required to prepare contingent post-closure plans under §§ 264.228(c)(1)(ii) and 264.258(c)(1)(ii) must submit a post-closure plan to the Regional Administrator within 90 days from the date that the owner or operator or Regional administrator determines that the hazardous waste management unit must be closed as a landfill, subject to the requirements of §§ 264.117–264.120. The plan must be submitted with the permit application, in accordance with § 270.14(b)(13) of this Chapter, and approved by the Regional Administrator as part of the permit issuance procedures under Part 124 of this Chapter. In accordance with § 270.32 of this Chapter, the approved post-closure plan will become a condition of any RCRA permit issued.

(b) For each hazardous waste management unit subject to the requirements of this Section, the post-closure plan must identify the activities that will be carried on after closure of each disposal unit and the frequency of these activities, and include at least:

(1) A description of the planned monitoring activities and frequencies at which they will be performed to comply with Subparts F, K, L, M, and N of this Part during the post-closure care period; and

(2) A description of the planned maintenance activities, and frequencies at which they will be performed, to ensure:

(i) The integrity of the cap and final cover or other containment systems in accordance with the requirements of Subparts K, L, M, and N of this Part; and

(ii) The function of the monitoring equipment in accordance with the requirements of Subparts F, K, L, M, and N of this Part; and

(3) The name, address, and phone number of the person or office to contact about the hazardous waste disposal unit or facility during the post-closure care period.

(c) Until final closure of the facility, a copy of the approved post-closure plan must be furnished to the Regional Administrator upon request, including request by mail. After final closure has been certified, the person or office specified in § 264.188(b)(3) must keep the approved post-closure plan during the remainder of the post-closure period.

(d) *Amendment of plan.* The owner or operator must request a permit modification to authorize a change in the approved post-closure plan in accordance with the applicable requirements of Parts 124 and 270. The written request must include a copy of the amended post-closure plan for approval by the Regional Administrator.

(1) The owner or operator may submit a written request to the Regional Administrator for a permit modification to amend the post-closure plan at any time during the active life of the facility or during the post-closure care period.

(2) The owner or operator must submit a written request for a permit modification to authorize a change in the approved post-closure plan whenever:

(i) Changes in operating plans or facility design affect the approved post-closure plan, or

(ii) There is a change in the expected year of final closure, if applicable, or

(iii) Events which occur during the active life of the facility, including partial and final closures, affect the approved post-closure plan.

(3) The owner or operator must submit a written request for a permit modification at least 60 days prior to the proposed change in facility design or operation, or no later than 60 days after an unexpected event has occurred which has affected the post-closure plan. An owner or operator of a surface impoundment or waste pile that intends to remove all hazardous waste at closure and is not otherwise required to submit a contingent post-closure plan under §§ 264.228(c)(1)(ii) and 264.258(c)(1)(ii) must submit a post-closure plan to the Regional Administrator no later than 90 days after the date that the owner or operator or Regional Administrator determines that the hazardous waste management unit must be closed as a landfill, subject to the requirements of § 264.310. The Regional Administrator will approve, disapprove or modify this plan in accordance with the procedures in Parts 124 and 270. In accordance with § 270.32 of this Chapter, the approved post-closure plan will become a permit condition.

(4) The Regional Administrator may request modifications to the plan under the conditions described in § 264.118(d)(2). The owner or operator must submit the modified plan no later than 60 days after the Regional Administrator's request, or no later than 90 days if the unit is a surface impoundment or waste pile not previously required to prepare a contingent post-closure plan. Any modifications requested by the Regional Administrator will be approved, disapproved, or modified in accordance with the procedures in Parts 124 and 270.

§ 264.119 Post-closure notices.

(a) No later than 60 days after certification of closure of each hazardous waste disposal unit, the owner or operator must submit to the local zoning authority, or the authority with jurisdiction over local land use, and to the Regional Administrator a record of the type, location, and quantity of hazardous wastes disposed of within each cell or other disposal unit of the facility. For hazardous wastes disposed of before January 12, 1981, the owner or operator must identify the type, location, and quantity of the hazardous wastes to the best of his knowledge and in accordance with any records he has kept.

(b) Within 60 days of certification of closure of the first hazardous waste disposal unit and within 60 days of certification of closure of the last hazardous waste disposal unit, the owner or operator must:

(1) Record, in accordance with State law, a notation on the deed to the facility property—or on some other instrument which is normally examined during title search—that will in perpetuity notify any potential purchaser of the property that:

(i) The land has been used to manage hazardous wastes; and

(ii) Its use is restricted under 40 CFR Subpart G regulations; and

(iii) The survey plat and record of the type, location, and quantity of hazardous wastes disposed of within each cell or other hazardous waste disposal unit of the facility required by § 264.116 and § 264.119(a) have been filed with the local zoning authority or the authority with jurisdiction over local land use and with the Regional Administrator; and

(2) Submit a certification, signed by the owner or operator, that he has recorded the notation specified in paragraph (b)(1) of this Section, including a copy of the document in which the notation has been placed, to the Regional Administrator.

(c) If the owner or operator or any subsequent owner or operator of the land upon which a hazardous waste disposal unit is located wishes to remove hazardous wastes and hazardous waste residues, the liner, if any, or contaminated soils, he must request a modification to the post-closure permit in accordance with the applicable requirements in Parts 124 and 270. The owner or operator must demonstrate that the removal of hazardous wastes will satisfy the criteria of § 264.117(c). By removing hazardous waste, the owner or operator may become a generator of hazardous waste and must manage it in accordance with all applicable requirements of this Chapter. If he is granted a permit modification or otherwise granted approval to conduct such removal activities, the owner or operator may request that the Regional Administrator approve either:

(1) The removal of the notation on the deed to the facility property or other instrument normally examined during title search; or

(2) The addition of a notation to the deed or instrument indicating the removal of the hazardous waste.

§ 264.120 Certification of completion of post-closure care.

No later than 60 days after completion of the established post-closure care period for each hazardous waste disposal unit, the owner or operator must submit to the Regional Administrator, by registered mail, a certification that the post-closure care period for the hazardous waste disposal unit was performed in accordance with the specifications in the approved post-closure plan. The certification must be signed by the owner or operator and an independent registered professional engineer. Documentation supporting the independent registered professional engineer's certification must be furnished to the Regional Administrator upon request until he releases the owner or operator from the financial assurance requirements for post-closure care under § 264.145(i).

Subpart H—Financial Requirements

40 CFR Part 264 Subpart H is amended as follows:

1. In § 264.141, the following term is added to paragraph (f) in alphabetical order:

§ 264.141 Definitions of terms as used in this subpart.

* * * * *

(f) * * *

"Current plugging and abandonment cost estimate" means the most recent of the estimates prepared in accordance with § 144.62(a), (b), and (c) of this title.

* * * * *

2. In § 264.142, paragraphs (a), introductory text of (b) and (c) are revised to read as follows:

§ 264.142 Cost estimate for closure.

(a) The owner or operator must have a detailed written estimate, in current dollars, of the cost of closing the facility in accordance with the requirements in §§ 264.111–264.115 and applicable closure requirements in §§ 264.178, 264.197, 264.228, 264.258, 264.280, 264.310, and 264.351.

(1) The estimate must equal the cost of final closure at the point in the facility's active life when the extent and manner of its operation would make closure the

VOL 51 ISS 85 MY 2 1986 UMI

most expensive, as indicated by its closure plan (see § 264.112(b)); and

(2) The closure cost estimate must be based on the costs to the owner or operator of hiring a third party to close the facility. A third party is a party who is neither a parent nor a subsidiary of the owner or operator. (See definition of parent corporation in § 264.141(d).) The owner or operator may use costs for on-site disposal if he can demonstrate that on-site disposal capacity will exist at all times over the life of the facility.

(3) The closure cost estimate may not incorporate any salvage value that may be realized with the sale of hazardous wastes, facility structures or equipment, land, or other assets associated with the facility at the time of partial or final closure.

(4) The owner or operator may not incorporate a zero cost for hazardous wastes that might have economic value.

(b) During the active life of the facility, the owner or operator must adjust the closure cost estimate for inflation within 60 days prior to the anniversary date of the establishment of the financial instrument(s) used to comply with § 264.143. For owners and operators using the financial test or corporate guarantee, the closure cost estimate must be updated for inflation within 30 days after the close of the firm's fiscal year and before submission of updated information to the Regional Administrator as specified in § 264.143(f)(3). The adjustment may be made by recalculating the maximum costs of closure in current dollars, or by using an inflation factor derived from the most recent Implicit Price Deflator for Gross National Product published by the U.S. Department of Commerce in its *Survey of Current Business*, as specified in paragraphs (b)(1) and (b)(2) of this section. The inflation factor is the result of dividing the latest published annual Deflator by the Deflator for the previous year.

* * * * *

(c) During the active life of the facility, the owner or operator must revise the closure cost estimate no later than 30 days after the Regional Administrator has approved the request to modify the closure plan, if the change in the closure plan increases the cost of closure. The revised closure cost estimate must be adjusted for inflation as specified in § 264.142(b).

* * * * *

3. In § 264.143, paragraphs (a)(10), (b)(4)(ii), (c)(5), (d)(8), (e)(5), (f)(1)(i)(B), (f)(1)(i)(D), (f)(1)(ii)(B), (f)(1)(ii)(D), (f)(2), and (i) are revised to read as follows:

§ 264.143 Financial assurance for closure.

* * * * *

(a) * * *

(10) After beginning partial or final closure, an owner or operator or another person authorized to conduct partial or final closure may request reimbursements for partial or final closure expenditures by submitting itemized bills to the Regional Administrator. The owner or operator may request reimbursements for partial closure only if sufficient funds are remaining in the trust fund to cover the maximum costs of closing the facility over its remaining operating life. Within 60 days after receiving bills for partial or final closure activities, the Regional Administrator will instruct the trustee to make reimbursements in those amounts as the Regional Administrator specifies in writing, if the Regional Administrator determines that the partial or final closure expenditures are in accordance with the approved closure plan, or otherwise justified. If the Regional Administrator has reason to believe that the maximum cost of closure over the remaining life of the facility will be significantly greater than the value of the trust fund, he may withhold reimbursements of such amounts as he deems prudent until he determines, in accordance with § 264.143(i) that the owner or operator is no longer required to maintain financial assurance for final closure of the facility. If the Regional Administrator does not instruct the trustee to make such reimbursements, he will provide the owner or operator with a detailed written statement of reasons.

* * * * *

(b) * * *

(4) * * *

(ii) Fund the standby trust fund in an amount equal to the penal sum within 15 days after an administrative order to begin final closure issued by the Regional Administrator becomes final, or within 15 days after an order to begin final closure is issued by a U.S. district court or other court of competent jurisdiction; or

* * * * *

(c) * * *

(5) Under the terms of the bond, the surety will become liable on the bond obligation when the owner or operator fails to perform as guaranteed by the bond. Following a final administrative determination pursuant to section 3008 of RCRA that the owner or operator has failed to perform final closure in accordance with the approved closure plan and other permit requirements when required to do so, under the terms of the bond the surety will perform final closure as guaranteed by the bond or will deposit the amount of the penal sum into the standby trust fund.

* * * * *

(d) * * *

(8) Following a final administrative determination pursuant to section 3008 of RCRA that the owner or operator has failed to perform final closure in accordance with the closure plan and other permit requirements when required to do so, the Regional Administrator may draw on the letter of credit.

* * * * *

(e) * * *

(5) After beginning partial or final closure, an owner or operator or any other person authorized to conduct closure may request reimbursements for closure expenditures by submitting itemized bills to the Regional Administrator. The owner or operator may request reimbursements for partial closure only if the remaining value of the policy is sufficient to cover the maximum costs of closing the facility over its remaining operating life. Within 60 days after receiving bills for closure activities, the Regional Administrator will instruct the insurer to make reimbursements in such amounts as the Regional Administrator specifies in writing, if the Regional Administrator determines that the partial or final closure expenditures are in accordance with the approved closure plan or otherwise justified. If the Regional Administrator has reason to believe that the maximum cost of closure over the remaining life of the facility will be signficantly greater than the face amount of the policy, he may withhold reimbursements of such amounts as he deems prudent until he determines, in accordance with § 264.143(i), that the owner or operator is no longer required to maintain financial assurance for final closure of the facility. If the Regional Administrator does not instruct the insurer to make such reimbursements, he will provide the owner or operator with a detailed written statement of reasons.

* * * * *

(f) * * *

(1) * * *

(i) * * *

(B) Net working capital and tangible net worth each at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates; and

* * * * *

(D) Assets located in the United States amounting to at least 90 percent of total assets or at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates.

(ii) * * *

(B) Tangible net worth at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates; and

* * * * *

(D) Assets located in the United States amounting to at least 90 percent of total assets or at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates.

* * * * *

(2) The phrase "current closure and post-closure cost estimates" as used in paragraph (f)(1) of this section refers to the cost estimates required to be shown in paragraphs 1–4 of the letter from the owner's or operator's chief financial officer (§ 264.151(f)). The phrase "current plugging and abandonment cost estimates" as used in paragraph (f)(1) of this section refers to the cost estimates required to be shown in paragraphs 1–4 of the letter from the owner's or operator's chief financial officer (§ 144.70(f) of this title).

* * * * *

(i) *Release of the owner or operator from the requirements of this section.* Within 60 days after receiving certifications from the owner or operator and an independent registered professional engineer that final closure has been completed in accordance with the approved closure plan, the Regional Administrator will notify the owner or operator in writing that he is no longer required by this section to maintain financial assurance for final closure of the facility, unless the Regional Administrator has reason to believe that final closure has not been in accordance with the approved closure plan. The Regional Administrator shall provide the owner or operator a detailed written statement of any such reason to believe that closure has not been in accordance with the approved closure plan.

4. In § 264.144, paragraphs (a), the introductory text of (b), and paragraph (c) are revised to read as follows:

§ 264.144 Cost estimate for post-closure care.

(a) The owner or operator of a disposal surface impoundment, land treatment, or landfill unit, or of a surface impoundment or waste pile required under §§ 264.228 and 264.258 to prepare a contingent closure and post-closure plan, must have a detailed written estimate, in current dollars, of the annual cost of post-closure monitoring and maintenance of the facility in accordance with the applicable post-closure regulations in §§ 264.117–264.120, 264.228, 264.258, 264.280, and 264.310.

(1) The post-closure cost estimate must be based on the costs to the owner or operator of hiring a third party to conduct post-closure care activities. A third party is a party who is neither a parent nor a subsidiary of the owner or operator. (See definition of parent corporation in § 264.141(d).)

(2) The post-closure cost estimate is calculated by multiplying the annual post-closure cost estimate by the number of years of post-closure care required under § 264.117.

(b) During the active life of the facility, the owner or operator must adjust the post-closure cost estimate for inflation within 60 days prior to the anniversary date of the establishment of the financial instrument(s) used to comply with § 264.145. For owners or operators using the financial test or corporate guarantee, the post-closure cost estimate must be updated for inflation within 30 days after the close of the firm's fiscal year and before the submission of updated information to the Regional Administrator as specified in § 264.145(f)(5). The adjustment may be made by recalculating the post-closure cost estimate in current dollars or by using an inflation factor derived from the most recent Implicit Price Deflator for Gross National Product published by the U.S. Department of Commerce in its *Survey of Current Business* as specified in § 264.145(b)(1) and (b)(2). The inflation factor is the result of dividing the latest published annual Deflator by the Deflator for the previous year.

* * * * *

(c) During the active life of the facility, the owner or operator must revise the post-closure cost estimate within 30 days after the Regional Administrator has approved the request to modify the post-closure plan, if the change in the post-closure plan increases the cost of post-closure care. The revised post-closure cost estimate must be adjusted for inflation as specified in § 264.144(b).

* * * * *

5. In § 264.145, the introductory paragraph and paragraphs (a)(11), (b)(4)(ii), (c)(5), (d)(9), (e)(5), (f)(1)(i)(B), (f)(1)(i)(D), (f)(1)(ii)(B), (f)(1)(ii)(D), (f)(2), and (i) are revised to read as follows:

§ 264.145 Financial assurance for post-closure care.

The owner or operator of a hazardous waste management unit subject to the requirements of § 264.144 must establish financial assurance for post-closure care in accordance with the approved post-closure plan for the facility 60 days prior to the initial receipt of hazardous waste or the effective date of the regulation, whichever is later. He must choose from the following options:

(a) * * *

(11) An owner or operator or any other person authorized to conduct post-closure care may request reimbursements for post-closure care expenditures by submitting itemized bills to the Regional Administrator. Within 60 days after receiving bills for post-closure care activities, the Regional Administrator will instruct the trustee to make reimbursements in those amounts as the Regional Administrator specifies in writing, if the Regional Administrator determines that the post-closure care expenditures are in accordance with the approved post-closure plan or otherwise justified. If the Regional Administrator does not instruct the trustee to make such reimbursements, he will provide the owner or operator with a detailed written statement of reasons.

* * * * *

(b) * * *

(4) * * *

(ii) Fund the standby trust fund in an amount equal to the penal sum within 15 days after an administrative order to begin final closure issued by the Regional Administrator becomes final, or within 15 days after an order to begin final closure is issued by a U.S. district court or other court of competent jurisdiction; or

* * * * *

(c) * * *

(5) Under the terms of the bond, the surety will become liable on the bond obligation when the owner or operator fails to perform as guaranteed by the bond. Following a final administrative determination pursuant to section 3008 of RCRA that the owner or operator has failed to perform post-closure care in accordance with the approved post-closure plan and other permit requirements, under the terms of the bond the surety will perform post-closure care in accordance with the post-closure plan and other permit requirements or will deposit the amount of the penal sum into the standby trust fund.

* * * * *

(d) * * *

(9) Following a final administrative determination pursuant to Section 3008 of RCRA that the owner or operator has failed to perform post-closure care in accordance with the approved post-

VOL 51 ISS 85 MY 2 1986 UMI

closure plan and other permit requirements, the Regional Administrator may draw on the letter of credit.

* * * * * *

(e) * * *

(5) An owner or operator or any other person authorized to conduct post-closure care may request reimbursements for post-closure care expenditures by submitting itemized bills to the Regional Administrator. Within 60 days after receiving bills for post-closure care activities, the Regional Administrator will instruct the insurer to make reimbursements in those amounts as the Regional Administrator specifies in writing, if the Regional Administrator determines that the post-closure care expenditures are in accordance with the approved post-closure plan or otherwise justified. If the Regional Administrator does not instruct the insurer to make such reimbursements, he will provide the owner or operator with a detailed written statement of reasons.

* * * * * *

(f) * * *

(1) * * *

(i) * * *

(B) Net working capital and tangible net worth each at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates; and

* * * * * *

(D) Assets in the United States amounting to at least 90 percent of his total assets or at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates.

* * * * * *

(ii) * * *

(B) Tangible net worth at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates; and

* * * * * *

(D) Assets located in the United States amounting to at least 90 percent of his total assets or at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates.

(2) The phrase "current closure and post-closure cost estimates" as used in paragraph (f)(1) of this section refers to the cost estimates required to be shown in paragraphs 1–4 of the letter from the owner's or operator's chief financial officer (§ 264.151(f)). The phrase "current plugging and abandonment cost estimates" as used in paragraph (f)(1) of this section refers to the cost estimates required to be shown in paragraphs 1–4 of the letter from the owner's or operator's chief financial officer (§ 144.70(f) of this Title).

* * * * * *

(i) *Release of the owner or operator from the requirements of this Section.* Within 60 days after receiving certifications from the owner or operator and an independent registered professional engineer that the post-closure care period has been completed for a hazardous waste disposal unit in accordance with the approved plan, the Regional Administrator will notify the owner or operator that he is no longer required to maintain financial assurance for post-closure care of that unit, unless the Regional Administrator has reason to believe that post-closure care has not been in accordance with the approved post-closure plan. The Regional Administrator shall provide the owner or operator with a detailed written statement of any such reason to believe that post-closure care has not been in accordance with the approved post-closure plan.

* * * * * *

6. In § 264.147, paragraph (e) is revised to read as follows:

§ 264.147 Liability requirements.

* * * * * *

(e) *Period of coverage.* Within 60 days after receiving certifications from the owner or operator and an independent registered professional engineer that final closure has been completed in accordance with the approved closure plan, the Regional Administrator will notify the owner or operator in writing that he is no longer required by this Section to maintain liability coverage for that facility, unless the Regional Administrator has reason to believe that closure has not been in accordance with the approved closure plan.

* * * * * *

7. In § 264.151 paragraph (b) is revised and paragraphs (f)(5) and (g)(5) are added to read as follows:

§ 264.151 Wording of the instruments.

* * * * * *

(b) A surety bond guaranteeing payment into a trust fund, as specified in § 264.143(b) or § 264.145(b) or § 265.143(b) or § 265.145(b) of this Chapter, must be worded as follows, except that instructions in brackets are to be replaced with the relevant information and the brackets deleted:

Financial Guarantee Bond

Date bond executed:
Effective date:
Principal: [legal name and business address of owner or operator]
Type of Organization: [insert "individual," "joint venture," "partnership," or "corporation"]
State of incorporation: _____
Surety(ies): [name(s) and business address(es)]
EPA Identification Number, name, address and closure and/or post-closure amount(s) for each facility guaranteed by this bond [indicate closure and post-closure amounts separately]: _____
Total penal sum of bond: $ _____
Surety's bond number: _____

Know All Persons By These Presents, That we, the Principal and Surety(ies) hereto are firmly bound to the U.S. Environmental Protection Agency (hereinafter called EPA), in the above penal sum for the payment of which we bind ourselves, our heirs, executors, administrators, successors, and assigns jointly and severally; provided that, where the Surety(ies) are corporations acting as co-sureties, we, the Sureties, bind ourselves in such sum "jointly and severally" only for the purpose of allowing a joint action or actions against any or all of us, and for all other purposes each Surety binds itself, jointly and severally with the Principal, for the payment of such sum only as is set forth opposite the name of such Surety, but if no limit of liability is indicated, the limit of liability shall be the full amount of the penal sum.

Whereas said Principal is required, under the Resource Conservation and Recovery Act as amended (RCRA), to have a permit or interim status in order to own or operate each hazardous waste management facility identified above, and

Whereas said Principal is required to provide financial assurance for closure, or closure and post-closure care, as a condition of the permit or interim status, and

Whereas said Principal shall establish a standby trust fund as is required when a surety bond is used to provide such financial assurance;

Now, Therefore, the conditions of the obligation are such that if the Principal shall faithfully, before the beginning of final closure of each facility identified above, fund the standby trust fund in the amount(s) identified above for the facility,

Or, if the Principal shall fund the standby trust fund in such amount(s) within 15 days after a final order to begin closure is issued by an EPA Regional Administrator or a U.S. district court or other court of competent jurisdiction,

* * * * * *

(f) * * *

(5) This firm is the owner or operator of the following UIC facilities for which financial assurance for plugging and abandonment is required under Part 144. The current closure cost estimates as required by 40 CFR 144.62 are shown for each facility:

* * * * * *

(g) * * *

(5) This firm is the owner or operator of the following UIC facilities for which financial assurance for plugging and abandonment is required under Part 144. The current closure cost estimates as required by 40 CFR 144.62 are shown for each facility:

* * * * * *

PART 265—STANDARDS FOR OWNERS AND OPERATORS OF HAZARDOUS WASTE TREATMENT, STORAGE, AND DISPOSAL FACILITIES

40 CFR Part 265 is amended as follows:

1. The authority citation for Part 265 continues to read as follows:

Authority: Secs. 1006, 2002(a), 3004, 3005 and 3015 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6924, 6925 and 6935).

2. In 40 CFR Part 265 Subpart G, §§ 265.110–265.120 are revised as follows:

Subpart G—Closure and Post-Closure

265.110 Applicability.
265.111 Closure performance standard.
265.112 Closure plan; amendment of plan.
265.113 Closure; time allowed for closure.
265.114 Disposal or decontamination of equipment, structures and soils.
265.115 Certification of closure.
265.116 Survey plat.
265.117 Post-closure care and use of property.
265.118 Post-closure plan; amendment of plan.
265.119 Post-closure notices.
265.120 Certification of completion of post-closure care.

Subpart G—Closure and Post-Closure

§ 265.110 Applicability.

Except as § 265.1 provides otherwise:

(a) Sections 265.111–265.115 (which concern closure) apply to the owners and operators of all hazardous waste management facilities; and

(b) Sections 265.116–265.120 (which concern post-closure care) apply to the owners and operators of:

(1) All hazardous waste disposal facilities; and

(2) Waste piles and surface impoundments for which the owner or operator intends to remove the wastes at closure to the extent that these Sections are made applicable to such facilities in §§ 265.228 or 265.258.

§ 265.111 Closure performance standard.

The owner or operator must close the facility in a manner that:

(a) Minimizes the need for further maintenance, and

(b) Controls, minimizes or eliminates, to the extent necessary to protect human health and the environment, post-closure escape of hazardous waste, hazardous constituents, leachate, contaminated run-off, or hazardous waste decomposition products to the ground or surface waters or to the atmosphere, and

(c) Complies with the closure requirements of this Subpart including, but not limited to, the requirements of §§ 265.197, 265.228, 265.258, 265.280, 265.310, 265.351, 265.381 and 265.404.

§ 265.112 Closure plan; amendment of plan.

(a) *Written plan.* By May 19, 1981, the owner or operator of a hazardous waste management facility must have a written closure plan. Until final closure is completed and certified in accordance with § 265.115, a copy of the most current plan must be furnished to the Regional Administrator upon request, including request by mail. In addition, for facilities without approved plans, it must also be provided during site inspections, on the day of inspection, to any officer, employee or representative of the Agency who is duly designated by the Administrator.

(b) *Content of plan.* The plan must identify steps necessary to perform partial and/or final closure of the facility at any point during its active life. The closure plan must include, at least:

(1) A description of how each hazardous waste management unit at the facility will be closed in accordance with § 265.111; and

(2) A description of how final closure of the facility will be conducted in accordance with § 265.111. The description must identify the maximum extent of the operation which will be unclosed during the active life of the facility; and

(3) An estimate of the maximum inventory of hazardous wastes ever on-site over the active life of the facility and a detailed description of the methods to be used during partial and final closure, including, but not limited to methods for removing, transporting, treating, storing or disposing of all hazardous waste, identification of and the type(s) of off-site hazardous waste management unit(s) to be used, if applicable; and

(4) A detailed description of the steps needed to remove or decontaminate all hazardous waste residues and contaminated containment system components, equipment, structures, and soils during partial and final closure including, but not limited to, procedures for cleaning equipment and removing contaminated soils, methods for sampling and testing surrounding soils, and criteria for determining the extent of decontamination necessary to satisfy the closure performance standard; and

(5) A detailed description of other activities necessary during the partial and final closure period to ensure that all partial closures and final closure satisfy the closure performance standards, including, but not limited to, ground-water monitoring, leachate collection, and run-on and run-off control; and

(6) A schedule for closure of each hazardous waste management unit and for final closure of the facility. The schedule must include, at a minimum, the total time required to close each hazardous waste management unit and the time required for intervening closure activities which will allow tracking of the progress of partial and final closure. (For example, in the case of a landfill unit, estimates of the time required to treat or dispose of all hazardous waste inventory and of the time required to place a final cover must be included.); and

(7) An estimate of the expected year of final closure for facilities that use trust funds to demonstrate financial assurance under §§ 265.143 or 265.145 and whose remaining operating life is less than twenty years, and for facilities without approved closure plans.

(c) *Amendment of plan.* The owner or operator may amend the closure plan at any time prior to the notification of partial or final closure of the facility. An owner or operator with an approved closure plan must submit a written request to the Regional Administrator to authorize a change to the approved closure plan. The written request must include a copy of the amended closure plan for approval by the Regional Administrator.

(1) The owner or operator must amend the closure plan whenever:

(i) Changes in operating plans or facility design affect the closure plan, or

(ii) There is a change in the expected year of closure, if applicable, or

(iii) In conducting partial or final closure activities, unexpected events require a modification of the closure plan.

(2) The owner or operator must amend the closure plan at least 60 days prior to the proposed change in facility design or operation, or no later than 60 days after an unexpected event has occurred which has affected the closure plan. If an unexpected event occurs during the partial or final closure period, the owner or operator must amend the closure plan no later than 30 days after the unexpected event. These provisions also apply to owners or operators of surface impoundments and waste piles who

VOL 51 ISS 85 MY 2 1986 UMI

intended to remove all hazardous wastes at closure, but are required to close as landfills in accordance with § 265.310.

(3) An owner or operator with an approved closure plan must submit the modified plan to the Regional Administrator at least 60 days prior to the proposed change in facility design or operation, or no more than 60 days after an unexpected event has occurred which has affected the closure plan. If an unexpected event has occurred during the partial or final closure period, the owner or operator must submit the modified plan no more than 30 days after the unexpected event. These provisions also apply to owners or operators of surface impoundments and waste piles who intended to remove all hazardous wastes at closure but are required to close as landfills in accordance with § 265.310. If the amendment to the plan is a major modification according to the criteria in § 270.41 and §270.42, the modification to the plan will be approved according to the procedures in § 265.112(d)(4).

(4) The Regional Administrator may request modifications to the plan under the conditions described in paragraph (c)(1) of this Section. An owner or operator with an approved closure plan must submit the modified plan within 60 days of the request from the Regional Administrator, or within 30 days if the unexpected event occurs during partial or final closure. If the amendment is considered a major modification according to the criteria in §§ 270.41 and 270.42, the modification to the plan will be approved in accordance with the procedures in § 265.112(d)(4).

(d) *Notification of partial closure and final closure.*

(1) The owner or operator must submit the closure plan to the Regional Administrator at least 180 days prior to the date on which he expects to begin closure of the first surface impoundment, waste pile, land treatment, or landfill unit, or final closure if it involves such a unit, whichever is earlier. The owner or operator must submit the closure plan to the Regional Administrator at least 45 days prior to the date on which he expects to begin final closure of a facility with only tanks, container storage, or incinerator units. Owners or operators with approved closure plans must notify the Regional Administrator in writing at least 60 days prior to the date on which he expects to begin closure of a surface impoundment, waste pile, landfill, or land treatment unit, or final closure of a facility involving such a unit. Owners and operators with approved closure plans must notify the Regional Administrator in writing at least 45 days prior to the date on which he expects to begin final closure of a facility with only tanks, container storage, or incinerator units.

(2) The date when he "expects to begin closure" must be either within 30 days after the date on which any hazardous waste management unit receives the known final volume of hazardous wastes or, if there is a reasonable possibility that the hazardous waste management unit will receive additional hazardous wastes, no later than one year after the date on which the unit received the most recent volume of hazardous waste. If the owner or operator of a hazardous waste management unit can demonstrate to the Regional Administrator that the hazardous waste management unit or facility has the capacity to receive additional hazardous wastes and he has taken, and will continue to take, all steps to prevent threats to human health and the environment, including compliance with all interim status requirements, the Regional Administrator may approve an extension to this one-year limit.

(3) The owner or operator must submit his closure plan to the Regional Administrator no later than 15 days after:

(i) Termination of interim status except when a permit is issued simultaneously with termination of interim status; or

(ii) Issuance of a judicial decree or final order under Section 3008 of RCRA to cease receiving hazardous wastes or close.

(4) The Regional Administrator will provide the owner or operator and the public, through a newspaper notice, the opportunity to submit written comments on the plan and request modifications to the plan no later than 30 days from the date of the notice. He will also, in response to a request or at his own discretion, hold a public hearing whenever such a hearing might clarify one or more issues concerning a closure plan. The Regional Administrator will give public notice of the hearing at least 30 days before it occurs. (Public notice of the hearing may be given at the same time as notice of the opportunity for the public to submit written comments, and the two notices may be combined.) The Regional Administrator will approve, modify, or disapprove the plan within 90 days of its receipt. If the Regional Administrator does not approve the plan he shall provide the owner or operator with a detailed written statement of reasons for the refusal and the owner or operator must modify the plan or submit a new plan for approval within 30 days after receiving such written statement. The Regional Administrator will approve or modify this plan in writing within 60 days. If the Regional Administrator modifies the plan, this modified plan becomes the approved closure plan. The Regional Administrator must assure that the approved plan is consistent with §§ 265.111 through 265.115 and the applicable requirements of §§ 265.90 *et seq.*, 265.197, 265.228, 265.258, 265.280, 265.310, 265.351, 265.381, and 265.404. A copy of the modified plan with a detailed statement of reasons for the modifications must be mailed to the owner or operator.

(e) *Removal of wastes and decontamination or dismantling of equipment.* Nothing in this section shall preclude the owner or operator from removing hazardous wastes and decontaminating or dismantling equipment in accordance with the approved partial or final closure plan at any time before or after notification of partial or final closure.

§ 265.113 Closure; time allowed for closure.

(a) Within 90 days after receiving the final volume of hazardous wastes at a hazardous waste management unit or facility, or within 90 days after approval of the closure plan, whichever is later, the owner or operator must treat, remove from the unit or facility, or dispose of on-site, all hazardous wastes in accordance with the approved closure plan. The Regional Administrator may approve a longer period if the owner or operator demonstrates that:

(1)(i) The activities required to comply with this paragraph will, of necessity, take longer than 90 days to complete; or

(ii)(A) The hazardous waste management unit or facility has the capacity to receive additional hazardous wastes; and

(B) There is a reasonable likelihood that he or another person will recommence operation of the hazardous waste management unit or the facility within one year; and

(C) Closure of the hazardous waste management unit or facility would be incompatible with continued operation of the site; and

(2) He has taken and will continue to take all steps to prevent threats to human health and the environment, including compliance with all applicable interim status requirements.

(b) The owner or operator must complete partial and final closure activities in accordance with the approved closure plan and within 180 days after receiving the final volume of hazardous wastes at the hazardous waste management unit or facility, or 180 days after approval of the closure plan, if that is later. The Regional Administrator may approve an extension to the closure period if the owner or operator demonstrates that:

(1) (i) The partial or final closure activities will, of necessity, take longer than 180 days to complete; or

(ii) (A) The hazardous waste management unit or facility has the capacity to receive additional hazardous wastes; and

(B) There is reasonable likelihood that he or another person will recommence operation of the hazardous waste management unit or the facility within one year; and

(C) Closure of the hazardous waste management unit or facility would be incompatible with continued operation of the site; and

(2) He has taken and will continue to take all steps to prevent threats to human health and the environment from the unclosed but not operating hazardous waste management unit or facility, including compliance with all applicable interim status requirements.

(c) The demonstrations referred to in § 265.113(a) and (b) must be made as follows: (1) The demonstrations in paragraph (a) must be made at least 30 days prior to the expiration of the 90-day period in paragraph (a); and (2) The demonstrations in paragraph (b) must be made at least 30 days prior to the expiration of the 180-day period in paragraph (b).

§ 265.114 Disposal or decontamination of equipment, structures and soils.

During the partial and final closure periods, all contaminated equipment, structures and soil must be properly disposed of, or decontaminated unless specified otherwise in §§ 265.228, 265.258, 265.280, or 265.310. By removing all hazardous wastes or hazardous constituents during partial and final closure, the owner or operator may become a generator of hazardous waste and must handle that hazardous waste in accordance with all applicable requirements of Part 262 of this Chapter.

§ 265.115 Certification of closure.

Within 60 days of completion of closure of each hazardous waste surface impoundment, waste pile, land treatment, and landfill unit, and within 60 days of completion of final closure, the owner or operator must submit to the Regional Administrator, by registered mail, a certification that the hazardous waste management unit or facility, as applicable, has been closed in accordance with the specifications in the approved closure plan. The certification must be signed by the owner or operator and by an independent registered professional engineer. Documentation supporting the independent registered professional engineer's certification must be furnished to the Regional Administrator upon request until he releases the owner or operator from the financial assurance requirements for closure under § 265.143(h).

§ 265.116 Survey plat.

No later than the submission of the certification of closure of each hazardous waste disposal unit, an owner or operator must submit to the local zoning authority, or the authority with jurisdiction over local land use, and to the Regional Administrator, a survey plat indicating the location and dimensions of landfill cells or other hazardous waste disposal units with respect to permanently surveyed benchmarks. This plat must be prepared and certified by a professional land surveyor. The plat filed with the local zoning authority, or the authority with jurisdiction over local land use must contain a note, prominently displayed, which states the owner's or operator's obligation to restrict disturbance of the hazardous waste disposal unit in accordance with the applicable Subpart G regulations.

§ 265.117 Post-closure care and use of property.

(a)(1) Post-closure care for each hazardous waste management unit subject to the requirements of §§ 265.117–265.120 must begin after completion of closure of the unit and continue for 30 years after that date. It must consist of at least the following:

(i) Monitoring and reporting in accordance with the requirements of Subparts F, K, L, M, and N of this Part; and

(ii) Maintenance and monitoring of waste containment systems in accordance with the requirements of Subparts F, K, L, M, and N of this part.

(2) Any time preceding closure of a hazardous waste management unit subject to post-closure care requirements or final closure, or any time during the post-closure period for a particular hazardous waste disposal unit, the Regional Administrator may:

(i) Shorten the post-closure care period applicable to the hazardous waste management unit, or facility, if all disposal units have been closed, if he finds that the reduced period is sufficient to protect human health and the environment (e.g., leachate or ground-water monitoring results, characteristics of the hazardous waste, application of advanced technology, or alternative disposal, treatment, or re-use techniques indicate that the hazardous waste management unit or facility is secure); or

(ii) Extend the post-closure care period applicable to the hazardous waste management unit or facility, if he finds that the extended period is necessary to protect human health and the environment (e.g., leachate or ground-water monitoring results indicate a potential for migration of hazardous wastes at levels which may be harmful to human health and the environment).

(b) The Regional Administator may require, at partial and final closure, continuation of any of the security requirements of § 265.14 during part or all of the post-closure period when:

(1) Hazardous wastes may remain exposed after completion of partial or final closure; or

(2) Access by the public or domestic livestock may pose a hazard to human health.

(c) Post-closure use of property on or in which hazardous wastes remain after partial or final closure must never be allowed to disturb the integrity of the final cover, liner(s), or any other components of the containment system, or the function of the facility's monitoring systems, unless the Regional Administrator finds that the disturbance:

(1) Is necessary to the proposed use of the property, and will not increase the potential hazard to human health or the environment; or

(2) Is necessary to reduce a threat to human health or the environment.

(d) All post-closure care activities must be in accordance with the provisions of the approved post-closure plan as specified in § 265.118.

§ 265.118 Post-closure plan; amendment of plan.

(a) *Written plan.* By May 19, 1981, the owner or operator of a hazardous waste disposal unit must have a written post-closure plan. An owner or operator of a surface impoundment or waste pile that intends to remove all hazardous wastes at closure must prepare a post-closure plan and submit it to the Regional Administrator within 90 days of the date that the owner or operator or Regional Administrator determines that the hazardous waste management unit or facility must be closed as a landfill, subject to the requirements of §§ 265.117–265.120.

(b) Until final closure of the facility, a copy of the most current post-closure

BEST COPY AVAILABLE

VOL 51 ISS 85 MY 2 1986 UMI

plan must be furnished to the Regional Administrator upon request, including request by mail. In addition, for facilities without approved post-closure plans, it must also be provided during site inspections, on the day of inspection, to any officer, employee or representative of the Agency who is duly designated by the Administrator. After final closure has been certified, the person or office specified in § 265.116(c)(3) must keep the approved post-closure plan during the post-closure period.

(c) For each hazardous waste management unit subject to the requirements of this Section, the post-closure plan must identify the activities that will be carried on after closure of each disposal unit and the frequency of these activities, and include at least:

(1) A description of the planned monitoring activities and frequencies at which they will be performed to comply with Subparts F, K, L, M, and N of this Part during the post-closure care period; and

(2) A description of the planned maintenance activities, and frequencies at which they will be performed, to ensure:

(i) The integrity of the cap and final cover or other containment systems in accordance with the requirements of Subparts K, L, M, and N of this Part; and

(ii) The function of the monitoring equipment in accordance with the requirements of Subparts F, K, L, M, and N of this Part; and

(3) The name, address, and phone number of the person or office to contact about the hazardous waste disposal unit or facility during the post-closure care period.

(d) *Amendment of plan.* The owner or operator may amend the post-closure plan any time during the active life of the facility or during the post-closure care period. An owner or operator with an approved post-closure plan must submit a written request to the Regional Administrator to authorize a change to the approved plan. The written request must include a copy of the amended post-closure plan for approval by the Regional Administrator.

(1) The owner or operator must amend the post-closure plan whenever:

(i) Changes in operating plans or facility design affect the post-closure plan, or

(ii) Events which occur during the active life of the facility, including partial and final closures, affect the post-closure plan.

(2) The owner or operator must amend the post-closure plan at least 60 days prior to the proposed change in facility design or operation, or no later than 60 days after an unexpected event has occurred which has affected the post-closure plan.

(3) An owner or operator with an approved post-closure plan must submit the modified plan to the Regional Administrator at least 60 days prior to the proposed change in facility design or operation, or no more than 60 days after an unexpected event has occurred which has affected the post-closure plan. If an owner or operator of a surface impoundment or a waste pile who intended to remove all hazardous wastes at closure in accordance with §§ 265.228(b) or 265.258(a) is required to close as a landfill in accordance with § 265.310, the owner or operator must submit a post-closure plan within 90 days of the determination by the owner or operator or Regional Administrator that the unit must be closed as a landfill. If the amendment to the post-closure plan is a major modification according to the criteria in §§ 270.41 and 270.42, the modification to the plan will be approved according to the procedures in § 265.118(f).

(4) The Regional Administrator may request modifications to the plan under the conditions described in above paragraph (d)(1). An owner or operator with an approved post-closure plan must submit the modified plan no later than 60 days of the request from the Regional Administrator. If the amendment to the plan is considered a major modification according to the criteria in §§ 270.41 and 270.42, the modifications to the post-closure plan will be approved in accordance with the procedures in § 265.118(f). If the Regional Administrator determines that an owner or operator of a surface impoundment or waste pile who intended to remove all hazardous wastes at closure must close the facility as a landfill, the owner or operator must submit a post-closure plan for approval to the Regional Administrator within 90 days of the determination.

(e) The owner or operator of a facility with hazardous waste management units subject to these requirements must submit his post-closure plan to the Regional Administrator at least 180 days before the date he expects to begin partial or final closure of the first hazardous waste disposal unit. The date he "expects to begin closure" of the first hazardous waste disposal unit must be either within 30 days after the date on which the hazardous waste management unit receives the known final volume of hazardous waste or, if there is a reasonable possibility that the hazardous waste management unit will receive additional hazardous wastes, no later than one year after the date on which the unit received the most recent volume of hazardous wastes. The owner or operator must submit the post-closure plan to the Regional Administrator no later than 15 days after:

(1) Termination of interim status (except when a permit is issued to the facility simultaneously with termination of interim status); or

(2) Issuance of a judicial decree or final orders under Section 3008 of RCRA to cease receiving wastes or close.

(f) The Regional Administrator will provide the owner or operator and the public, through a newspaper notice, the opportunity to submit written comments on the post-closure plan and request modifications to the plan no later than 30 days from the date of the notice. He will also, in response to a request or at his own discretion, hold a public hearing whenever such a hearing might clarify one or more issues concerning a post-closure plan. The Regional Administrator will give public notice of the hearing at least 30 days before it occurs. (Public notice of the hearing may be given at the same time as notice of the opportunity for the public to submit written comments, and the two notices may be combined.) The Regional Administrator will approve, modify, or disapprove the plan within 90 days of its receipt. If the Regional Administrator does not approve the plan he shall provide the owner or operator with a detailed written statement of reasons for the refusal and the owner or operator must modify the plan or submit a new plan for approval within 30 days after receiving such written statement. The Regional Administrator will approve or modify this plan in writing within 60 days. If the Regional Administrator modifies the plan, this modified plan becomes the approved post-closure plan. The Regional Administrator must ensure that the approved post-closure plan is consistent with §§ 265.117 through 265.120. A copy of the modified plan with a detailed statement of reasons for the modifications must be mailed to the owner or operator.

(g) The post-closure plan and length of the post-closure care period may be modified any time prior to the end of the post-closure care period in either of the following two ways:

(1) The owner or operator or any member of the public may petition the Regional Administrator to extend or reduce the post-closure care period applicable to a hazardous waste management unit or facility based on cause, or alter the requirements of the post-closure care period based on cause.

(i) The petition must include evidence demonstrating that:

BEST COPY AVAILABLE

(A) The secure nature of the hazardous waste management unit or facility makes the post-closure care requirement(s) unnecessary or supports reduction of the post-closure care period specified in the current post-closure plan (e.g., leachate or ground-water monitoring results, characteristics of the wastes, application of advanced technology, or alternative disposal, treatment, or re-use techniques indicate that the facility is secure), or

(B) The requested extension in the post-closure care period or alteration of post-closure care requirements is necessary to prevent threats to human health and the environment (e.g., leachate or ground-water monitoring results indicate a potential for migration of hazardous wastes at levels which may be harmful to human health and the environment).

(ii) These petitions will be considered by the Regional Administrator only when they present new and relevant information not previously considered by the Regional Administrator. Whenever the Regional Administrator is considering a petition, he will provide the owner or operator and the public, through a newspaper notice, the opportunity to submit written comments within 30 days of the date of the notice. He will also, in response to a request or at his own discretion, hold a public hearing whenever a hearing might clarify one or more issues concerning the post-closure plan. The Regional Administrator will give the public notice of the hearing at least 30 days before it occurs. (Public notice of the hearing may be given at the same time as notice of the opportunity for written public comments, and the two notices may be combined.) After considering the comments, he will issue a final determination, based upon the criteria set forth in paragraph (g)(1) of this section.

(iii) If the Regional Administrator denies the petition, he will send the petitioner a brief written response giving a reason for the denial.

(2) The Regional Administrator may tentatively decide to modify the post-closure plan if he deems it necessary to prevent threats to human health and the environment. He may propose to extend or reduce the post-closure care period applicable to a hazardous waste management unit or facility based on cause or alter the requirements of the post-closure care period based on cause.

(i) The Regional Administrator will provide the owner or operator and the affected public, through a newspaper notice, the opportunity to submit written comments within 30 days of the date of the notice and the opportunity for a public hearing as in subparagraph (g)(1)(ii) of this section. After considering the comments, he will issue a final determination.

(ii) The Regional Administrator will base his final determination upon the same criteria as required for petitions under paragraph (g)(1)(i) of this section. A modification of the post-closure plan may include, where appropriate, the temporary suspension rather than permanent deletion of one or more post-closure care requirements. At the end of the specified period of suspension, the Regional Administrator would then determine whether the requirement(s) should be permanently discontinued or reinstated to prevent threats to human health and the environment.

§ 265.119 Post-closure notices.

(a) No later than 60 days after certification of closure of each hazardous waste disposal unit, the owner or operator must submit to the local zoning authority, or the authority with jurisdiction over local land use, and to the Regional Administrator, a record of the type, location, and quantity of hazardous wastes disposed of within each cell or other disposal unit of the facility. For hazardous wastes disposed of before January 12, 1981, the owner or operator must identify the type, location and quantity of the hazardous wastes to the best of his knowledge and in accordance with any records he has kept.

(b) Within 60 days of certification of closure of the first hazardous waste disposal unit and within 60 days of certification of closure of the last hazardous waste disposal unit, the owner or operator must:

(1) Record, in accordance with State law, a notation on the deed to the facility property—or on some other instrument which is normally examined during title search—that will in perpetuity notify any potential purchaser of the property that:

(i) The land has been used to manage hazardous wastes; and

(ii) Its use is restricted under 40 CFR Subpart G regulations; and

(iii) The survey plat and record of the type, location, and quantity of hazardous wastes disposed of within each cell or other hazardous waste disposal unit of the facility required by § 265.116 and § 265.119(a) have been filed with the local zoning authority or the authority with jurisdiction over local land use and with the Regional Administrator; and

(2) Submit a certification signed by the owner or operator that he has recorded the notation specified in paragraph (b)(1) of this Section and a copy of the document in which the notation has been placed, to the Regional Administrator.

(c) If the owner or operator or any subsequent owner of the land upon which a hazardous waste disposal unit was located wishes to remove hazardous wastes and hazardous waste residues, the liner, if any, and all contaminated structures, equipment, and soils, he must request a modification to the approved post-closure plan in accordance with the requirements of § 265.118(g). The owner or operator must demonstrate that the removal of hazardous wastes will satisfy the criteria of § 265.117(c). By removing hazardous waste, the owner or operator may become a generator of hazardous waste and must manage it in accordance with all applicable requirements of this Chapter. If the owner or operator is granted approval to conduct the removal activities, the owner or operator may request that the Regional Administrator approve either:

(1) The removal of the notation on the deed to the facility property or other instrument normally examined during title search, or

(2) The addition of a notation to the deed or instrument indicating the removal of the hazardous waste.

§ 265.120 Certification of completion of post-closure care.

No later than 60 days after the completion of the established post-closure care period for each hazardous waste disposal unit, the owner or operator must submit to the Regional Administrator, by registered mail, a certification that the post-closure care period for the hazardous waste disposal unit was performed in accordance with the specifications in the approved post-closure plan. The certification must be signed by the owner or operator and an independent registered professional engineer. Documentation supporting the independent registered professional engineer's certification must be furnished to the Regional Administrator upon request until he releases the owner or operator from the financial assurance requirements for post-closure care under § 265.145(h).

Subpart H—Financial Requirements

40 CFR Part 265 Subpart H is amended as follows:

1. In § 265.140, paragraph (a) is revised as follows:

§ 265.140 Applicability.

(a) The requirements of §§ 265.142, 265.143 and 265.147 through 265.150 apply to owners or operators of all

VOL 51 ISS 85 MAY 2 1986 UMI

hazardous waste facilities, except as provided otherwise in this section or in § 265.1.

* * * * *

2. In 40 CFR § 265.141, the following term is added to paragraph (f) in alphabetical order:

§ 265.141 [Amended]

* * * * *

(f) * * *

"Current plugging and abandonment cost estimate" means the most recent of the estimates prepared in accordance with § 144.62(a), (b), and (c) of this Title.

* * * * *

3. In § 265.142, paragraphs (a) and the introductory text of paragraph (b), and paragraph (c) are revised. Paragraphs (b)(i) and (b)(ii) are correctly designated as paragraphs (b)(1) and (b)(2), respectively.

§ 265.142 Cost estimate for closure.

(a) The owner or operator must have a detailed written estimate, in current dollars, of the cost of closing the facility in accordance with the requirements in §§ 265.111–265.115 and applicable closure requirements of §§ 265.178, 265.197, 265.228, 265.258, 265.280, 265.310, 265.351, 265.381 and 265.404.

(1) The estimate must equal the cost of final closure at the point in the facility's active life when the extent and manner of its operation would make closure the most expensive, as indicated by its closure plan (see § 265.112(b)); and

(2) The closure cost estimate must be based on the costs to the owner or operator of hiring a third party to close the facility. A third party is a party who is neither a parent nor a subsidiary of the owner or operator. (See definition of parent corporation in § 265.141(d).) The owner or operator may use costs for on-site disposal if he can demonstrate that on-site disposal capacity will exist at all times over the life of the facility.

(3) The closure cost estimate may not incorporate any salvage value that may be realized by the sale of hazardous wastes, facility structures or equipment, land or other facility assets at the time of partial or final closures.

(4) The owner or operator may not incorporate a zero cost for hazardous waste that might have economic value.

(b) During the active life of the facility, the owner or operator must adjust the closure cost estimate for inflation within 60 days prior to the anniversary date of the establishment of the financial instrument(s) used to comply with § 265.143. For owners and operators using the financial test or corporate guarantee, the closure cost estimate must be updated for inflation within 30 days after the close of the firm's fiscal year and before submission of updated information to the Regional Administrator as specified in § 265.143(e)(3). The adjustment may be made by recalculating the closure cost estimate in current dollars, or by using an inflation factor derived from the most recent Implicit Price Deflator for Gross National Product published by the U.S. Department of Commerce in its *Survey of Current Business*, as specified in paragraphs (b)(1) and (b)(2) of this section. The inflation factor is the result of dividing the latest published annual Deflator by the Deflator for the previous year.

* * * * *

(c) During the active life of the facility, the owner or operator must revise the closure cost estimate no later than 30 days after a revision has been made to the closure plan which increases the cost of closure. If the owner or operator has an approved closure plan, the closure cost estimate must be revised no later than 30 days after the Regional Administrator has approved the request to modify the closure plan, if the change in the closure plan increases the cost of closure. The revised closure cost estimate must be adjusted for inflation as specified in § 265.142(b).

* * * * *

4. In § 265.143, paragraphs (a)(10), (b)(4)(ii), (c)(8), (d)(5), (e)(1)(i)(B), (e)(1)(i)(D), (e)(1)(ii)(B), (e)(1)(ii)(D), (e)(2), and (h) are revised as follows:

§ 265.143 Financial assurance for closure.

* * * * *

(a) * * *

(10) After beginning partial or final closure, an owner or operator or another person authorized to conduct partial or final closure may request reimbursements for partial or final closure expenditures by submitting itemized bills to the Regional Administrator. The owner or operator may request reimbursements for partial closure only if sufficient funds are remaining in the trust fund to cover the maximum costs of closing the facility over its remaining operating life. No later than 60 days after receiving bills for partial or final closure activities, the Regional Administrator will instruct the trustee to make reimbursements in those amounts as the Regional Administrator specifies in writing, if the Regional Administrator determines that the partial or final closure expenditures are in accordance with the approved closure plan, or otherwise justified. If the Regional Administrator has reason to believe that the maximum cost of closure over the remaining life of the facility will be significantly greater than the value of the trust fund, he may withhold reimbursements of such amounts as he deems prudent until he determines, in accordance with § 265.143(h) that the owner or operator is no longer required to maintain financial assurance for final closure of the facility. If the Regional Administrator does not instruct the trustee to make such reimbursements, he will provide to the owner or operator a detailed written statement of reasons.

* * * * *

(b) * * *

(4) * * *

(ii) Fund the standby trust fund in an amount equal to the penal sum within 15 days after an administrative order to begin final closure issued by the Regional Administrator becomes final, or within 15 days after an order to begin final closure is issued by a U.S. district court or other court of competent jurisdiction; or

* * * * *

(c) * * *

(8) Following a final administrative determination pursuant to Section 3008 of RCRA that the owner or operator has failed to perform final closure in accordance with the approved closure plan when required to do so, the Regional Administrator may draw on the letter of credit.

* * * * *

(d) * * *

(5) After beginning partial or final closure, an owner or operator or any other person authorized to conduct closure may request reimbursements for closure expenditures by submitting itemized bills to the Regional Administrator. The owner or operator may request reimbursements for partial closure only if the remaining value of the policy is sufficient to cover the maximum costs of closing the facility over its remaining operating life. Within 60 days after receiving bills for closure activities, the Regional Administrator will instruct the insurer to make reimbursements in such amounts as the Regional Administrator specifies in writing if the Regional Administrator determines that the partial or final closure expenditures are in accordance with the approved closure plan or otherwise justified. If the Regional Administrator has reason to believe that the maximum cost of closure over the remaining life of the facility will be significantly greater than the face amount of the policy, he may withhold reimbursement of such amounts as he deems prudent until he determines, in accordance with § 265.143(h), that the owner or operator is no longer required

to maintain financial assurance for final closure of the particular facility. If the Regional Administrator does not instruct the insurer to make such reimbursements, he will provide to the owner or operator a detailed written statement of reasons.

* * * * *

(e) * * *

(1) * * *

(i) * * *

(B) Net working capital and tangible net worth each at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates; and

* * * * *

(D) Assets located in the United States amounting to at least 90 percent of total assets or at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates.

(ii) * * *

(B) Tangible net worth at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates; and

* * * * *

(D) Assets located in the United States amounting to at least 90 percent of total assets or at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates.

(2) The phrase "current closure and post-closure cost estimates" as used in paragraph (e)(1) of this section refers to the cost estimates required to be shown in paragraphs 1–4 of the letter from the owner's or operator's chief financial officer (§ 264.151(f)). The phrase "current plugging and abandonment cost estimates" as used in paragraph (e)(1) of this section refers to the cost estimates required to be shown in paragraphs 1–4 of the letter from the owner's or operator's chief financial officer (§ 144.70(f) of this Title).

* * * * *

(h) *Release of the owner or operator from the requirements of this Section.*

Within 60 days after receiving certifications from the owner or operator and an independent registered professional engineer that final closure has been completed in accordance with the approved closure plan, the Regional Administrator will notify the owner or operator in writing that he is no longer required by this Section to maintain financial assurance for final closure of the facility, unless the Regional Administrator has reason to believe that final closure has not been in accordance with the approved closure plan. The Regional Administrator shall provide the owner or operator a detailed written statement of any such reason to believe that closure has not been in accordance with the approved closure plan.

5. In § 265.144, paragraphs (a), introductory text of (b) and (c) are revised to read as follows:

§ 265.144 Cost estimate for post-closure care.

(a) The owner or operator of a hazardous waste disposal unit must have a detailed written estimate, in current dollars, of the annual cost of post-closure monitoring and maintenance of the facility in accordance with the applicable post-closure regulations in §§ 265.117–265.120, 265.228, 265.258, 265.280, and 265.310.

(1) The post-closure cost estimate must be based on the costs to the owner or operator of hiring a third party to conduct post-closure care activities. A third party is a party who is neither a parent nor subsidiary of the owner or operator. (See definition of parent corporation in § 265.141(d).)

(2) The post-closure cost estimate is calculated by multiplying the annual post-closure cost estimate by the number of years of post-closure care required under § 265.117.

(b) During the active life of the facility, the owner or operator must adjust the post-closure cost estimate for inflation within 60 days prior to the anniversary date of the establishment of the financial instrument(s) used to comply with § 265.145. For owners or operators using the financial test or corporate guarantee, the post-closure care cost estimate must be updated for inflation no later than 30 days after the close of the firm's fiscal year and before submission of updated information to the Regional Administrator as specified in § 265.145(d)(5). The adjustment may be made by recalculating the post-closure cost estimate in current dollars or by using an inflation factor derived from the most recent Implicit Price Deflator for Gross National Product published by the U.S. Department of Commerce in its *Survey of Current Business* as specified in § 265.145 (b)(1) and (b)(2). The inflation factor is the result of dividing the latest published annual Deflator by the Deflator for the previous year.

* * * * *

(c) During the active life of the facility, the owner or operator must revise the post-closure cost estimate no later than 30 days after a revision to the post-closure plan which increases the cost of post-closure care. If the owner or operator has an approved post-closure plan, the post-closure cost estimate must be revised no later than 30 days after the Regional Administrator has approved the request to modify the plan, if the change in the post-closure plan increases the cost of post-closure care. The revised post-closure cost estimate must be adjusted for inflation as specified in § 265.144(b).

* * * * *

4. In § 265.145, the introductory paragraph and paragraphs (a)(11), (b)(4)(ii), (c)(9), (d)(5), (e)(1)(i)(B), (e)(1)(i)(D), (e)(1)(ii)(B), (e)(1)(ii)(D), (e)(2), and (h) are revised as follows:

§ 265.145 Financial assurance for post-closure care.

By the effective date of these regulations, an owner or operator of a facility with a hazardous waste disposal unit must establish financial assurance for post-closure care of the disposal unit(s).

* * * * *

(a) * * *

(11) An owner or operator or any other person authorized to conduct post-closure care may request reimbursements for post-closure expenditures by submitting itemized bills to the Regional Administrator. Within 60 days after receiving bills for post-closure care activities, the Regional Administrator will instruct the trustee to make reimbursements in those amounts as the Regional Administrator specifies in writing, if the Regional Administrator determines that the post-closure expenditures are in accordance with the approved post-closure plan or otherwise justified. If the Regional Administrator does not instruct the trustee to make such reimbursements, he will provide the owner or operator with a detailed written statement of reasons.

* * * * *

(b) * * *

(4) * * *

(ii) Fund the standby trust fund in an amount equal to the penal sum within 15 days after an administrative order to begin final closure issued by the Regional Administrator becomes final, or within 15 days after an order to begin final closure is issued by a U.S. district court or other court of competent jurisdiction; or

(iii) * * *

* * * * *

(c) * * *

(9) Following a final administrative determination pursuant to Section 3008 of RCRA that the owner or operator has failed to perform post-closure care in

VOL 51 ISS 85 MY 2 1986 UMI

accordance with the approved post-closure plan and other permit requirements, the Regional Administrator may draw on the letter of credit.

* * * * *

(d) * * *

(5) An owner or operator or any other person authorized to perform post-closure care may request reimbursement for post-closure care expenditures by submitting itemized bills to the Regional Administrator. Within 60 days after receiving bills for post-closure care activities, the Regional Administrator will instruct the insurer to make reimbursements in those amounts as the Regional Administrator specifies in writing, if the Regional Administrator determines that the post-closure expenditures are in accordance with the approved post-closure plan or otherwise justified. If the Regional Administrator does not instruct the insurer to make such reimbursements, he will provide a detailed written statement of reasons.

* * * * *

(e) * * *

(1) * * *

(i) * * *

(B) Net working capital and tangible net worth each at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates; and

* * * * *

(D) Assets in the United States amounting to at least 90 percent of his total assets or at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates.

* * * * *

(ii) * * *

(B) Tangible net worth at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates; and

* * * * *

(D) Assets located in the United States amounting to at least 90 percent of his total assets or at least six times the sum of the current closure and post-closure cost estimates and the current plugging and abandonment cost estimates.

(2) The phrase "current closure and post-closure cost estimates" as used in paragraph (e)(1) of this section refers to the cost estimates required to be shown in paragraphs 1–4 of the letter from the owner's or operator's chief financial officer (§ 264.151(f)). The phrase "current plugging and abandonment cost estimates" as used in paragraph (e)(1) of this section refers to the cost estimates required to be shown in paragraphs 1–4 of the letter from the owner's or operator's chief financial officer (§ 144.70(f) of this Title).

* * * * *

(h) *Release of the owner or operator from the requirements of this Section.* Within 60 days after receiving certifications from the owner or operator and an independent registered professional engineer that the post-closure care period has been completed in accordance with the approved post-closure plan, the Regional Administrator will notify the owner or operator in writing that he is no longer required by this Section to maintain financial assurance for post-closure care of that unit, unless the Regional Administrator has reason to believe that post-closure care has not been in accordance with the approved post-closure plan. The Regional Administrator will provide the owner or operator a detailed written statement of any such reason to believe that post-closure care has not been in accordance with the approved post-closure plan.

* * * * *

7. In § 265.147, paragraph (e) is revised to read as follows:

§ 265.147 Liability Requirements.

* * * * *

(e) *Period of coverage.* Within 60 days after receiving certifications from the owner or operator and an independent registered professional engineer that final closure has been completed in accordance with the approved closure plan, the Regional Administrator will notify the owner or operator in writing that he is no longer required by this Section to maintain liability coverage for that facility, unless the Regional Administrator has reason to believe that closure has not been in accordance with the approved closure plan.

* * * * *

PART 270—EPA ADMINISTERED PERMIT PROGRAMS: THE HAZARDOUS WASTE PERMIT PROGRAM

1. The authority citation for Part 270 continues to read as follows:

Authority: Secs. 1006, 2002, 3005, 3007, 3019, and 7004 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912, 6925, 6927, 6939, and 6974).

Subpart B—Permit Application

40 CFR Part 270 Subpart B is amended as follows:

2. In § 270.14, paragraphs (b)(14), (15) and (16) are revised to read as follows:

§ 270.14 Contents of Part B application: General requirements.

* * * * *

(b) * * *

(14) For hazardous waste disposal units that have been closed, documentation that notices required under §264.119 have been filed.

(15) The most recent closure cost estimate for the facility prepared in accordance with §264.142 and a copy of the documentation required to demonstrate financial assurance under § 264.143. For a new facility, a copy of the required documentation may be submitted 60 days prior to the initial receipt of hazardous wastes, if that is later than the submission of the Part B.

(16) Where applicable, the most recent post-closure cost estimate for the facility prepared in accordance with § 264.144 plus a copy of the documentation required to demonstrate financial assurance under § 264.145. For a new facility, a copy of the required documentation may be submitted 60 days prior to the initial receipt of hazardous wastes, if that is later than the submission of the Part B.

* * * * *

3. In § 270.42, paragraph (d) is revised to read as follows:

§ 270.42 Minor modifications of permits.

* * * * *

(d) Allow for a change in ownership or operational control of a facility where the Director determines that no other change in the permit is necessary, provided that a written agreement containing a specific date for transfer of permit responsibility between the current and new permittees has been submitted to the Director. Changes in the ownership or operational control of a facility may be made if the new owner or operator submits a revised permit application no later than 90 days prior to the scheduled change. When a transfer of ownership or operational control of a facility occurs, the old owner or operator shall comply with the requirements of 40 CFR 264, Subpart H (Financial Requirements), until the new owner or operator has demonstrated to the Director that he is complying with the requirements of that Subpart. The new owner or operator must demonstrate compliance with Subpart H requirements within six months of the date of the change in the ownership or operational control of the facility. Upon demonstration to the Director by the new owner or operator of compliance with Subpart H, the Director shall notify the old owner or operator in writing that he no longer needs to comply with Subpart H as of the date of demonstration. All other interim status duties are transferred effective immediately upon the date of the change of ownership or operational control of the facility.

* * * * *

4. In § 270.72, paragraph (d) is revised to read as follows:

§ 270.72 Changes during interim status.

* * * * *

(d) Changes in the ownership or operational control of a facility may be made if the new owner or operator submits a revised Part A permit application no later than 90 days prior to the scheduled change. When a transfer of ownership or operational control of a facility occurs, the old owner or operator shall comply with the requirements of 40 CFR 265, Subpart H (Financial Requirements), until the new owner or operator has demonstrated to the Director that he is complying with the requirements of that Subpart. The new owner or operator must demonstrate compliance with Subpart H requirements within six months of the date of the change in the ownership or operational control of the facility. Upon demonstration to the Director by the new owner or operator of compliance with Subpart H, the Director shall notify the old owner or operator in writing that he no longer needs to comply with Subpart H as of the date of demonstration. All other interim status duties are transferred effective immediately upon the date of the change of ownership or operational control of the facility.

48 CFR Part 52
Federal Acquisition Regulation (FAR); Public Comments Concerning Contract Changes Clauses; Proposed Rule

VOL 51 ISS 85 MY 2 1986 UMI

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 52

Federal Acquisition Regulation (FAR); Public Comments Concerning Contract Changes Clauses

AGENCY: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Defense Acquisition Regulatory Council and the Civilian Agency Acquisition Council are considering changes to Federal Acquisition Regulation (FAR) 52.243–1 through 52.243–4, Changes clauses.

COMMENTS: Comments should be submitted to the FAR Secretariat at the address shown below on or before June 16, 1986, to be considered in the formulation of a final rule.

ADDRESS: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets NW., Room 4041, Washington, DC 20405.

Please cite FAR Case 85–28 in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Ms. Margaret A. Willis, FAR Secretariat, Telephone (202) 523–4755.

SUPPLEMENTARY INFORMATION:

A. Background.

Because of comments received from industry, it was considered necessary to review the Changes clauses at FAR 52.243–1 through 52.243–4. Comments on this subject were solicited by means of a notice in the **Federal Register** on May 23, 1985 (50 FR 21313). The responses received were evaluated and provide the basis for the proposed revisions appearing herein.

Accordingly, the FAR Changes clauses 52.243–1 through 52.243–4, are revised to provide that the contractor must "assert its right to an adjustment" rather than "submit a proposal for adjustment," within 30 days from the receipt of a written order. These proposed revisions essentially impose the same requirements on the contractor as those previously in effect in the Defense Acquisition Regulation and the Federal Procurement Regulations Changes clauses.

B. Regulatory Flexibility Act Analysis Summary

Economic Impact of Proposed Rule

Incorporation of the proposed rule in the Federal Acquisition Regulation may result in a significant economic impact on a substantial number of small entities. However, information currently available is insufficient to permit a determination as to the extent of such economic impact, and comments that will permit a determination are hereby solicited.

Alternatives to the Proposed Rule

The proposed rule is expected to have a favorable economic impact on small entities. Under the current FAR coverage, the contractor must submit a proposal for adjustment within 30 days after receipt of a change order. Under the proposed revision, the contractor need only assert the right to an adjustment within the 30-day period. Since the rule will not have an unfavorable impact on small entities, consideration of possible alternatives is unnecessary.

C. Paperwork Reduction Act.

The Paperwork Reduction Act (Pub. L. 96–511) does not apply because the proposed changes to FAR 52.243–1 through 52.243–4 do not impose any additional reporting or recordkeeping requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, et seq.

List of Subjects in 48 CFR Part 52

Government procurement.

Dated: April 28, 1986.

Lawrence J. Rizzi,

Director, Office of Federal Acquisition and Regulatory Policy.

Therefore, it is proposed that 48 CFR Part 52 be amended as follows:

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

1. The authority citation for Part 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. Chapter 137; and 42 U.S.C. 2453(c).

2. Section 52.243–1 is amended by inserting a period in the introductory text following the word "clause" and removing the remainder of the sentence; by removing in the title of the clause the date "(APR 1984)" and inserting in its place the date "(MAY 1986)"; by revising the first sentence of paragraph (c) of the clause; and by removing the derivation lines following "(End of clause)" to read as follows:

§ 52.243–1 Changes—Fixed-Price.

* * * * *

(c) The Contractor must assert its right to an adjustment under this clause within 30 days from the date of receipt of the written order. * * *

* * * * *

3. Section 52.243–2 is amended by inserting a period in the introductory text following the word "clause" and removing the remainder of the sentence; by removing in the title of the clause the date "(APR 1984)" and inserting in its place the date "(MAY 1986)"; by revising the first sentence of paragraph (c) of the clause; and by removing the derivation lines following "(End of clause)" to read as follows:

§ 52.243–2 Changes—Cost-Reimbursement.

* * * * *

(c) The Contractor must assert its right to an adjustment under this clause within 30 days from the date of receipt of the written order. * * *

* * * * *

4. Section 52.243–3 is amended by inserting a period in the introductory text following the word "clause" and removing the remainder of the sentence; by removing in the title of the clause the date "(APR 1984)" and inserting in its place the date "(MAY 1986)"; by revising the first sentence of paragraph (c) of the clause; and by removing the derivation lines following "(End of clause)" to read as follows:

§ 52.243–3 Changes—Time-and-Materials or Labor Hours.

* * * * *

(c) The Contractor must assert its right to an adjustment under this clause within 30 days from the date of receipt of the written order. * * *

* * * * *

5. Section 52.243–4 is amended by inserting a period in the introductory text following the word "clause" and removing the remainder of the sentence; by removing in the title of the clause the date "(APR 1984)" and inserting in its place the date "(MAY 1986)"; by revising the second sentence of paragraph (d) of the clause; by revising the first sentence of paragraph (e) of the clause; and by removing the derivation lines following "(End of clause)" to read as follows:

§ 52.243–4 Changes.

* * * * *

(d) * * * However, except for an adjustment based on defective

specifications, no adjustment for any change under paragraph (b) of this clause shall be made for any costs incurred more than 20 days before the Contractor gives written notice as required. * * *

(e) The contractor must assert its right to an adjustment under this clause within 30 days after (1) receipt of a written change order under paragraph (a) of this clause or (2) the furnishing of a written notice under paragraph (b) of this clause, by submitting to the Contracting Officer a written statement describing the general nature and amount of the proposal, unless this period is extended by the Government. * * *

* * * * *

Part IV

Department of Commerce

National Oceanic and Atmospheric Administration

50 CFR Part 301
Pacific Halibut Fisheries; Final Rules

VOL 51 ISS 85 MY 2 1986 UMI

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 301

[Docket No. 60475-6075]

Pacific Halibut Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of final rule.

SUMMARY: The Assistant Administrator for Fisheries, NOAA, on behalf of the International Pacific Halibut Commission, publishes notice of regulations promulgated by that Commission and approved by the United States Government to govern the Pacific halibut fishery. These regulations are intended to enhance the conservation of Pacific halibut stocks in order to help rebuild and sustain them at an adequate level in the northern Pacific Ocean and Bering Sea.

EFFECTIVE DATE: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: J. Craig Hamilond, Special Agent in Charge, Law Enforcement Division, Alaska Region, NMFS, P.O. Box 1668, Juneau, AK 99802, 907-586-7225; or Executive Director, International Pacific Halibut Commission, P.O. Box 5009, University Station, Seattle, WA 98105, 206-624-1838.

SUPPLEMENTARY INFORMATION: The International Pacific Halibut Commission (IPHC), under the Convention between the United States of America and Canada for the Preservation of the Halibut Fishery of the Northern Pacific Ocean and Bering Sea (signed at Ottawa, Ontario, on March 2, 1953), as amended by a Protocol Amending the Convention (signed at Washington, DC, on March 29, 1979), has promulgated new regulations governing the Pacific halibut fishery. The regulations have been approved by the Secretary of State of the United States of America and by the Governor-General of Canada by Order-in-Council. On behalf of the IPHC, these regulations are published in the **Federal Register** to provide notice of their effectiveness, and to inform persons subject to the regulations of the restrictions and requirements established therein.

The substantive changes from the previous regulations, published at 50 FR 13382 (April 4, 1985), are as follows: (1) New halibut fishing seasons and area catch limits are established; (2) changes are made in the boundaries of certain halibut regulatory areas and the closed area, and Subarea 2A-1 is abolished in § 301.4; (3) new requirements for retrieval of halibut fishing gear from closed areas are prescribed; (4) vessel clearance requirements for various parts of Area 4 are changed; (5) new requirements for recording of commercial halibut catches on State or Provincial fish tickets are added; (6) certain vessels fishing in Areas 4C and 4E are excused from the 72-hour prohibition before a halibut fishing season on the use of setline gear to fish for any species; (7) changes are made in the sport fishing seasons for 1986 and 1987.

Because approval by the Secretary of State of the IPHC regulations is a foreign affairs function, Jensen v. National Marine Fisheries Service, 512 F. 2d 1189 (9th Cir. 1975), 5 U.S.C. Section 553 of the Administrative Procedure Act, Executive Order 12291, and the Regulatory Flexibility Act do not apply to this notice of the effectiveness and content of the regulations.

List of Subjects in 50 CFR Part 301

Fish, Fisheries.

Dated: April 29, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR Part 301 is revised to read as follows:

PART 301—PACIFIC HALIBUT FISHERIES

Sec.

301.1 Short title.
301.2 Interpretation.
301.3 Application.
301.4 Regulatory areas.
301.5 Fishing periods.
301.6 Closed periods.
301.7 Closed area.
301.8 Catch limits.
301.9 Size limits.
301.10 Licensing of vessels.
301.11 Vessel clearance and hold inspection.
301.12 Logs.
301.13 Receipt and possession of halibut.
301.14 Fishing gear.
301.15 Retention of tagged halibut.
301.16 Supervision of unloading and weighing.
301.17 Sport fishing for halibut.
301.18 Previous regulations superseded.
Appendix to Part 301.

Authority: 5 UST 5; TIAS 2900; 16 U.S.C. 773-773k.

§ 301.1 Short title.

This part may be cited as the *Pacific Halibut Fishery Regulations.*

§ 301.2 Interpretation.

(a) In this part,

Charter vessel means a hired vessel under direct control of a licensed operator that is used in sport fishing for halibut.

Commercial fishing means fishing the resulting catch of which either is or is intended to be sold or bartered.

Commission means the International Pacific Halibut Commission.

Fishing means the taking, harvesting, or catching of fish; or any activity that can reasonably be expected to result in the taking, harvesting, or catching of fish, including specifically the deployment of any amount or component part of setline gear anywhere in the maritime area.

Land with respect to halibut means to bring to shore and to offload.

License means a halibut fishing license issued by the Commission pursuant to §§ 301.10 and 301.17 of this part.

Maritime area, in respect of the fisheries jurisdiction of a Contracting Party, includes without distinction areas within and seaward of the territorial sea or internal waters of that Party.

Operator, with respect to any vessel, means the master or other individual on board and in charge of that vessel.

Person includes an individual, corporation, firm, or association.

Regulatory area means an area referred to in § 301.4 of this part.

Setline gear means one or more stationary, buoyed, and anchored lines with hooks attached.

Sport fishing means all fishing other than commercial fishing.

(b) In this part, all bearings are magnetic, unless otherwise stated, and all positions are determined by the most recent charts issued by the United States National Ocean Survey or the Canadian Hydrographic Service.

§ 301.3 Application.

(a) This part applies to persons and vessels fishing for halibut in waters off the west coast of Canada and the United States, including the southern as well as the western coasts of Alaska, within the respective maritime areas in which each of those countries exercises exclusive fisheries jurisdiction as of March 29, 1979.

(b) Sections 301.4 to 301.16 apply only to commercial fishing for halibut.

(c) Section 301.17 applies only to sport fishing for halibut.

(d) This part does not apply to fishing operations authorized or conducted by the Commission for research purposes.

§ 301.4 Regulatory areas.

The following areas shall be regulatory areas for the purposes of the Convention (see the map of Regulatory Areas in the Appendix to this part):

(a) Area 2A includes all waters off the coasts of the states of California, Oregon, and Washington.

(b) Area 2B includes all waters off the coast of British Columbia.

(c) Area 2C includes all waters off the coast of Alaska that are east of a line running northwest one-quarter west (312°) from Cape Spencer Light (latitude 58°11'57" N., longitude 136°38'18" W.), and south and east of a line running south one-quarter east (177°) from said light.

(d) Area 3A includes all waters between Area 2C and a line extending from the most northerly point on Cape Aklek (latitude 57°41'15" N., longitude 155°35'00" W.) to Cape Ikolik (latitude 57°17'17" N., longitude 154°47'18" W.), then along the Kodiak Island coastline to Cape Trinity (latitude 56°44'50" N., longitude 154°08'44" W.), then southeast by east one-quarter east (121°).

(e) Area 3B includes all waters between Area 3A and a line extending southeast (135°) from Cape Lutke (latitude 54°29'00" N., longitude 164°20'00" W.) and south of latitude 54°49'00" No. in Isanotski Pass.

(f) Area 4A includes all waters in the Gulf of Alaska west of Area 3B and in the Bering Sea west of the closed area defined in § 301.7 that are east of longitude 172°00'00" W. and south of latitude 56°20'00" N.

(g) Area 4B includes all waters in the Bering Sea and the Gulf of Alaska west of Area 4A and south of latitude 56°20'00" N.

(h) Area 4C includes all waters in the Bering Sea north of Area 4A and north of the closed area defined in § 301.7 which are east of a line extending true northwest (315°) from a point at latitude 56°20'00" N., longitude 170°00'00" W., south of latitude 58°00'00" N., and west of longitude 168°00'00" W.

(i) Area 4D includes all waters in the Bering Sea north of Areas 4A and 4B, north and west of Area 4C, and west of longitude 168°00'00" W.

(j) Area 4E includes all waters in the Bering Sea north of the closed area defined in § 301.7, east of longitude 168°00'00" W., and south of latitude 65°34'00" N.

§ 301.5 Fishing periods.

(a) The fishing periods for each regulatory area are set out in the following table and apply where the catch limits specified in § 301.8 have not been taken.

8/12-8/14	10/29/-10/03
8/15-8/17	

*Date to be announced by the Commission.

(b) Notwithstanding paragraph (a) of this section, where Area 3A is closed under § 301.8 on a date before the attainment of the catch limit in Area 3B, Area 3B will close on the same date.

(c) Where Area 3B is closed under paragraph (b) of this section, it shall reopen on the next scheduled opening date on the schedule of fishing periods referred to in paragraph (a) of this section and continue on that schedule until the catch limit specified in § 301.8 is attained.

(d) Each fishing period shall begin and terminate at 1200 hours Pacific Standard Time on the date set out in the table to this section, unless the Commission specifies otherwise. See the schedule and map of time zones in the Appendix to this part for correct local time.

(e) All commercial fishing for halibut shall cease at 1200 hours Pacific Standard Time on October 31.

§ 301.6 Closed periods.

(a) No person shall engage in fishing for halibut in any regulatory area other than during the fishing periods set out in § 301.5 in respect of that area.

(b) No person shall land or otherwise retain halibut caught outside a fishing period applicable to the regulatory area where the halibut was taken.

(c) Subject to § 301.14 (f) and (g), this part does not prohibit fishing for any species of fish other than halibut during the closed periods.

(d) Notwithstanding paragraph (c) of this section, no person shall have halibut in his possession while fishing for any other species of fish during the closed periods.

(e) No person shall retrieve any halibut fishing gear from a closed area if the vessel has any halibut on board.

(f) A vessel that has no halibut on board may retrieve any halibut fishing gear in a closed area after notifying a fishery officer or representative of the Commission prior to that retrieval.

(g) After retrieval of halibut gear in accordance with paragraph (f) of this section, the vessel shall submit to a hold inspection at the discretion of the fishery officer or representative of the Commission.

(h) No person shall retain any halibut caught on gear retrieved under paragraph (f) of this section.

§ 301.7 Closed area.

All waters in the Bering Sea that are east of a line from Cape Sarichef Light (latitude 54°36'00" N., longitude 164°55'42" W.) to a point at latitude 56°28'00" N., longitude 168°30'00" W., south of a line from the latter point to

VOL 51 ISS 85 MY 2 1986 UMI

Cape Newenham (latitude 58°39'00" N., longitude 162°10'25" W.), and north of latitude 54°49'00" N. in Isanotski Pass are closed to halibut fishing and no person shall fish for halibut therein or have halibut in his possession while in those waters except in the course of a continuous transit across those waters.

§ 301.9 Catch limits.

(a) The total allowable catch of halibut to be taken during the halibut fishing periods specified in § 301.5 shall be limited to the weight expressed in pounds or metric tons shown in the following table:

Regulatory area	Catch limits	
	Pounds	Metric tons
2A	550,000	249
2B	11,200,000	5,080
2C	11,200,000	5,080
3A	28,100,000	12,746
3B	10,300,000	4,672
4A	2,000,000	907
4B	1,700,000	771
4C	600,000	272
4D	700,000	318
4E	50,000	23

(b) The weights in each catch limit shall be computed on the basis that the heads of the fish are off and their entrails removed.

(c) The Commission shall determine and announce to the public the date on which the catch limit for each regulatory area will be taken and the specific dates during which fishing will be allowed in each regulatory area.

(d) If the Commission determines that the catch limit specified in paragraph (a) of this section would be exceeded in a 24-hour fishing period in any regulatory area, the catch limit for that area shall be considered to have been taken.

(e) Notwithstanding paragraph (a) of this section, Areas 3A and 3B shall both be closed if the catch limit of 38,400,000 pounds (17,418 metric tons) for the combined areas is taken.

(f) Notwithstanding paragraph (a) of this section, Areas 4A and 4B shall both be closed if the catch limit of 3,700,000 pounds (1,678 metric tons) for the combined areas is taken.

(g) When under paragraphs (c), (d), (e), or (f) of this section the Commission has announced a date on which the catch limit for a regulatory area will be taken, no person shall fish for halibut in that area after that date for the rest of the year, unless the Commission has announced the reopening of that area for halibut fishing.

§ 301.9 Size limits.

(a) No person shall take or possess any halibut that

(1) With the head on, is less than 32 inches (81.3 cm) as measured in a straight line, passing over the pectoral fin from the tip of the lower jaw with the mouth closed, to the extreme end of the middle of the tail, as illustrated in the Appendix to this part, or

(2) With the head removed, is less than 24 inches (61.0 cm) as measured from the base of the pectoral fin at its most anterior point to the extreme end of the middle of the tail, as illustrated in the Appendix to this part.

(b) No person shall mutilate or otherwise disfigure a halibut in any manner that prevents the determination of the minimum size of the halibut for the purpose of paragraph (a) of this section.

§ 301.10 Licensing of vessels.

(a) The Commission may issue a license in respect of a vessel used for halibut fishing.

(b) No person shall fish for halibut from a vessel, nor possess halibut caught from a vessel, unless the Commission has issued a license in respect of that vessel.

(c) A license issued in respect of a vessel referred to in paragraph (b) of this section must be carried on that vessel at all times and the holder of it shall permit its inspection by customs and fishery officers of the Contracting Parties.

(d) A license shall be issued without fee by the Commission from its office in Seattle, Washington, upon receipt of a completed "Application for Vessel License for the Halibut Fishery" form.

(e) Application forms may be obtained from customs or fishery officers of either Contracting Party, or from the Commission.

(f) Licenses issued under this section shall be valid only during the year in which they are issued.

(g) A new license is required for a vessel that is sold, transferred, renamed, or redocumented.

(h) No person shall:

(1) Fish for halibut while on board a vessel in respect of which the Commission has issued a license while that vessel is in an area where commercial fishing for halibut is not permitted under this part; or

(2) Possess halibut while on board a vessel referred to in paragraph (h)(1) of this section in an area referred to in that paragraph unless that vessel is in transit to or within a port in which that halibut may be lawfully sold.

(i) The license required under this section is in addition to any license, however designated, that is required under the laws of Canada or any of its Provinces or the United States or any of its States.

§ 301.11 Vessel clearance and hold inspection.

(a) No person other than a person who lands his total annual halibut catch at ports within Areas 4A, 4B, 4C, 4D, 4E, or the closed area defined in § 301.7 of this part shall fish for halibut in Area 4A, 4B, or 4D from any vessel, unless the operator of that vessel obtains a vessel clearance and hold inspection both before such fishing and before the unloading of any halibut caught in Area 4A, 4B, or 4D.

(b) No person other than a person who lands his total annual halibut catch at a port within Area 4C may fish for halibut in Area 4C from any vessel, unless the operator of that vessel obtains a vessel clearance and hold inspection both before such fishing in each fishing period that applies to Area 4C and before the unloading of any halibut caught in that Area.

(c) No person other than a person who lands his total annual halibut catch at a port within Area 4E, or the closed area defined in § 301.7 may fish for halibut in Area 4E from any vessel, unless the operator of that vessel obtains a vessel clearance and hold inspection both before such fishing in each fishing period that applies to Area 4E and before the unloading of any halibut caught in that Area.

(d) The vessel clearance and hold inspection required under paragraphs (a), (b), and (c) of this section may be obtained only at Dutch Harbor or Akutan, Alaska, from a customs or fishery officer of the United States, a representative of the Commission, or a designated commercial fish processor.

(e) Vessel clearances and hold inspections required under paragraphs (a), (b), and (c) of this section prior to fishing in Area 4 shall be obtained within the 120-hour period before each of the openings in that Area.

(f) No halibut shall be on board at the time of inspection required by paragraph (e) of this section.

(g) Vessel clearances and hold inspections required under paragraphs (a), (b), and (c) of this section after fishing in Area 4 shall be obtained within the 120-hour period after each of the opening in that Area.

(h) The vessel clearance and hold inspection required under paragraphs (b) and (c) of this section is not valid if the vessel has fished for halibut in Area 4A, 4B, or 4D after obtaining the clearance and inspection required for such fishing.

§ 301.12 Logs.

(a) The operator of any vessel five (5) net tons or greater shall keep an accurate log of all halibut fishing operations including the date, locality, amount of gear used, and total weight of halibut taken daily in each locality.

(b) The log referred to in paragraph (a) of this section shall be:

(1) Updated not later than 24 hours after midnight local time for each day fished and within 24 hours following the closure of the area in which the vessel is fishing;

(2) Retained for a period of two years by the owner or operator of the vessel;

(3) Open to inspection by a fishery officer or any authorized representative of the Commission upon demand; and

(4) Kept on board the vessel when engaged in halibut fishing, during transits to port of landing, and for 5 days following off-loading halibut.

(c) No person shall make a false entry in a log referred to in paragraph (a) of this section.

§ 301.13 Receipt and possession of halibut.

(a) A person who purchases or otherwise receives halibut from the owner or operator of the vessel from which that halibut was caught, either directly from that vessel or through another carrier, shall record each such purchase or receipt on State or Provincial fish tickets, showing the date, locality, name of vessel, Halibut Commission license number, and the name of the person from whom the halibut was purchased or received and the amount in pounds according to trade categories of the halibut.

(b) A copy of the fish tickets referred to in paragraph (a) of this section shall be:

(1) Retained by the person making them for a period of two years from the date the fish tickets are made; and

(2) Open to inspection by a fishery officer or any authorized representative of the Commission.

(c) No person shall possess any halibut that he knows to have been taken in contravention of this part.

(d) When halibut are delivered to other than a commercial fish processor or primary fish buyer, the records required by paragraph (a) of this section shall be maintained by the operator of the vessel from which that halibut was caught, in compliance with paragraph (b) of this section.

(e) It shall be illegal to enter a Halibut Commission license number on a State or Provincial fish ticket for any vessel other than the vessel actually used in catching the halibut reported thereon.

§ 301.14 Fishing gear.

(a) No person shall fish for halibut using any gear other than hook and line gear.

(b) No person shall possess halibut taken with any gear other than hook and line gear except as provided in § 301.15.

(c) No person shall possess halibut while on board a vessel carrying any fishing gear other than hook and line gear or nets that are used solely for the capture of bait.

(d) All setline or skate marker buoys carried aboard or used by any United States vessel used for halibut fishing in a regulatory area shall be marked with one of the following:

(1) The vessel's name,

(2) The vessel's state license number, or

(3) The vessel's registration number, which markings shall be in characters at least four inches in height and one-half inch in width in a contrasting color visible above the water and shall be maintained in legible condition.

(e) All setline or skate marker buoys carried aboard or used by a Canadian vessel used for halibut fishing in a regulatory area shall be marked as required by the *British Columbia Fishery (General) Regulations.*

(f) No person on board a vessel from which setline gear was used to fish for any species of fish anywhere in waters described in § 301.3(a) during the 72-hour period immediately before the opening of a halibut fishing period shall catch or possess halibut anywhere in those waters during that halibut fishing period.

(g) No vessel from which setline gear was used to fish for any species of fish anywhere in waters described in § 301.3(a) during the 72-hour period immediately before the opening of a halibut fishing period may be used to catch or possess halibut anywhere in those waters during that halibut fishing period.

(h) Notwithstanding paragraphs (f) and (g) of this section, the 72-hour fishing restriction preceding a halibut fishing period shall not apply to persons and vessels fishing for halibut during fishing periods in Areas 4C and 4E as described in § 301.4 (h) and (j).

§ 301.15 Retention of tagged halibut.

Nothing contained in this part prohibits any vessel at any time from retaining and landing a halibut that bears a Commission tag at the time of capture, if the halibut with the tag still attached is reported at the time of landing and made available for examination by a representative of the Commission or by an officer of the Contracting Parties or a state or provincial government.

§ 301.16 Supervision of unloading and weighing.

The unloading and weighing of halibut may be subject to the supervision of a customs officer or other authorized officers to assure the fulfillment of the provisions of this part.

§ 301.17 Sport fishing for halibut.

(a) Sport fishing for halibut is only permitted from February 1 to December 31, 1986, and from February 1 to October 31, 1987.

(b) No person shall engage in sport fishing for halibut using gear other than a headline or rod with no more than two hooks attached, or a spear.

(c) No person shall catch, possess, or land more than two halibut of any size per day from a vessel that is engaged in sport fishing.

(d) After two halibut have been taken by any person engaged in sport fishing, those halibut shall be landed before that person takes more halibut on any succeeding day.

(e) No halibut caught in sport fishing shall be possessed aboard a vessel when other fish or shellfish aboard the said vessel are destined for commercial use, sale, trade, or barter.

(f) No person shall operate a charter vessel engaged in fishing for halibut unless the Commission has issued a license in respect of that vessel.

(g) A license issued in respect of a vessel referred to in paragraph (f) of this section must be carried on that charter vessel at all times and the holder of it shall permit its inspection by customs and fishery officers of the Contracting Parties.

(h) A license shall be issued without fee by the Commission from its office in Seattle, Washington, upon receipt of a completed "Application for Vessel License for the Halibut Fishery" form.

(i) Licenses issued under this section shall be valid only during the year in which they are issued.

§ 301.18 Previous regulations superseded.

This part shall supersede all previous regulations of the Commission, and this part shall be effective each succeeding year until superseded.

[Docket No. 60474-6074]

Pacific Halibut Fisheries—United States Treaty Indian Tribes

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Emergency interim rule and request for comment.

SUMMARY: The Assistant Administrator for Fisheries, NOAA, issues an emergency interim rule to implement measures recommended by the International Pacific Halibut Commission (Commission) and approved by the Secretary of Commerce (Secretary) to govern fishing by certain U.S. treaty Indian tribes in the Pacific halibut fishery. These regulations establish a special quota and commercial fishing season for halibut off the State of Washington for members of four U.S. treaty Indian tribes.

DATES: This rule is effective April 29, 1986 until modified, superseded, or rescinded. Comments are due by May 29, 1986.

ADDRESS: Send comments to Mr. Rolland A. Schmitten, Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way NE., BIN C15700, Seattle, WA 98115.

FOR FURTHER INFORMATION CONTACT: R.A. Schmitten at 206-526-6150.

SUPPLEMENTARY INFORMATION: The Commission, under the Convention between the United States of America and Canada for the Preservation of the Halibut Fishery of the Northern Pacific Ocean and Bering Sea (signed at Ottawa, Ontario, on March 2, 1953), as amended by a Protocol Amending the Convention (signed at Washington, DC, on March 29, 1979), recommended at its annual meeting on January 27-30, 1986, that the government of the United States take regulatory action, pursuant to its domestic law and separate from the Commission's action, to provide for the United States' special obligations to four treaty Indian tribes with historic treaties containing fishing provisions. Those recommendations, which have been approved by the Secretary, include establishing a special Subarea 2A-1 under § 301.19 within the Commission's Regulatory Area 2A, providing a suballocation of 50,000 pounds of halibut to the four treaty Indian tribes in Regulatory Area 2A, and setting an open season for commercial halibut fishing by the tribes beginning April 30 and closing when the subquota is reached or on October 31, whichever occurs first.

Consultation was had with the Coast Guard at a meeting of the Pacific Fishery Management Council on March 11-13, 1986, in Portland, Oregon. The Secretary has authority to promulgate regulations implementing the Commission's recommendations under the Northern Pacific Halibut Act of 1982, 16 U.S.C. 773c.

The regulations establish Subarea 2A-1 under § 301.19 which includes the off-reservation halibut fishing areas of the four treaty Indian tribes in the ocean off the coast of Washington and in the Strait of Juan de Fuca. Subarea 2A-1 is not intended to describe precisely the historic off-reservation halibut fishing places of all tribes, as the location of those places has hot been determined. The regulations also provide a tribal suballocation of 50,000 pounds based on the Commission's conservative estimate of the amount of fish equalling half of the exploitable biomass of halibut within Subarea 2A-1 . The regulations establish a special commercial season in Subarea 2A-1 beginning April 30 and ending October 31, or when the tribal subquota is reached, whichever occurs first, which is designed to maximize the tribes' opportunity to harvest their full allocation. The regulations also establish a special U.S. treaty Indian tribal subsistence and ceremonial season in Subarea 2A-1 which begins on April 30 and ends on December 31, 1986. This subsistence and ceremonial fishery allows tribal members to take and retain up to two halibut per day on hook-and-line gear, but not to sell the fish caught.

The regulations are time critical and require implementation without prior public comment and without delaying their effectiveness although public comment has been invited for 30 days after their effective date. They are the result of intricate negotiations following a lawsuit filed by the Makah Tribe in 1985 to force the Federal government to protect their asserted treaty-protected fishing rights. Given the protracted and bitter litigation over treaty Indian salmon rights, now in its eighteenth year, NOAA's representatives to the IPHC deemed it in the best interests of the United States and the halibut fishery to support the tribes' proposals for a special season and allocation beginning in 1986. The United States' position, which resulted in the Commission's recommendations, was based on the outcome of a series of meetings with all affected parties, including all segments of the non-Indian halibut fishing community. The Commission's recommendations and implementing regulations are the popularly preferred alternative to continued litigation.

It was the Commission's recommendation, and the common understanding of the affected parties, that regulations would be promulgated in time to provide for a treaty Indian commercial season beginning on April 30, 1986. Without emergency implementation of the regulations, treaty Indian halibut fishing will be prevented until June 16, the beginning of the regularly scheduled commercial season in Regulatory Area 2A. Failure to promulgate the regulations effective immediately would negate the Commission's action, breach the agreements reached among the affected parties, undermine the Federal government's credibility, and force the matter to the attention of the courts.

Classification

The Assistant Administrator for Fisheries, NOAA, has determined that this rule is necessary to respond to an emergency situation and is consistent with the Northern Pacific Halibut Act and other applicable law, including the United States obligations to Canada and to U.S. treaty Indians.

Absent emergency issuance, tribal commercial fishing would be prevented until June 16, 1986, the opening of the regularly scheduled commercial season for all citizens in the Commission's Regulatory Area 2A. Given the time constraints, treaty obligations, and international obligations under the Protocol, the Assistant Administrator finds there is good cause to promulgate these regulations on an emergency basis and that it is impracticable and contrary to the public interest in resolving litigation issues to require notice and public comment, or to delay the effective date of the regulations, under the provisions of section 553 (b) and (d) of the Administrative Procedure Act.

The policy of NOAA is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions, or objections regarding this rule to the Regional Director at the address above. Comments must be received by the date specified above.

This emergency rule is exempt from the normal review procedures of Executive Order 12291 as provided in section 8(a)(1) of that order. This rule is being reported to the Director of the Office of Management and Budget with an explanation of why it is not possible to follow the procedures of that order. In

VOL 51 ISS 85 MY 2 1986 UMI

addition, NMFS has determined that this rule is not a major rule within the terms of E.O. 12291 because it will not have a major effect on the economy and will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions. This rule is exempt from the procedures of the Regulatory Flexibility Act because the rule is issued without opportunity for prior public comments.

The implementation of a treaty Indian fishery by these regulations is not a major Federal action which would significantly affect the quality of the human environment within the meaning of section 102(2)(c) of the National Environmental Policy Act.

This rule does not contain any collection of information requirement for purposes of the Paperwork Reduction Act.

List of Subjects in 50 CFR Part 301

Fisheries, Fishing.

Dated: April 28, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator For Fisheries Resource Management, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR Part 301 is amended as follows:

PART 301 [AMENDED]

1. The authority citation for Part 301 continues to read as follows:

Authority: 5 UST 5; TIAS 2900; 16 USC 773–773k.

2. In the table of contents, a new section designation is added, to read as follows:

§ 301.19 United States treaty Indian tribes.

3. A new § 301.19 is added, to read as follows:

§ 301.19 United States treaty Indian tribes.

(a) *Purpose.* The purpose of this section is to implement recommendations of the International Pacific Halibut Commission (IPHC) to govern fishing for halibut by four United States treaty Indian tribes in certain marine fishing areas off the coast of Washington and in the Strait of Juan de Fuca.

(b) *Relation to other laws.* Except as provided in this section, all regulations of the IPHC in this part apply to halibut fishing by members of United States treaty Indian tribes.

(c) *Definitions.* United States treaty Indian tribes means the Makah, Quileute Hoh, and Quinault tribes located in the State of Washington.

(d) *Area.* Within IPHC Regulatory Area 2A, Subarea 2A–1 includes waters off the coast of Washington from the U.S.-Canada border south to 46°53'18" N. latitude (Point Chehalis) and east of 125°44' W. longitude. Within Subarea 2A–1, boundaries of a tribe's fishery may be revised as ordered by a Federal court.

Tribe	Boundaries
Makah	North of 48°06'15" N. latitude (Norwegian Memorial), east of 125°44'00" W. longitude, and west of longitude 123°42'30".
Quileute	Between 48°07'36" N. latitude (Sand Point) and 47°31'00" N. latitude (Queets River), and east of longitude 125°44'00".
Hoh	Between 47°54'18" N. latitude (Quillayute River) and 47°21'00" N. latitude (Quinault River), and east of longitude 125°44'00".
Quinault	Between 47°40'06" N. latitude (Destruction Island) and 46°53'18" N. latitude (Point Chehalis), and east of longitude 125°44'00".

(e) *Quota.* Of the total allowable catch in IPHC Regulatory Area 2A, 50,000 pounds (23 metric tons) is suballocated to the U.S. treaty Indian tribes regardless of where the fish are taken by those tribes in Regulatory Area 2A. All fish taken by members of U.S. treaty Indian tribes in Subarea 2A during the season described in paragraph (f)(1) of this section will count toward this quota whether or not the fish are sold.

(f) *Season.* (1) For members of U.S. treaty Indian tribes, the commercial fishing season in Subarea 2A–1 shall commence on April 30 and terminate when the quota for the tribes specified in paragraph (e) of this section is reached, or on October 31, whichever is earlier.

(2) For members of the U.S. treaty Indian tribes, a subsistence and ceremonial fishing season in Subarea 2A–1 shall commence on April 30, 1986 and 1987, and terminate on December 31, 1986, and October 31, 1987. In this subsistence and ceremonial fishery, treaty Indians may take and retain, but not sell, up to two halibut per day caught on hook-and-line gear.

(g) *Identification of U.S. treaty Indian.* Any member of a U.S. treaty Indian tribe as defined in paragraph (c) of this section who is fishing under this part shall have in his or her possession a valid treaty Indian identification card issued pursuant to 25 CFR Part 249, Subpart A. This identification is not a substitute for the commercial halibut vessel license required of all commercial halibut fishermen by the IPHC.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Determination of Endangered Status for the Least Bell's Vireo

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines the least Bell's vireo (*Vireo bellii pusillus*) to be an endangered species. This action is being taken because loss of habitat has greatly restricted the vireo's breeding range, and nest parasitism by the brown-headed cowbird (*Molothrus ater*) has greatly reduced nesting success within much of its remaining breeding habitat. The action is based, in part, on a petition received by the Service on November 8, 1979. The least Bell's vireo presently occurs in southwestern California and northwestern Baja California, Mexico, an area representing only a fraction of its former range. The final decision on determination of critical habitat included in the proposed rule is postponed in accordance with section 4(b)(6)(C) of the Endangered Species Act. The rule provides protection to all populations of this bird.

DATES: The effective date of this rule is June 2, 1986. In a separate document published in today's **Federal Register**, the Service reopens the comment period on the proposed critical habitat designation.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours at the U.S. Fish and Wildlife Service, Lloyd 500 Building, 500 NE. Multnomah Street, Suite 1692, Portland, Oregon 97232.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne S. White, Chief, Division of Endangered Species, at the above address (503/231–6131 or FTS 429–6131).

SUPPLEMENTARY INFORMATION:

Background

The least Bell's vireo is a small, gray, migratory songbird that feeds mainly on insects. The bird usually constructs its nest low in thickets along willow-dominated riparian habitats. The normal clutch of four eggs is incubated about 14 days. The young remain in the nest approximately 10–12 days. The least Bell's vireo arrives in its breeding habitat in mid-March to early April, and departs in late August and September for its wintering range in Mexico.

Three other subspecies of Bell's vireo are recognized by the American Ornithologists' Union (1957): *Vireo bellii bellii* of the midwestern United States; *V. b. medius* of Texas; and *V. b. arizonae* of the southwestern United States and northern Mexico. While all are fairly similar in behavior and life history, all the subspecies are geographically separated on their breeding ranges (Hamilton 1962). Virtually all Bell's vireos winter in Mexico.

The least Bell's vireo occupies a more restricted nesting habitat than the other subspecies. It primarily inhabits dense, willow-dominated riparian habitats with lush understory vegetation, which is limited to the immediate vicinity of water courses. The other subspecies of Bell's vireo also inhabit upland areas such as desert scrub. Thus, the narrow and limited nature of the habitat of the least Bell's vireo makes the subspecies more susceptible to major population reductions than are the other subspecies. At the present time no population of more than five pairs is known to occur below a major water control project.

Least Bell's vireos are known to nest primarily in willows but also use a variety of shrubs, trees, and vines. The birds forage in riparian and adjoining chaparral habitat (Salata 1983a). Preliminary studies of vireo foraging behavior along the Santa Ynez River and within the Mono Creek Basin (Santa Barbara County) indicate that more than 50 percent of the foraging occurs in the adjacent chaparral community; approximately 70 percent of the foraging observations were obtained from about 200 to 300 yards from the nest (Tom Keeney, biologist, U.S. Army Corps of Engineers, personal communication, July 31, 1985).

No other passerine (perching songbirds) species in California is known to have declined as dramatically as the least Bell's vireo. It primarily nests in small, remnant segments of willow-dominated riparian habitats. Most populations contain less than five breeding pairs. Once widespread and abundant throughout the Central Valley and other low-elevation riverine valleys, its historical breeding range extended from interior northern California (near Red Bluff, Tehama County) to northwestern Baja California, Mexico. In the last several decades, the subspecies apparently has been totally extirpated from the Sacramento and San Joaquin Valleys, which once were at the center of its breeding range. Its breeding range is now restricted (as of 1983–1984) to several localities in the Salinas River Valley, Monterey and San Benito Counties; one locality (as of 1979) along the Amargosa River, Inyo County; and numerous small populations in southern California south of the Tehachapi Mountains and in northwestern Baja California, Mexico.

Widespread loss of riparian habitats and brood parasitism by the brown-headed cowbird (*Molothrus ater*) have precipitated the decline in the least Bell's vireo. Destruction of riparian woodlands may have rendered the least Bell's vireo incapable of withstanding the spectacular increase in brown-headed cowbirds that began in the 1920's (Grinnell and Miller 1944, Gaines 1974, Laymon 1980). The population decline of the vireo has been well documented.

In 1973 no least Bell's vireo was found during an intensive search in formerly occupied habitat between Red Bluff, Tehama County, and Stockton, San Joaquin County (Gaines 1974). In 1977, the U.S. Fish and Wildlife Service reviewed the literature, examined museum material, and contacted numerous National Audubon Society chapters and knowledgeable field observers for information on the status of the least Bell's vireo (Wilbur 1980a).

Since then, several intensive vireo surveys of virtually all potential breeding habitat in California have been conducted (Gaines 1977, Goldwasser 1978, Goldwasser *et al.* 1980, unpublished Fish and Wildlife Service data). In total, least Bell's vireos have been reported from only 46 of over 150 former localities (some localities cover several miles of a water course) surveyed in the U.S. from 1977 through 1985. The surveys are based upon singing (or territorial) males. Counts of such males are an index to the population levels and are considered to be the maximum number present, since one male in five may not be paired or breeding at the time of the count. Based on this information, the present breeding population status of least Bell's vireo per county in California is as follows:

County	Sites [a]	Males [b]
San Benito	1	1
Monterey [c]	0	0
Inyo [c]	0	0
San Bernardino [c]	0	0
Santa Barbara	3	26
Ventura	1	5
Los Angeles	2	6
Orange	1	1
Riverside	9	29
San Diego	30	223
Total	46	291

[a] Number of different known breeding localities.
[b] Number of known territorial males.
[c] No known breeding in 1985.

BEST COPY AVAILABLE

Based on surveys conducted from 1977 to 1985, the Service estimates that approximately 300 territorial male least Bell's vireos occur in California (Fish and Wildlife Service, unpublished data). Preliminary surveys in Baja California, Mexico, resulted in the location of a number of small populations, but suitable habitat is declining and limited (Wilbur 1980b). There are probably several hundred breeding pairs in Baja California (Wilbur 1980b).

On November 8, 1979, the Service received a petition from James M. Greaves to list the Arizona and least Bell's vireos as endangered. A notice of acceptance of the petition and status review was published on February 6, 1980 (FR 8030). Based on the best scientific and commercial data available and other comments submitted during the status review, the Service found that the petitioned action was warranted for the least Bell's vireo on October 13, 1983 (49 FR 2485, January 20, 1984); however, action was precluded by other pending listing actions, in accordance with section 4(b)(3)(C)(i) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*). Section 4(b)(3)(C)(i) recycles such petitions, which resulted in a new finding deadline of October 13, 1984. A finding was made October 12, 1984, that this action on the least Bell's vireo was still warranted but precluded. Publication of the proposed rule appeared on May 3, 1985 (50 FR 18968), fulfilling the next finding required under section 4(b)(3)(B)(ii) of the Act.

Information generated from the above February 6, 1980, Notice of Status Review indicates that the Arizona Bell's vireo if relatively common and widely distributed in a variety of habitats in Arizona, New Mexico, and Mexico. It is not primarily restricted to early riparian successional stages as is *V. b. pusillus*. Although density estimates of *V. b. arizonae* along the Colorado River and adjacent areas are very low, the subspecies appears to be doing well throughout most of its geographical range (USFWS status review data). Thus, the proposal published by the Service was restricted to the least Bell's vireo (*V. b. pusillus*). A finding that the petitioned action for the Arizona Bell's vireo was not warranted was published January 20, 1984 (49 FR 2487).

Summary of Comments and Recommendations

In the May 3, 1985, proposed rule and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. A newspaper notice was published in the *Blade Tribune* (May 31, 1985), *San Diego Transcript* (May 29, 1985), *San Bernardino Sun* (May 29, 1985), *San Diego Tribune* (May 30, 1985), *News Press* (May 29, 1985), *Enterprise* (May 31, 1985), *Los Angeles Times* (June 7, 1985), *Riverside Press* (May 30, 1985), and *San Diego Union* (May 30, 1985), all of which invited general public comment. A public hearing was requested by a number of interested parties. Public hearings were conducted in San Diego on July 30, 1985; in Oxnard on July 31, 1985; and in Anaheim, on August 1, 1985. A total of 370 individuals attended the hearings. Notification of the public hearings and an extension of the comment period to August 30, 1985, was published on July 9, 1985 (50 FR 27992). An additional notification extending the comment period to December 2, 1985, was published on October 3, 1985 (50 FR 40424). These two additional notifications were also published in the aforementioned nine newspapers in July and October, respectively.

During the comment period, totaling approximately 6 months, 219 comments on listing were received. Of the 180 comments that stated a position on listing, 171 (95%) supported listing and 9 (5%) did not; 39 comments were non-substantive. These comments are discussed below.

Support for the listing proposal was voiced by four elected officials, California Department of Fish and Game, several local government entities, 15 conservation organizations (or branches thereof), and 139 other interested parties.

Little opposition was received regarding the need to list the least Bell's vireo; however, concern over the listing was voiced from three local agencies, one organization, two landowners, and three other private parties. A number of developers, landowners, local agencies, several State agencies including the California Department of Transportation, and local governments submitted comments regarding the possible effects that listing, and particularly, designation of critical habitat, might have on planned activities and development.

Because of the complexity of the economic analysis that must accompany the final rule designating critical habitats and the large number of comments and data received on these habitats, the Service has decided to make final only the listing portion of this rule at this time so that immediate protection of the least Bell's vireo would be possible. Section 4(b)(6)(C)(ii) of the Act allows the Service to extend the deadline for designating critical habitat for up to one year (May 3, 1987, in this case), if critical habitat is not yet determinable and/or immediate protection is needed for the species through a final listing action. Both of these reasons apply in this instance; therefore, the Service is now going forward with this final listing rule. Hence, the comments pertaining to designation of critical habitat or the potential economic impacts of such designation will not be discussed here but will be addressed when a final decision on critical habitat is made. Only comments addressing the issue of listing this species are responded to here. Numerous comments on administrative procedures, document availability, and future management of the vireo were received. Those comments that do not address the issue of listing will not be specifically responded to here.

Written comments and oral statements obtained during the public hearings and comment periods are combined in the following discussion. Opposing comments and other comments questioning the rule can be placed in a number of general groups, depending on content. These categories of comment, and the Service's response to each, are listed below.

Comment 1: What studies were used by the Service to support the decision to list the vireo and where are these available for review?

Service response: The studies reviewed by the Service are listed in the Reference Cited section of the proposed rule and in this final rule. In some cases, the data were supplied by personal communication with field biologists. Cited reports are available in the Service's Regional Office in Portland, Oregon, or in the Laguna Niguel, California, and Sacramento, California, field offices. Articles that were published in journals and were cited are available in many university libraries.

Comment 2: The notices for the public hearings and comments were inadequate and were not made public.

Service response: The Service's notification process is extensive and is summarized at the beginning of this section. The Service is required to publish a notice in local newspapers soliciting comments on the proposal and stating the particulars of any public hearing, if such is scheduled; to give notice of the proposal to appropriate scientific organizations; and to hold a

VOL 51 ISS 85 MY 2 1986 UMI

public hearing, if requested to do so within 45 days of the date of publication of the proposed rule. All requirements pertaining to the notification process were met by the Service as indicated at the beginning of this section.

Comment 3: The least Bell's vireo is already protected because it is listed as an endangered species by the State of California. Nesting habitat is adequately protected by county policies and State procedures. Section 4(b)(1)(A) of the Act states that those efforts being made by any state or political subdivision to protect such species must be considered in the decision to designate the species as federally listed.

Service response: In 1980 the least Bell's vireo was listed as endangered by the State of California. Since that time vireo numbers have continued to decline throughout most of its range. As set forth under Factor E in the section below on Summary of Factors Affecting the Species, the recent increases along the Santa Margarita River can be attributed to an active cowbird trapping program and not to a natural increase. Vireo habitat continues to disappear and/or be adversely modified in spite of its State listing. Recognition of the least Bell's vireo as a federally listed species will provide additional protection and the further potential for restoring its habitat and for managing the bird.

Comment 4: Significant habitat has been developed along minor streams and in narrow canyons from agricultural runoff. Expansion of the imported water supply and hillside agriculture has changed the runoff pattern so that year-round flow is now common. Riparian vegetation, especially willows, has developed in these narrow canyons and may be suitable for least Bell's vireos. These areas should be surveyed before any action is taken on listing the least Bell's vireo.

Service response: The Service is obligated to use the best available biological information to determine whether a species warrants listing. The Service has checked many sites with this type of habitat and found virtually no vireos. No data are currently available to support the suggestion that these small willow-dominated areas created by agricultural runoff or other small sites are important to the known status of the vireo or that such areas may be used for breeding purposes by vireos. The future of these artificially-created habitats is precarious because agricultural runoff water can be discontinued at any time. Alternatively, over time these habitats may be otherwise suitable for several decades, but may become too mature for the vireo because of a lack of scouring or other forces needed for long-term habitat maintenance. Mature riparian forests are not selected by the vireos for nesting; the birds select younger growths of willows and associated vegetation. The total number of vireos using such habitats (i.e., from agricultural runoff), even in the aggregate, appears to be very small.

Comment 5: In the Fallbrook area, habitat losses are not attributable to agricultural development. In fact 25–30 percent of all irrigation water applied to orchards ends up as return flow into channels. During 1978–1985 when most of the orchards were planted, the nitrate rich runoff water contributed significantly to enhancing the depth and breadth of the willow groves where little growth occurred previously.

Service response: The Service evaluated the past and current threats to determine if the least Bell's vireo should be designated as endangered. This evaluation indicates that conversion of land throughout the range of the vireo for agricultural purposes; pumping to withdraw water for crop maintenance; and construction of dams, channels, and other water conveyance systems have resulted in the loss of substantial vireo habitat. Agricultural practices have also inadvertently encouraged the expansion of the range of the brown-headed cowbird (Wilbur 1980a, Laymon 1980).

As far as the Fallbrook area is concerned, no data were supplied or available to the Service indicating that agricultural runoff was largely responsible for creating these willow habitats. There are other possible explanations for these changes. For example, as 1978–1980 were particularly wet years in this area, it appears possible that the recharging of the groundwater table after a lengthy dry period may have contributed to some of the new or expanded willow growth. Ground water may allow for riparian growth, but it does not provide for the periodic scouring that is a principal feature of the riparian habitat normally used by the vireo. Many riparian plants are routinely scoured by heavy water flows. The regrowth referred to by the commenter may be a response to natural patterns of scouring and regrowth rather than to the agricultural runoff. Periodic scouring would have to recur in order to maintain the vireo habitat in its early successional stages.

Comment 6: It is incorrect to say that San Diego County has sustained a loss of habitat. For example, the Tijuana River was devoid of riparian vegetation until the 100-year flood in 1980 caused regrowth. As the result of water importation, many new habitats have been created, supporting many more least Bell's vireos in southern California. All species of birds have increased because of the greater availability of water, including the native cowbird. In fact, the least Bell's vireo is not endangered.

Service response: Importation of water and groundwater pumping has encouraged agricultural conversion of riparian habitat because of a reliable, constantly available, and relatively inexpensive source of water. Some habitat undoubtedly has been created by agricultural runoff, but it appears to mainly entail small, isolated islands of riparian habitat that are little used by vireos. The creation of such isolated pockets of riparian habitat does not offset the more widespread losses of larger riparian areas in the past 80 years. There is no evidence to support the contention that the brown-headed cowbird is a native species of California, with the possible exception of a portion of the lower Colorado River and as an occasional vagrant. Its range expansion to the north and west has been well documented since the early 1900's (Laymon 1980).

There is no evidence to support the contention that all species of birds have increased in southern California as the result of importation of water or for any other reason. On the contrary, available data indicate that numerous species are experiencing declines in population numbers, several bird species are listed as endangered in southern California, and a number of species are considered candidates for listing. The Tijuana River, prior to settlement, was subject to regular scouring floods. Flood control projects in Mexico and agricultural practices in San Diego County had largely eliminated the habitat of the vireo sometime prior to the 1980's.

Comment 7: Surveys for the least Bell's vireo were started during a time of very adverse hydrologic conditions and the results are not representative of actual conditions today. A 32-year drought (1946–1977) ended with abnormally high rainfall in 1978. During 1978–1980, rainfall was exceptionally heavy. Only in the last year has large-scale regrowth of willows occurred to the extent that protected nesting sites were available to the least Bell's vireo. As the level of water in groundwater basins declines, there will be times when habitat will contract and disappear. The importance of a perennial water supply in creating and maintaining riparian vegetation should be assessed. Also, heavy precipitation and runoff from the wet winters (1978 to 1983) caused an increase in the width of some riparian habitat. Because the recent wet period has ended, much of the recently expanded vegetation is expected to die back. Long-term protection should concentrate on riparian habitat that is dependent on stream flow and not currently existing groundwater sources.

Another commenter offered views directly contrary to the above and stated that many climatologists believe the weather has been unusually benign the last 30 years and that climate is now returning to the normal pattern of instability. Dry periods will be drier and wet periods will be wetter. Groundwater in the river basins will be the most stable element because of its ability to absorb, store, and slowly release accumulated surface flows. Unless additional dams are constructed and/or excessive pumping is done, the groundwater basin will continue to recharge and support willows as it has in the past.

Service response: The riparian ecosystems required by the vireo are dynamic systems, and the scouring of vegetation during periodic floods is required to create the low dense vegetation favored by the bird. At the present time, the Service knows of no significant numbers of vireos inhabiting below any major water control project in California or Mexico. Therefore, a surge of groundwater flow to surface flows would be required for scouring to maintain habitat quality. Otherwise, the willows will grow beyond the needs of the vireo, and a riparian forest will be created, which is habitat unsuitable to vireos. This is part of the problem in the Central Valley of California.

Natural expansion and contraction of riparian habitat is expected. However, because of the very low number of vireos, extensive contractions of habitat for more than a couple of years may suppress vireo numbers and reproduction to a point from which they could not recover.

Whether or not vireo habitat can be maintained by groundwater basins has bearing on the need to list the vireo. Groundwater tables apparently are in good condition now because of the series of wet winters, yet the vireo is still suffering from low numbers. As indicated above, high ground water levels (or low stream floods) allows the riparian vegetation to mature beyond the needs of the vireo. Periodic and regular scouring floods or some other agent must cause the habitat to revert to early successional stages. Willows and other vegetation over several yards (meters) in height are of little value to the vireo, except for some feeding.

Comment 8: Suitable habitat for the least Bell's vireo is plentiful. Rather than habitat being the critical limiting factor, it is predation and parasitism that are primarily responsible for the vireo's low numbers. Loss of riparian habitat and urban encroachment are clearly secondary factors. The San Luis Rey River and other existing and potential habitat in southern California have the capacity to support large populations of least Bell's vireos. During a 1978 survey of 69 miles (110 kilometers) of potential nesting habitat along the San Luis Rey River, Goldwasser (1978) found that only 13 miles (21 kilometers) or 19 percent of the habitat was occupied. What is the relative contribution of cowbird parasitism towards extinction of the vireo versus habitat disturbance?

Service response: The least Bell's vireo has been extirpated from over 95 percent of its former range. The contraction of range and reduction in numbers from a "common" species to an "extremely rare" one, has resulted, in part, from loss and/or adverse modification of habitat as described in the Summary of Factors Affecting the Species section. The Service also recognizes the substantial adverse impact from nest parasitism and predation. However, the Service has seen no evidence to document that cowbird parasitism plays the sole or primary role in the reduction in vireo numbers and range. The Service agrees that some apparently suitable vireo habitat is unoccupied, possibly because the previous population has been extirpated and vireo numbers are not high enough to provide a substantial pool of individuals to recolonize. In summary, the Service believes that the vireo is endangered by a combination of these factors and that the loss of habitat has been a significant contributory element along with the cowbirds.

Comment 9: Many wildlife species are numerous at Prado Dam only because of the artificial expansion of the riparian habitat created by the operation of Prado Dam.

Service response: Historically the Prado Basin area and adjacent Santa Ana River supported large numbers of wildlife species. Channelizing and concrete lining of the majority of the Santa Ana River downstream of Prado Dam has greatly diminished the amount of riparian habitat available for wildlife. Prado Dam encompasses an area that contained large amounts of riparian vegetation, much of which was destroyed when the basin was first flooded. Prado Dam may provide more wildlife habitat in Prado Basin than the latter had historically. In the Service's review of the status of the least Bell's vireo, the Service has considered the large reduction (hundreds of miles) in available riparian habitat throughout the vireo's overall range, not just the Santa Ana River area. Only two pairs of vireos are known to breed below Prado Dam on the Santa Ana River.

Comment 10: Riparian habitat along the San Dieguito River in the San Pasqual Valley did not exist in the 1950's prior to acquisition by the City of San Diego or in the 1960's prior to the sand mining activities associated with development of the flood control channels.

Service response: The presence of riparian vegetation as discussed in the response to a previous comment is dependent upon a number of factors. The San Pasqual Valley is owned by the City of San Diego and is an agricultural preserve. Riparian vegetation in the valley is limited by agricultural and sand mining operations. The Service believes that the San Dieguito River was typical of rivers in the area and was capable historically of supporting suitable riparian vegetation for least Bell's vireo. Construction of the Sutherland Dam approximately 50 years ago along the San Dieguito River resulted in loss of suitable vireo habitat downstream. The Service received no data to support the suggestion that sand mining operations or the City of San Diego have contributed directly to the establishment of significant amounts of riparian habitat where historically there has been none. Some suitable habitat is present now and is supporting a limited number of breeding least Bell's vireos.

Comment 11: The Service needs to assess the impacts on the survival of least Bell's vireos if no Federal or State projects are permitted, thereby eliminating a source of funding for habitat restoration.

Service response: The Service must base its decision to list a species on the five factors given in the "Summary of Factors Affecting the Species" section as mandated by the Act. Economics may not be considered in making the final decision on a listing proposal. It is not the intention of the Service to stop Federal or other projects. However, projects involving Federal funding or approval will be evaluated through the Section 7 consultation process. If through consultation the Service determines that a Federal project is likely to jeopardize the continued existence of the least Bell's vireo or result in the destruction or adverse modification of any designated critical habitat, which may be determined later, the Service may recommend reasonable and prudent alternatives to the proposed action.

VOL 51 ISS 85 MY 2 1986 UMI

Comment 12: The least Bell's vireo does not currently nest in Prado Basin. In the near future conditions will be too inhospitable for the vireo. The bird should have been protected years ago before plans were made to develop the area. The natural living and breeding habits of the vireo are not conductive to long-term preservation.

Service response: Recent surveys indicate that the vireo population in the Prado Basin-Santa Ana River area has declined to 14 territorial males (U.S. Fish & Wildlife Service, unpublished data). Cowbirds are ubiquitous in much of this area and are seriously reducing vireo productivity. The Service believes that with a suitable cowbird control program, vireo numbers in this area would increase. Plans to develop the area are a further indication that habitat loss and modification are a continuing threat to the vireo.

Comment 13: According to a description of the species and information on its range found in a field guide, the Bell's vireo is widespread and therefore not endangered.

Service response: The cited field guide was referring to the full species of Bell's vireo. The least Bell's vireo is one of four subspecies of Bell's vireo. Restricted to less than 5 percent of its original breeding habitat in California, the least Bell's vireo has approximately 300 territorial males in the United States and an undetermined number (thought to number several hundred pairs) in Mexico. The other three subspecies do not now appear to be at any risk to their continued existence.

Comment 14: Even with preservation of habitat, is it not too late to save the vireo?

Service response: The Service believes that it is not too late and an active recovery program will substantially augment vireo numbers to a point where extinction is far less probable. Prospect for recovery, however, is not a factor to be considered in listing a species (see below).

Comment 15: Listing the least Bell's vireo is premature. The listing process should be suspended for 24 months during which time local agencies will establish a cooperative cowbird trapping program. Local policies will be reviewed and modified to increase protection. Listing is only a passive response, whereas the above program would provide an actual process to conserve the least Bell's vireo.

Service response: The State of California listed the least Bell's vireo as endangered in 1980. The species continues to lose habitat and decline. The Service has carefully reviewed the status of the vireo and believes immediate listing is warranted. A host of actions will be required to conserve the least Bell's vireo, only one of which is cowbird control. While the desire of local agencies to aid in vireo recovery actions is commendable, the Service recognizes that more far reaching action is required. There is also no provision in the Act to delay listing for 24 months. The Service can postpone listing for 6 months pursuant to section 4(b)(6)(B)(i) of the Act but only if substantial disagreement among experts exists regarding the sufficiency or accuracy of the available data on the status of the species. No such disagreement exists for the least Bell's vireo.

Comment 16: Many comments anticipated future Section 7 consultations on Federal projects involving habitat areas occupied by the least Bell's vireo. Highway projects, oil drilling, recreational facilities, and other types of construction activities were identified. One comment implied that the "traditional concept of mitigation" could be used to resolve project impacts if no critical habitat was designated.

Service response: Federal agencies are required to consult formally with the Service if they propose to authorize, fund, or carry out any activity that may affect the least Bell's vireo, wherever these birds are found and regardless of any critical habitat designation.

Through formal consultation with the Service, the Federal agency determines whether, and in what manner, it can carry out its action consistent with the "jeopardy" prohibition of section 7(a)(2). The traditional concept of mitigation does not control in the assessment of the likelihood of jeopardy. If the Service finds that the action is not likely to jeopardize the vireo, then project modifications are not required by section 7(a)(2). However, if it is determined that the action is likely to jeopardize the continued existence of the vireo, then reasonable and prudent alternatives to the proposal should be considered. Such alternatives, which satisfy the requirements of Section 7(a)(2), may also involve significant project modifications.

Comment 17: Several commenters requested that the Service prepare an Environmental Impact Statement (EIS) in accordance with the National Environmental Policy Act (NEPA) before issuing a critical habitat rule.

Service response: For the reasons set out in the NEPA section toward the end of this document, the Service takes the position that rules issued pursuant to section 4(a) of the Endangered Species Act, including critical habitat rules, do not require the preparation of an EIS.

To summarize the comments and data provided under the proposal, the Service received no data indicating that the status of the vireo is far healthier than previously thought, that there were "thousands of vireos" still breeding in California, or that large blocks of appropriate habitat can be found below flood control dams or in some other parts of California or Mexico. No data were presented contradicting the effects of cowbirds on the reproductive success of the vireos. A few hundred pairs of vireos in several dozen locations exist in California, with probably similar numbers in Baja California, Mexico.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that the least Bell's vireo (*Vireo bellii pusillus*) should be classified as an endangered species. Procedures found at section 4(a)(1) of the Act and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the least Bell's vireo (*Vireo bellii pusillus*) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* The least Bell's vireo is predominantly restricted to dense riparian habitat on its breeding range in California and northwestern Baja California. Over 95 percent of historic riparian habitat has been lost throughout its former breeding range in the Central Valley of California, which may have accounted for 60–80 percent of the original population. Similar habitat losses have also occurred throughout its remaining stronghold in southern California, and habitats are currently declining in Baja California as well (Wilbur 1980b). These widespread losses are mainly attributable to flood control and water development projects, agricultural development, livestock grazing, invasive exotic plants, off-road vehicles, and urban development resulting from rapidly expanding human populations. Despite growing concern at all levels of government for declining riparian vegetation, substantial amounts of riparian habitat continue to be lost each year.

In summary, with about 65 percent of the remaining United States population threatened by at least four major construction projects (see below) and the remaining 35 percent restricted to small, isolated habitats vulnerable to a variety of imminent threats, the least Bell's vireo is becoming increasingly threatened by extinction.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* Not applicable.

C. *Disease or predation.* As with other song birds (passerines), the least Bell's vireo has always been subject to nest predation. Unlike many other passerines, however, least Bell's vireos typically build their nests within about 40 inches (1 meter) of the ground, where they are accessible to a variety of terrestrial predators that prey on eggs or young (Wilbur 1980a; Salata 1981, 1983a). Male vireos often sing while on the nest, thereby potentially increasing predation rates by attracting predators. With the introduction of house pets and feral cats and with the surrounding of remnant breeding habitats by encroaching urban development, abnormally high predator densities may occur. In such situations, vireos undoubtedly face greater predation pressure than in larger, more natural habitats.

Recent multi-year studies by Greaves and Gray (unpublished reports) and Salata (1981, 1983a) quantified predation rates at the Santa Ynez River and Santa Margarita River populations, respectively. They found that about 40 percent of all nesting attempts along the Santa Ynez River failed because of predation and that about 30 percent failed because of predation along the Santa Margarita River. Predation rates of approximately 25 percent were noted during 1984 along the San Diego, Sweetwater, and San Luis Rey Rivers (Jones 1985).

D. *The inadequacy of existing regulatory mechanisms.* The least Bell's vireo is protected by both State of California and Federal laws. It is also protected under the land management plans of some local jurisdictions (e.g., zoning, parks). The Migratory Bird Treaty Act (16 U.S.C. 701–711) establishes provisions regulating the taking, possessing, transporting, and import of migratory birds, including all Bell's vireos. The vireo has not been subjected to any commercial activities. However, its habitat is not protected under those laws and is being incrementally destroyed and degraded. The Endangered Species Act offers additional possibilities for protection and management of this species' habitat.

E. *Other natural or manmade factors affecting its continued existence.* The effect of nest parasitism by the brown-headed cowbird has been greatly enhanced by anthropogenic factors, resulting in increased cowbird habitat and range and decreased vireo habitat. The brown-headed cowbird was rare in California prior to 1900, but expanded tremendously in both range and numbers (Garrett and Dunn 1981) as irrigated agriculture and animal husbandry increased (Wilbur 1980a). Cowbirds do not build their own nests but instead parasitize the nests of other bird species (i.e., lay their eggs in the nests of other species), usually to the detriment of the host birds' own eggs or young. The first record of nest parasitism on the least Bell's vireo was in 1907, after which reported incidences increased rapidly (Wilbur 1980a). The cowbird is not dependent upon the vireo, as it can use a large number of other species as host for its eggs. Vireo nests appear to be among the easiest to locate by cowbirds and may be favored, if present.

Recent studies by Greaves and Gray (unpublished reports) and Salata (1981, 1983a) have documented parasitism rates of between 20 and 47 percent from 1980 to 1982 along the Santa Ynez and Santa Margarita Rivers, respectively. Laymon (in litt.) suggests rates above 20% are probably detrimental to the vireo population's recruitment; at levels above 40% the local population may be expected to decline. Although the results of these studies do not indicate inordinately high parasitism rates compared to those of other common host species of brown-headed cowbirds, they do support the hypothesis that cowbird parasitism is significantly reducing least Bell's vireo reproductive success. During 1984 in a study of least Bell's vireo reproductive success along several rivers in San Diego County, Jones (1985) found a parasitism rate of 80 percent, a high rate that significantly affected vireo reproductive success.

Different rates would be expected at other breeding locales of least Bell's vireo, depending on an array of environmental factors. Considering the present widespread abundance of cowbirds throughout the historic range of the vireo, it appears that cowbird parasitism may greatly increase the probabilities of localized extinction to many of the small, vulnerable breeding populations. Further, depressed nesting productivity in the larger vireo breeding populations may: (1) Limit the opportunities (a) for population dispersal into unoccupied habitats or (b) to augment smaller populations and (2) may prevent founding pairs from successfully producing enough young to establish a new local population. An active cowbird control program by the Marine Corps on Camp Pendleton (Santa Margarita River), during April through July in 1983, is credited with increasing the vireo productivity within the study area from 104 fledglings per 100 breeding adults in 1982 to 143 fledglings per 100 breeding adults in 1983 (Salata 1983b).

The widespread habitat losses described above have fragmented remaining breeding populations into small, disjunct, widely dispersed subpopulations. Of the 46 localities currently known to support breeding populations, 34 support 4 or fewer territorial males, and only 7 sites support more than 10 breeding pairs. The 5 largest remaining populations, the Sweetwater River (46 territorial males), Prado Basin-Santa Ana River (14 territorial males), Santa Margarita River (85 territorial males), Santa Ysabel Creek (16 territorial males), and Santa Ynez River (26 territorial males), represent about 65 percent of the extant population in the United States; each is imminently threatened by a major urban development or water control project planned in the near future. Many of the smaller subpopulations are similarly threatened by a variety of projects associated with the increasing human population throughout the range of the vireo.

Biogeographic theories suggest that these small, remnant populations (accounting for about 35 percent of the total population) are more vulnerable to extirpation than several larger populations. In short, the smaller and more isolated a given local population, the more likely its chances of extinction. Given the high mortality rates of all small migratory songbirds, the significant threat posed by brown-headed cowbird parasitism (see above), and the site tenacity of the subspecies, localized extinctions are a high probability, even without natural or human-caused destruction of local habitats. In many instances, there may be no other vireo populations close enough or there may not be sufficient population recruitment at other breeding areas to repopulate extirpated populations in later years. Also, if local habitats are decimated for a year or two (e.g., by flooding such as occurred in southern California in 1978 and 1980), there may be no nearby habitat available to which vireos can disperse until the scoured riparian habitat regenerates. In this case, vireos may be forced into habitats less suitable to their nesting and foraging requirements, resulting in heightened mortality and reduced reproductive success.

The Service has carefully assessed the best scientific information available regarding the past, present, and future threats faced by this species in

VOL 51 ISS 85 MY 2 1986 UMI

determining to make this rule final. Based on this evaluation, the preferred action is to list the least Bell's vireo as endangered. Its greatly reduced distribution and small population size, loss of habitat, and substantial potential for habitat modification or loss from future development projects, indicate the species warrants endangered rather than threatened status. The bird is clearly in danger of becoming extinct throughout its range in the foreseeable future. A decision to take no action would exclude the least Bell's vireo from needed protection available under theEndangered Species Act. Therefore, no action or listing as threatened would be contrary to the Act's intent. The reasons for postponing the designation of critical habitat are given in the following section. Designation of critical habitat will be addressed in a subsequent Federal Register notice. Elsewhere in this issue of the Federal Register the Service has reopened the comment period on the proposed critical habitat of May 3, 1985 (50 FR 18968).

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time a species is determined to be endangered or threatened. Section 4(b)(6)(C) further indicates that a concurrent critical habitat determination is not required if the Service finds that a prompt determination of endangered or threatened status is essential to the conservation of the involved species, or that critical habitat is not then determinable. The Service believes that a prompt determination of endangered status for the least Bell's vireo is essential. If the least Bell's vireo were only proposed, but not listed, it would be eligible only for the consideration given under the conference requirement of section 7(a)(4) of the Act, as amended. This does not require a limitation on the commitment of resources on the part of the concerned Federal agencies or applicants for Federal permits. Therefore, in order to ensure that the full benefits of Section 7 and other conservation measures under the Act will apply to the least Bell's vireo, prompt determination of endangered status is essential.

Section 4(b)(2) of the Act requires the Service to consider economic and other impacts of designating a particular area as critical habitat. The Service is in the process of evaluating the information on economic impacts of designating critical habitat that was submitted during the comment period. However, because of the complexities and extent of the activities being assessed, the Service has not completed the evaluation. The Service today reopens the comment period on the critical habitat proposal in order to gather further data on economic impacts, boundaries, and precise habitat needs of the species in order to define more precisely the critical habitat of the vireo. The Service is in the process of performing the economic and other impact analyses required for a determination of critical habitat for the species, and plans to consider a final determination in the near future. The decision on designation of critical habitat must be made by May 3, 1987, pursuant to section 4(b)(6)(C)(ii) of the Act, as amended.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402 and are now under revision (see proposal at 48 FR 29990: June 29, 1983). Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. Critical habitat is not being designated for the vireo at this time.

A variety of Federal agencies have jurisdiction and responsibilities within vireo habitat, and Section 7 consultation might be required in a number of instances. At this point, known proposals that could require consultation include: modification of Gibraltar Reservoir on the Santa Ynez River (Army Corps of Engineers (CE) and U.S. Forest Service), a flood control project on the Santa Ana River (CE), a flood control project (CE), highway construction projects (Federal Highway Administration), urban development in wetlands at the Sweetwater Reservoir (CE), and a water project on the Santa Margarita River (Bureau of Reclamation and U.S. Marine Corps). These and other projects have the potential for significant adverse effects on the least Bell's vireo.

The Bureau of Reclamation and U.S. Marine Corps have coordinated with the Service concerning possible projects that may be authorized for the Santa Margarita River at Camp Pendleton. An interagency agreement has been established to provide a mechanism leading to the timely implementation of a conservation strategy for native flora and wildlife species at Camp Pendleton and their habitats in the Santa Margarita floodplain and estuary. This agreement has identified the least Bell's vireo and other listed species as important public trust resources to be conserved.

Controlled burning by various government agencies to reduce fuel loads in uninhabited areas may benefit the vireo, if done at the right time and in the proper manner. The Forest Service may have to consult on some of their controlled burning programs in areas where vireos are present.

In the case of highway projects in southern California, those that may affect the vireo are major bridge crossings of riparian habitat. Many similar crossings already exist in vireo habitat that do not appear to be substantial adverse influences on the vireo, although this needs further study. Each such future project may become the subject of a consultation to see what, if any, effects are likely. Only projects with Federal approval or funding are possible candidates for such consultations.

This rule brings sections 5 and 6 of the Endangered Species Act into effect with respect to the least Bell's vireo. Section 5 authorizes the acquisition of lands for the purpose of conserving endangered and threatened species. Pursuant to section 6, the Fish and Wildlife Service would be able to grant funds (should they become available) to the State of California for management actions aiding the protection and recovery of the vireo.

Listing the least Bell's vireo as endangered allows for development of a recovery plan for this bird. Such a plan will draw together the State, Federal, and local agencies having responsibility for conservation of the vireo. The recovery plan will outline an administrative framework, sanctioned by the Act, for agencies to coordinate activities and cooperate in their conservation efforts. Habitat Conservation Plans (HCPs) and other comprehensive plans, such as those being coordinated by the San Diego Assocation of Governments task force on the vireo, will be a part of and coordinated through the recovery plan process. The recovery plan will describe recovery priorities and estimate the cost of various tasks necessary to accomplish them. It will recommend appropriate functions to each agency and a time frame within which to complete them.

The Act and implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take (including harass, harm, etc.—see definitions at 50 CFR 17.3), import or export, ship in interstate commerce in the course of a commercial activity, or sell or offer for sale in interstate or foreign commerce any endangered wildlife species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits are at 50 CFR 17.22. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities.

The least Bell's vireo is not used for economic purposes, is not a commercial species, and is not legally hunted, sold, or traded. Only a few requests for taking permits are anticipated. This bird is presently protected under 50 CFR Parts 10 and 20 as a migratory bird.

The Service will review the least Bell's vireo to determine whether it should be placed upon the Annex of the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere, which is implemented through Section 8A(e) of the Act, and whether it should be considered for other appropriate international agreements.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to Section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244). The Service's determination includes and applies to critical habitat rules, none of which in the past have been found to be major Federal actions under NEPA.

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Reopening of Comment Period on the Proposed Critical Habitat Designation for the Endangered Least Bell's Vireo

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; reopening of comment period.

SUMMARY: The Service gives notice that the comment period is reopened for 90 days to receive further comments concerning the proposed designation of critical habitat for the least Bell's vireo. The vireo has been listed as an endangered species as published in today's **Federal Register.** A final decision regarding designation of critical habitat will be made after all materials received by the Service have been evaluated.

DATE: Comments from all interested parties must be received by July 31, 1986.

ADDRESS: Comments and materials should be sent to the Regional Director, U.S. Fish and Wildlife Service, Suite 1692, Lloyd 500 Building, 500 NE. Multnomah Street, Portland, Oregon 97232. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne S. White, Chief, Division of Endangered Species, at the above address (503/231-6131 or FTS 429-6131).

SUPPLEMENTARY INFORMATION:

Background

In today's **Federal Register,** the Service issues a final rule to list the least Bell's vireo (*Vireo bellii pusillus*) as an endangered species and afford it immediate protection under the Endangered Species Act (16 U.S.C. 1531 *et seq.*). Due to the nature and extent of the threats faced by the least Bell's vireo, it is deemed to be essential to the conservation of the species that it be listed without further delay. As explained in the final rule, because of the complexity of the economic analysis that must accompany the designation of critical habitat, the large number of comments and data received, and the difficulty and significance of the issues pertaining to the proposed critical habitat designation, the Service has decided to defer a decision on the critical habitat designation. Section 4(b)(6)(C) of the Act allows the Service to extend the prescribed period for designation of critical habitat for up to one year: May 3, 1987, in this case. Accordingly, the Service reopens, for 90 days, the comment period on the proposed designation of critical habitat (May 3, 1985; 50 FR 18968) for the least Bell's vireo.

Because the comments previously submitted by all parties in 1985 on the proposed rule concerning critical habitat for this species will still be considered, there is no need for duplicate comments to be resubmitted during this comment period by any party. Comments made at past public hearings carry equal weight with written comments.

Author

The primary author of this notice is Ms. Carolyn Bohan, U.S. Fish and Wildlife Service, 500 NE. Multnomah St., Suite 1692, Portland, Oregon 97232 (503)/231-6131 or FTS 429-6131).

Authority

The authority for this action is the Endangered Species Act (16 U.S.C. 1531 *et seq.*; Pub. L. 93-205, 87 Stat. 884; Pub. L. 94-359, 90 Stat. 911; Pub. L. 95-632, 92 Stat. 3751; Pub. L. 96-159, 93 Stat. 1225; Pub. L. 97-304, 96 Stat. 1411).

The United States Government Manual 1985/86

As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to see about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and subject/agency indexes.

Of significant historical interest is Appendix A, which describes the agencies and functions of the Federal Government abolished, transferred, or changed in name subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 15; at 9 am.

Rules and Regulations

Federal Register
Vol. 51, No. 86
Monday, May 5, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 86-045]

Limited Ports of Entry; Atlanta, GA

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule.

SUMMARY: This document affirms the interim rule which amended the regulations in 9 CFR Part 92 by adding Atlanta, Georgia, to the list of limited ports of entry for animals and animal products (such as animal semen, animal test specimens, hatching eggs, and day old chicks) which do not appear to require restraint and holding inspection facilities. It was necessary to add Atlanta, Georgia, to this list to reflect the availability of the Veterinary Services inspection facilities and personnel so that importers can make arrangements for the importation of such animals and animal products.

EFFECTIVE DATE: May 5, 1986.

FOR FURTHER INFORMATION CONTACT: Dr. S.S. Richeson, Import-Export Animals and Products Staff, VS, APHIS, USDA, Room 843, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8172.

SUPPLEMENTARY INFORMATION:

Background

The regulations in § 92.3 of 9 CFR Part 92 list a large number of ports with inspection stations or quarantine stations maintained by Veterinary Services for the importation of animals and animal products. In addition to air and ocean ports and several other types of ports, § 92.3 lists certain limited ports for the importation of animals and animal products (such as animal semen, animal test specimens, hatching eggs, and day old chicks) which do not appear to require restraint and holding inspection facilities.

An interim rule published in the Federal Register on February 5, 1986 (51 FR 4480-4481), amended § 92.3(e) of the regulations by adding Atlanta, Georgia, to the list of such limited ports for entry. The interim rule was made effective upon publication. Comments were solicited for 60 days following publication. No comments were received. The factual situation which was set forth in the interim rule still provides a basis for the amendment.

Executive Order 12291 and Regulatory Flexibility Act

This action has been reviewed in accordance with Executive Order 12291 and has been classified as not a major rule. The Department has determined that this action will not have a significant effect on the economy; will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this rulemaking action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

It is anticipated that the addition of Atlanta, Georgia, to the list of limited ports for the importation of animals and animal products which do not appear to require restraint and holding inspection facilities will not cause a substantial change in the number of such animals and animal products entering the United States or in the number of persons importing such animals and animal products.

Therefore, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. (See 7 CFR 3015, Subpart V).

List of Subjects in 9 CFR Part 92

Animal diseases, Canada, Imports, Livestock and livestock products, Mexico, Poultry and poultry products, Quarantine, Transportation, Wildlife.

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

Accordingly, the interim rule amending 9 CFR Part 92 which was published at 51 FR 4479-4480 on February 5, 1986, is adopted as a final rule.

Authority: 7 U.S.C. 1622; 19 U.S.C. 1306; 21 U.S.C. 102-105, 111, 134a, 134b, 134c, 134d, 134f, and 135; 7 CFR 2.17, 2.51, and 371.2(d).

Done at Washington, D.C., this 29th day of April 1986.

Gerald J. Fichtner,
Acting Deputy Administrator, Veterinary Services.

BILLING CODE 3410-34-M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 353

Reports of Apparent Crimes Affecting Insured Nonmember Banks

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Final rule.

SUMMARY: The FDIC has adopted a regulation to require insured nonmember banks to report, on a prescribed form, criminal violations of the United states Code that involve or affect such banks to the appropriate investigatory and prosecuting authorities, as well as to the FDIC. Robberies, burglaries and nonemployee larcenies, which are subject to the requirements of 12 CFR 326.5(c), are exempt from the requirements of the rule. The central purpose of the report form requirement is to assure that the information needed by investigators and

UMI

VOL 51 ISS 86 MY 5 1986 UMI

prosecutors for effective law enforcement is provided in an orderly and timely fashion. Also, the FDIC, by receiving a copy of the reports, will be better able to monitor, and to act to reduce, losses to insured nonmember banks as a result of criminal activity.

EFFECTIVE DATE: June 4, 1986.

FOR FURTHER INFORMATION CONTACT: James R. Dudine, Chief, Special Activities Section, Division of Bank Supervision, FDIC, 550 17th Street, N.W., Washington, D.C. 20429; (202) 898-6750.

SUPPLEMENTARY INFORMATION: The directors of an insured nonmember bank are obligated, by virtue of their fiduciary duties, to cause reports of crimes against the bank to be made to the cognizant investigatory and prosecuting authorities. The FDIC, in the course of exercising its supervisory responsibilities and in the interest of safety and soundness, presently monitors the fulfillment of this obligation through the bank examination process. In view of the threat of increasing bank losses through criminal activity, particularly through crimes involving "insiders", the new rule formalizes the crime reporting requirement, improves the quality and usefulness of crime reports by specifying the information needed for effective law enforcement, and enhances the ability of the FDIC to monitor, and to act to reduce, losses to banks through criminal activity. The rule, including the report form, results from the work and recommendations of an interagency group comprised of representatives of the Federal financial institutions regulatory agencies, the U.S. Department of Justice, Criminal Division, and the Federal Bureau of Investigation.

This rule is adopted following publication by the FDIC of a similar proposed rule on October 24, 1985 on which comments were solicited. 50 FR 43209 (1985). The comments were carefully considered in the course of framing the rule.

Four of the twenty-one comments received addressed the proposed requirement (§ 353.2) that each nonmember insured bank notify the FDIC if its fidelity bond coverage were cancelled or the coverage changed significantly, with one in favor and two opposed. The fourth favored notification but thought it should be given by the bonding company. This requirement has been deleted from the rule in the belief that there are more effective and efficient ways to gather the information and to achieve the objective sought.

Seven commenters opposed the proposed rule in its entirety as unnecessary and unwarranted. Other commenters, while expressing general agreement with the objectives of the proposed rule, raised concern about the lack of a minimum dollar amount for triggering the filing of a report, the shortness of the fourteen-day period for the filing of a required report, and bank customer privacy rights, and suggested that because of the vagueness of criminal law, it would be difficult for banks to determine when the filing of a report was appropriate.

Instructions have been added to the report form that incorporate a $2500 potential loss threshold for the required filing of a report, if the bank is unable to identify a possible perpetrator. The time for the filing of a report after the discovery of an apparent crime that is subject to this part has been changed from fourteen days to thirty days. Of course, the fact that a report is required should not deter a bank from first informing the cognizant authorities by telephone, or by other expeditious means, of an apparent violation, when such action is appropriate.

A notice has been added to the report form stating that the information contained therein is subject to the Privacy Act of 1974, 5 U.S.C. 552a, and to 12 CFR Part 310. The Right to Financial Privacy Act of 1978 specifically authorizes financial institutions voluntarily to report "possible" criminal violations to "any agency or department of the United States, or any officer, employee, or agent thereof." See 12 U.S.C. 3401(3); 3403(c).

The sentence in the proposed rule (§ 353.1) stating that "Doubts as to whether a report should be filed in any particular case should be resolved in favor of doing so" has been deleted, and the following sentence has been added: "For purposes of this part, the phrase 'apparent violation' implies that there is a reasonable basis for believing that a crime has occurred, is occurring, or may occur." An addition to the report form similarly amplifies the phrase "suspected criminal activity."

The requirement in the proposed rule (§ 353.1) that a report of an apparent criminal violation of the United States Code be transmitted also to the state prosecuting attorney if a state law violation may be involved has been deleted. The instructions in the report form have been amended to indicate that the use of the form for this purpose is optional.

Regulatory Flexibility Act

In accordance with the Regulatory Flexibility Act (5 U.S.C. 601–12), the Board of Directors certifies that the rule will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

Inasmuch as the rule formalizes the existing obligation of insured nonmember banks to report criminal violations, the additional burden placed upon most such institutions by this requirement will not be significant. The reporting and notification requirements in the rule were approved by the Office of Management and Budget under control number 3064-0077 pursuant to section 3504(h) of the Paperwork Reduction Act (44 U.S.C. 3504(h)).

List of Subjects in 12 CFR Part 353

Banks, banking, State nonmember banks, Reporting and recordkeeping requirements.

Accordingly, the FDIC hereby adds Part 353 to Title 12, CFR, as follows:

PART 353—REPORTS OF APPARENT CRIMES AFFECTING INSURED NONMEMBER BANKS

Sec.
353.0 Purpose and scope.
353.1 Reports and records.

Appendix A—Form 6710/06 and 6710/06A, Report of Apparent Crime (Short Form and Long Form), and Instructions for Its Preparation and Filing

Authority: 12 U.S.C. 1818, 1819.

§ 353.0 Purpose and scope.

The purpose of this part is to reduce losses to insured nonmember banks resulting from criminal violations of the United States Code involving or affecting the assets or affairs of such banks through the requirement of prompt and systematic reports by such banks of such crimes or attempted crimes. This part complements, and does not supplant any of the requirements of, Part 326. Neither the particular requirements of this part nor of Part 326 shall be construed as reducing in any way the general responsibility of insured nonmember banks to report apparent criminal violations to the appropriate investigatory and prosecuting authorities.

§ 353.1 Reports and records.

(a) Whenever it appears that a criminal violation of the United States Code involving or affecting the assets or affairs of an insured nonmember bank (excluding a federal savings bank) has been committed or attempted, then the bank (using Form 6710/06 or 6710/06A and the instructions therefor, appearing in Appendix A) shall promptly report the apparent violation to the appropriate field office of the Federal Bureau of Investigation, to the appropriate office of the United States Attorney, and to the regional director (Division of Bank Supervision (DBS)) of the FDIC region in which the bank is located. The bank shall maintain a copy of each such report in its records. For purposes of this part, the phrase "apparent violation" implies that there is a reasonable basis for believing that a crime has occurred, is occurring, or may occur. The fact that a report is required by this part should not in any case deter a bank from first informing the appropriate authorities by telephone, or other expeditious means, of an apparent violation, when such action is deemed fitting.

(b) Robberies, burglaries and nonemployee larcenies, which are subject to the requirements of 12 CFR 326.5(c), are exempt from the requirements of this part.

(c) Supplies of Form 6710/06 and 6710/06A can be obtained from the FDIC regional office (DBS), which will also provide, if needed, the addresses of the investigatory and prosecuting authorities with which reports required by this part are to be filed.

(Approved by the Office of Management and Budget under control number 3064-0077)

FDIC

REPORT OF APPARENT CRIME (SHORT FORM)

Federal Deposit Insurance Corporation

ATTENTION:
Use this form only if suspected criminal activity (see 12 C.F.R. §353.1) involves actual or probable loss of less than $10,000 (prior to any recovery or reimbursement) not involving an executive officer, director or principal shareholder of the institution within the meaning of 12 C.F.R. §215.2 (with the term "member bank" deemed to mean "insured non-member bank"). All other referrals should be submitted on FDIC Form 6710/06A, Report of Apparent Crime (Long Form). For purposes of this form, "suspected criminal activity" implies that there is a reasonable basis for believing that a crime has occurred, is occurring or may occur.

This form should be promptly filed by the bank, but no later than thirty days following discovery of the suspected violation. Where appropriate, law enforcement authorities should be immediately notified by telephone or other expeditious means.

The information in this report is confidential and subject to the applicable provisions of the Privacy Act of 1974, 5 U.S.C. 552a and Part 310 (12 C.F.R.) of the FDIC's Rules and Regulations.

Item No.	Remarks

FDIC 6710/06 (3-85) Page Three

PRINCIPAL CRIMINAL STATUTES

18 U.S.C. 2	To aid, abet, counsel, command, induce or procure the commission of federal offense
18 U.S.C. 201	Bribery of public officials, including elected representatives, jurors and employees of any department or agency of the federal government, and witnesses in official proceedings, e.g., anyone who gives, offers or promises anything of value to a public official or a witness with the intent to influence that person's official functions.
18 U.S.C. 215	Kickbacks, bribes. Makes it unlawful for any officer, director, employee, agent or attorney to solicit, accept or give anything of value in connection with any transaction or business of any financial institution
18 U.S.C. 371	Conspiracy of two or more persons to either commit a federal offense or to defraud the United States (or any agency of the U.S.)
18 U.S.C. 656	Theft, embezzlement or misapplication of bank funds, willfully by an officer, director, agent or employee of a bank, with intent to injure or defraud the bank. Can infer intent to injure from the fact of injury or from acts knowingly done in reckless disregard for the interests of the bank
18 U.S.C. 709	False advertising or misuse of words "National," "Federal Reserve," "Deposit Insurance," etc., to convey impression of federal agency affiliation
18 U.S.C. 1001	General false statements statute - knowingly and willfully falsifying or concealing a material fact or making a false statement or making or using false writing knowing it to be false
18 U.S.C. 1005	False entries and reports or statements, including material omissions, with intent to injure or defraud the bank, the OCC (or Fed or FDIC), bank examiners or other individuals or companies
18 U.S.C. 1014	False statement (oral or written) e.g., loan application, made knowingly for the purpose of influencing any bank whose deposits are federally insured, upon any application, purchase agreement, commitment, loan (or any change or extension of same) including willfully overvaluing land, property or security
18 U.S.C. 1029	Credit Card fraud - knowingly and with intent to defraud, produce, use or traffic in counterfeit access devices
18 U.S.C. 1030	Computer fraud - knowingly accessing a computer without authorization, or using it for unauthorized purposes, including obtaining information contained in records of financial institutions
18 U.S.C. 1341	Mail fraud - scheme or artifice to defraud that makes use of the Postal Service
18 U.S.C. 1343	Wire fraud - scheme or artifice to defraud using transmission by wire, radio or TV for the purpose of carrying out the scheme
18 U.S.C. 1344	Bank fraud - scheme or artifice to defraud a federally insured institution or take money, funds, credits, assets, securities or other property by misrepresentation
18 U.S.C. 1621	Perjury/false statement made under oath (if false statement is not made under oath, individual may still be prosecuted under 18 U.S.C. 1001 or 1014)
18 U.S.C. 1951 **18 U.S.C. 1961**	Racketeer Influenced and Corrupt Organizations ("RICO") statutes. Investing in any enterprise affecting interstate commerce if the funds for the investment are derived from a pattern of racketeering activity. (these activities are defined to include: murder, drug dealing, bribery, robbery, extortion, counterfeiting, mail fraud, wire fraud, embezzlement from pension funds, obstruction of criminal investigations, fraud in the sale of securities, etc.)
31 U.S.C. 5311 **31 C.F.R. 103**	Currency Transactions/Bank Secrecy Act
15 U.S.C. 78dd	Foreign Corrupt Practices Act of 1977. Payment of anything of value to any foreign official, foreign political party or candidate or, any other person where the American corporation knows or has reason to know the thing of value would be offered to a foreign official, foreign political party or candidate for foreign political office
15 U.S.C. 78ff	Criminal violations of securities laws
15 U.S.C. 78x	Criminal penalty provisions of securities laws

UMI

VOL 51 ISS 86 MY 5 1986 UMI

INSTRUCTIONS FOR FILING THE SHORT FORM

The purpose of this report is to provide a consistent means by which financial institutions can make referrals of known or suspected criminal activity perpetrated against the institutions whether by insiders or those outside the institution. The report will provide an effective means by which appropriate law enforcement and supervisory authorities will be made aware of known or suspected criminal activity. Institutions should use care in filling out this report and should insure that it is filled out in as complete a manner as practicable under the circumstances.

When a financial institution concludes that a crime has probably occurred involving less than $2,500 where the institution has no basis for identifying a possible suspect or group of suspects (as often occurs with a check forgery or an unauthorized use of a credit card), then reporting the violation to the United States Attorney and federal law enforcement is optional. But if (1) the apparent crime involves $2,500 or more or (2) the institution has a reasonable basis for identifying the suspect or group of suspects, *regardless of the dollar amount involved in the apparent crime*, then reporting is mandatory.

DISTRIBUTION:

1. Retain one copy in bank's files.
2. Send one copy to Regional Director, Division of Bank Supervision, Federal Deposit Insurance Corporation.
3. Send one copy to the nearest office of the FBI.
4. Send one copy to nearest office of the U.S. Attorney.
5. If the violation involves 31 C.F.R. 103, send one copy to the local IRS office, Criminal Investigation Division.
6. In cases involving the unauthorized use of a credit card or credit card number (18 U.S.C. §1029) or computer fraud (18 U.S.C. §1030), perpetrated without any apparent complicity of a bank employee or officer, the financial institution should send the form to the local office of the Secret Service in lieu of sending the referral to the FBI.
7. If also a criminal violation of state law, consider sending the form to the appropriate state prosecuting authority.

REPORT OF APPARENT CRIME (LONG FORM)

Federal Deposit Insurance Corporation

ATTENTION:
Use this form in all cases where suspected criminal activity (see 12 C.F.R. §353.1) involves probable loss (before reimbursement or recovery) of $10,000 or greater and in all cases, regardless of amount, involving an executive officer, director or principal shareholder of the institution within the meaning of 12 C.F.R. §215.2 (with the term "member bank" deemed to mean "insured nonmember bank"). For purposes of this form, "suspected criminal activity" implies that there is a reasonable basis for believing that a crime has occurred, is occurring or may occur.

This form should be promptly filed by the bank, but no later than thirty days following discovery of the suspected violation. Where appropriate, law enforcement authorities should be immediately notified by telephone or other expeditious means.

The information in this report is subject to the applicable provisions of the Privacy Act of 1974, 5 U.S.C. 552a and Part 310 (12 C.F.R.) of the FDIC's Rules and Regulations.

1. Name and Location of Financial Institution

NAME _____

LOCATION _____ (STREET) _____ (CITY) ____ (ST) _____ (ZIP)

CERTIFICATE NUMBER _____ If activity occurred at branch office(s), please identify _____

2. Asset Size of Financial Institution (*millions of dollars*) _____

3. Approximate date and dollar amount (prior to any allowance for restitution or recovery) of suspected violation

DATE _____ (Month Day Year) AMOUNT (*thousands of dollars*) _____

4. Summary characterization of the suspected violation. Check appropriate box(es)

☐ Defalcation/Embezzlement ☐ Bribery/Gratuity ☐ Other (Describe) _____
☐ False Statement ☐ Misuse of Position or Self Dealing _____
☐ Check Kiting ☐ Mysterious Disappearance _____

Applicable Section(s) of the U.S. Code (if known). (See list on page 7) _____

5. This matter is being referred to the FBI in _____ (CITY) ____ (ST)

and the U.S. Attorney in _____ (CITY) ____ (ST) _____ (JUDICIAL DISTRICT (*if known*))

VOL 51 ISS 86 MY 5 1986 UMI

6. Person(s) Suspected of Criminal Violation. Complete subparagraphs (a) through (e) on **each** individual suspected of criminal activity (if more than one, use continuation sheet). Include primary suspects only. Individuals who may have knowledge of the suspected criminal activity, but who are not themselves suspected of being involved should be listed as witnesses under item 10. Provide any additional details known with respect to prior referrals or affiliations.

a. NAME _____ (FIRST) _____ (MI) _____ (LAST)

ADDRESS _____ (STREET) _____ (CITY) _____ (ST) _____ (ZIP)

DATE OF BIRTH _____ (If known) (Month Day Year) SOCIAL SECURITY NO _____ (If known)

b. Relationship to the financial institution (check all applicable blocks)
☐ Officer ☐ Employee ☐ Broker ☐ Shareholder
☐ Director ☐ Agent ☐ Borrower ☐ Other, Specify _____

c. Is person still affiliated with the financial institution ☐ Yes ☐ No

If no, ☐ terminated ☐ resigned. DATE _____ (Month Day Year)

Describe Circumstances (if necessary, use continuation sheet) _____

d. Prior or related referrals ☐ Yes ☐ No. If yes, please identify

e. Is person affiliated with any other financial institution ☐ Yes ☐ No or business enterprise ☐ Yes ☐ No. If yes to either or both, please identify

7. a. Explanation/Description of Suspected Violation. Provide a **brief** narrative description of the activity giving rise to the referral explaining what is unusual or irregular about the transaction. Details will be provided later in the form. The purpose of this paragraph is to provide a **summary** description of the overall transaction.

b. Give a chronological and complete account of the suspected violation. (Use continuation sheet, if necessary)
- Relate key events to documents and attach copies of those documents.
- Explain who benefited, financially or otherwise, from the transaction, how much, and how.
- Furnish any explanation of the transaction provided by the suspect and indicate to whom and when it was given.
- Furnish any explanation of the transaction provided by any other person.
- Furnish any evidence of cover-up by the suspect or evidence of an attempt to deceive federal or state examiners or others.
- Indicate where the suspected violation took place (*e.g.*, main office, branch, other).
- Recommend any further investigation that might assist law enforcement in fully examining the potential violation.

THIS SECTION OF THE REFERRAL IS CRITICAL. It should be as detailed as circumstances permit. The care with which this section is written may make the difference in whether or not the described conduct and its criminal nature are clearly understood. The discussion points listed in this section are not exhaustive. They should be covered but to the extent additional explanation would be useful as to any particular item or to the extent an additional category should be addressed, it should be done here. Feel free to use attachments or to continue the description on a separate sheet. Include any suggestions for the interviewing of any witnesses, gathering of any documents or methods of investigation which might prove useful in following up on the referral (e.g., tracing of proceeds).

c Indicate whether the suspected violation appears to be an isolated incident or whether it relates to other transactions (Explain)

8 Exclusion of Information from the Referral
Has any pertinent information been excluded from this referral as a result of any legal or other restraint? ☐ Yes ☐ No
If so, why? _____

Have the excluded information or documents been segregated for later retrieval? ☐ Yes ☐ No

9 Has there been a confession? ☐ Yes ☐ No If so, by whom? _____

10 Witnesses
List any witnesses who might have information about the suspected violation and describe their position or employment. Indicate if they have been interviewed. (Use continuation sheet if necessary.)

	Name	Position	Address	Tele.	Interviewed Yes	Interviewed No

2					☐	☐
3					☐	☐
4					☐	☐
5					☐	☐

11 Discovery and Reporting
a Who discovered the suspected violation and when?

b Has the suspected violation been reported to the Board of Directors? ☐ Yes ☐ No By whom and when?

c Has the Board of Directors taken action? ☐ Yes ☐ No If so, what and when?

d Has the suspected violation previously been reported to federal or local law enforcement or to any federal or state supervisory agency? ☐ Yes ☐ No If so, by whom, to whom, and when?

12 Loss
a Amount of loss known $ _____
b Restitution by _____
In the amount of $ _____
c Name of Applicable Surety Bond Company _____
d Amount of Bond $ _____
e Amount of deductible $ _____
f Was claim filed? ☐ Yes ☐ No
g Settlement by Surety Company $ _____
h Total restitution and settlement to date $ _____
i Net loss (after subtracting any amounts paid in the form of restitution or settlement) $ _____
j Is additional loss suspected? ☐ Yes ☐ No (If yes, explain)

k. Has the suspected violation had a material impact on or otherwise affected the financial soundness of the institution? If so, please explain.

13 Offer of Assistance
The individuals listed below are/will be authorized to discuss this referral with FBI and Department of Justice officials and to assist in locating or explaining any documents pertinent to this referral, **provided that contact is first made with**

CONTINUATION SHEET

Item No.	Remarks

PRINCIPAL CRIMINAL STATUTES

18 U.S.C. 2	"To aid, abet, counsel, command, induce or procure" the commission of federal offense
18 U.S.C. 201	Bribery of public officials, including elected representatives, jurors and employees of any department or agency of the federal government and witnesses in official proceedings (e.g., anyone who gives, offers or promises anything of value to a public official or a witness with the intent to influence that person's official functions)
18 U.S.C. 215	Kickbacks, bribes. Makes it unlawful for any officer, director, employee, agent or attorney to solicit, accept or give anything of value in connection with any transaction or business of any financial institution
18 U.S.C. 371	Conspiracy of two or more persons to either commit a federal offense or to defraud the United States (or any agency of the U.S.)
18 U.S.C. 656	Theft, embezzlement or misapplication of bank funds, willfully by an officer, director, agent or employee of a bank, with intent to injure or defraud the bank. Can infer intent to injure from the fact of injury or from acts knowingly done in reckless disregard for the interests of the bank
18 U.S.C. 709	False advertising or misuse of words "National," "Federal Reserve," "Deposit Insurance," etc., to convey impression of federal agency affiliation
18 U.S.C. 1001	General false statements statute—knowingly and willfully falsifying or concealing a material fact or making a false statement or making or using false writing knowing it to be false
18 U.S.C. 1005	False entries and reports or statements, including material omissions, with intent to injure or defraud the bank, the OCC (or Fed or FDIC) bank examiners or other individuals or companies
18 U.S.C. 1014	False statement (oral or written) (e.g., loan application) made knowingly for the purpose of influencing any bank whose deposits are federally insured, upon any application, purchase agreement, commitment, loan (or any change or extension of same) including willfully over valuing land, property or security
18 U.S.C. 1029	Credit Card fraud—knowingly and with intent to defraud, produce, use or traffic in counterfeit access devices
18 U.S.C. 1030	Computer fraud—knowingly accessing a computer without authorization, or using it for unauthorized purposes, including obtaining information contained in records of financial institutions
18 U.S.C. 1341	Mail fraud—scheme or artifice to defraud that makes use of the Postal Service
18 U.S.C. 1343	Wire fraud—scheme or artifice to defraud using transmission by wire, radio or TV for the purpose of carrying out the scheme
18 U.S.C. 1344	Bank fraud—scheme or artifice to defraud a federally insured institution or take money, funds, credits, assets, securities or other property by misrepresentation
18 U.S.C. 1621	Perjury/false statement made under oath (if false statement is not made under oath, individual may still be prosecuted under 18 U.S.C. 1001 or 1014)
18 U.S.C. 1951 **18 U.S.C. 1961**	Racketeer Influenced and Corrupt Organizations ("RICO") statutes. Investing in any enterprise affecting interstate commerce if the funds for the investment are derived from a pattern of racketeering activity. (these activities are defined to include: murder, drug dealing, bribery, robbery, extortion, counterfeiting, mail fraud, wire fraud, embezzlement from pension funds, obstruction of criminal investigations, fraud in the sale of securities, etc.)
31 U.S.C. 5311 **31 C.F.R. 103**	Currency Transactions/Bank Secrecy Act
15 U.S.C. 78dd	Foreign Corrupt Practices Act of 1977. Payment of anything of value to any foreign official, foreign political party or candidate or any other person where the American corporation knows or has reason to know the thing of value would be offered to a foreign official, foreign political party or candidate for foreign political office
15 U.S.C. 78ff	Criminal violations of securities laws

INSTRUCTIONS FOR FILING THE LONG FORM

The purpose of this report is to provide a consistent means by which financial institutions can make referrals of known or suspected criminal activity perpetrated against the institutions whether by insiders or those outside the institution. The report will provide an effective means by which appropriate law enforcement and supervisory authorities will be made aware of known or suspected criminal activity. Institutions should use care in filling out this report and should insure that it is filled out in as complete a manner as practicable under the circumstances.

All information requested within the body of the report should be supplied at the time of the report unless such information is not known or can only be supplied at a later date. Documents not provided with this report should be segregated and safeguarded in order that they might be subsequently supplied upon request or service of subpoena.

DISTRIBUTION:

1. Retain one copy in bank's files.
2. Send one copy to Regional Director, Division of Bank Supervision, Federal Deposit Insurance Corporation.
3. Send one copy to the nearest office of the FBI.
4. Send one copy to nearest office of the U.S. Attorney.
5. Send one copy to the State Banking Authority.
6. If the violation involves 31 C.F.R. 103, send one copy to the local IRS office, Criminal Investigation Division.
7. In cases involving the unauthorized use of a credit card or credit card number (18 U.S.C. §1029) or computer fraud (18 U.S.C. §1030), perpetrated without any apparent complicity of a bank employee or officer, the financial institution should send the form to the local office of the Secret Service in lieu of sending the referral to the FBI.
8. If also a criminal violation of state law, consider sending the form to the appropriate state prosecuting authority.

ADDITIONAL INSTRUCTIONS FOR EXAMINERS

Examiners should fill out this report whenever suspected criminal activity has been identified in a banking institution and either has not yet been reported by the institution or the report made by the institution is deemed to be inadequate. It is important to note that this report should be filled out whenever criminal activity is suspected; examiners are not required to make any initial finding that such reports would, if pursued, result in a criminal conviction. That judgment will be made by responsible law enforcement authorities. Any questions regarding whether or not any particular activity would constitute a crime for purposes of making a criminal referral should be resolved through communications with the Regional Office. In filling out this report, examiners should avoid overly technical descriptions of transactions which might not be readily understood by law enforcement authorities unfamiliar with banking operations.

DISTRIBUTION BY EXAMINER/REGIONAL OFFICE

Examiner

1. Retain one copy in field office file under name of the bank.
2. Send original to the Regional Office.

Regional Office

3. Retain one copy in Regional Office under name of the bank.
4. Send one copy to the Chief, Special Activities Section, Washington, D.C. 20429, accompanied by a signed cover letter indicating, in appropriate cases, the priority to be given the referral.
5. Send one copy to the nearest office of the FBI.
6. Send one copy to the U.S. Attorney.
7. If violation of state law, consider sending the referral to the appropriate state prosecuting authority.
8. If the violation involves 31 C.F.R. 103, send one copy to the local IRS office, Criminal Investigation Division.
9. Send a copy to the State Banking Authority.

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 556

[No. 86-424]

Interstate Branching

Date: April 24, 1986.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule with request for comments.

SUMMARY: The Federal Home Loan Bank Board ("Board") is amending its statement of policy on branching by Federal savings and loan associations and Federal savings banks ("Federal associations") to provide: (1) General equality of Federal associations with state-chartered thrift institutions of a Federal association's home office state with respect to branching across state lines and (2) possibly broader branching rights for a Federal association acquiring a failing institution in the form of regional branching rights as well as single target state branching rights. The Board is also soliciting comments on further amending its statement of policy to provide general equality of Federal associations with state-chartered financial institutions, including banks, or their holding companies with respect to branching and acquisitions.

DATES: The rule becomes effective May 5, 1986. Comments concerning branching or acquisition equality with banks and bank holding companies must be received before August 4, 1986.

ADDRESSES: Send comments to Director, Information Services Section, Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552.

FOR FURTHER INFORMATION CONTACT: Winifred Sutton, Attorney, Blue Division (202) 377-7044; David Wall, Attorney, Red Division (202) 377-7397; or Mary Rawlings-Milton, Chief Paralegal, Federal Savings and Loan Insurance Corporation Attorneys Group, (202) 377-7048, Office of the General Counsel, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION: On December 20, 1985, the Board proposed amendments to § 556.5 of its Federal Regulations (12 CFR 556.5 (1985)) regarding interstate branching by thrifts. The proposed revisions related to branching in both supervisory and nonsupervisory contexts. In the latter respect, the proposal would have provided Federal associations generally with the same ability to branch or to merge across state lines granted by state law to state-chartered associations headquartered in the state in which a Federal association's home office is located.

The proposal also provided in essence that a Federal association in a holding company structure might not exercise the new branching rights granted under this proposal to Federal associations generally if another insured institution in that structure exercised such rights.

In the supervisory context, the proposal would permit the Board to allow a Federal association acquiring a failing institution to obtain entry into a region rather than being limited to the state of the failing target institution. The region could not exceed three states in addition to the state of the target, unless the target state was itself part of a regional compact specifically authorized "by statute laws of such states, by language to that effect and not merely by implication," in which case the Board might consider an application for branching capacity within the states of the regional compact even if in excess of the target's state plus three others. The proposed rule set forth a preference for applications contemplating a region of contiguous states, but did not prohibit the Board from allowing branching capacity in non-contiguous states.

After considering the public comments received and other information, the Board has determined to adopt the amendments substantially as proposed, altering certain language to clarify provisions applicable to Federal associations in a holding company structure and to emphasize that supervisory context branching beyond the state of a target will be granted only upon a showing of reasonableness and very substantial benefit to the Federal Savings and Loan Insurance Corporation ("FSLIC") in a measure sufficient to constitute a compelling factor in determining to make such an award.

Discussion of Comment Letters

The Board received letters from 76 commenters, including: thirty-one from state and federally-chartered thrifts and from thrift holding companies; thirteen from various financial institution leagues and professional associations; eight from commercial banks; and ten from State government officials and regulators. Six members of Congress referred comments written by their constituents and others to the Board for consideration. The Board considered late-filed and late-received letters. Most comments generally favored adoption of the proposed amendment, but many requested substantive and technical changes to the amendment. These comments are discussed below, as are the modifications to the proposal that the Board has incorporated in the final rule.

Most commenters considered the proposed amendment in two parts: the nonsupervisory part, which is that portion of the amendment dealing with interstate branching generally by healthy Federal associations ("Nonsupervisory Amendment"), and the supervisory part, which addresses branching rights that may be granted acquirers of failing institutions ("Supervisory Amendment").

The majority of commenters favored adoption of the Nonsupervisory Amendment as proposed; however, several commenters suggested modifications. Some desired to expand the scope of the Nonsupervisory Amendment to provide a Federal association with the same branching rights allowed by the law of its home office state to state-chartered commercial banks. These commenters urged that Federal associations compete with commercial banks and that to deny such branching parity with commercial banks would disadvantage Federal associations. Several commenters noted that state regional branching laws often apply only to state-chartered commercial banks or holding companies and not state-chartered thrifts. One such letter asserted that state thrifts often do not have the political power necessary to convince state legislators to include thrifts in state regional banking compacts and urged the Board to lead the way for these state thrifts by granting Federal associations branching parity with state-chartered commercial banks, thus encouraging state legislators to include state thrifts in branching legislation.

Some commenters advocated expanding the Nonsupervisory Amendment by allowing a Federal association to have branching parity with state-chartered thrifts in any state in which the Federal association operates, not only in its home office state as proposed. The reason voiced for this position was that Federal associations should be afforded the benefits of the laws of any state in which they operate. Others wished to expand the Nonsupervisory Amendment

VOL 51 ISS 86 MY 5 1986 UMI

by allowing Federal associations to branch in any state that allowed out-of-state financial institutions to enter.

Several commenters expressed concern that Federal associations might weaken their financial condition in taking advantage of new branching rights, thereby increasing the risk to the FSLIC. These commenters favored a policy of controlled growth for Federal associations, and one suggested that the Board allow only Federal associations with net worth in excess of regulatory requirements to take advantage of interstate branching in the nonsupervisory context.

One commenter was of the opinion that the Board's Nonsupervisory Amendment contravened the Congressional policy expressed in the provisions of the Garn-St Germain Depository Institutions Act of 1982, Pub. L. 97-320, 96 Stat. 1469 ("Garn-St Germain Act"), that allow the emergency interstate acquisition of thrifts. The commenter believed that Congress intended interstate branching by thrifts only in extraordinary cases, justified by the existence of severe financial conditions which threaten the stability of a significant number of insured institutions. Accordingly, the commenter concluded that Congress did not intend Federal associations to branch in the non-supervisory context.

The Board in its proposal requested comments on the portion of the Nonsupervisory Amendment that provided in essence that a Federal association in a holding company structure may not exercise the new branching rights if another insured institution in that structure possesses or exercises branching rights. Of the letters submitted that specifically addressed these holding company provisions, most opposed the restrictions. Several commenters argued that they were unfair. Most of these commenters were of the opinion that the holding company provisions of the proposed amendment, if adopted, should be modified to allow management solely to decide which institution within the holding company could exercise the new branching rights. These commenters reasoned that such a decision should be based on management's business judgment and not on a regulatory designation.

Several letters asserted that the holding company provisions were ambiguous and requested clarification.

Other commenters wished to ensure that state law restrictions or requirements on interstate branching by state-chartered thrifts would also be applied to Federal associations under the proposal, in the interests of true branching parity between Federal associations and state-chartered thrifts. One letter gave as an example of such a state law restriction the requirement of continuing reinvestment by thrifts in the host state as a condition of interstate branching.

Commenters opposed to the Nonsupervisory Amendment often expressed concern over the current condition of the thrift industry as the reason for their opposition. Some commenters feared that allowing thrifts to expand interstate would result in weakening the condition of these thrifts. In addition, several argued that the increase in competition would hurt local thrifts and ultimately increase the risk to the FSLIC.

While the majority of comments addressing the Supervisory Amendment generally favored its adoption, the range of comments on that part of the proposal was broad. Most commenters favoring adoption desired modifications. Some commenters advocated eliminating all restrictions on the Board's authority to grant branching rights to acquirers of failing institutions. Several suggested that the Board adopt formal guidelines for its implementation of those provisions. Others felt there should be no change in the Board's branching policy statement concerning supervisory cases, and a few opposed granting interstate branching rights in any event, even under current regulations.

Many commenters opposed the Supervisory Amendment. One such commenter argued that granting branching rights in up to three additional states to acquirers of failing institutions was "an unwarranted override of state prerogative in determining the makeup and direction of regulated institutions in [the] state".

At the other end of the spectrum, several commenters desired to expand the Supervisory Amendment to grant automatically branching rights in three states to acquirers of failing institutions. Some suggested that the Supervisory Amendment should apply retroactively to past acquirers of failing institutions to recognize benefits afforded the FSLIC by those entities. One commenter suggested that acquirers of failed institutions be granted branching rights in three states on a "to be named later" basis by the acquirer.

Many who supported adoption of the Supervisory Amendment desired modifications. For example, several letters suggested removing the reference to "three" states, arguing that this numerical limitation would soon become the minimum number of states in which branching rights were granted in supervisory cases. Others argued that eliminating the reference to "three" states would allow the Board maximum flexibility in granting interstate branching rights in supervisory cases. Several commenters recognized the Board's need to grant branching rights in supervisory cases, but stressed that the Board should adopt a conservative approach in applying the Supervisory Amendment. These commenters asked the Board to articulate formally its policy for implementing the Supervisory Amendment. One suggested that the Board grant branching rights in more than one state to acquirers in supervisory cases, but only as related to the magnitude of the failing institution's problems or contingent upon the acquirer picking up a smaller institution in a state in which branching rights would be granted.

Of the commenters who argued that branching rights should be granted acquirers of failing institutions only in the state of the target institution, several supported allowing the acquirer to take advantage of any regional compact in which the target state was involved.

Several commenters claimed that the supervisory provisions violated traditional notions of comity, upsetting the balance of power between federal and state governments; and some claimed that the proposed regulation, and in particular the Supervisory Amendment, was directly opposed to Congressional policy on interstate branching by thrifts.

One commenter was of the opinion that the proposed amendment was in "direct contravention of Congressional policy expressed in two major statutory enactments." The acts cited were 12 U.S.C. 1730a(e) (1982), and the Garn-St Germain Act. A few commenters argued that the provisions of the Garn-St Germain Act that required notification of state authorities and other procedural requirements prior to approving an interstate acquisition or merger in a supervisory case indicated Congressional intent to restrain interstate branching by thrifts.

Authority

The Board is authorized to regulate the operations of Federal associations by section 5 of the Home Owners' Loan Act of 1933, as amended ("HOLA"), 12 U.S.C. 1464 (1982 & Supp. II 1984), and it has regulated the branching of Federal associations under this authority. The Board's authority in this respect is plenary and not bounded by any restrictions of state law, and it is clear that the Board may authorize Federal associations to branch or acquire other federal associations by merger across state lines. *IBAA v. FHLBB*, 557 F. Supp. 23 (D.D.C. 1982).

Section 334 of the Garn-St Germain Act added a new subsection (r) to section 5 of the HOLA, 12 U.S.C. 1464(r) (1982), which recognized and confirmed the Board's authority to authorize interstate branching for Federal associations, but imposed a requirement that, with certain specific exceptions, any such Federal association branching across state lines must qualify as a domestic building and loan association under the Internal Revenue Code and meet the Code's asset composition test.

The case law and section 5(r) confirm the Board's authority in this area and clearly contradict the assertions of those commenters who challenged the legal basis of such authority.

Background

The Board permitted Federal associations to branch well before the publication of its first policy statement on branching in 1967, 32 FR 20630 (Dec. 21, 1967). The Board generally limited Federal associations to branching within the states of their home offices, however, until the issuance of an amendment to its statement of policy, Board Resolution No. 81-157, 46 FR 19221 (March 30, 1981), to provide for interstate branch operations that resulted from certain supervisory acquisitions. The Board resolution provided in part:

> The scope of the interstate branching prohibition in section 556.5(a)(3) is qualified by the word "generally", which reserves to the Board discretion to approve interstate branch operations in special circumstances. The exceptional nature of acquisition transactions supervised by the Federal Savings and Loan Insurance Corporation (FSLIC) to prevent the failure of an insured institution gives rise to such special circumstances. Though the Board has authority to approve interstate acquisitions in supervisory cases, the Board's regulations do not presently set forth any policy guidelines regarding factors it will consider when deciding whether to exercise this authority.
>
> This resolution amends the Board's policy statement to clarify that the Board may approve a merger, consolidation, or purchase of assets involving a Federal association that would not otherwise be permissible under the general rule if (1) the proposed acquisition will be effected pursuant to a plan to prevent the failure of an institution insured by the FSLIC, (2) the Board determines that the insurance liability or risk of the FSLIC will be reduced as a result of the proposed acquisition, and (3) the Board determines that the insurance liability or risk of the FSLIC resulting from the proposed acquisition transaction will be substantially less than the liability or risk that would result from otherwise equally desirable acquisition alternatives, if any, that would not result in interstate branch operations. . . . It should be noted that the amendment accomplished by this Resolution applies only to the specific types of supervisory cases described therein. This final rule does not alter the Board's policy regarding interstate branching in non-supervisory contexts. With respect to supervisory cases to which the rule applies, the amendment does not alter the Board's long-standing preference for intrastate supervisory mergers and acquisitions.

The policy statement on interstate branching has been amended since the issuance of Resolution No. 81-157, by Resolution Nos. 81-496, 46 FR 45120 (Oct. 10, 1981), and 82-496, 47 FR 34125 (Aug. 6, 1982), but such amendments have clarified the original policy statement without altering its basic purposes and limitations. A proposed rule that would have enlarged the scope of interstate branching and acquisition by all institutions the accounts of which are insured by the Federal Savings and Loan Insurance Corporation ("insured institutions") was published for notice and comment in 1983, but was not adopted. Board Resolution No. 83-244, 48 FR 20930 (May 10, 1983).

The Board has also adopted a final rule concerning branching across state lines within the region formed by the District of Columbia, Maryland, and Virginia. Board Resolution No. 86-423 (April 24, 1986). The amendment set forth in the present resolution is general and does not supersede the Board's specific rulemaking for that region.

It should be noted that the Board may authorize acquisitions of failing insured institutions by out of state acquirers under the temporary authority of section 408(m) of the National Housing Act, 12 U.S.C. 1730a(m) (1982), added by Section 123 of the Garn-St Germain Act, and the Board has employed this authority on several occasions. This extraordinary authority, which is separate from the Board's general rulemaking power over Federal association branching under section 5 of the HOLA, will expire in the middle of July, unless extended by Congress. Pub. L. No. 99-278 (1986).

On June 10, 1985, the United States Supreme Court decided that state statutes that selectively authorized interstate branch acquisitions on a regional basis did not violate the "Douglas Amendment" to the Bank Holding Company Act or the Constitution of the United States. *Northeast Bancorp, Inc.* v. *Board of Governors of the Federal Reserve System*, No. 84-363 (U.S. June 10, 1985). Section 3(d) of the Bank Holding Company Act, 12 U.S.C. 1824(d) (1982), known as the "Douglas Amendment", prohibits the Board of governors from approving an application of a bank holding company or bank located in one state to acquire a bank located in another state unless the acquisition "is specifically authorized by the statute laws of the State in which such bank is located by language to that effect and not merely by implication." From 1956 to 1972, the Douglas Amendment had the effect of barring interstate bank acquisitions because no state had enacted the requisite authorizing statutes. Beginning in 1972, some states enacted statutes permitting such acquisitions in limited circumstances or for specific purposes. Beginning with Massachusetts in 1982, several states enacted statutes authorizing interstate acquisitions on a reciprocal basis within their geographical regions. In *Northeast Bancorp*, the Supreme Court upheld Massachusetts and Connecticut statutes allowing regional acquisitions as consistent with the Douglas Amendment and the Bank Holding Company Act as a whole, and as not violating the Commerce Clause, the Compact Clause, or the Equal Protection Clause of the United States Constitution.

In regulating branching of Federal associations generally, the Board has traditionally provided Federal associations with potential branching rights as broad as those that would be provided under State law for thrifts or commercial banks in the state in which a Federal association is located (as set forth, for example, in the 1979 codification of the Board's policy statement on the organization and branching of Federal associations, at 12 CFR 556.5(b)(1) (1979)).

State law regarding interstate expansion by financial institutions can best be described in terms of emerging trends. Roughly speaking, the states fall into three categories in their articulated statutory attitudes toward interstate expansion. First, there are states that do not allow any form of interstate expansion. Second, there are a growing number that have authorized interstate expansion on a regional, often reciprocal, basis. Finally, there are states which have authorized potential entry by out of the state institutions not limited to a region. There remain, of course, a number of states that do not address this issue by statute, as well as state statutes that defy easy categorization.

There are differences among those states that permit some sort of interstate expansion by financial institutions concerning the type of institution that may branch or acquire and what form the expansion may take: merger, acquisition, establishment of de novo branches, etc. A majority permits some

VOL 51 ISS 86 MY 5 1986 UMI

form of interstate expansion by banks, and at least half of those allow expansion by thrifts. Regional limitations vary considerably; some states provide for future regional expansion through reciprocity.

Most of the states that permit interstate expansion by thrifts permit entry by merger or acquisition. Maine limits entry by out-of state financial institutions to the establishment of, or the acquisition of control over, a Maine financial institution or holding company by an out of state holding company.

Request for Further Comment

The Board's proposal diverged from its traditional approach to the application of state law standards to Federal association branching in that the proposed rule was more conservative, looking only to state law applicable to thrift institutions instead of that applicable to "state financial depository institutions" generally, as expressed in 12 CFR 556.5(a)(2) (1985). Upon consideration of the comments received and a review of state legislation in this area, the Board has determined that a conservative standard, looking only to state law applicable to thrift institutions, should be employed at this time as the standard for Federal association branching across state lines in a nonsupervisory context.

The Board has also decided, however, to invite further comment, for a ninety day period, upon this standard and the possibility of using other standards: state law applicable to all financial depository institutions insured by the FSLIC or the Federal Deposit Insurance Corporation, or state law applicable to such financial depository institutions and their holding companies.

Final rule

The Board's final rule applies a thrift institution standard to determine interstate Federal association branching rights in a nonsupervisory context, as proposed, but the amendment further clarifies the proposal by providing that state law shall be looked to only with respect to basic authority to establish branch offices; approvals by state authority are not incorporated, nor are related state law investment standards or prerequisites, which would be inconsistent with a federal rule for Federal associations already subject to regulation in these matters. State law will be followed, however, in distinguishing the capacity to branch *de novo* from the capacity to acquire offices by merger. The amendment does not authorize a Federal association to become a saving and loan holding company.

The Board has determined to adopt the proposed special rules concerning Federal associations within a holding company structure, but has attempted to clarify these rules. In many ways, these rules embody principles explicitly or implicitly set forth in the structure of the Federal savings and loan system, the Savings and Loan Holding Company Amendments of 1967, and Board actions in which aquisition limitations of the Savings and Loan Holding Company Amendments of 1967 were overriden by the FSLIC under the temporary special authority of section 408(m) of the National Housing Act, 12 U.S.C. 1730a(m) (1982). A Federal association that is itself the ultimate parent holding company in a holding company structure is treated, in substance, as if the other associations in the structure were its branches. Extraordinary acquisitions under temporary provisions of the Garn-St Germain Act are not made a basis to "leverage" wide ranging branching authority. And the basic purposes of the Savings and Loan Holding Company Amendments are observed. In response to comments received, and subject to these limitations, the Board has determined to adopt a final rule that provides greater scope for management decision. Except for certain delineated circumstances, a Federal association would not be precluded from utilizing interstate branching rights solely because another institution in the holding company structure possessed such rights, but only if such other institution exercised such rights.

Since 1981, the Board has recognized that different rules should apply to the acquisition of branches and branching rights in connection with actions to prevent the failure of institutions the accounts of which are insured by the FSLIC. The Board's basic policy initiative of 1981, granting interstate branching capacity in connection with the acquisition of a failing institution, preceded the Garn-St Germain Act and was fully implemented prior to the enactment of that statute. The amended final rule is consistent with that initiative. In a context of expanding opportunities for financial institutions, represented by the growth of "regional compacts", and increasing costs of FSLIC actions with respect to failing institutions, it is appropriate to modify the existing rules for the acquisition of failing institutions to provide a potential branching capacity that is more consistent with the greater opportunities now available to financial institutions and with the assistance programs of the FSLIC.

The Board continues to favor limited interstate acquisitions and branching, however, and the rule gives preference to simpler, limited applications, such as those seeking entry only into the state of a failing target institution, over those seeking wider capacity. As stated in the proposal, the amended rule merely expands the Board's flexibility under its own rules to grant branching capacity in connection with the acquisition of assets or liabilities of failing institutions and for the purpose of serving the needs of the FSLIC. It is not the Board's purpose to signal a move toward general unrestricted branching on a national or broad scale in connection with supervisory cases. The Board has considered the variations suggested by the commenters that would be within its authority, but has determined that the steps taken by the amended rule are appropriate at this time. The Board has also decided that implementation of the principles of the amended rule should proceed on a case by case basis without imposing deductive restrictions that are not based upon experience. The Board has decided, however, to clarify the rule by requiring that a grant of branching rights in states other than the state of the target must be supported by a showing that the additional branching is reasonably related to the structure of the applicant, before or after acquisition of a target institution, and that the proposed acquisition is of very substantial benefit to the FSLIC, in a measure sufficient to constitute a compelling factor in determining to make an award to the applicant.

As indicated, the amendment addresses branching capacity for Federal associations generally and in connection with the acquisition of failing institutions. The approval of particular branches remains, of course, subject to standard regulatory procedures.

The Board has determined that this amendment shall become effective immediately upon publication. In the present circumstances of the savings and loan industry, and in particular in view of the large and growing number of distressed insured institutions that are eligible for FSLIC assistance and the increasing cost to the FSLIC of delays in the marketing and acquisition of distressed institutions, it is imperative that the improvements made under this rule be effected without delay. There is no reason to expect that any person or interest will be harmed by making this rule effective upon publication. Any interested party's ability to prepare to take action or to enjoy a reasonable time in which to respond to proposed actions under the new rule would not be impaired by an immediate effective

date. The benefits derived from not delaying the effective date are substantial and compelling from the standpoint of the FSLIC. Accordingly, the Board has determined that good cause exists for providing that this rule shall be effective upon publication and that such good cause satisfies the requirements of 12 CFR 508.14 (1985) and the rulemaking provisions of the Administrative Procedure Act, 5 U.S.C. 553(d) (1982).

Final Regulatory Flexibility Analysis

Pursuant to section 3 of the Regulatory Flexibility Act, 5 U.S.C. 604, the Board is providing the following regulatory flexibility:

1. *Need for and objectives of the rule.* These elements are incorporated above in the **SUPPLEMENTARY INFORMATION** regarding the rule.

2. *Issues raised by comments and agency assessment and response.* These elements are incorporated above in the **SUPPLEMENTARY INFORMATION** regarding the rule.

3. *Significant alternatives minimizing small-entity impact and agency response.* There are no alternatives that would have less impact on small institutions, consistent with the intended result and existing statutory requirements. Further, the rule will not involve any significant new reporting or compliance costs that could impose a disproportionate burden on small institutions.

List of Subjects in 12 CFR Part 556

Savings and loan associations.

Accordingly, the Federal Home Loan Bank Board hereby amends Part 556, Subchapter C, Chapter V, Title 12, *Code of Federal Regulations*, as set forth below.

Subchapter C—Federal Savings and Loan System

PART 556—STATEMENTS OF POLICY

1. The authority citation for Part 556 continues to read as follows:

Authority: Sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); Sec. 341, 96 Stat. 1505, as amended (12 U.S.C. 1701j–3); Secs. 402–403, 408–407, 48 Stat. 1256–1257, 1259–1260, as amended (12 U.S.C. 1725–1726, 1729–1730); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–1948 Comp., P. 1071.

2. Amending § 556.5 by revising paragraphs (a)(1) through (a)(3)(iv) to read as follows:

§ 556.5 Establishment of branch offices

(a) *General.* (1) The Board encourages a competitive savings and loan system that provides choices of facilities for improved financial services to the public. The Board believes that branching is a primary means to increase competition and serve the public. The Board recognizes that establishment of a full service branch is only one means for improving service and competition in an area and, therefore, encourages innovative ideas for branches designed to suit the needs of a particular community.

(2) As a general policy, the Board permits a Federal association to branch within the state in which its home office is located.

(3)(i)(*a*)(*1*) Additionally, the Board will permit a Federal association to establish or operate a branch office in a state other than the state in which its home office is located if the law of the state in which a Federal association's home office is located and the law of the state in which the branch is to be located would permit the establishment of such branch if the Federal association were an institution of the savings and loan or savings bank type chartered by the state in which the Federal association's home office is located.

(*2*) For the purposes of this paragraph (a)(3)(i)(*a*), state law is employed to determine basic authority to branch, or to acquire branch offices by merger or acquisition of assets or liabilities, but authorization by a state official is not required, and other state law limitations or requirements, such as those concerning investment standards, do not apply.

(*3*) This paragraph (a)(3)(i)(*a*) does not authorize a Federal association to become a savings and loan holding company controlling an insured institution located in a state other than the state in which the Federal association's home office is located.

(*b*) For the purposes of this paragraph (a)(3), the home office of a Federal association shall be deemed to be its home office as of the later of the date of its chartering or December 20, 1985, unless an association clearly demonstrates to the satisfaction of the Board that relocation to another state was not effected primarily to obtain branching advantages under this § 556.5(a).

(*c*) If a Federal association is a holding company or a subsidiary of an insured institution that is a holding company, it shall have a home office for the purposes of paragraph (a)(3)(i) only if no other insured institution in its holding company structure exercises or has exercised branching rights described in paragraph (a)(3)(i)(*a*);

(*d*) If a Federal association is an ultimate parent holding company, and no state chartered insured institution in the holding company structure exercises or has exercised branching rights described in paragraph (a)(3)(i)(*a*), such ultimate parent holding company shall be the sole association in the holding company structure that may acquire such branching rights under paragraph (a)(3)(i)(*a*). For the purposes of this paragraph (a)(3)(i), "ultimate parent holding company" means a savings and loan holding company not controlled by another company.

(*e*) *Multiple holding companies* (*1*) A Federal association that is a subsidiary of a multiple savings and loan holding company that controls insured institutions located in more than one state shall have a home office for the purposes of paragraph (a)(3)(i) only if no other subsidiary insured institution of its holding company exercises or has exercised branching rights described in paragraph (a)(3)(i)(*a*).

(*2*) Such a subsidiary Federal association may not exercise branching rights described in paragraph (a)(3)(i)(*a*) if a single state has been designated by its parent pursuant to section 408(e)(3)(B) of the National Housing Act, 12 U.S.C. 1730a(e)(3)(B), that is not the state in which such subsidiary Federal association has its home office, or if it became a subsidiary of its parent holding company pursuant to an acquisition or acquisitions effected pursuant to section 408(m) of the National Housing Act at a time when that parent was an existing savings and loan holding company, unless no subsidiary of such parent in a state designated pursuant to § 408(e)(3)(B) or existing prior to such section 408(m) acquisition posesses branching rights described in paragraph (a)(3)(i)(*a*).

(*f*) A Federal association that acquires and exercises branching rights pursuant to any of subparagraphs (a)(3)(i)(*a*) through (*e*) may not operate or retain branches established pursuant to such exercise if another insured institution in its holding company structure exercises branching rights described in paragraph (a)(3)(i)(*a*).

(ii)(*a*) Notwithstanding the limitations of paragraph (a)(3)(i) of this section, but subject to section 5(r) of the Home Owner's Loan Act of 1933, as amended, the Board may approve the establishment or operation of a branch office by a Federal association in a state other than the state in which its home office is located; *Provided* that:

(*1*) The establishment of the branch office will be achieved as part of or as a result of a transaction in which assets or liabilities of a failing insured institution ("target institution") are acquired by another institution, by merger or otherwise, as part of a transaction in

VOL 51 ISS 86 MY 5 1986 UMI

which the insured accounts of a target institution are assumed by and transferred to an insured institution as a means of payment of insurance by the Federal Savings and Loan Insurance Corporation ("Corporation") or pursuant to an action by the Corporation to prevent the failure of a target institution;

(*2*) The Board determines that the Corporation's insurance liability or risk, including cost or potential cost to the Corporation, will be reduced as a result of the transaction involving a target institution; and

(*3*) If any alternative has been submitted that is not objectionable on supervisory grounds and could be approved in accordance with paragraph (a)(2), (a)(3)(i), or (a)(3)(iii) of this section or that would involve an acquisition by, or transfer of accounts to, a state chartered institution and would be in accordance with the laws governing the chartering and operation of all parties to the transaction, the Board determines that the Corporation's insurance liability or risk, including cost or potential cost to the Corporation, resulting from the proposed interstate acquisition by, or transfer of accounts to, a Federal association under this paragraph (a)(3)(ii) will be substantially less than the liability or risk that would result from such other alternative.

(*b*) Branching approved or permitted pursuant to this paragraph (a)(3)(ii) may be:

(*1*) Operation of a former office or offices of a target institution; and

(*2*) Permission to establish branch offices in a state or states other than the state or states in which a target institution operates: *Provided* that branching rights permitted pursuant to this paragraph (a)(3)(ii)(*b*)(*2*) shall not in any event include any state in addition to the greater of (A) three (3) states in addition to the state or states in which the target institution operates, or (B) if the home office of the target institution is located in a state that, as of the date of acquisition of the target institution, is included in a regional compact of states specifically authorizing branching or acquisition across state lines by institutions of the savings and loan or savings bank type by statute laws of such states, by language to that effect and not merely by implication, the states included within such as regional compact: *Provided further,* that the Board shall give preference to an application seeking limited branching authority over an application seeking wider branching capacity under paragraphs (a)(3)(ii)(*b*) (*1*) and (*2*); *Provided further,* that in considering applications to approve transactions involving the exercise of authority under this paragraph (a)(3)(ii)(*b*)(*2*), the Board shall prefer an application involving branching in states within a regional compact for institutions of the savings and loan or savings bank type or in a state having boundary lines contiguous with boundary lines of the state in which the target institution's home office is located; and *Provided further,* that no application for branching capacity under this paragraph (a)(3)(ii)(*b*)(*2*) shall be approved unless the Board finds that such branching capacity is reasonably related to the office structure of the applicant, before or after acquisition of the target institution or its assets or liabilities, and that an acquisition effected pursuant to such application is of very substantial benefit to the FSLIC in a measure sufficient to constitute a compelling factor in determining to make an award to the applicant.

(*c*) The principles of this paragraph (a)(3)(ii) shall also apply in reverse mergers in which the target institution is the surviving entity and in the acquisition of control of subsidiary insured institutions in a state or states in which a Federal association is not authorized to branch pursuant to paragraph (a)(3)(i).

(iii) Notwithstanding paragraph (a)(3)(i) of this section, but subject to section 5(r) of the Home Owners' Loan Act of 1933, as amended, the Board may approve the establishment of a branch office in a state or states other than the state in which the home office is located, provided that the establishment of the branch office will be achieved by the consolidation of some or all of the savings and loan subsidiaries, or of some or all of the offices of the savings and loan subsidiaries, of a multiple savings and loan holding company. The Board may approve the establishment of a branch office by a resulting institution in any state or states in which it maintains branch offices as a result of the consolidation.

(iv) Notwithstanding paragraph (a)(3)(i) of this section, but subject to section 5(r) or the Home Owners' Loan Act of 1933, as amended, in a transaction not involving an action by the Corporation for transfer of accounts or to prevent the failure of an insured institution, the Board may approve the establishment of a branch office in any state in which the applicant has established or has been permitted to operate a branch office pursuant to the conditions set forth in paragraph (a)(3)(ii) of this section.

* * * * *

By the Federal Home Loan Bank Board.

Jeff Sconyers,

Secretary.

[FR Doc. 86-10025 Filed 5-2-86; 8:45 am]

BILLING CODE 6720-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 85-ANE-30; Amdt. 39-5293]

Airworthiness Directives; Avco Lycoming Division T5313B and T5317A Series Turboshaft Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires an initial and repetitive dye penetrant inspections for cracks, and removal as necessary, of the centrifugal compressor impeller installed on Avco Lycoming T5313B and T5317A series turboshaft engines. The AD is needed to prevent an impeller failure that can cause an uncontained engine failure.

DATES: Effective May 6, 1986.

Compliance Schedule—As prescribed in the body of the AD.

Incorporation by Reference—Approved by the Director of the Federal Register effective May 6, 1986.

ADDRESSES: The applicable service bulletin (SB) may be obtained from Avco Lycoming Division, 550 South Main Street, Stratford, Connecticut 06497.

A copy of the SB is contained in the Rules Docket Number 85-ANE-30, in the Office of the Regional Counsel, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

FOR FURTHER INFORMATION CONTACT: Chris Gavriel, Engine Certification Branch, ANE-141, Engine Certification Office, Aircraft Certification Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone (617) 273-7084.

SUPPLEMENTARY INFORMATION: The FAA has determined that cracks can develop in the perimeter of the two drain holes on the centrifugal compressor impeller due to low cycle fatigue, and can propagate to a critical length before the published service life limit can be realized. This can precipitate a rapid tensile fracture of the impeller and can result in an uncontained engine failure. Two impellers have been found with cracks at the drain holes at 5,610 cycles and at 12,691 cycles, and one ruptured at 8,907 cycles causing an uncontained engine failure. Although the ruptured impeller was installed in an engine that was used in a non-aviation application, the mechanism of failure is the same in both aviation and non-aviation engines, yet the consequences of the failure are potentially different.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedures hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

Conclusion

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption **"FOR FURTHER INFORMATION CONTACT".**

List of Subjects in 14 CFR Part 39

Engines, Air transportation, Aircraft, Aviation safety, Incorporation by reference.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 39 of the Federal Aviation Regulations (FAR) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding to § 39.13 the following new airworthiness directive (AD):

Avco Lycoming Division: Applies to Avco Lycoming Division T5313B and T5317A turboshaft engines.

Compliance is required as indicated unless already accomplished.

To prevent centrifugal compressor impeller rupture that can cause uncontained engine failure, accomplish the following in accordance with Avco Lycoming Service Bulletin (SB) 0052, Paragraph 2A and 2B, dated November 26, 1985, or FAA approved equivalent:

(a) Inspect centrifugal compressor impeller Part Number 1-100-078-08, upon meeting the criteria as stated in (1), (2), or (3) below, within the next 200 cycles in service from the effective date of this AD, and reinspect thereafter per paragraph (b):

(1) Impellers with 4,000 cycles or more in service, installed in T5313B engines.

(2) Impellers with 3,500 cycles or more in service, installed in T513B engines, that have been previously installed and operated in a T5317A engine.

(3) Impellers with 3,500 cycles or more in service, installed in T5317A engines.

(b) Reinspect impellers with no cracks detected at intervals not to exceed 500 cycles in service since last inspection.

(c) Remove from service cracked impellers as follows:

(1) Prior to further flight, if cracks of 0.050 inch or greater are present.

(2) Within the next 10 cycles, if cracks of less than 0.050 inch are present.

Aircraft may be ferried in accordance with the provisions of FAR Parts 21.197 and 21.199 to a base where the AD can be accomplished.

Upon request, an equivalent means of compliance with the requirements of this AD may be approved by the Manager, Engine Certification Office, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

Upon submission of substantiating data by an owner or operator through an FAA maintenance inspector, the Manager, Engine Certification Office, New England Region, may adjust the compliance times specified in this AD.

Avco Lycoming SB Number 0052, dated November 26, 1985, identified and described in this document, is incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received this document from the manufacturer may obtain copies upon request to Avco Lycoming Division, 550 South Main Street, Stratford, Connecticut 06497. This document also may be examined at the Office of the Regional Counsel, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803, Room Number 311, Rules Docket Number 85-ANE-30, Monday through Friday between the hours of 8:00 a.m. and 4:30 p.m., except Federal holidays.

This amendment becomes effective on May 6, 1986.

Issued in Burlington, Massachusetts, on April 14, 1986.

Robert E. Whittington,

Director, New England Region.

[FR Doc. 86-10001 Filed 5-2-86; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 85-ANE-38; Amdt. 39-5291]

Airworthiness Directives; Glasflugel "Standard Libelle," "Standard Libelle-201B," and H301 and H301B "Libelle" Gliders

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the Federal Register and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective as to all known U.S. owners and operators of certain Glasflugel "Standard Libelle" and "Libelle" gliders by individual letters. The AD requires inspection of the elevator linkage in the area of the welded seam at the base of the control stick for cracks, and eventual replacement of the elevator linkage. The AD is needed to prevent fatigue failure of the elevator linkage which could result in loss of elevator control.

DATES: Effective May 6, 1986, as to all persons except those persons to whom it was made immediately effective by priority letter ADs No. 85-22-11 and 85-22-11R1, issued October 30, 1985 and December 31, 1985, respectively, which contained this amendment.

Compliance schedule—As prescribed in body of AD.

Incorporation by Reference—Approved by the Director of the Federal Register effective May 6, 1986.

ADDRESSES: The applicable technical notes and the elevator linkage Part Number 301-41-4/2 may be obtained from Mr. Hansjoerg Streifender, Bruelstrasse 12, 7318 Lenningen 2, Federal Republic of Germany.

A copy of the technical notes is contained in the Rules Docket, Regional Counsel, ANE-7, FAA New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

FOR FURTHER INFORMATION CONTACT: Munro Dearing, Brussels Aircraft Certification Office, Europe, Africa, and Middle East Office, FAA, c/o American Embassy, 15 Rue de la Loi B-1040 Brussels, Belgium telephone 513.38.30 ext. 2710, or Richard B. Noll, ANE-152, Boston Aircraft Certification Office,

VOL 51 ISS 86 MY 5 1986 UMI

FAA New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone (617) 273-7111.

SUPPLEMENTARY INFORMATION: On October 30, 1985, priority letter AD 85-22-11 was issued and made effective immediately to all known U.S. owners and operators of certain Glasflugel "Standard Libelle," Standard Libelle-201B," and H301 and H301B "Libelle" gliders. The AD required inspection of the elevator linkage in the area of the welded seam at the base of the control stick for cracks within 10 hours time in service, and replacement of the elevator linkage within 25 hours time in service after receipt of the AD, but not later than December 31, 1985. AD action was necessary to prevent fatigue failure of the elevator linkage which could result in loss of elevator control. The AD was amended by priority letter AD 85-22-11 R1, issued December 31, 1985, which was necessary to extend the compliance period for replacement of the elevator linkage because of the unavailability of the required replacement part within the originally established schedule, and to ensure aircraft safety during the extended compliance period by requiring repetitive inspections of the elevator linkage for cracks.

Applicability information was provided because not all aircraft serial numbers of the named models were affected by the AD; the replacement part number omitted from the original AD was identified; and the source of the replacement part was given because Glasflugel is no longer in business.

Since it was found that immediate corrective action was required, notice and public procedure thereon were impracticable and contrary to public interest, and good cause existed to make the AD effective immediately by individual letters, issued October 30, 1985 and December 31, 1985, to all known U.S. owners and operators of certain Glasflugel "Standard Libelle," "Standard Libelle-201B," and H301 and H301B "Libelle" gliders. These conditions still exist, and the AD is hereby published in the **Federal Register** as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

Conclusion

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption **"FOR FURTHER INFORMATION CONTACT".**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 39 of the Federal Aviation Regulations (FAR) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding to Part 39 the following new airworthiness directive (AD):

Glasflugel: Applies to "Standard Libelle" and "Standard Libelle-201B" (aircraft serial numbers 1 through 470), and H301 and H301B "Libelle" (all aircraft serial numbers) gliders.

Compliance is required as indicated unless already accomplished.

To prevent fatigue failure of the elevator linkage in the area of the welded seam at the base of the control stick which could result in loss of elevator control, accomplish the following:

(a) Within the next 10 hours time in service after the effective date of this AD, and thereafter at intervals not to exceed 10 hours time in service after the last inspection, unless compliance with paragraph (c) is already accomplished, visually inspect the elevator linkage, part number (P/N) 301-41-3/2, by means of a magnifying glass of at least 5 times magnification for cracks in the area of the welded seam at the base of the control stick.

(b) If a crack is found during the inspection required by paragraph (a) of this AD, before further flight, replace elevator linkage, P/N 301-41-3/2, with a serviceable part.

(c) Within the next 50 hours time in service after the effective date of this AD, but no later than July 1, 1986, replace the elevator linkage, P/N 301-41-3/2, with P/N 301-41-4/2, in accordance with Glasflugel-Technical Notes Nos. 201-22, dated July 29, 1980, for Models "Standard Libelle" and "Standard Libelle-201B," and 301-31, dated July 29, 1980, for Models H 301 and H 301B "Libelle" gliders, or an FAA-approved equivalent.

Upon request, an equivalent means of compliance with the requirements of this AD may be approved by the Manager, Brussels Aircraft Certification Office, ABU-100, Europe, Africa, and Middle East Office, FAA, c/o American Embassy, 15 Rue de la Loi B-1040 Brussels, Belgium, telephone 513.38.30 ext. 2710.

Upon submission of substantiating data by an owner or operator through an FAA maintenance inspector, the Manager, Brussels Aircraft Certification Office, may adjust the compliance time specified in this AD.

Glasflugel Technical Notes Nos. 201-22 and 301-31, dated July 29, 1980, identified and described in this document, are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Mr. Hansjoerg Streifender, Bruelstrasse 12, 7319 Lenningen 2, Federal Republic of Germany. These documents also may be examined at Regional Counsel, ANE-7, FAA New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

This amendment becomes effective May 6, 1986, as to all persons except those persons to whom it was made immediately effective by priority letters AD No. 85-22-11 and 85-22-11R1, issued October 30 and December 31, 1985, respectively, which contained this amendment.

Issued in Burlington, Massachusetts, on April 14, 1986.

Robert E. Whittington,

Director, New England Region.

[FR Doc. 86-9999 Filed 5-2-86; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 85-ANE-22; Amdt. 39-5292]

Airworthiness Directive: Pratt & Whitney (PW) JT9D-3A Series Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts an airworthiness directive (AD) that requires initial and repetitive radioisotope inspections of the second stage turbine nozzle guide vanes for detection of second stage turbine vane inner shroud rearward deflection, and removal of the affected parts from service if excessive deflection is discovered. The AD is needed to institute an inspection program that would maintain a safe clearance between the vane inner shroud and the second stage turbine disk, and eliminate uncontained engine failures that can be initiated by excessive vane deflection.

DATE: Effective June 5, 1986.

Compliance schedule—As prescribed in the body of the AD.

Incorporation by reference—Approved by the Director of the Federal Register effective June 5, 1986.

ADDRESSES: The applicable Alert Service Bulletin (ASB) may be obtained from Pratt & Whitney, Publication Department, P.O Box 611, Middletown, Connecticut 06457. A copy of the ASB is contained in the Rules Docket Number 85-ANE-22 in the Office of the Regional Counsel, New England Region Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803 and may be examined between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Chris Gavriel, Engine certification Branch, ANE-141, Engine Certification Office, Aircraft Certification Division, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone (617) 273-7084.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations (FAR) to include a new AD requiring initial and repetitive inspections of the second stage turbine nozzle guide vanes, Part Number 770372, and PW JT9D-3A engines for rearward deflection and removal of vanes with excessive rearward deflection, was published in the **Federal Register** on October 24, 1985, (50 FR 43222). The FAA has determined that there have been five events of excessive vane rearward deflection to date, not six as previously reported, one of which has resulted in an uncontained engine failure. In this instance, a section of the second stage turbine disk was liberated and an adjacent engine was damaged while the aircraft was executing a takeoff roll. Since this condition is likely to exist or develop on other engines of the same design, a new AD is being issued which requires initial and repetitive radioisotope inspections of the second stage turbine nozzle guide vanes for rearward deflection and removal of vanes that have deflected in excess of established limits per PW ASB 5619, dated July 31, 1985.

Interested persons have been afforded the opportunity to participate in the making of this amendment and due consideration has been given to all relevant data and comments received. One comment was received concerning the proposed rule. The one commenter conducted an industry-wide survey on the proposed rule and received two responses. One participant in the survey recommended, through the commenter, that the proposed rule have provisions to allow monitoring of the vane burning and bowing every 1,000 hours as an equivalent means of compliance. The FAA disagrees. Experience at other JT9D-3A operators has shown that second stage turbine nozzle guide vane deflection is possible without burning or bowing. Vane and shroud deflection is the main concern since this can and has led to second turbine disk contact. Therefore, vane and shroud deflection is the primary criteria for engine removal and the vane deflection limits of ASB 5619 must be adhered to.

A second participant in the survey requested, through the commenter, that the appropriate section of the Engine Manual Part Number 770407 be added to the proposed rule as an alternate reference. The request is denied in that the ASB 5619 is a self contained document that includes all aspects of compliance with this rule. The Engine Manual is referenced in the ASB as a supporting document.

Conclusion

The FAA has determined that this regulation involves 167 JT9D engines installed on Boeing 747 series aircraft and the approximate total annual cost is $112,000. It has also determined that few, if any, small entities within the meaning of the Regulatory Flexibility Act will be affected since the rule affects only operators using Boeing 747 aircraft in which the JT9D engines are installed, none of which are believed to be small entities. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption **"FOR FURTHER INFORMATION CONTACT".**

List of Subjects in 14 CFR 39

Engines, Air transportation, Aircraft, Aviation safety, Incorporation by reference.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 39 of the Federal Aviation Regulations (FAR) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354 (a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding to § 39.13 the following new airworthiness directive (AD):

Pratt & Whitney: Applies to Pratt & Whitney (PW) JT9D-3A series turbofan engines.

Compliance is required as indicated, unless already accomplished.

To preclude second stage turbine disk failures resulting from rearward deflection of the second stage turbine nozzle guide vane inner shroud, inspect second stage nozzle guide vanes, Part Number (P/N) 770372, in accordance with the Accomplishment Instructions of PW Alert Service Bulletin (ASB) 5619, dated July 31, 1985, or FAA approved equivalent, per the following schedule:

(a) Inspect vanes for rearward deflection prior to accumulating 4,000 hours in service since new or since the vanes were refurbished, and reinspect thereafter per paragraph (b).

(b) Reinspect at the following intervals and until such time as the engine incorporates a complete set of new or refurbished vanes with zero time in service, at which time the requirements of paragraph (a) become applicable.

(1) Within the next 1,000 hours in service since last inspection, if the vane deflection is greater than 0.050 inches but not greater than 0.070 inches.

(2) Within the next 2,000 hours in service since last inspection, if the vane deflection is less than or equal to 0.050 inches.

(c) Remove from service, prior to further flight, vanes that have a rearward deflection greater than 0.070 inches.

Notes: 1. Refurbished vanes are defined as vanes which have been operated in service and have subsequently been inspected and repaired to the specifications in Pratt & Whitney Engine Manual, P/N 646028.

2. Engine Manuals P/N 646028 and 770407 are identical for the JT9D-3A engine model and are both FAA approved.

Upon request, an equivalent means of compliance may be approved by the Manager, Engine Certification Office, Aircraft Certification Division, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

Aircraft may be ferried in accordance with the provisions of FAR Parts 21.197 and 21.199 to a base where the AD can be accomplished.

Upon submission of substantiating data by an owner or operator through the FAA maintenance inspector, the Manager, Engine Certification Office, New England Region, may adjust the compliance time specified in this AD.

VOL 51 ISS 86 MY 5 1986 UMI

PW ASB-5834, dated July 31, 1985, is incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received this document from the manufacturer may obtain copies upon request to Pratt & Whitney, Publication Department, P.O. Box 611, Middletown, Connecticut 06457.

This document also may be examined at the Office of the Regional Counsel, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803, Rules Docket Number 85-ANE-22, Room Number 311, between the hours of 8:00 a.m. and 4.30 p.m., Monday through Friday except Federal holidays.

This amendment becomes effective on June 5, 1986.

Issued in Burlington, Massachusetts, on April 14, 1986.

Robert E. Whittington,

Director, New England Region.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 85-AWA-5]

Establishment of Airport Radar Service Areas; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: This action corrects the description of the Michiana Regional Airport, South Bend, IN, Airport Radar Service Area (ARSA). An ARSA is operational only during the hours of operation of the control tower and associated radar approach control facility. Michiana Regional Airport, South Bend Tower and Approach Control Facility provide services only during a portion of the day. The description of these hours was inadvertently omitted from the ARSA description as published on April 7, 1986. This action corrects that description.

EFFECTIVE DATE: 0901 G.m.t., May 8, 1986.

FOR FURTHER INFORMATION CONTACT: Robert Burns, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

History

Federal Register Document 86-7886 was published on April 7, 1986, establishing the Michiana Regional Airport, South Bend, IN, ARSA. The legal description of the ARSA inadvertently omitted a narrative description of the limited hours of operation. An ARSA is operational during the hours the control tower and approach control facility are operating. This action corrects that omission.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Airport radar services areas

Adoption of the Correction

Accordingly, pursuant to the authority delegated to me, Federal Register Document 86-7886, as published in the Federal Register on April 7, 1986, (51 FR 11686) is corrected as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1354(a) and 1354(a); 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

2. Section 71.501 is amended as follows:

Michiana Regional Airport, South Bend, IN [Amended]

By adding the words "This airport radar service area is effective during the specific days and times of the South Bend Tower and Approach Control Facility as established in advance by a Notice to Airmen. The effective dates and times will thereafter be continuously published in the Airport/Facility Directory."

Issued in Washington, D.C., on April 29, 1986.

Daniel J. Peterson,

Manager, Airspace—Rules and Aeronautical Information Division.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket No. 9148]

Flowers Industries, Inc.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Modifying order.

SUMMARY: The Federal Trade Commission has modified a 1983 consent order with Flowers Industries, Inc., a Thomasville, Ga. baker (48 FR 53403), by appointing a trustee to divest two bakeries and extending for six months the deadline for the divestitures.

DATES: Consent Order Issued Nov. 3, 1983. Modified Order Issued April 16, 1986.

FOR FURTHER INFORMATION CONTACT: Elliot Feinberg, FTC/L-301, Washington, D.C. 20580. (202) 694-4604.

SUPPLEMENTARY INFORMATION: In the Matter of Flowers Industries, Inc., a corporation. The prohibited trade practices and/or corrective actions, as set forth at 48 FR 53403, remain unchanged.

List of Subjects in 16 CFR Part 13

Bakeries, Trade practices.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 7 38 Stat. 731, as amended; 15 U.S.C. 45, 18)

[Docket No. 9148]

Order Modifying Order to Divest

In the matter of Flowers Industries, Inc., a corporation.

Commissioners: Terry Calvani, Acting Chairman; Patricia P. Bailey; Mary L. Azcuenaga; Andrew J. Strenio, Jr.

On November 3, 1983, the Commission issued its Order in this matter requiring, *inter alia*, that respondent Flowers Industries, Inc. ("Flowers") "divest itself absolutely and in good faith of the High Point Baker Plant . . . [and] of the Gadsden Bakery Plant to an Eligible Person including, without limitation, land, buildings, fixtures attached thereto, machinery and equipment." As of the date of this order, neither plant has been divested by Flowers. Because it appeared that the public interest would be served by modifying the order to allow for the appointment of a trustee to accomplish divestiture, on March 19, 1986, the Commission issued its Order To show Cause why Order Requiring Divestiture Should Not Be Modified ("Order To Show Cause") pursuant to § 3.72 of the Commission's Rules of Practice. The Order to Show Cause

proposed the insertion of a new Paragraph VII of the Order to appoint Graham Humes of Mellon Bank (East) N.A. as trustee. On March 31, 1986, the Order To Show Cause was served on Flowers, and Flowers answered on April 2, 1986, stating that it consents to the modifications.

After reviewing Flowers's answer and the materials submitted with its compliance reports, the Commission has concluded that the public interest warrants modifying the order as proposed in the Order To Show Cause. As the Commission observed in the Order To Show Cause, the appointment of the trustee appears likely to advance the remedial objectives of the order.

Accordingly,

It is hereby ordered that pursuant to 15 U.S.C. 45 (b), and § 3.72 of the Commission's Rules of Practice, 16 CFR § 3.72, (1) Paragraphs VII, VIII, IX, X and XI of the order in this matter be modified to renumber these Paragraphs VIII, IX, X, XI, and XII respectively, and (2) a new Paragraph VII be added to the order, as follows:

VII

The Commission hereby appoints Graham Humes, of Mellon Bank (East) N.A., as Trustee to serve subject to all the terms and conditions specified herein.

A. Powers and Duties of Trustee; Conditions of Trusteeship

1. The Trustee shall have the duty and authority to effect the divestiture of the properties and assets of Flowers subject to divestiture pursuant to Paragraphs I and II of this Order ("the Assets") as quickly as possible in good faith to an Eligible Person who has represented in good faith that the Assets will, if acquired, be used in accordance with subparagraphs I(B) and II(B) of the Order. The Trustee may divest the plants separately or together.

2. The duty and authority of the Trustee to divest the Assets shall be at the most favorable price and terms available, but there shall be no minimum price therefor.

3. If requested by Flowers or the Commission, the Trustee shall furnish a surety bond, the cost of which may be included in the Trustee's expenses as provided in subparagraph VII(D).

4. Except for cases of misfeasance, negligence, willful or wanton acts, or bad faith by the Trustee, the Trustee shall not be liable to Flowers for any action taken or not taken in the performance of the trusteeship. Flowers shall indemnify the Trustee and hold the Trustee harmless against any liabilities, claims, or expenses arising out of performance of the trusteeship, including all reasonable fees of counsel and other expenses incurred in connection with the preparation for or defense of any claim, whether or not resulting in any liability, except to the extent that such liabilities, claims, or expenses result from misfeasance, negligence, willful or wanton acts, or bad faith by the Trustee.

5. Rule 2.41(f) of the Commission's Rules of Practice and Procedures shall apply to the Trustee in the same manner as it would be applicable to Flowers.

6. The Trustee may seek approval of a proposed acquirer at any time during the period specified in subparagraphs VII(B)(1) and VII(B)(2), and the Trustee may seek approval for more than one proposed acquirer. After the expiration of the time for seeking approval of a proposed acquirer, the Trustee shall have no duty or authority to seek approval of a proposed acquirer.

7. Each request to the Commission for approval of a proposed acquirer shall be in writing and shall include a definitive written agreement between the proposed acquirer and the Trustee. The agreement shall be conditional upon approval of the transaction by the Commission.

8. The Trustee shall have the power (a) to retain the services of attorneys, appraisers, consultants, investment bankers, and such others as may be reasonably necessary to assist in the divestiture of the Assets; (b) to disclose confidential information and data respecting the Assets to any person who, in the opinion of the Trustee, shows a bona fide interest in acquiring the Assets or any portion thereof; (c) to enter into such contracts and execute such documents on behalf of Flowers as may be reasonable and necessary to effect divestiture in accordance with the terms of this Order, provided that such contracts and documents may include representations, warranties covenants, and indemnity agreements only as to clear title; and (d) to take such other actions as may be reasonable and necessary to effect divestiture in accordance with the terms of this Order.

9. Within thirty days following appointment of the Trustee and every thirty days thereafter, until the Commission approves a proposed acquirer or the time for seeking approval of a proposed acquirer has expired, the Trustee shall submit a verified report in writing to the Commission, with a copy to Flowers, setting forth (a) the steps taken by the Trustee to make public the availability for purchase of the Assets, (b) a list of all persons or organizations to whom notice of availability for purchase has been given directly, (c) a summary of all discussions and negotiations together with the indentities and addresses of all interested persons or organizations, and (d) copies of all internal memoranda, offers, counter-offers, communications, and correspondence concerning divestiture. The Trustee shall provide such other reports as may be required by the Commission.

10. The Trustee shall account for all monies derived from any divestiture. All funds received by the Trustee from a prospective acquirer shall be deposited immediately in a federally chartered bank in an interest-bearing account until settlement of the Trustee's account.

11. Within sixty days after divestiture or after expiration of the time for seeking approval of a proposed acquirer, the Trustee shall submit to the Commission a detailed final accounting, including all amounts received or paid by the Trustee and all unpaid amounts still owing to the Trustee or others. Upon approval of the accounting by the Commission, the Trustee shall pay the approved unpaid expenses and pay the balance of the funds, together with all interest earned, to Flowers. Should the amount in the Trustee's account be insufficient to pay the approved unpaid expenses and to compensate the Trustee, Flowers, within 15 days after receiving notice thereof from the Commission, shall deliver to the Trustee an amount sufficient to compensate the Trustee pursuant to subparagraph VII(D) and to permit the Trustee to pay all approved unpaid expenses.

12. The Trustee may be removed by the Commission for failure to discharge the Trustee's obligations diligently or faithfully, or for other good cause. Upon the removal, death, or resignation of the Trustee, a successor Trustee shall be appointed by the Commission. Selection of such successor Trustee shall be subject to the consent of Flowers, which consent shall not be unreasonably withheld.

B. Term of Trusteeship; Extension

1. The Trustee shall have 180 days from the date of appointment to submit requests for approval of a proposed acquirer to the Commission.

2. That time period may be extended by the Commission (a) upon the removal, death, or resignation of the Trustee, for an additional thirty days plus a period equal to the time during which there was no Trustee; (b) for a period necessary to remedy any delay in the submission of a request for approval of a proposed acquirer that has been substantially caused by any violation of this Order by Flowers; or (c) for a period

VOL 51 ISS 86 MY 5 1986 UMI

equal to such time as there exists any unresolved dispute with Flowers over the interpretation of this Order.

3. The trusteeship shall terminate upon the Trustee's discharge of the obligations set forth in subparagraph VII(A)(II).

C. Additional Obligations of Flowers

1. Flowers shall cooperate fully with the Trustee in the Trustee's efforts to effect divestiture of the Assets. Flowers will do nothing to impede or interfere with those efforts.

2. When requested to do so by the Trustee, Flowers shall promptly empower the Trustee to perform, on Flower's behalf, every act necessary to convey clear title to the Assets from Flowers to any Eligible Person in accordance with the terms of this Order. All documents to be executed in compliance with this subparagraph shall first be submitted to and approved by the Director of the Bureau of Competition.

3. When requested to do so by the Trustee, Flowers shall promptly provide the Trustee and prospective acquirers with existing information relating to the Assets, including but not limited to, written information and data, access to the Assets, access to records relating to the Assets, access to personnel for tours and inspections of the Assets, access to knowledgeable personnel for answering questions about the Assets, and information previously submitted to the Commission regarding Flowers' prior divestiture efforts.

4. Flowers shall not cause or permit the Assets to become subject to any new lien or encumbrance, and no existing lien or encumbrance shall be increased.

D. Compensation and Expenses of Trustee

1. The Trustee's compensation shall be paid by Flowers, and the Trustee's reasonable expenses shall be reimbursed by Flowers.

2. The Trustee's compensation shall consist of a flat fee and a contingent fee, as follows:

(a) The Trustee shall be paid a flat fee of $5000 per month from the date hereof until the first to occur of either:

(i) Divestiture of the Assets as provided for herein, or

(ii) The Expiration of the time provided for seeking approval of a proposed acquirer.

(b) In addition to the flat fee specified in subparagraph VII(D)(2)(a), the Trustee shall be paid a fee contingent upon the consummation of the divestitures contemplated hereunder from the proceeds of the divestitures.

(c) If the combined purchase price of the Assets is less than or equal to six million dollars, the contingent fee shall be $10,000 for the divestiture of the properties and assets subject to divestiture pursuant to Paragraph I of this Order and $10,000 for the divestiture of the properties and assets subject to divestiture pursuant to Paragraph II of this Order, plus an additional amount based on the combined purchase price of the Assets and calculated as follows:

(i) 3% of that portion of the purchase price less than or equal to one million dollars; plus

(ii) 1% of that portion of the purchase price greater than one million dollars but less than or equal to two million dollars; plus

(iii) 2% of that portion of the purchase price greater than two million dollars but less than or equal to three million dollars; plus

(iv) 3% of that portion of the purchase price greater than three million dollars but less than or equal to four million dollars; plus

(v) 4% of that portion of the purchase price greater than four million dollars but less than or equal to five million dollars; plus

(vi) 5% of that portion of the purchase price greater than five million dollars but less than or equal to six million dollars.

(d) If the combined purchase price of the Assets is greater than six million dollars, the contingent fee shall be based on the combined purchase price of the Assets and calculated as follows:

(i) If the purchase price is greater than six million dollars but less than or equal to seven million dollars, 6% of the purchase price;

(ii) If the purchase price is greater than seven million dollars but less than or equal to eight million dollars, 7% of the purchase price;

(iii) If the purchase price is greater than eight million dollars but less than or equal to nine million dollars, 8% of the purchase price;

(iv) If the purchase price is greater than nine million dollars but less than or equal to ten million dollars, 9% of the purchase price;

(v) If the purchase price is greater than ten million dollars, 10% of the purchase price.

3. Notwithstanding any other term of this Order, Flowers shall not be obligated to reimburse the Trustee for any expenses in excess of $30,000 unless those expenses have been approved by the Commission.

4. Each month the Trustee shall present Flowers with a detailed written statement of the Trustee's expenses for the previous month. A copy of each monthly expense statement shall be sent to the Director of the Bureau of Competition. Subject o the condition set forth in subparagraph VII(D)(3), Flowers shall reimburse the Trustee for such expenses within five days of receipt of each monthly statement.

E. Resolution of Disputes

1. If Flowers and the Trustee are unable to resolve any dispute arising out of the interpretation of this Order, either party may notify the Commission thereof in writing.

2. The Commission shall resolve a dispute arising under subparagraph VII(E)(1) without unreasonable delay. With regard to any dispute arising out of the interpretation of subparagraphs VII(A)(8)(a), VII(A)(8)(b), VII(C)(3), or VII(D) of this Order, the Commission's determination shall be final and binding upon Flowers and the Trustee.

3. For the purpose of subparagraph VII(B)(2)(c), an unresolved dispute shall exist as of the date the Commission (a) receives notice under subparagraph VII(E)(1), or (b) in the case of a dispute between it and Flowers, notifies Flowers in writing thereof.

F. Termination of Obligation To Divest

Except upon a showing that any act or omission by Flowers in violation of the terms of this Order has contributed substantially to the Trustee's inability to divest the Assets, Flowers's obligation to divest the Assets under this Order shall terminate upon expiration of the time for seeking approval of a proposed acquirer; provided, however, that Flowers shall proceed to accomplish any divestiture that has been approved by the Commission, or that is subsequently approved by the Commission if the request for approval was received by the Commission before the expiration of the time for seeking approval of a proposed acquirer.

By the Commission. Commissioner Strenio was recorded as not participating.

Issued: April 16, 1986.

Emily H. Rock,

Secretary.

BILLING CODE 6750-01

16 CFR Part 13

[Docket No. C-3183]

Saab-Scania of America, Inc.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order requires an Orange, Conn. wholly-owned subsidiary of a Swedish automobile company, among other things, to make repairs or reimburse consumers for costs they incurred because of paint problems with Saab cars assembled at the company's factory in Malines, Belgium, from 1970 to 1976. The offer to repair or reimburse will be made to consumers who bought a new Belgian-made Saab after Dec. 31, 1977 and to subsequent owners who bought their vehicle within the first 36 months after the original purchase. The repair or reimbursement cost will be up to $2,000 per car, except for cars purchased in Massachusetts. The Attorneys General in Massachusetts, Maine and Vermont have reached separate agreements with Saab in those states over the paint problem, but Saab consumers in Maine and Vermont are eligible for the repair or reimbursement program. Date: Complaint and Order issued April 16, 1986.[1]

FOR FURTHER INFORMATION CONTACT: Phoebe Morse, Director, Boston Regional Office, Federal Trade Commission, 150 Causeway St., Room 1301, Boston, MA 02114. (312) 353-4423.

SUPPLEMENTARY INFORMATION: On Thursday, Dec. 12, 1985, there was published in the **Federal Register**, 50 FR 50800, a proposed consent agreement with analysis In the Matter of Saab-Scania of America, Inc., a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

Comments were filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its modified order to cease and desist, as set forth below, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Corrective Actions and/or Requirements: S 13.533 Corrective actions and/or requirements; 13.533-45 Maintain records; 13.533-55 Refunds, rebates, and/or credit.

List of Subjects in 16 CFR Part 13

Automobiles, Trade practices.

16 CFR Part 13

[Docket No. 9166]

Figgie International, Inc.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Final order.

SUMMARY: This final order requires, among other things, a Richmond, Va. manufacturer and seller of home heat detectors to provide notification that smoke detectors give earlier warning than heat detectors in nearly all residential fires to past purchasers of its heat detectors. Respondent must also disclose that fact in any future promotional materials that make claims about the residential fire protection provided by heat detectors. Additionally, respondent is prohibited from misrepresenting: (1) The performance characteristics of any heat or smoke detector, or any system containing both; or (2) any standard or recommendation established by the National Fire Protection Association or any other group concerning fire warning systems.

DATES: Complaint issued May 17, 1983. Final Order issued April 11, 1986.[1]

FOR FURTHER INFORMATION CONTACT: Christopher Schwartz, New York Regional Office, Federal Trade Commission, 2243-EB Federal Bldg., 26 Federal Plaza, New York, NY 10278. (212) 264-1207.

SUPPLEMENTARY INFORMATION: In the Matter of Figgie International, Inc., a corporation. The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Advertising Falsely or Misleadingly: § 13.10 Advertising falsely or misleadingly; § 13.170 Qualities or properties of product or service; § 13.195 Safety; § 13.205 Scientific or other relevant facts; § 13.245 Specifications or standards conformance. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; § 13.533-20 Disclosures; § 13.533-45 Maintain records.

List of Subjects in 16 CFR Part 13

Residential heat detectors, Trade practices.

(Authority: Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

Before Federal Trade Commission

[Docket No. 9166]

Commissioners: Terry Calvani, Acting Chairman, Patricia P. Bailey, Mary L. Azcuenaga, Andrew J. Strenio, Jr.

In the Matter of Figgie International, Inc., a corporation.

Final Order

This matter has been heard by the Commission upon the appeals of respondent and complaint counsel from the initial decision, and upon briefs and oral argument in support of and in opposition to the appeals. For the reasons stated in the accompanying opinion, the Commission has denied the appeal of the respondent and has granted in part and denied in part the appeal of complaint counsel.

It is ordered that the initial decision of the administrative law judge be adopted as the findings of fact and conclusions of law of the Commission except where it is inconsistent with the accompanying opinion. Other findings of fact and conclusions of law of the Commission are contained in the accompanying opinion.

It is further ordered that the following order to cease and desist be entered:

I

It is ordered that respondent, Figgie International, Inc., its successors and assigns, and respondent's officers, agents, representatives and employees, directly or through any corporate or other device, in connection with the advertising, offering for sale or distribution of any heat detector or any residential fire alarm system containing a heat detector, as the term "heat detector" is defined by the National Fire Protection Association's Standard 74, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

A. Representing in any manner, directly or by implication:

(1) That heat detectors provide the necessary warning to allow safe escape from most residential fires; or

(2) That fire alarm systems combining heat detectors and smoke detectors provide significantly greater fire warning protection than smoke

[1] Copies of the Complaint, Initial Decision and Opinion of the Commission are available from the Commission's Public Reference Branch, H-130, 6th & Pa. Ave., NW., Washington, D.C. 20580.

VOL 51 ISS 86 MY 5 1986 UMI

detectors alone because heat detectors give earlier warning of hot, flaming fires.

B. Misrepresenting in any manner, directly or by implication:

(1) The performance characteristics of any heat detector or any residential fire alarm system containing a heat detector including, but not limited to, the capability of the heat detector to provide the necessary warning to occupants to allow them to escape safely in the event of fire; or

(2) The existence or content of any standard or recommendation established or made by the National Fire Protection Association or any other entity regarding the location, number or type of fire protection devices to be installed in a residence, or compliance of any heat detector or residential fire alarm system containing a heat detector with any such standard or recommendation; or

(3) The performance characteristics of any smoke detectors or any residential fire alarm system containing a smoke detector; or

C. Representing in any manner, directly or by implication, the performance characteristics of any heat detector or any fire alarm system containing a heat detector including, but not limited to, the capability of the heat detector to provide fire warning protection, unless at the time of making any such representation respondent possesses and relies upon competent and reliable scientific evidence which substantiates such representation.

II.

It is further ordered that respondent shall, within 120 days from the date of service of this Order, include the following notice in all print advertising or print promotional material for all heat detectors manufactured or sold by respondent or for any fire warning system containing such heat detectors, if that advertising or promotional material expressly or impliedly represents that heat detectors provide the necessary warning to allow safe escape in the event of fire or that a combination system of heat and smoke detectors provides significantly greater protection than smoke detectors alone:

NOTICE: Smoke detectors give earlier warning than heat detectors in nearly all residential fires. That is because detectable amounts of smoke almost always develop before detectable levels of heat.

The above-required language shall be printed in a typeface and color that are clear and conspicuous, and, in multipage documents, shall appear on the cover or first page. Nothing contrary to, inconsistent with, or in mitigation of the above-required language shall be used in any advertising or promotional materials. With respect to any film, video tape, or slide promotional material, the above-required language shall be included both orally and visually within the first minute of the presentation, in a matter designed to ensure clarity and prominence.

III.

It is further ordered that respondent shall, within 180 days after service of this Order, send by first-class mail, to each identifiable purchaser of respondent's fire alarm products since January 1, 1979, the disclosure required by part II.

Purchasers shall be deemed identifiable if they can be traced using warranty cards or testimonial letters in respondent's possession and/or using sales records maintained by respondent's dealers.

IV.

It is further ordered that respondent shall:

A. Distribute a copy of this Order to all of its officers and to all employees, agents or representatives having sales or promotional responsibilities with respect to the subject matter of this Order. The respondent shall also distribute a copy of this Order to each dealer of its fire alarm products.

B. Provide each of its dealers with a form clearly stating that dealer's intention to conform his or her sales practices to the requirements of this Order.

C. Cease selling its fire warning devices to any dealer who does not sign and return that form to respondent or fails to conform his or her sales practices to the requirements of this Order.

D. Investigate and make good faith efforts to resolve any complaints it receives that any dealer has failed to conform his or her sales practices to the requirements of this Order.

V.

It is further ordered that respondent shall maintain such documents as will demonstrate compliance with this Order for a period of three years from the date the document is created or used, whichever is later. Such documents shall be made available to the Commission or its staff for inspection and copying upon reasonable request and shall include, but not be limited to, the following:

(a) A copy of each nonidentical form of promotional and training materials disseminated by respondent;

(b) The name and last known address of each dealer of respondent's first fire alarm products;

(c) The name and last known address of each purchaser identified under Part III of this Order; and

(d) A copy of each complaint it receives that any of its dealers has failed to conform his or her sales practices to the requirements of this Order, and a record of the investigation and disposition of the complaint.

VI.

It is further ordered that respondent shall notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the Order.

VII.

It is further ordered that respondent shall, within 120 days after service upon it of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order.

By the Commission, Commissioner Bailey concurring in part and dissenting in part and Commissioner Strenio did not participate.

Issued: April 11, 1986.

Emily H. Rock,

Secretary.

Statement of Commissioner Bailey Concurring in Part and Dissenting in Part

Figgie International, Inc.

[Docket No. 9166]

April 11, 1986.

The Commission rules today that respondent Figgie International, Inc. (Figgie) misrepresented the performance of its Vanguard heat detectors. I agree. Figgie claimed that its heat detectors "provide the necessary warning to occupants to allow them to escape safely" from residential fires. That is untrue for nearly all residential fires, and the Commission's order prohibits Figgie from repeating that claim.

The complaint in this matter also alleged that respondent claimed that its "fire alarm systems combining heat detectors and smoke detectors provide *significantly greater* fire warning protection for occupants than smoke detectors alone." Complaint para. 5 (emphasis added). The Commission agrees that this claim was made in three forms, but concludes that complaint counsel failed to prove that two of them were false[1] I believe

[1] The opinion examines three different ways in which Figgie represented that its heat detectors

Continued

complaint counsel adequately proved that heat detectors do not provide "significantly greater" protection in any of the three fashions claimed, and so I dissent from that part of the Commission's opinion.

Figgie made the following statements, all of which contribute to the notion that heat detectors provide significantly greater protection from fires than smoke detectors alone: "HEAT DETECTORS HAVE PROBABLY SAVED MORE LIVES AND PROPERTY THAN ANY OTHER FIRE DETECTION DEVICE" (CX 63); combining heat detectors with smoke detectors gives consumers "the combination needed to give a greater measure of life safety" and is needed "to maximize chances for survival" (CXs 69, 68); and "to have adequate protection, the home must have heat detectors as well as smoke detectors." (CX 130) In the face of this and other evidence, the ALJ found that a claim of "significantly greater benefit" was made, and the Commission expressly adopts that conclusion. Opinion at 11 & n. 12.

The record evidence of how heat detectors actually perform compared to smoke detectors contrasts sharply with the picture Figgie painted in its advertising and marketing materials. For example, Figgie claimed that its heat detectors are significantly more protective because they can be placed where smoke detectors are not recommended (such as kitchens, garages, and attics). However, the expert testimony and test data introduced at trial establish that this confers virtually no life safety protection benefit over smoke detectors because smoke detectors almost always alarm before heat detectors, regardless of their respective locations.[2] Figgie also claimed that heat detectors provide significantly more protection because they are mechanically reliable. Smoke detectors, which rely on outside power sources, are theoretically less reliable than mechanically operated heat detectors. But the most reliable empirical data in the record suggests that the difference is quite small so that characterizing it as "significantly greater" life safety protection is inaccurate.[3]

Moreover, this record demonstrates that: (1) Smoke detectors provide the best protection for saving lives in case of fire; and (2) heat detectors, wherever placed, do not alarm soon enough to allow safe escape in most residential fires. Since heat detectors do not allow consumers to escape safely from most fires, but smoke detectors do, it is difficult to understand how heat detectors could be said to provide "significantly greater" protection than smoke detectors, or even any "significant" degree of protection at all.

The Commission's failure to enter a finding that Figgie's "significantly greater" benefit claims are deceptive stems primarily from what I believe to be a misreading of the complaint and complaint counsel's burden. The Commission agrees that the relevant claims were made and reaches conclusions not too dissimilar from my own about what level of increased protection heat detectors provide in the two situations in dispute. However the Commission then asks not whether that level of increase is "significant," but whether even a small or slight increase might nevertheless be "important" or "meaningful" or "significant" to at least some consumers. This is the crux of the Commission's error: a shift in emphasis away from the complaint's focus on whether the *increase* is significant and towards a new focus, not pled in the complaint and thus not litigated at trial, on whether the *protection* is or may be significant to some consumers.[4]

While this may appear to be only a subtle shift in emphasis, it reverses the result in the case. I would prohibit Figgie from repeating any claims to the effect that heat detectors provide "significantly greater" protection than smoke detectors, although I would permit the company to publicize whatever marginal increases in protection are demonstrated by the evidence because I agree with the opinion's conclusion that some consumers might consider even slight increases in fire protection "important" (particularly if they are highly risk averse). The Commission appears to agree that at least some of Figgie's increased benefit claims are false (concluding, for example, that placement of heat detectors confers only a "slightly," not a significantly, better level of protection), but refuses to ban those false claims outright because complaint counsel failed to prove that no one would find slight increases in fire protection significant.[5]

I think the opinion is trying to say that if consumers have no other protection, then heat detectors in their garages may help to prevent property damage, and that should consumers with smoke detectors fail to maintain them then a heat detector may provide an alarm that is late, but better than nothing. In other words, the Commission believes Figgie should be allowed to continue selling heat detectors to consumers who are sufficiently risk averse that they are willing to spend between $500 and $600 for a heat detector system that adds at most a slight increment of protection to smoke detectors. I do not disagree with that goal. I simply disagree with the notion that Figgie can continue to sell its heat detectors by convincing consumers that they are more valuable, and more beneficial in protecting the lives of consumers and their families, than the evidence shows to be true.

My dissent is tempered only by the fact that the order entered in this case prohibits Figgie from making performance claims for its heat detectors which cannot be substantiated. I believe the record of this proceeding contains clear evidence that Figgie cannot substantiate claims that its heat detectors provide "significantly greater" life safety protection than do smoke detectors alone. For that reason, therefore, the order should have the effect of restraining Figgie indirectly from making exaggerated claims of this kind in the future But there is not the slightest reason, on this record, to have left open any doubt on this point. Figgie's heat detectors do not provide "significantly

were significantly better than smoke detectors alone: in their response to hot, flaming fires; in their ability to be located where smoke detectors are not recommended; and in their mechancial reliability. The Commission rules the first claim deceptive, and I agree. My dissent focuses on the resolution of the second two claims. I join the Commission's opinion and order in all other respects.

[2] The record includes a test report in which a heat detector was placed in a kitchen and a smoke detector was placed in an adjacent hallway; after a fire was set in the kitchen, the smoke detector located elsewhere in the house alarmed before the heat detector located in the same kitchen. (I.D. 149) While this represents the result of only a single test, the conclusion about the respective performance of the devices holds true in almost all cases, according to experts who testified. They asserted that smoke detectors would almost always alarm before heat detectors because smoke disperses quickly and evenly throughout a home, while heat buildup is highly uneven. Detectors that react to smoke are not limited in space coverage the way that detectors that react to heat are. As a consequence, these experts testified that heat detectors would *not* significantly increase consumers' life safety potential and would provide only marginal benefits by increasing property protection. (Bukowski Tr. 1058–59; Clark Tr. 711–12).

Other test data in the record confirm that smoke detectors virtually always outperform heat detectors, regardless of location. For example, the Indiana Dunes I and II tests, showed that heat detectors provided no increase in escape time compared to smoke detectors. (Bukowski Tr. 966–81) In Dunes I, heat detectors never activated first and in one-third of the tests no heat detectors ever activated at all. (Bukowski Tr. 966) In Dunes II, not one heat detector alarmed in time to provide three minutes of escape time. (Bukowski Tr. 961) The California Fire Chiefs' tests, which included tests where fires were set in the kitchen, similarly reported that heat detectors never responded first to fires. (Martin Tr. 679) The Commission's opinion discounts the results of these tests because it claims the tests measured only comparative heat and smoke detector performance in the same room. However, each test involved detector arrays in several locations in each house, so that the responses of heat and smoke detectors in different rooms were recorded and compared. The results show that smoke detectors alarmed in time to give the necessary three-minute warning in 80 percent of the tests in Dunes I, and that heat detectors add *no* increase in protection. (Bukowski Tr. 980, 982–83).

[3] The only objective data on comparative smoke detector reliability are from three tests, one showing a failure rate of approximately two percent over several years, and a third showing that 16 percent of smoke detectors surveyed in the field over an indeterminate period were not operational. (Bukowski Tr. 1048) Because the definition of failure used to compile these figures encompasses a range of performance well short of mechanical failure—such as slight decreases in smoke detector sensitivity and removal of batteries (Bukowski Tr. 1051)—the rates of actual smoke detector failure are even lower than these figures suggest.

[4] This focus is especially curious since the actual claims Figgie made did not by any stretch of the imagination suggest that heat detectors added only slight increments of protection that could be important to some people. To the contrary, Figgie repeatedly stressed that consumers' chances for survival were significantly greater, or "maximize[d]," with heat detectors and that smoke detectors alone were inadequate to save them and their families from death by fire.

[5] The suggestion that complaint counsel should have provided testimony or survey evidence to show what level of additional protection consumers find "significant" is in my view unwarranted. *See* Opinion at 33. Once the Commission determines what claims Figgie made, this case simply does not present questions of consumer perception. Surely the Commission does not mean to suggest that complaint counsel must prove first that a claim is false as a matter of scientific fact and second that it is false in the subjective view of consumers.

VOL 51 ISS 86 MY 5 1986 UMI

greater" fire warning protection for occupants than smoke detectors alone, and Figgie should have been told directly in the order not to make that claim again or any of the statements that contributed to it.

[FR Doc. 86-9974 Filed 5-2-86; 8:45 am]

BILLING CODE 6750-01-M

16 CFR Part 305

Rules for Using Energy Cost and Consumption Information Provided in Labeling and Advertising of Consumer Appliances

AGENCY: Federal Trade Commission.

ACTION: Final rule revision.

SUMMARY: The Federal Trade Commission's Appliance Labeling Rule requires that the table in § 305.9, which sets forth the representative average unit energy costs for four residential energy sources, be revised periodically on the basis of updated information provided by the Department of Energy ("DOE").

This notice revised the table to incorporate the latest figures for average unit energy costs as published in the Federal Register on February 20, 1986 by DOE.

EFFECTIVE DATE: The revised Table 1 is effective May 5, 1986. The mandatory dates for using these revised DOE cost figures are detailed below.

FOR FURTHER INFORMATION CONTACT: James Mills, 202-376-8934, attorney, Division of Enforcement, Federal Trade Commission, Washington, DC 20580.

SUPPLEMENTARY INFORMATION: On November 19, 1979, the Federal Trade Commission issued a final Appliance Labeling Rule (44 FR 66466) in response to a directive in section 324 of the Energy Policy and Conservation Act ("EPCA"), 42 U.S.C. 6201 (1975). The rule requires the disclosure of energy efficiency or cost information on labels and in retail sales catalogs for seven categories of appliances, and mandates that these energy costs or energy efficiency ratings be based on standardized test procedures developed by DOE. The rule also requires a general disclosure, on certain point-of-sale promotional materials, of the availability of energy cost or energy efficiency information, and requires that any claims concerning energy consumption made in writing or in broadcast advertisements be based on results of the standardized test procedures. The cost and efficiency information obtained by followed the test procedures is derived by using the representative average unit energy costs provided by DOE.

Table 1 in § 305.9 of the rule sets forth the representative average unit energy costs to be used for all requirements of the rule. As stated in § 305.9(b), the Table is intended to be revised periodically on the basis of updated information provided by DOE. Table 1 was first revised by publication of new DOE figures on January 13, 1981 in the Federal Register (46 FR 2974).

On February 20, 1986, DOE published (51 FR 6165) the most recent figures for representative average unit energy costs. Consequently, Table 1 must again be updated in order to reflect these latest cost figures. Accordingly, Table 1 is revised to read as set forth below.

Mandatory Use of Revised Cost Figures

The dates when use of the figures in the Revised Table 1 becomes mandatory in calculating cost disclosures for use in reporting, labeling and advertising products covered by the Commission's rule and/or EPCA are as follows:

For 1986 Submissions of Data Under § 305.8 of the Commission's Rule: The new cost figures must be used in all 1986 submissions except clothes washers. Because the 1986 costs were not published in time for use in preparing data for the mandatory submission date for these products, clothes washer submissions for 1986 could be based on the 1985 cost figures.

For Labeling and Advertising of Products Under the Commission's Rule: Only those products for which new ranges are published that are based on 1986 submissions using these 1986 DOE cost figures should be labeled with estimated annual cost figures calculated using these 1986 DOE cost figures. If such new ranges are published, the effective date for labeling new products will be ninety days after publication of the ranges in the Federal Register. Advertising for such products will also have to be based on the new costs and ranges beginning ninety days after publication of the new ranges in the Register.

Advertising of Products Covered by EPCA but not by the Commission's Rule: Manufacturers of products covered by section 323(c) of EPCA, but not by the Appliance Labeling Rule (clothes dryers, television sets, kitchen ranges and ovens, humidifiers and dehumidifiers, central air conditioners, and space heaters) must use the 1986 representative average unit costs for energy in all representations effective August 4, 1986.

List of Subjects in 16 CFR Part 305

Advertising, Energy conservation, Household appliances, Labeling, Reporting and recordkeeping requirements.

PART 305 [AMENDED]

Accordingly, 16 CFR Part 305 is amended as follows:

1. The authority citation for Part 305 continues to read as follows, and the authority citation following 305.9 is removed.

Authority: Sec. 324, Energy Policy and Conservation Act, (Pub. L. 94-163, (42 U.S.C. 6294)); as amended by the National Energy Conservation Policy Act (Pub. L. 95-619)

2. Section 305.9(a) is amended by revising Table 1 to read as follows:

§ 305.9 Representative average unit energy costs.

(a) * * *

TABLE 1.—REPRESENTATIVE AVERAGE UNIT COSTS OF ENERGY FOR FOUR RESIDENTIAL ENERGY SOURCES (1986)

Type of energy	In common terms	As required by DOE test procedure	Dollars per million Btu's [1]
Electricity	8.20¢/kWh [2]	$0.0820/kWh	$24.03
Natural Gas	62.0¢/therm [3] or 66.36¢/MCF [4, 5]	0.00060820/Btu.	6.30
No. 2 heating Oil	$1.04/gallon [6]	0.00000750/Btu.	7.50
Propane	$1.69/gallon [7]	0.00000697/Btu.	8.97

[1] Btu stands for British thermal unit.
[2] kWh stands for kilowatt hour.
[3] 1 kWh=3,413 Btu's.
[4] 1 therm=100,000 Btu's.
[5] MCF stands for 1,000 cubic feet.
[6] For the purposes of this table, 1 cubic foot of natural gas has an energy equivalence of 1,016 Btu's.
[7] For the purposes of this table, 1 gallon of No. 2 heating oil has an energy equivalence of 138,700 Btu's.
[8] For the purposes of the table, 1 gallon of liquid propane has an energy equivalence of 91,600 Btu's.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 441

[Docket No. 86N-0070]

Antibiotic Drugs; Imipenem Monohydrate-Cilastatin Sodium for Injection

Correction

In FR Doc. 86-7369, beginning on page 11571, in the issue of Friday, April 4, 1986, make the following corrections:

1. On page 11573, third column, § 441.20a(a)(3)(i), third line, "of" should read "on".

2. On page 11574, first column, in § 441.20a(b)(1), first line, "at" should read "a", and in the second line, "and" should read "an".

3. On the same page and column, in § 441.20a(b)(1)(i)(*a*), fourth line, "with" should read "of".

4. On the same page and column, in § 441.20a(b)(1)(i)(*d*), fourth line, "deionized" was misspelled.

5. On the same page and column, in § 441.20a(b)(1)(ii), first line, "standards" should read "standard".

6. On the same page and column, in § 441.20a(b)(1)(ii)(*a*), eleventh line, "nor" should read "no".

7. On the same page, following the formula definitions, in § 441.20a(b)(1)(iv), paragraphs (b) (2) through (6) were omitted. The omitted text reads as follows:

§ 441.20a Sterile imipenem monohydrate.

* * * * *

(b) * * *

(2) *Sterility.* Proceed as directed in § 436.20 of this chapter, using the method described in paragraph (e)(1) of that section.

(3) *Pyrogens.* Proceed as directed in § 436.32(a) of this chapter, using a solution containing 5.0 milligrams of imipenem per milliliter, except inject 10 milliliters per kilogram of rabbit weight.

(4) *Loss on drying.* Proceed as directed in § 436.200(i) of this chapter.

(5) *Specific rotation.* Dilute an accurately weighed sample with sufficient pH 7.0 phosphate buffer to give a concentration of approximately 5.0 milligrams of imipenem per milliliter. Proceed as directed in § 436.210 of this chapter, using a 1.0-decimeter polarimeter tube. To prepare the pH 7.0 phosphate buffer, transfer 5 grams of monobasic potassium phosphate and 11 grams of dibasic potassium phosphate to a 1.0-liter volumetric flask. Dissolve and dilute to volume with distilled water.

(6) *Identity.* Proceed as directed in § 436.211 of this chapter, using the sample preparation described in paragraph (b)(2) of that section.

BILLING CODE 7710-12-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 85-09; Notice 02]

Federal Motor Vehicle Safety Standards; New Pneumatic Tires on Passenger Cars

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Final rule.

SUMMARY: This notice amends Federal Motor Vehicle Safety Standard (FMVSS) No. 109, *New Pneumatic Tires on Passenger Cars*, to delete paragraph S4.2.2.2(b) of the standard. Paragraph S4.2.2.2(b) imposes a size factor dimensional requirement on tires manufactured for passenger cars. The agency has concluded that the size factor requirement provides no safety benefits, and that removing that requirement relieves an unnecessary restriction on tire manufacturers.

EFFECTIVE DATE: This amendment is effective May 5, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Larry Cook, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590 (202) 426-1750.

SUPPLEMENTARY INFORMATION: Federal Motor Vehicle Safety Standard (FMVSS) No. 109, *New Pneumatic Tires—Passenger Cars*, 49 CFR 571.109, specifies the requirements for all tires manufactured for use on passenger cars manufactured after 1948. Under that safety standard, tires must meet

VOL 51 ISS 86 MY 5 1986 UMI

specified dimensional, strength, resistance to bead unseating, endurance, and high speed requirements, and be labeled with certain safety information.

The European Tyre and Rim Technical Organisation (ETRTO) petitioned NHTSA to amend Standard No. 109 to delete the size factor requirement in paragraph S4.2.2.2(b). "Size factor" is defined in paragraph S3 of the standard as "the sum of the section width and the outer diameter of a tire determined on the test rim." The basis for ETRTO's request was that size factor provides no safety benefits and should be deleted for the same reasons stated by the agency for deleting the minimum size factor requirement. (*See*, 46 FR 61473, December 17, 1981; 47 FR 36180; August 19, 1982.) NHTSA tentatively agreed that the size factor dimensional requirement provides no safety benefits and issued a notice on July 12, 1985 (50 FR 28428), granting ETRTO's petition and proposing to delete the size factor requirement.

Background

A rule published in December 1981, deleted an informational table (referred to as "Table 1") that had been included in FMVSS No. 109 to list dimensional and loading information for all passenger car tire sizes, including dimensional specifications for "minimum size factor." The information had been used by the agency for testing tires for compliance with FMVSS No. 109 and for determining the appropriateness of the tires used on particular vehicles, in accordance with FMVSS No. 110, *Tire Selection and Rims*. NHTSA determined that retaining Table 1 was not necessary because the required specifications for compliance testing could be determined from the information labeled on the sidewall of the tires, and because no safety-related justifications for keeping the table were found to exist.

In deleting Table 1 from Standard No. 109, NHTSA intended to reduce unnecessary paperwork burdens for manufacturers and facilitate the introduction of new technology in tires, and thus amended the standard's requirements for tire sizes and load factors to reference publications of private standards groups. Commenters to the NPRM on this action has requested the agency to delete the dimensional requirements of Standard No. 109 in its final rule, but NHTSA determined that those requests could not be considered since the public was not given an opportunity to comment on such a change. NHTSA thus issued the final rule which amended S4.2.2.2 to simply delete reference to Table 1 and instead include the new references to the private publications.

Since dimensional requirements were being retained in S4.2.2.2, several commenters were concerned that some of the standardization organizations do not publish the size factor dimension. NHTSA addressed this concern by explaining that all yearbooks specify a tire's overall diameter and section width, and that added together, those dimensions equal the size factor. However, when Table I was deleted from Standard No. 109, NHTSA should have distinguished between specifications referring to "size factor" and those which had referred previously to "minimum size factor." As explained below, this oversight resulted in an unintended removal of dimensional tolerances previously permitted by the standard.

Size factor

Prior to the deletion of Table 1, paragaph S4.2.2.2(b) of the standard had required that a tire's size factor be *at least as large as* the size factor provided by the table. Accordingly, a "minimum size factor" was specified in Table 1 for each tire size designation. The minimum size facter for a particular tire size was always less than the size factor of that tire. A tire could meet the size factor dimensional requirement of FMVSS No. 109 when its size factor was equal to or greater than the size factor provided by Table 1 for its size designation. (For example, according to data from the 1982 Tire and Rim Association Yearbook, the size factor for the tire listed as P195/75R14 is 33.23 inches, while its minimum size factor is calculated as 32.64 inches.)

When the agency deleted Table 1, NHTSA removed Standard No. 109's listing of minimum size factors for tire sizes. NHTSA determined that the requirement was no longer necessary because manufacturers would not undersize their tire absent such a requirement. The agency amended the standard to require that a tire's size factor be at least as large as that specified in a submission made by an individual manufacturer to NHTSA, pursuant to the requirements of paragraph S4.4.1(a) of the standard, or in one of the standardization organization's publications described in S4.4.1(b), for the tire's size designation and type. However, since size factor is simply the sum of the section width and the outer diameter of a tire and is actually a design goal, the unintended effect of specifying that a tire's size factor be "at least as large as" that specified in a publication or yearbook was to revise S4.2.2.2(b) to remove the dimensional tolerances previously permitted by the minimum size factors provided in Table 1.

ETRTO's petition

When the agency denied petitions for reconsideration of its decision to delete the minimum size factor requirement, NHTSA reiterated its conclusion that such a requirement was not needed in Standard No. 109. 47 FR at 36181. ETRTO subsequently petitioned the agency to delete or amend S4.2.2.2(b) to accord with NHTSA's determination that a dimensional requirement for tire size factor was unnecessary and "to avoid any confusion" regarding that matter. NHTSA granted the petition and issued an NPRM proposing to remove paragraph S4.2.2.2(b) from Standard No. 109 and the definition of "size factor" from paragraph S3 (50 FR 28426; July 12, 1985).

The July 1985 NPRM explained that the size factor requirement should be deleted for the same reasons that minimum size factor was deleted. As explained in that notice, the agency tentatively determined that there were no safety benefits to retaining the size factor requirements since it would be implausible that tire manufacturers would either intentionally or inadvertently undersize their passenger car tires, due to the engineering and quality control efforts that are involved in designing and producing new tire sizes. First, the size factor of a tire cannot be changed after the mold is set up to produce that tire size. Second, tire manufacturers are required to certify that their tires can carry 100 percent of its maximum load at a speed of 50 miles per hour for 24 hours. Undersized tires would be overloaded and would predictably have a high failure rate during this test, which would alert tire manufacturers and NHTSA to any undersizing. Further, product liability awards and negative publicity would more than offset the few dollars saved by undersizing, and would serve as compelling disincentives to manufacturers. Finally, NHTSA believed that the size factor requirement was unnecessary because the absence of such a requirement in Safety Standard No. 119, which applies to tires for use on all motor vehicles other than passenger cars, had not created any problems. Accordingly, since NHTSA believed that tire manufacturers would not intentionally or inadvertently produce a tire which was smaller than the size labelled on the sidewall, the agency proposed to delete the size factor requirement as a means of relieving an unnecessary restriction on tire manufacturers.

Comments

The agency received four comments on the proposal. Ford agreed that the size requirement provides no safety benefits and should therefore be deleted from Standard No. 109, while Volkswagen, BMW, and Daimler-Benz AG (Mercedes-Benz) opposed the proposal.

Volkswagen (VW) argued that deleting the size factor requirement would eliminate one of the last constraints on tire manufacturers. VW cited examples of identical tires being marked with different sizes due to the overlap between maximum and minimum dimensions. That company believed that the performance requirements of Standard No. 109 do not represent a safeguard against undersizing or tire section width, so that tire manufacturers could continue to designate a tire in different ways which can enable them to charge unjustified premiums for certain tires marked with larger sizes. VW suggested NHTSA adopt lower tolerance limits for tire section width.

In response to this comment, NHTSA believes that motor vehicle manufacturers must use their own expertise in tire selection to comply with both FMVSS No. 109 and FMVSS No. 110. The practices of some tire manufacturers to supply identical tires at different prices is one which can occur regardless of the size factor requirement in Standard No.109. Since there are means available to motor vehicle manufacturers to guard against those types of actions, NHTSA has concluded that VW has not provided a sufficient basis for retaining the size factor requirement.

BMW believed that the agency should not limit its consideration of undersized tires to tire strength and durability. BMW urged NHTSA to consider that tire size affects drivability, braking and steering, and is dependent on wheelwell clearances, and that tire revolutions per mile affect speedometer and odometer accuracy, noise and exhaust emission and fuel economy. That commenter also believed that a minimum dimensional requirement is necessary in light of the use of aftermarket tires, and that, given the entry of other countries into tire production, "compliance with some existing voluntary size standard could become a nebulous quantity."

NHTSA agrees that the factors cited by BMW can be affected by tire size. However, the agency believes that the effect, if any, would be significant. Further, there is no reason to believe that manufacturers will produce tires which do not accord with their labeled sizes.

In their petitions for reconsideration of NHTSA's decision to remove the minimum size factor requirement, commenters argued that, absent a minimum size factor requirement, it would be possible for manufacturers to undersize their tires. The agency did not agree that manufacturers will undersize their tires absent a minimum size factor requirement, and explained its decision in the following manner:

> The size factor of a tire cannot change after the mold is set up to begin producing that size of tire. With all of the engineering and quality control effort involved in designing and producing new tire sizes, it is simply implausible that a tire manufacturer would either intentionally or inadevertently undersize the molds. The undersize tires that would be produced might save the manufacturers a few dollars per tire, but the savings would be more than offset by product liability awards and negative publicity generated. Since automobile manufacturers design cars to a tire's rated load, undersized tires would be overloaded on those cars, and would predictably exhibit higher failure rates than properly sized tires made by other manufacturers. This appears to be a very compelling disincentive to undersizing tires. Hence, the agency concludes that the minimum size factor is not needed in Standard No. 109. (47 FR at 36181; August 19, 1982.)

The agency has concluded that the rationale against undersizing is still valid. Therefore, NHTSA does not agree with BMW that tire undersizing by aftermarket or foreign tire manufacturers might occur absent a size factor requirement.

Daimler-Benz AG (DBAG) agreed with NHTSA that it is highly improbable that tires with insufficient load carrying capacities will be produced, even in the absence of a size factor requirement. However, that company believed that future tires will have less width than current tires if the size factor requirement were deleted. Although DBAG acknowledged that this might not necessarily result in a direct safety hazard with respect to tire strength and endurance, that commenter was concerned about decreased in tire width. DBAG believed that, since the wheelwell spaces have to be determined on the basis of the largest possible dimensions of the designated tire size, narrower tires in set wheelwells might not be esthetically pleasing to customers. Customers might therefore replace their original tires with large sizes which could interfere with the surrounding body and suspension parts. DBAG was also concerned that customer cost and dissatisfaction could increase if smaller tires were produced, since smaller tires tend to wear more rapidly.

NHTSA does not agree that customers will purchase tires that are oversized for their vehicles. FMVSS No. 110 requires that consumers be informed of recommended tire sizes for their vehicles, to ensure that existing tires are not replaced with tires of sizes not recommended for a particular vehicle. Further, the agency believes that tire dealers will exercise great care in order to avoid tort liability for selling incompatible tires.

NHTSA has concluded that the size factor requirement in Standard No. 109 provides no safety benefits. The agency has concluded that removing size factor not only relieves an unnecessary restriction on tire manufacturers but also recognizes that mass-produced products have some minor product-to-product variations, and that these variations can be perfectly acceptable. Therefore, NHTSA is amending FMVSS No. 109 to delete S4.2.2.2(b), and the definition of "size factor' from paragraph S3.

Effective date

The changes to Standard No. 109 described herein are effective upon publication of this rule in the Federal Register. These changes relieve a restriction on tire manufacture which the agency has determined to be unnecessary. The revisions to the standard do not specify different test procedures or additional requirements, and no leadtime for preparation by tire or vehicle manufacturers is required. NHTSA therefore finds good cause for making these changes effective upon publication of this final rule in the Federal Register.

Analysis of regulatory impacts

The changes to Safety Standard No. 109 made by this rule removes an unnecessary requirement from the standard. The elimination of unnecessary regulation is a useful step for the industry, the general public, and this agency.

NHTSA has examined the effect of this rulemaking action and determined that it is not major within the meaning of Executive Order 12291 or significant within the meaning of the Department of Transportation's regulatory policies and procedures. The agency has also determined that the economic and other effects of this rulemaking action are so minimal that a regulatory evaluation is not required. NHTSA believes that the implementation of this rule would not

BEST COPY AVAILABLE

VOL 51 ISS 86 MY 5 1986 UMI

increase the costs or burdens for any party.

Regulatory Flexibility Act

NHTSA has also considered the effects of this rulemaking action under the Regulatory Flexibility Act. The agency believes that few of the tire manufacturers would qualify as small businesses. Any tire manufacturer that do qualify as small business might benefit to a small extent by the changes made by this rule, since removing size factor allows manufacturers the leeway to produce tires of sizes which are within acceptable industry standards.

Small governmental units and small organizations are generally affected by amendments to the Federal motor vehicle safety standards as purchasers of new motor vehicles and new motor vehicle equipment. However, these entities will not be affected by the revisions made by this rule since the changes will not singificantly affect the price of tires. For the reasons stated above, I hereby certify that this rule will not have a significant economic impact on a substantial number of small entities, and that a regulatory flexibility analysis is, therefore, not required.

Environmental effects

NHTSA has analyzed this rulemaking action for the purposes of the National Environmental Policy Act. The agency has determined that implementation of this action will not have any significant impact on the quality of the human environment.

List of Subjects in 49 CFR 571

Imports, Motor vehicle safety, Motor vehicles, Rubber and rubber products, Tires.

PART 571—[AMENDED]

In consideration of the foregoing, 49 CFR Part 571 is amended as follows:

1. The authority citation for Part 571 will continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

§ 571.109 Standard No. 109, new pneumatic tires—passenger cars. [Amended]

2. Paragraph S3 is amended by removing the following paragraph:

"Size Factor" means the sum of the section width and the outer diameter of a tire determined on the test rim.

3. Paragraph S4.2.2.2 is revised to read as follows:

• • • • •

S4.2.2.2 *Physical Dimensions.* The actual section width and overall width for each tire measured in accordance with S5.1, shall not exceed the section width specified in a submission made by an individual manufacturer, pursuant to S4.4.1(a) or in one of the publications described in S4.4.1.(b) for its size designation and type by more than:

(1) (For tires with a maximum permissible inflation pressure of 32, 36, or 40 psi) 7 percent, or

(2) (For tires with a maximum permissible inflation pressure of 60 psi or 240, 280, or 300kPa) 7 percent or 0.4 inch, whichever is larger.

• • • • •

Issued on April 29, 1986.

Diane K. Steed,

Administrator.

BILLING CODE 4910-59-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 650

[Docket No. 51222-5222]

Fishery and Conservation Management; Atlantic Sea Scallop Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Emergency interim rule; extension of effective date.

SUMMARY: The Secretary of Commerce extends an emergency interim rule which delayed implementation of Amendment 1 to the Fishery Management Plan for Atlantic Sea Scallops (FMP) and reestablished the 35-meats-per-pound standard until May 5, 1986. It is necessary to extend this emergency rule for an additional 60 days, through July 3, 1986, because the conditions requiring the emergency measure still exist. This action is intended to avert severe immediate economic hardship while processors revise, as necessary, their handling procedures.

EFFECTIVE DATE: The effective date of Amendment 1 to 50 CFR Part 650 is delayed through July 3, 1986.

FOR FURTHER INFORMATION CONTACT: Carol J. Kilbride, 617-281-3600.

SUPPLEMENTARY INFORMATION: Under section 305(e)(1) of the Magnuson Fishery Conservation and Management Act (Magnuson Act), the Secretary issued an emergency rule on January 3, 1986, at 51 FR 208, delaying the effective date of Amendment 1 for 90 days until April 1, 1986. On April 8, 1986, NOAA further delayed the effective date of Amendment 1 an additional 30 days from April 4, until May 5, 1986, at 51 FR 11927.

This rule delays the implementation of Amendment 1 for an additional 60 days and extends the regulations implementing the FMP which established a minimum size at harvest within a range from 40-25 meats per pound (47 FR 35990, August 18, 1982). This rule also continues the 35-meats-per-pound standard provided in the emergency rule of January 3, 1986, and April 8, 1986.

The New England Fishery Management Council has voted to extend this emergency rule for the full 90 days since the conditions within the fishery requiring the original emergency rule still exist. This action is authorized by section 305(e)(3) of the Magnuson Act. The emergency rule is exempt from the normal review procedures of Executive Order 12291 as provided for in section 8(a)(1) of the order. This rule is being reported to the Office of Management and Budget with an explanation of why it is not possible to follow the procedures of that order.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 30, 1986.

William G. Gordon,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

50 CFR Part 661

[Docket No. 60477-6077]

Ocean Salmon Fisheries off the Coasts of Washington, Oregon and California

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final 1986 fishery management measures and request for comments.

SUMMARY: NOAA issues this notice establishing final fishery management measures for the commercial and recreational ocean salmon fisheries off Washington, Oregon, and California for 1986. Specific measures vary by fishery and area. Together they establish fishing areas, seasons, quotas, legal gear, recreational fishing days and catch limits, possession and landing restrictions, and minimum sizes for salmon taken in the fishery conservation zone (3-200 miles) off Washington, Oregon, and California. Similar regulations are being adopted for the territorial sea (0-3 miles) by the States of Washington, Oregon, and California. The management measures are intended to prevent overfishing and to apportion the ocean harvest equitably among non-treaty commercial and recreational and treaty Indian fisheries. The regulations also are calculated to allow salmon to escape the ocean fisheries to provide for treaty Indian and non-Indian inside fisheries and spawning. These management measures were established using the procedures instituted by the framework amendment to the ocean salmon fishery management plan.

EFFECTIVE DATE: This notice will be effective from 0001 hours (Pacific Daylight Time) April 30, 1986 until modified, superseded or rescinded. Comments will be accepted until May 15, 1986.

ADDRESSES: Comments on this notice may be submitted to Rolland A. Schmitten, Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way NE, BIN C15700, Seattle, WA 98115; or Mr. E. Charles Fullerton, Director, Southwest Region, 300 South Ferry Street, Terminal Island, CA 90731.

FOR FURTHER INFORMATION CONTACT: Rolland A. Schmitten, 206-526-6150; E. Charles Fullerton, 213-514-6196; or the Pacific Fishery Management Council, 503-221-6352.

SUPPLEMENTARY INFORMATION:

Background

The ocean salmon fisheries off Washington, Oregon, and California are managed under a "framework" fishery management plan (FMP). Regulations at 50 CFR Part 661 provide the mechanism for making preseason and inseason adjustments to the management measures, within limits set by the FMP, by notice in the **Federal Register**.

The majority of the 1985 management measures, which were implemented under the framework FMP (50 FR 18672, May 2, 1985), remain in effect until modified, superseded, or rescinded.

This notice implements management measures for the 1986 ocean salmon fisheries recommended by the Pacific Fishery Management Council (Council).

Schedule for Establishing or Adjusting Annual Management Measures

During the first week of March, the Council's Salmon Plan Development Team (Team) and staff economist prepared two reports for the Council, its advisors and the public. The first report, "Review of 1985 Ocean Salmon Fisheries," summarizes the 1985 ocean salmon fisheries and assesses how well the Council's management objectives were met in 1985. The second report, "Preseason Report I: Stock Abundance Analysis for 1986 Ocean Salmon Fisheries," provides the 1986 salmon stock status projections and analyzes the impacts on the stocks and FMP management goals if the 1985 regulations were to be used in 1986.

On March 10-13, the Council met in Portland, Oregon, to develop proposed management options for 1986. Three troll and three recreational fishery management options were proposed for further analysis and public comment. These options presented various combinations of management measures calculated to protect the weak stocks and provide for maximum harvests of more abundant stocks of coho and chinook salmon.

During the third week of March, the Team and staff economist prepared a third report, "Preseason Report II: Analysis of Proposed Regulatory Options for 1986 Ocean Salmon Fisheries," which analyzes the effects of the proposed 1986 management options. This report also was distributed to the Council, its advisors, and the public.

On April 1, 2, and 7, public hearings on the proposed options were held in Renton, Washington, Coos Bay and Astoria, Oregon, and Sacramento and Eureka, California.

On April 8-11, the Council met in Eureka to adopt its final 1986 management measures and its recommendations to the Secretary of Commerce (Secretary). The Team and staff economist prepared a fourth report, "Preseason Report III: 1986 Ocean Salmon Fisheries, Analysis of Impacts of Council Adopted 1986 Regulations," which analyzes the effects of the Council's final recommendations. This report also was distributed to the Council, its advisors, and the public.

Resource Status

Most salmon runs returning to Washington, Oregon, and California rivers and streams in 1986 are expected to be about the same as or larger than in 1985. Bright spots include predicted ocean abundance of three-year-old Klamath River fall-run chinook, which at 213,000 fish is 87 percent above the 1979-85 average; hatchery coho stocks contributing to the Oregon Production Index (OPI), which are expected to be nearly 2½ times more abundant than in 1985, and a predicted return of 286,100 Columbia River bright fall chinook salmon destined for areas above Bonneville Dam, which is about 50 percent greater than the 191,100 fish that returned in 1985.

Primary resource management concerns are for stocks predicted to be substantially below last year's abundance, including Bonneville Pool (Spring Creek) hatchery chinook, Oregon coastal natural coho, and some Washington coastal natural coho stocks.

Chinook Salmon Stocks. The Sacramento and San Joaquin river chinook stocks are expected to return in numbers comparable to recent years. These stocks are expected to permit a harvest only slightly smaller than in 1985 and still provide spawning escapement slightly below the upper end of the goal range.

Primary management concerns in the area south of Cape Blanco, Oregon, are for Klamath River fall chinook. The estimated total ocean population of Klamath River fall chinook in 1986 is 286,000 fish, compared with the 1985 estimate of 102,000. Although the abundance of age three chinook is improved over recent years, the abundance of age four chinook is predicted to be five percent below the 1979-1985 average.

Oregon coastal chinook stocks include south-migrating and localized stocks primarily from southern Oregon streams, and north-migrating chinook stocks which generally originate in central and northern Oregon streams. The southern stocks were depressed in 1983 and 1984 from the effects of El Nino. It is predicted that the 1986 abundance will continue to improve over 1984 and 1985 levels. North-migrating chinook stocks are in stable condition, and are expected to contribute to the ocean catch at about the same level as in 1985 and meet escapement goals.

Estimates of Columbia River chinook abundance vary by stock. The number of upriver spring chinook predicted to return to the river is well above the 84,700 fish that returned in 1985, an encouraging sign for this stock which has been severely depressed for many years. Upriver summer chinook stocks continue to be severely depressed. They are affected insignificantly by ocean harvests off Oregon and Washington. The projected 1986 ocean escapement is slightly below the 1985 ocean escapement of 21,400 fish and far short of the spawning escapement goal of 80,000 fish above Bonneville Dam. Lower river spring (Willamette) chinook returns should be nearly as good as in 1985. The upriver bright fall chinook run is in excellent condition with 286,100 fish forecasted to return to the river. The inriver return of this stock in 1985 was also excellent, the largest since 1973. The escapement goal for upriver bright chinook is 40,000 fish above McNary Dam. Although the total 1986 lower river hatchery stock abundance is expected to

VOL 51 ISS 86 MY 5 1986 UMI

increase from the 1985 level. Bonneville Pool hatchery fall chinook stocks are depressed; only 16,200 Spring Creek hatchery chinook are expected to return to the river, compared with 33,000 fish in 1985.

Washington coastal and Puget Sound chinook are generally far-north migrating, and are affected insignificantly by ocean harvests from Cape Falcon to the U.S.-Canada border.

Coho Salmon Stocks. Oregon coastal and Columbia River coho stocks are the primary components of the Oregon Production Index (OPI). The OPI is an annual index of coho abundance from Leadbetter Point, Washington, south through California. The 1986 OPI is 1,793,000 coho, a 147 percent increase over the 1985 OPI of 727,100 fish. Estimated private hatchery production within the OPI area is 285,500 coho salmon which is added to the OPI to estimate total coho abundance in the area.

Columbia River and Oregon coastal coho are managed as one stock under the framework of the OPI because they are largely mixed in the ocean fisheries. However, Columbia River stocks are managed for full utilization of hatchery production, while Oregon coastal stocks are managed to achieve the rebuilding schedule for naturally-spawning adults. The Oregon Department of Fish and Wildlife estimates Oregon coastal natural (OCN) coho abundance in 1986 at 285,600 fish, below the abundance of recent years. The natural stocks returning this year come from a parent run that spawned in the El Nino year of 1983. Only 57,000 wild fish returned to spawn that year, the lowest return on record and only about one-third of the escapement goal. Of particular concern to fishery managers is that to meet the 1986 OCN coho ocean escapement goal with this level of abundance, the ocean harvest rate must be considerably less than the rates the other stocks in the OPI could sustain.

The 1986 abundance of several northern Washington coastal natural coho stocks is expected to be lower than the preseason estimates used for planning ocean seasons in 1985. The predicted low ocean escapement of Queets River natural coho salmon of 5,200 fish, compared to 6,100 fish in 1985, is of particular concern.

All Puget Sound coho stocks are expected to meet ocean escapement goals, although most stocks have declined in abundance from 1985.

Management Measures for 1986

The Council adopted allowable ocean harvest levels and management measures for 1986, which are designed to protect the weak stocks discussed above, while at the same time allowing maximum harvest of runs with surplus hatchery stocks available to the ocean fisheries.

Only one change in the 1985 regulations was proposed for ocean salmon fisheries south of Point Delgada, California. A subarea coho quota was established to reduce the fishery impacts on OCN coho. It is predicted that ocean escapement of chinook will be slightly below the upper end of the Sacramento River fall chinook spawning escapement goal range of 122,000 to 180-000 adults.

From Point Delgada to Cape Blanco, harvests are constrained by quotas to protect Klamath River fall chinook. The 1986 quotas were proposed by the Klamath River Salmon Management Group (KRSMG), an advisory group of managers of both ocean and inriver Indian and non-Indian fisheries. The ocean quotas are larger than those needed to meet the 1986 ocean escapement goal of 115,100 Klamath River chinook, and reflect the poor socioeconomic condition of affected communities brought about by the lower-than-average ocean harvests in recent years. The area was closed to commercial fishing in 1985. Nevertheless, the Council estimated that 97,200 chinook will escape the ocean fisheries in 1986, compared with 59,300 chinook in 1985 and 43,300 chinook in 1984. Resulting spawning escapement in 1986 is predicted to be 61,200 fish, compared to 43,000 fish in 1985 and 22,700 fish in 1984.

Coho quotas south of Cape Falcon (troll 409,800; recreational 189,000) are higher than in 1985 (troll 45,000; recreational 170,000), because of the predicted high abundance of 1986 OPI coho. The ocean quotas exceed the levels necessary to meet the 1986 escapement goal for Oregon coastal natural coho spawning adults (170,000), to maximize the catch of hatchery stocks surplus to inside fishery and spawning needs. Estimated spawning escapement for OCN coho stocks in 1986 is 142,800.

North of Cape Falcon, as in recent years, ocean treaty and non-treaty harvests and management measures were established by the Council based on negotiations among fishery managers and user group representatives as authorized by the U.S. District Court in *U.S.* v. *Washington, U.S.* v. *Oregon,* and *Hoh Indian Tribe et al.* v. *Baldrige.* Ocean regulations will allow an inside fishery in north coastal streams and will provide spawning escapements at levels agreed to by the negotiators. Ocean management measures are designed to protect weak Washington coastal natural coho stocks in 1986, including Queets River natural fall coho, as well as to minimize the ocean harvest of Bonneville Pool hatchery chinook. A deviation from the framework allocation scale to allocate coho salmon to ocean fisheries north of Cape Falcon in 1986 is being implemented by an emergency rule to be promulgated shortly. Puget Sound escapements are expected to be above established goals for Skagit and Stillaguamish naturally spawning coho.

The Makah, Quileute, Quinault, and Hoh ocean troll fisheries will have a quota of 12,500 chinook and 86,000 coho during May–September, somewhat higher than 1985 quota levels. These quotas are separate from the non-Indian troll and recreational quotas. When tribal quotas are reached, the tribal fishery will close regardless of the number of fish, if any, remaining in the non-Indian quotas; there will be no transfer of overages or underages between non-Indian and Indian ocean quotas.

The following tables and text reflect the management measures recommended by the Council for 1986. The Secretary concurs with these recommendations and finds them responsive to the goals of the FMP, requirements of the resource, and the socio-economic factors affecting resource users. The recommendations are consistent with the requirements of the Magnuson Fishery Conservation and Management Act and other applicable law.

The following management measures are adopted for 1986 under 50 CFR Part 661.

TABLE 1.—COMMERCIAL MANAGEMENT MEASURES FOR 1986 OCEAN SALMON FISHERIES.[a]

[NOTE: Footnotes to this table contain important additional restrictions which must be followed for lawful participation in the fishery.]

Area and season	Salmon species possession and landing restrictions	Quotas		Minimum size limit (inches)		Special restrictions by area
		Chinook	Coho	Chinook	Coho	
United States-Canada Border to Cape Falcon:						
May 1 through earlier of May 10 or chinook quota	All except coho	[b] 33,700		28		Barbless hooks; Conservation Zone 1[f] Columbia River mouth) is closed.
May 14 through earlier of May 31 or chinook quota						
United States-Canada Border to Carroll Island:						
Aug. 2 through Aug. 3	All	[b] 4,000	[b] 30,000	28	16	Barbless hooks.
Aug. 7 through earliest of Sept. 15,[c] coho quota, or chinook quota.	All					
Leadbetter Point to Cape Falcon		[b c] 13,300	[b d] 110,600	28	16	Barbless hooks; Conservation Zone 1[f] (Columbia River mouth) is closed.
Aug. 2 through Aug. 3	All					
Aug. 7 through earliest of Sept. 15, coho quota, or chinook quota.	All					
Cape Falcon to Cape Perpetua		None	(*)	26	16	Barbless hooks.
May 1 through June 30	All except coho					
July 1 through July 20	All, with restrictions [b]					
July 23 through coho quota	All					
Coho quota through Oct. 31	All except coho					
Cape Perpetua to Cape Blanco		None	(*)	26	16	Barbless hooks.
May 1 through June 30	All except coho					
July 1 through July 20	All, with restrictions [b]					
July 23 through coho quota	All					
Coho quota through Oct. 31	All except coho					
Cape Blanco to Point Delgada		[g] 68,200	(*)	26	22	Barbless hooks; not more than 6 lines per boat off California; Conservation Zones 2 (Humbug Mountain to Sisters Rocks), 3 (Punta Gorda to Point Delgada), and 4 (12-mile square at the mouth of the Klamath River) are closed.[i]
June 16 through June 19	All, with restrictions [b]					
June 23 through June 26	All, with restrictions [b]					
June 30 through earlier of Aug. 31 coho quota, or chinook quota.	All, with restrictions [b]					
Coho quota through earlier of Aug. 31 or chinook quota						
Sisters Rocks to Chetco Point:						
May 1 through earlier of June 7 or chinook subarea quota.	All except coho	[j] 7,500		28		Barbless hooks; open only within six nautical miles of the baseline from which the territorial sea is measured.
Sisters Rocks to Mack Arch:						
Lastest of Aug. 7 or chinook quota through earlier of Sept. 15 or chinook subarea quota.	All except coho	[j] 7,500				Barbless hooks; open only within six nautical miles of the baseline from which the territorial sea is measured.
South Jetty, Humboldt Bay to Punta Gorda:						
Sept. 8 through earlier of Sept. 30 or chinook subarea quota.	All	[k] 10,000	(*)	26	22	Barbless hooks; open only within six nautical miles of the baseline from which the territorial sea is measured; no more than 6 lines per boat.
Point Delgada to United States-Mexico Border		None	(*)	26	22	Barbless hooks; no more than 6 lines per boat.
May 1 through May 31	All except coho					
June 1 through earlier of Sept. 30 or coho quota	All					
Coho quota through Sept. 30	All except coho					

[a] In addition to the troll seasons listed, the Oregon Fish and Wildlife Commission may establish limited additional late all-salmon-except-coho seasons inside State waters near the mouths of the Elk, Sixes, and Chetco rivers, which seasons will be consistent with the objectives of these regulations.

[b] The non-treaty ocean fisheries north of Cape Falcon (recreational and troll) will be managed not to exceed either (1) an overall 88,100 chinook quota or (2) impacts on Washington coastal natural coho stocks equivalent, but not necessarily equal to, the subarea quotas set forth in tables 1 and 2.

[c] The season will reopen on August 7 only if at least one full day of fishing on both coho and chinook remains. Fishing continues for both species until either the chinook or coho quota is projected to be attained.

[d] Coho quotas north of Cape Falcon, Oregon, are being implemented by an emergency rule which provides for a deviation from the framework allocation scale for 1986.

[e] Any quota overage or underage in the troll quotas from the United States-Canada Border to Carroll Island August troll fishery will be subtracted from or added to the troll quotas beginning August 7 from Leadbetter Point to Cape Falcon.

[f] Conservation Zone 1 is defined as: The ocean area surrounding the Columbia River mouth bounded by a line extending for 6 nautical miles due west from North Head along 46°18'00" N. latitude to 124°13'18" W. longitude, then southerly along a line of 167° True to 46°11'06" N. latitude and 124°11'00" W. longitude (Lighthouse Buoy), then due east to shore along 46°11'06" N. latitude.

[g] The non-treaty ocean troll fishery south of Cape Falcon will be managed not to exceed harvest quotas and hooking mortality of 463,000 coho From Cape Falcon to Pt. Delgada, the subarea harvest quota is 363,000 coho salmon and there is a mortality of 50,000 coho salmon. South of Pt. Delgada, the subarea harvest quota is 26,800 coho salmon and there is a hooking mortality of 3,200 coho salmon.

[h] (1) From July 1 through July 20: A single daily possession or landing per boat of 50 coho is permitted without chinook restrictions. For over 50 coho, chinook also must be possessed and landed and there cannot be more than two coho possessed or landed for each chinook possessed or landed over 50 coho. Mixed loads of chinook and coho and coho-only loads must be delivered in the area. There are no restrictions on the place of delivery of chinook-only loads. Chinook salmon possessed or landed in this management area may not be returned or transferred to any vessel engaged in the commercial salmon fishery.

(2) If there are less than 200,000 coho remaining in the subarea quota when the fishery reopens on July 23, the above restrictions will remain in effect until the coho quota is reached. This determination will be made by the Pacific Fishery Management Council's Salmon Plan Development Team by July 22 and will be announced by notice in the FEDERAL REGISTER. If more than 200,000 coho remain, no ratio restrictions will apply in the fishery beginning July 23.

[i] (1) From July 1 through July 20: At least one chinook must be possessed or landed for each two coho possessed or landed. Coho may not be possessed without a chinook salmon in possession. The chinook must be delivered with the coho. Chinook salmon possessed or landed in this management area may not be returned or transferred to any vessel engaged in the commercial salmon fishery.

(2) If there are less than 200,000 coho remaining in the subarea quota when the fishery reopens on July 23, then a single daily possession or landing per boat of 50 coho is permitted without chinook restrictions. For over 50 coho, chinook also must be possessed and landed and there cannot be more than two coho possessed or landed for each chinook possessed or landed over 50 coho. Chinook salmon possessed or landed in this management area may not be returned or transferred to any vessel engaged in the commercial salmon fishery. This determination will be made by the Pacific Fishery Management Council's Salmon Plan Development Team by July 22 and will be announced by notice in the FEDERAL REGISTER. If more than 200,000 coho remain, no ratio restrictions will apply in the fishery beginning July 23.

[j] The total chinook quota of 123,200 for all ocean salmon fisheries in this area consists of 83,200 chinook for the troll fishery and 40,000 chinook for the recreational fishery. On July 16, the Salmon Plan Development Team will determine how many chinook will be required to complete the recreational season, not to exceed its 40,000 quota. Any remaining allowable catch will be allocated to the troll fishery. The total troll quota includes subarea quotas for fisheries from Sisters Rocks to Chetco Point (7,500 chinook) and Sisters Rocks to Mack Arch (7,500 chinook). Any overage or underage in the subarea chinook quota from Sisters Rocks to Chetco Point will be added to or subtracted from the troll quota from Cape Blanco to Point Delgada. Any overage in the troll fishery from Cape Blanco to Point Delgada will be subtracted from the subarea troll quota from Sisters Rocks to Mack Arch.

[k] (1) At least one chinook must be possessed or landed for each two coho possessed or landed. The chinook must be delivered with the coho. Coho may not be possessed without a chinook salmon in possession. Chinook salmon possessed or landed in this management area may not be returned or transferred to any vessel engaged in the commercial salmon fishery.

(2) From June 16 through June 30: Salmon may not be possessed in a closed area more than 12 hours after that area is closed. Except for the 12-hour period following closure, no vessel may enter the closed area with salmon on board without prior notification of the Commander, Pacific Area, U.S. Coast Guard, through the nearest Coast Guard station. It is unlawful for a vessel to which has been issued an ocean salmon fishing permit by any state to have troll gear in the water during the closed periods between June 20 and June 22, and June 27 and June 29.

[l] Conservation zones 2, 3, and 4 are defined as follows:
Conservation zone 2: The ocean area bounded on the north by 42°40'30" N. latitude, and on the south by 42°35'45" N. latitude.
Conservation zone 3: The ocean area bounded on the north by 40°15'30" N. latitude, and on the south by 40°01'24" N. latitude.

VOL 51 ISS 86 MY 5 1986 UMI

Conservation zone 4: The ocean area surrounding the Klamath River mouth bounded on the north by 41°38'48" N. latitude (approximately 6 nautical miles north of the Klamath River mouth), on the west by 124°23'00" W. longitude (approximately 12 miles from shore), and on the south by 41°26'48" N. latitude (approximately 6 nautical miles south of the Klamath River mouth).

[2] The Klamath River fall chinook portion of the catch after September 7, as determined by the Salmon Plan Development Team, will be subtracted from the 1987 troll allocation.

[3] Coho catches in this fishery will not count toward any coho quota.

TABLE 2.—RECREATIONAL MANAGEMENT MEASURES FOR 1986 OCEAN SALMON FISHERIES [1]

[NOTE: Footnotes to this table contain important additional restrictions which must be followed for lawful participation in the fishery.]

Area and season	Salmon Species	Quota Chinook	Quota Coho	Minimum size limit (inches) Chinook	Minimum size limit (inches) Coho	Daily bag limit and special restrictions by area
United States-Canada Border to Queets River	All	[5] 2,300	[5] 26,000	24	16	2 fish.
June 29 through earliest of Sept. 25, chinook quota, or coho quota						
Sunday through Thursday only						
Queets River to Klipsan Beach:						
June 29 through earliest of Sept. 25, chinook quota, or coho quota.	All	[5] 23,100	[5] 78,300	24	16	2 fish; closed within 0–3 nautical miles.
Sunday through Thursday only.						
Klipsan Beach to Red Buoy Line: (Closed)						
Red Buoy Line to Cape Falcon:						
June 29 through earliest of Sept. 25, chinook quota, or coho quota.	All	[5] 11,700	[5] 103,200	24	16	2 fish.
Sunday through Thursday only.						
Cape Falcon to Cape Blanco:						
May 24 through May 30	All	None	∞	None	None	First 2 fish hooked per day must be retained, no more than 2 fish may be retained per day, and no more than 6 fish may be retained in 7 consecutive days.[4]
June 28 through earlier of Sept. 4 or coho quota						
Cape Blanco to Point Delgada [7]	All	[6] 40,000	∞	20	20	From May 24 through June 22, not more than 1 coho and 1 chinook; after June 22, 2 salmon of any species. No more than 6 fish may be retained in 7 consecutive days; barbless hooks; Conservation zone 4 (12-mile square at Klamath River mouth) is closed Aug. 1 thru Aug. 31.[8]
Effective immediately, closed until May 24						
May 24 through earlier of Sept. 7 or chinook quota						
Point Delgada to United States-Mexico Border	All	None	∞	20	20	2 fish; barbless hooks.
Nearest Saturday to Feb. 15 through nearest Sunday to November 15						

[1] These management measures assume a Buoy 10 recreational fishery in Washington and Oregon State waters (Columbia River mouth to the Astoria-Megler Bridge) with total state quotas of 10,000 chinook and 67,000 coho. Washington and Oregon will negotiate a Buoy 10 fishery within these parameters at a later date. In addition to the ocean recreational seasons listed, the Oregon Fish and Wildlife Commission may establish limited additional late all-salmon-except-coho seasons inside State waters near the mouths of the Elk, Siuslaw and Chetco rivers and Tillamook Bay, which seasons will be consistent with the objectives of these regulations.

[2] The non-treaty ocean fisheries north of Cape Falcon (recreational and troll) will be managed not to exceed either (1) an overall 69,100 chinook quota, or (2) impacts on Washington coastal natural coho stocks equivalent, but not necessarily equal to, the subarea quotas set forth in tables 1 and 2.

[3] Coho quota south of Cape Falcon is 169,000 fish. Coho caught south of Cape Blanco count toward the total quota, but the fishery south of Cape Blanco will not close when the coho quota is met.

[4] If this recreational catch rate indicates the possibility of reaching the recreational quota before Labor Day, inseason revision of fishing days per week to extend the season through Labor Day will be involved. The order of preference for daily closures will be (1) Sundays, (2) Sundays and Mondays, and (3) other combination of days.

[5] On July 16, the Salmon Plan Development Team will determine how many chinook will be required to complete the recreational season. Any portion of the recreational chinook quota (40,000 fish) not needed to complete the recreational season will be reallocated to the troll fishery. Troll and recreational fisheries from Cape Blanco to Point Delgada will be managed not to exceed a total quota of 123,200 chinook.

[6] Federal regulations for 1985 allowed the recreational fishery to open on February 15, 1986. The State of California closed the fishery in territorial waters north of Point Delgada on March 28, 1986. Effective upon filing of these regulations, the recreational fishery in the FCZ from the Oregon-California Border to Point Delgada will close until opened by these regulations on May 24.

[7] If 14,000 or more chinook are caught by July 1, no more than 1 chinook may be retained per day, fishing for all species will be open only Thursday through Monday each week, and no more than 4 salmon may be retained in 7 consecutive days. This determination will be made by the Pacific Fishery Management Council's Salmon Plan Development Team, and will be announced by notice in the FEDERAL REGISTER. Conservation Zone 4 is defined as The ocean area surrounding the Klamath River mouth bounded on the north by 41°38'48" N. latitude (approximately 6 nautical miles north of the Klamath River mouth) on the west by 124°23'00" W. longitude (approximately 12 miles from shore), and on the south by 41°26'48" N. latitude (approximately 6 nautical miles south of the Klamath River mouth).

TABLE 3.—TREATY INDIAN MANAGEMENT MEASURES

[NOTE: Footnotes to this table contain important additional restrictions which must be followed for lawful participation in the fishery.]

Tribe	Boundaries [1]	Open seasons	Species	Minimum lengths [2] Chinook	Minimum lengths [2] Coho	Special restrictions by area
Makah	That portion of the Fishery Management Area north of 48°02'15" N. latitude (Normanger Mansmid) and east of 125°44'00" W. longitude.	May 1 to earlier of May 31 or chinook quota [3].	All salmon except coho	24"		Barbless hooks, except that hooks used with bait and plugs may be barbed. No more than 8 lines/boat, or no more than 4 hand-held lines per person.
		June 1 to earlier of Oct. 31 or chinook or coho quota [3].	All salmon	24"	16"	Barbless hooks, except that hooks used with bait and plugs may be barbed. No more than 8 lines/boat, or no more than 4 hand-held lines per person.
Quileute	That portion of the Fishery Management Area between 48°07'36" N. latitude (Sand Point) and 47°31'42" N. latitude (Queets River).	May 1 to earlier of May 31 or chinook quota [3].	All salmon except coho	28"		Barbless hooks, except that hooks used with bait and plugs may be barbed. No more than 8 lines/boat. [4]
		June 1 to earlier of Sept. 15 or chinook or coho quota [3].	All salmon	28"	16"	Barbless hooks, except that hooks used with bait and plugs may be barbed. No more than 8 lines/boat. [4]
Hoh	That portion of the Fishery Management Area between 47°54'18" N. latitude (Quillayute River) and 47°21'00" N. latitude (Quaxsult River).	May 1 to earlier of May 31 or chinook quota [3].	All salmon except coho	28"		Barbless hooks, except that hooks used with bait and plugs may be barbed. No more than 8 lines/boat. [4]
		June 1 to earlier of Sept. 15 or chinook or coho quota [3].	All salmon	28"	16"	Barbless hooks, except that hooks used with bait and plugs may be barbed. No more than 8 lines/boat. [4]

TABLE 3.—TREATY INDIAN MANAGEMENT MEASURES—Continued

[NOTE: Footnotes to this table contain important additional restrictions which must be followed for lawful participation in the fishery.]

Tribe	Boundaries [1]	Open seasons	Species	Minimum lengths [2] Chinook	Minimum lengths [2] Coho	Special restrictions by area
Quinault	That portion of the Fishery Management Area between 47°40'06" N. latitude (Destruction Island) and 46°53'18" N. latitude (Point Chehalis).	May 1 to earlier of May 31 or chinook quota [3].	All salmon except coho	28"		Barbless hooks, except that hooks used with bait and plugs may be barbed. No more than 8 lines/boat. [4]
		June 1 to earlier of Sept. 15 or chinook or coho quota [3].	All salmon	28"	16"	Barbless hooks, except that hooks used with bait and plugs may be barbed. No more than 8 lines/boat. [4]

[1] All boundaries may be changed to include such other areas as may hereafter be authorized for that tribe's treaty fishery by a federal court.

[2] For subsistence and ceremonial purposes, the minimum total lengths of salmon are:
Makah Tribe: None.
Quileute, Hoh, and Quinault Tribes: Not more than two chinook salmon between the lengths of 24 and 28 inches per day may be retained.

[3] The overall ocean quotas for the Washington Coastal Tribes are: 12,500 chinook and 86,000 coho salmon. These quotas include troll catches by the Klallam and Makah tribes in Area 4B.

[4] The area within a 6 miles radius of the mouths of the Queets River (47°31'42" N. latitude), the Hoh River (47°45'12" N. latitude) and the Quillayute River (47°54'18" N. latitude) will be closed to commercial fishing. A closure within 2 miles of the mouth of the Quinault River (47°21'00" N. latitude) may be enacted by the Tribe and/or the State of Washington and will not adversely affect the Secretary's management regime.

Gear Definitions and Restrictions

In addition to gear restrictions shown in Tables 1, 2, and 3, the following gear definitions and restrictions will be in effect until modified, superseded or rescinded.

Troll Fishing Gear

Troll fishing gear for the FMA is defined as one or more lines that drag hooks with bait or lures behind a moving fishing vessel.

In that portion of the FMA off Oregon and Washington, the line or lines must be affixed to the vessel and must not be disengaged from the vessel at any time during the fishing operation.

Recreational Fishing Gear

Recreational fishing gear for the Fishery Management Area (FMA) is defined as angling tackle consisting of a line with not more than one artificial lure or natural bait attached.

In that portion of the FMA off Oregon and Washington, the line must be attached to a rod and reel held by hand or closely attended; the rod and reel must be held by hand while playing a hooked fish. No person may use more than one rod and line while fishing off Oregon or Washington. Off Oregon, not more than three hooks can be used. There is no limit to the number of hooks that can be used off Washington and California.

In that portion of the FMA off California, weights directly attached to a line may not exceed four (4) pounds. There is no limit to the number of lines that a person may use while recreationally fishing off California.

Geographical Landmarks

Geographical landmarks referenced in this notice are at the following locations:

Carroll Island	46°00'16" N. lat.
Queets River	47°31'42" N. lat.
Leadbetter Point	46°38'10" N. lat.
Klipsan Beach	46°28'12" N. lat.
Red Buoy Line	Seaward along the south jetty of the Columbia River to the visible tip of the jetty and then to Buoy #2SJ, then southwesterly to Buoy #4, continuing southwesterly to Buoy #2, and then to the Columbia River Buoy, then due west along 46°11'06" N. latitude.
Cape Falcon	45°46'00" N. lat.
Cape Perpetua	44°17'30" N. lat.
Cape Blanco	42°50'20" N. lat.
Humbug Mountain.	42°40'30" N. lat.
Sisters Rocks	42°35'45" N. lat.
Mack Arch	42°13'40" N. lat.
Chetco Point	42°02'35" N. lat.
South Jetty, Humboldt Bay.	40°45'30" N. lat.
Punta Gorda	40°15'30" N. lat.
Point Delgada	40°01'24" N. lat.

Classification

The 1986 management measures established under the provisions of the FMP and its implementing regulations are based on the most recent data available. The aggregate data upon which the measures are based are available for public inspection at the offices of the Regional Directors (see **ADDRESSES**) during business hours until the end of the comment period.

These actions are taken under 50 CFR Part 661, are in compliance with Executive Order 12291, and are covered by the Regulatory Flexibility Analysis RFA/Final Supplemental Environmental Impact Statement (SEIS) prepared for the framework amendment to the FMP. These actions impose no information collection requirements under the Paperwork Reduction Act.

Section 661.23 of the ocean salmon regulations states that the Secretary will publish a notice establishing management measures for 1986 and will invite public comments prior to its effective date. If the Secretary determines, for good cause, that a notice must be issued without affording a prior opportunity for public comment, comments on the notice will be received by the Secretary for a period of 15 days after the effective date of the notice.

Because of the depressed status of some salmon stocks, and the need to reduce harvest in some areas or to establish different opening dates than those in the 1985 regulations for some fisheries, the Secretary has determined that time does not permit a comment period prior to the date the management measures must be in effect. Comments will be accepted for 15 days after the effective date of this notice.

The public has had opportunity to comment on these management measures during the process of their development. The public participated in the March and April Council, Team, and Advisor meetings, and in public hearings held in Washington, Oregon, and California in early April, which generated the management actions recommended by the Council and approved by the Secretary. Written public comments were invited by the Council between the March and April Council meetings.

BILLING CODE 3510-22-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Rule to Determine Cycladenia Humilis var. Jonesii (Jones Cycladenia) to be a Threatened Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines *Cycladenia humilis* var. *jonesii* (Jones cycladenia) to be a threatened species under the authority of the Endangered Species Act of 1973, as amended. This taxon occurs in three general areas in the Canyonlands section of southeastern Utah, in Emery, Garfield, and Grand Counties. The three populations total about 7,500 individuals, with over half on pubic land managed by the Bureau of Land Management, approximately 2,500 on National Park Service lands at Glen Canyon National Recreation Area and Capitol Reef National Park, and approximately 500 at one site on State of Utah land. A fourth population may still occur in Kane County, Utah, or in Mohave County, Arizona, but is known only from a collection with general location information made in 1882, before the boundary between the territories of Utah and Arizona was surveyed. The taxon grows on barren clay hills forming the steep side slopes and bases of mesas in the canyon country. The species is vulnerable due to its rarity, and is threatened by impacts from mineral and oil and gas exploration and off-road vehicle disturbance.

DATES: The effective date of this rule is June 4, 1986.

ADDRESSES: The complete file for this rule is available for public inspection, by appointment, during normal business hours of the Service's Endangered Species Staff at the following locations: 134 Union Boulevard, Fourth Floor, Lakewood, Colorado 80228; Room 2078 Administration Building, 1745 West 1700 South, Salt Lake City, Utah 84140; and Suite B-109, Independence Plaza, 529 25-½ Road, Grand Junction, Colorado 81505.

FOR FURTHER INFORMATION CONTACT: John L. England, Salt Lake City (801/524-4430 or FTS 588-4430), or John Anderson, Grand Junction (303/241-0563 or FTS 322-0348), at the above address.

SUPPLEMENTARY INFORMATION:

Background

Cycladenia humilis var. *jonesii* (Jones cycladenia) is a herbaceous perennial 4 to 6 inches (10-15 centimeters) tall, with clumps of bright green leaves and ". . . rosy flowers (that) somewhat resemble small morning-glories and have a charm that thrills the beholder" (Eastwood 1942). Alice Eastwood described the plant in 1942 as *Cycladenia jonesii* based on a collection from the San Rafael Swell (Emery County) made by Marcus E. Jones in 1914. Except for two other San Rafael Swell collections in the 1930's, this taxon was not seen again until a single plant was discovered by Dr. Stanley Welsh in 1968 in Castle Valley, northeast of Moab (Grand County), about 65 miles east of the San Rafael Swell (Welsh 1970). He and Dr. Duane Atwood later reduced the Jones cycladenia to varietal status (Welsh, Atwood, and Reveal 1975). During inventories in the spring of 1985, since the proposal of endangered status on January 10, 1985, about 1,000 individuals were located in Castle Valley on Bureau of Land Management (BLM) land and another 1,000 individuals about 5 miles (8 kilometers) to the northeast along Onion Creek below Fisher Mesa, also on BLM land. These plants are growing in mixed desert shrub and the lower edge of the pinyon pine and juniper community at 5,000-5,600 feet (1,500-1,700 meters) on sparsely vegetated hills derived from arkosic (containing unweathered feldspar) sandstone of the Permian Cutler Formation.

In 1979, James Harris, then a graduate student at Brigham Young University, rediscovered Jones cycladenia at two sites 2 miles (3 kilometers) apart in the area of the 1914 collection. The larger site, with some 2,000 plants, is on public land managed by the BLM; the other has some 500 plants on State of Utah land. This San Rafael Desert population, which is just east of the San Rafael Reef and south of Interstate 70, consists of mostly mature plants, many of which are connected by underground stems (rhizomes). Therefore, the number of separate individual plants is hard to determine but is certainly lower than the number of above-ground stems. These plants are growing on sparsely vegetated "badland" hills, a habitat similar in aspect to the one in Castle Valley, but with fine-textured soils derived from a different formation, the Jurassic Summerville, at a slightly lower elevation (4,600 feet—1,400 meters) in the mixed desert shrub community with Mormon tea (*Ephedra torreyana*), shrubby wild-buckwheat (*Eriogonum corymbosum*), and *Enceliopsis nudicaulis*, a herbaceous perennial.

A third population was found during the 1984 field season on the Purple Hills, within the Circle Cliffs area of the Glen Canyon National Recreation Area (GCNRA), administered by the National Park Service (NPS), in Garfield County, Utah, (Welsh 1984). This population was discovered during a rare plant inventory as part of a biological baseline study for an Environmental Impact Statement on Federal tar sand leasing. This population is about 90 miles (145 kilometers) south of the San Rafael Swell population. Subsequently, inventories by Jim Holland (NPS), Steve Hedges (BLM), and John Anderson of the Fish and Wildlife Service in the spring of 1985 located three other sites of the Jones cycladenia with a total of 3,000 plants near the Purple Hills over an area about 5 miles (8 kilometers) long. These sites occur on sparsely vegetated "badland" hills and steep side slopes of mesas, as do the two previously discussed more northern populations, but at a slightly higher elevation (5,600-6,600 feet—1,700-2,000 meters), on another formation, the Triassic Chinle, and with the primarily herbaceous perennial plant associates, *Brickellia oblongifolia* and *Oenothera brachycarpa*. A fourth population from further south in Utah or from northern Arizona (the Pipe Spring area in Mohave County, Arizona and Kane County, Utah) may remain; it is known only from an 1882 collection by Andrew Siler, but the locality information is indefinite and the site has never been relocated (Holmgren 1984).

Cycladenia humilis var. *jonesii* is the only member of its genus in the Intermountain West; the genus consists of only the one species with its other varieties restricted to California. Because the Jones cycladenia has a disjunct distribution pattern in three localized areas over 100 miles apart and its nearest relatives are in California, it is believed to be a Tertiary relict. This taxon thus may be ill adapted to the present-day climatic regime of the Intermountain West, increasing its vulnerability.

The Canyonlands section of Utah has more endemic plants than any other portion of the State, about 70 taxa. In addition to the *Cycladenia*, about 13 of these taxa are candidates for possible listing under the Endangered Species Act (48 FR 53639). The Canyonlands are considered relatively ancient floristically, having "been less affected by the special conditions of recent changing [geological] epochs" (Holmgren 1972, p. 103).

Threats to the Jones cycladenia include habitat disturbance from exploration for oil and gas, tar sands, and minerals (primarily uranium), and from recreational and other off-road vehicle (ORV) use.

Section 12 of the Endangered Species Act of 1973 (Act) directed the Secretary of the Smithsonian Institution to prepare a report on those plants considered to be endangered, threatened, or extinct. This report, designated as House Document No. 94-51, was presented to Congress on January 9, 1975. On July 1, 1975, the Service published a notice in the **Federal Register** (40 FR 27823) of its acceptance of this report as a petition within the context of section 4(c)(2) of the Act (petition acceptance is now governed by section 4(b)(3) of the Act, as amended), and of its intention thereby to review the status of the plant taxa named within. On June 16, 1976, the Service published a proposed rule in the **Federal Register** (41 FR 24523) to determine approximately 1,700 vascular plant taxa to be endangered species pursuant to section 4 of the Act. This list was assembled on the basis of comments and data received by the Smithsonian Institution and the Service in response to House Document No. 94-51 and the July 1, 1975, **Federal Register** notice. *Cycladenia humilis* var. *jonesii* was included (as *Cycladenia jonesii*) in the July, 1975, notice (40 FR 27880) and the June, 1976, proposal (41 FR 24527). General comments received in relation to the 1976 proposal are summarized in an April 26, 1978, **Federal Register** publication (43 FR 17909).

The Endangered Species Act Amendments of 1978 required that all proposals over 2 years old be withdrawn, but established a 1-year grace period for proposals that were already 2 years old. On December 10, 1979, the Service published a notice of the withdrawal of the still-applicable portions of the June, 1976, proposal, along with other proposals that had expired. On December 15, 1980, the Service published a new notice of review for plants in the **Federal Register** (45 FR 82480), which included *Cycladenia humilis* var. *jonesii* as a category-1 species, indicating that the Service then possessed substantial information to support a proposal of

endangered or threatened status. No comments on this taxon were received in response to the 1980 notice. On February 15, 1983, the Service published a notice in the **Federal Register** (48 FR 6752) of its prior finding that the petitioned action on this taxon may be warranted, in accordance with section 4(b)(3)(A) of the Act as amended in 1982.

On October 13, 1983, and again on October 12, 1984, the petition finding was made that listing the Jones cycladenia was warranted but precluded by other listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act. Such a finding requires a recycling of the petition, pursuant to section 4(b)(3)(C)(i) of the Act and another finding becomes due within 12 months. The Service published a proposed rule, constituting a finding that the petitioned section was warranted, to list *Cycladenia humilis* var. *jonesii* as an endangered species in the January 10, 1985, **Federal Register** (50 FR 1247).

Endangered status was proposed for the Jones cycladenia based upon then-current status information, which indicated that the species comprised about 2,900 individuals in three populations. The Service's Grand Junction Field Office obtained additional status information after the publication of the proposed rule indicating the existence of two additional sites, one each in Grand County and Garfield County, and 7,500 individuals altogether. The Service, after evaluating the threats and the biological status of *Cycladenia humilis* var. *jonesii*, has determined that the species should be listed as threatened, rather than endangered as was proposed in the January 10, 1985, **Federal Register**.

Summary of Comments and Recommendations

In the January 10, 1985, proposed rule (50 FR 1247) and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. Newspaper notices that invited general public comment were published in the *Salt Lake Tribune* and *Deseret News* on February 12, 1985. Seven comments were received and are discussed below. No public hearing was requested or held.

The National Park Service supported the listing and reported an inventory that located three additional sites in the Purple Hills area: Middle Moody Canyon (GCNRA), Deer Point (BLM), and an adjacent site in Capitol Reef National Park (CRNP). The Park Service enumerated threats to the Purple Hills sites including nine oil and gas leases and five lease applications around the Purple Hills site within GCNRA, a proposal to develop the Circle Cliffs Special Tar Sands Area, ORV activity associated with uranium exploration, and the possibility of increased visitor access and recreational ORV activity associated with new road construction. The Middle Moody Canyon site is within the park natural zone. It and the CRNP site are protected from energy developments. The Park Service also noted that all of the Purple Hills sites are within grazing allotments. Recently, Service and NPS personnel visited the Purple Hills sites and observed the new sites and impacts to them. The Service agrees with the NPS comments.

The Bureau of Land Management submitted a comment in which it identified no threats to the BLM site in the Purple Hills. However, since the site is on the uranium-bearing Chinle Formation and the area is open to mining claims, there is a potential threat from uranium exploration. Although Kirkwood Oil and Gas Company has withdrawn its plan of operation for tar sand development, the threat of future tar sand development in the Circle Cliffs Special Tar Sands area remains, as noted by NPS. The BLM also noted that the Mohave County, Arizona, site was within Pipe Spring National Monument, on NPS land, not public domain land. However, the locality given for this collection is vague, and it could have been made anywhere in the vicinity of Pipe Spring National Monument, which is only 40 acres in size. There is potential habitat in this area on the slopes and foothills of the Chinle Formation, below the Vermillion Cliffs, between Cane Beds, Arizona, and Kanab, Utah.

The Smithsonian Institution and the State of Utah supported the listing; the State agreed there is no need to designate critical habitat. The Utah Native Plant Society also supported the listing and expressed the hope that listing would stimulate protection for the Jones cycladenia.

A comment from two individuals supported the listing. They mentioned that a graded road bisects the larger San Rafael site. This road has also been observed by the Service and is in an area of uranium exploration.

VOL 51 ISS 86 MY 5 1986 UMI

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that *Cycladenia humilis* var. *jonesii* should be classified as a threatened species. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations promulgated to implement the listing provisions of the Act (50 CFR Part 424) were followed. A species may be determined to be an endangered or a threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Cycladenia humilis* Bentham var. *jonesii* (Eastwood) Welsh & Atwood (Jones cycladenia) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Off-road vehicle use for recreation and exploration for minerals, tar sands, and oil and gas is impacting the habitat of *Cycladenia humilis* var. *jonesii*. The San Rafael Swell population is crisscrossed with vehicle tracks and pockmarked from uranium exploration (Anderson 1981, Hreha and Greenwood 1980). This habitat has also been staked with mining claims. Although none of the claims have been developed and most may be simply speculative, the danger of future mining for uranium remains a possibility. In addition, annual assessment work is required to maintain a valid claim. This assessment work causes continual distrubance of the habitat. Vehicle tracts and mining claims are also evident at the Purple Hills population (Welsh pers. comm.).

Oil and gas leases have been issued either on or immediately adjacent to all known extant population sites. There is active exploratory drilling for oil and gas adjacent to the Castle Valley site. The BLM site at the Purple Hills is within the Circle Cliffs Special Tar Sands Area, but no development is planned at present. Off-road vehicle use at the Castle Valley and Fisher Mesa (Onion Creek) sites has denuded strips through the population.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* Not known.

C. *Disease or predation.* All populations are within grazing allotments, but the probability of serious damage is low.

D. *The inadequacy of existing regulatory mechanisms.* No Federal or State laws directly protect *Cycladenia humilis* var. *jonesii*. Although the BLM is aware of this taxon, it is not currently obligated to regulate activities so as to provide for the conservation of the *Cycladenia*, and the sites on BLM land and the Purple Hills site on GCNRA are under multiple-use management.

E. *Other natural or manmade factors affecting its continued existence.* The arid climate and harsh soils of the habitat of the Jones cycladenia make its ecosystem a fragile one, easily degraded by surface distrubances, and slow to recover its natural condition. As an apparent relict species, it may not be well-adapted to present-day climatic conditions in the Intermountain region and may be especially susceptible to habitat disturbance through reduced ability for seedling establishment. Its low numbers in only three known extant populations increase its vulnerability to significant loss from a single inadvertent catastrophic disturbance.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the preferred action is to list *Cycladenia humilis* var. *jonesii* as a threatened species. The Jones cycladenia was proposed as endangered based on its rarity and evidence of threats. In the last year, new sites for two of the populations have been found: At Purple Hills and Castle Valley. These new findings have raised the total population estimate to 7,500 individuals from the 2,900 estimated in the proposal. Most of the new sites face the same threats and impacts as the others, and the Jones cycladenia remains a vulnerable species. Because of the increased numbers but continuing threats, threatened status is more appropriate than either endangered status or no action. Critical habitat is not being determined for this species for the reasons detailed below.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time a species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for *Cycladenia humilis* var. *jonesii* at this time. The designation of critical habitat is not considered to be prudent when such designation would not be of benefit to the taxon involved (50 CFR 424.12). The Service finds that designation of critical habitat is not prudent because the species would derive no additional benefits from the critical habitat designation that do not already arise from listing and that would outweigh the possible negative effects of such designation. Listing highlights the rarity of a plant and can lead to vandalism or collecting as well as positive attention. Publication of critical habitat descriptions and maps could be detrimental to the species by singling out the location of each occurrence, thus increasing risk to the species. The plant is attractive and conspicuous, and could be taken despite the Federal collecting prohibition. Also, the BLM, NPS, and the State are already aware of the occurrences on their land.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States, and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required by Federal agencies and the prohibitions against taking are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402 and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. Possible effects from BLM and NPS activities are expected to be limited. The two agencies funded some of the field surveys on this taxon and are aware of it for planning purposes. Management by these agencies would be affected. Restricting traffic to some existing roads and fencing some areas might be required, as well as special care in administering mining claims and oil and gas and tar sands leases so that

the taxon is accommodated in exploration or any development activity.

The Act and its implementing regulations found at 50 CFR 17.71 and 17.72 set forth a series of general trade prohibitions and exceptions that apply to all threatened plant species. With respect to *Cycladenia humilis* var. *jonesii*, all trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.71, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, or sell or offer for sale this species in interstate or foreign commerce. Seeds from cultivated specimens of threatened plant species are exempt from these prohibitions provided that a statement of "cultivated origin" appears on their containers. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.72 also provide for the issuance of permits to carry out otherwise prohibited activities involving threatened species under certain circumstances. No such trade in *Cycladenia humilis* var. *jonesii* is known. It is anticipated that few trade permits would ever be sought or issued since the species is not common in cultivation or in the wild.

Section 9(a)(2)(B) of the Act, as amended in 1982, prohibits the removal and reduction to possession of endangered plant species from areas under Federal jurisdiction. Regulations implementing this prohibition were published on September 30, 1985 (50 FR 39681). The protection is also extended to threatened plant species under 50 CFR 17.71. These regulations also provide for the issuance of permits for exceptions to this prohibition under 50 CFR 17.72. The Jones cycladenia occurs in large part on land managed by the BLM and NPS. It is likely that few collecting permits for the Jones cycladenia will be requested, as the plant is not common in the wild and has not been of interest to collectors.

Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–1903).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Regulation Promulgation

PART 17—[AMENDED]

Accordingly, Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, is amended as set forth below:

1. The authority citation for Part 17 continues to read as follows:

Authority: Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411 (16 U.S.C. 1531 *et seq.*).

2. Amend § 17.12(h) by adding the following, in alphabetical order under the family Apocynaceae, to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

* * * * *

[Docket No. 50581-5127]

Reporting and Recordkeeping Requirements for Atlantic Swordfish Fishery; Technical Amendment

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule; technical amendment.

SUMMARY: NOAA issues this final rule implementing a technical amendment to the regulations for the Fishery Management Plan for the Atlantic Swordfish Fishery (FMP). This rule clarifies the reporting requirements for vessels harvesting swordfish from the Caribbean. The intended effect is to implement the intent of the FMP.

EFFECTIVE DATE: May 5, 1986. The information collection requirements at § 630.5 have been approved by the Office of Management and Budget and are effective as of September 18, 1985.

FOR FURTHER INFORMATION CONTACT: Donald W. Geagan, 813-893-3722.

SUPPLEMENTARY INFORMATION: NOAA published a final rule on August 25, 1985 (50 FR 33956) to implement the Fishery Management Plan for the Atlantic Swordfish Fishery (FMP).

The time limit for submission of reports of the Center Director was omitted inadvertently from § 630.5. This rule revises § 630.5 by adding a statement requiring that reports be submitted within 10 days after swordfish are landed. Without this time limit, the reporting requirement is unenforceable.

Other Matters

This action is taken under the authority of 50 CFR Part 630 and is taken in compliance with Executive Order 12291.

List of Subjects

50 CFR Part 604

Reporting and recordkeeping requirements.

50 CFR Part 630

Fisheries, Reporting and recordkeeping requirements.

Dated: April 30, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator For Fisheries Resource Management, National Marine Fisheries Service.

For the reasons set forth in the preamble, NOAA amends 50 CFR Parts 604 and 630 as set forth below:

PART 604—OMB CONTROL NUMBERS FOR NOAA INFORMATION COLLECTION REQUIREMENTS

1. The authority citation for Part 604 continues to read:

Authority: Paperwork Reduction Act of 1980, 44 U.S.C. 3501-3520 (1982).

2. The table in § 604.1 is amended by adding the following entry in numerical order by section number:

§ 604.1 OMB control numbers assigned under the Paperwork Reduction Act.

* * * * *

50 CFR part or section where the information collection requirement is located	Current OBM control No. (all numbers begin 0648-)
§ 630.5	-0013

PART 630—ATLANTIC SWORDFISH FISHERY

1. The authority citation for Part 630 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. Section 630.5 is amended by adding a new last sentence to read as follows:

§ 630.5 Reporting requirements.

* * * Copies of the weigh-out sheets must be provided to the Center Director within 10 days after the swordfish are landed.

[FR Doc. 86-10010 Filed 4-30-86; 3:36 pm]

BILLING CODE 3510-22-M

50 CFR Part 642

[Docket No. 60339-6039]

Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic; Extension of Effective Date

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Emergency interim rule; extension of effective date.

SUMMARY: An emergency interim rule amending the regulations for the Fishery Management Plan for the Coastal Migratory Pelagic Resources of the Gulf of Mexico and the South Atlantic (FMP) is in effect through June 4, 1986. The Secretary of Commerce (Secretary) extends this rule for an additional 26 days (through June 30, 1986). This extension maintains the total allowable catch (TAC), allocations, and quotas established for the Gulf migratory group of king mackerel by the initial emergency regulations and continues in effect a closure of the commercial fishery. The intent of this rule is to protect the Gulf migratory group of king mackerel from being over-fished during the remainder of the fishing year ending June 30, 1986.

EFFECTIVE DATE: From 0001 hours June 5, 1986, through 2400 hours June 30, 1986.

ADDRESS: Copies of an environmental assessment may be obtained from and comments on this action may be sent to Donald W. Geagan, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

FOR FURTHER INFORMATION CONTACT: Donald W. Geagan, 813-893-3722.

SUPPLEMENTARY INFORMATION: Under section 305(e)(3)(B) of the Magnuson Fishery Conservation and Management Act the Secretary issued an emergency interim rule amending the FMP implementing regulations on March 11, 1986 (51 FR 8325). The rule reduced the TAC, allocations, and quotas for the Gulf migratory group of king mackerel.

The emergency rule set TAC at 5.2 million pounds with recreational and commercial allocations of 3.54 and 1.66 million pounds, respectively. The commercial allocation was exceeded and this fishery was closed by notice effective March 12, 1986, through June 4, 1986 (51 FR 9012, March 17, 1986). The closure notice provided for extension pending continuance of the initial emergency interim rule. Therefore, by implementation of this emergency rule, the Secretary extends the closure of the commercial fishery for the Gulf migratory group through June 30, 1986, unchanged from the emergency rule published March 11, 1986.

A detailed discussion of the background, issues, regulations, and the classification of the rulemaking is set forth in the preamble to the emergency interim rule and is not repeated here. Extension of the emergency interim rule was requested by the Gulf of Mexico and South Atlantic Fishery Management Councils.

This emergency interim rule is exempt from the normal review procedures of Executive Order 12291 as provided for in section 8(a)(1) of that order. This rule is being reported to the Director of the Office of Management and Budget, with an explanation of why it is not possible to follow the procedures of that order.

List of Subjects in 50 CFR Part 642

Fisheries, Fishing.

Dated: April 29, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator For Fisheries Resource Management, National Marine Fisheries Service.

For reasons set forth in the preamble, 50 CFR Part 642 is amended as follows:

PART 642—COASTAL MIGRATORY PELAGIC RESOURCES OF THE GULF OF MEXICO AND THE SOUTH ATLANTIC

1. The authority citation for Part 642 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. Section 642.7 is amended by adding a new paragraph (a)(27) to be effective from 0001 hours June 5, 1986, through 2400 hours June 30, 1986, to read as follows:

§ 642.7 Prohibitions.

(a) * * *

(27) Possess Gulf migratory group king mackerel harvested in the FCZ under the recreational allocation set forth at § 642.21(h) after closure has been invoked as specified in § 642.22.

* * * * *

3. Section 642.21 is amended by suspending all of paragraph (a) except the last two sentences and paragraph (c), from 0001 hours June 5, 1986, through 2400 hours June 30, 1986, and adding new paragraphs (f), (g) and (h) to be effective from 0001 hours June 5, 1986, through 2400 hours June 30, 1986, to read as follows:

§ 642.21 Quotas.

* * * * *

(f) The commercial allocation for the Gulf migratory group of king mackerel is 1.66 million pounds for the current fishing year (July 1, 1985-June 30, 1986). This allocation is divided into quotas as follows:

(1) 1.08 million pounds for the eastern zone;

(2) 0.48 million pounds for the western zone; and

(3) 0.10 million pounds for purse seines (see Figure 2 of § 642.29, and paragraph (i) of this section for a description of allocation zones).

(g) *Purse seine quota for king mackerel.* (1) The harvest of king mackerel by purse seines from the Gulf migratory group is limited to 0.10 million pounds for the current fishing year.

(2) The total harvest of king mackerel by purse seines from the Atlantic Ocean is limited to 400,000 pounds each fishing year.

(3) King mackerel harvested by purse seines are counted in the commercial allocations and quotas specified in paragraphs (a) and (f) of this section.

(h) *Recreational quota for king mackerel.* The recreational allocation for the Gulf migratory group of king mackerel is 3.54 million pounds for the current fishing year (July 1, 1985-June 30, 1986).

Proposed Rules

Federal Register
Vol. 51, No. 86
Monday, May 5, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1493

CCC Export Credit Guarantee Program (GSM–102) and CCC Intermediate Export Credit Guarantee Program (GSM–103), Amendment 2

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend the Commodity Credit Corporation (CCC) Export Credit Guarantee Program (GSM–102) Regulations (7 CFR Part 1493) to include a new program, the Intermediate Export Credit Guarantee Program (GSM–103). The GSM–103 program would allow U.S. exporters to apply for payment guarantees which would protect the exporter or the exporter's assignee against loss due to defaults in payment by foreign banks when commodities are sold on credit terms in excess of three years but not more than ten years. This rule will help promote the export of U.S. agricultural commodities since a U.S. exporter would be able to extend credit for a longer term when selling those commodities and obtain payment guarantee coverage for that sale. In addition, this rule will (i) permit CCC to adjust the maximum amount of interest which CCC guarantees to pay to the exporter or its assignee; (ii) permit freight cost to be covered under the CCC payment guarantees for breeding animals that are financed under GSM–102 and GSM–103 and (iii) permit CCC to enter into agreements with exporters/assignees for alternative methods of satisfying payment guarantees.

DATE: In order to assure consideration comments must be received by May 27, 1986.

ADDRESS: Mail or deliver comments to the General Sales Manager, Foreign Agricultural Service, Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: L.T. McElvain, Director, CCC Operations Division, Export Credits, Foreign Agricultural Service, USDA, Washington, D.C. 20250, Telephone: (202) 447–6225.

SUPPLEMENTARY INFORMATION:

Discussion of Rule

The current provisions of 7 CFR Part 1493, Subpart A, containing the CCC Export Credit Guarantee Program (GSM–102) regulations, protect an exporter or an exporter's assignee against loss from defaults in payment by foreign banks due to commercial or noncommercial reasons when commodities are sold on deferred payment terms of not more than three years. Section 1131 of the Food Security Act of 1985 (Pub L. 99–198) amended section 4 of the Food for Peace Act of 1966 (7 U.S.C. 1707a) to provide for CCC guarantees of the repayment of credit extended in connection with export sales where the credit terms are in excess of three years but not more than ten years. Pursuant to this authority, CCC propose to amend Subpart A in general to include a new program, the Intermediate Export Credit Guarantee Program (GSM–103). It was determined that for purposes of program management, the proposed CCC Intermediate Export Credit Guarantee Program (GSM–103) and the current CCC Export Credit Guarantee Program (GSM–102) should be codified together in the same regulations. Accordingly, this rule would amend the title of Part 1493 and several sections of Subpart A to include both programs.

The GSM–103 program would provide coverage to U.S. exporters who sell commodities on deferred payment terms in excess of three years but not more than ten years if repayment is secured by a foreign bank approved by CCC.

Under the rule, U.S. exporters would submit applications to CCC for payment guarantees. The exporter, among other things, would furnish information concerning the credit terms needed to finance the export sale. If the credit terms were for three years or less, the application would request coverage under the GSM–102 program. Applications with credit terms in excess of three years but not more than 10 years would request coverage under the GSM–103 program. If the application is accepted by CCC, a GSM–102 or GSM–103 payment guarantee, as applicable, would be issued to the U.S. exporter. CCC would permit the proceeds payable under the payment guarantee issued to be assigned to a financing institution in the U.S.

Sections 1493.1, 1493.2, 1493.3, 1493.4, 1493.5, 1493.10 and 1493.12 would be amended to include the GSM–103 program. Some of the language in these sections, as well as sections 1493.8 and 1493.9, would be revised slightly in the interest of greater clarity. This rule would also amend 1493.2(e) to permit CCC to adjust, during the period of repayment by the foreign banks, the maximum rate of interest which CCC guarantees. The present regulations only provide for a fixed-rate maximum interest coverage. The inability to adjust the interest rate coverage in response to changes in interest rates may inhibit export financing under the program. This rule would permit the interest rate coverage to be adjusted, but in any event the coverage would be limited to the average investment rate of the most recently auctioned 52-week Treasury bills as announced by the Department of Treasury at the time CCC determines the interest rate coverage or at the time the interest rate coverage is adjusted.

Paragraphs 1493.2 (f) and (m) would be amended to redefine "exported value" and "port value" to include freight for breeding animals and paragraph (m) would be redesignated as paragraph (o). Permitting freight to be covered by CCC payments guarantees for breeding animals would provide greater incentive for foreign countries to increase their purchase of breeding animals over what they would normally purchase. Transportation expenses for breeding animals can represent a significant cost for importers of breeding animals and their ability to have such expenses financed could influence them to buy U.S. breeding animals.

A new section 1493.16 would be added to make clear that CCC may establish alternative procedures in settling its obligations to U.S. exporters or their assignees in the course of rescheduling a foreign country's debt covered by a CCC payment guarantee.

Rulemaking Requirements

This rule has been reviewed under USDA procedures required by Executive Order 12291 and Departmental Regulation 1512–1 and has been classified as "not major" since the rule would not have any of the effects specified in those documents.

Melvin E. Sims, General Sales Manager, Foreign Agricultural Service, has determined that it is appropriate to have less than a 60-day comment period on this proposed action because a timely adoption of the final rule is crucial to comply with statutory provisions requiring CCC to make available credit guarantees for at least $500 million of credit extended on terms in excess of three years but not more than ten years during Fiscal Year 1986. Section 4 of the Food for Peace Act of 1966, as amended by Section 1131 of the Food Security Act of 1985, requires CCC to make available payment guarantees for each fiscal year ending September 30, 1986, through September 30, 1988, for not less than $500 million of export sales and for each of the fiscal years ending September 30, 1989 and September 30, 1990, for not more than $1 billion of export sales. These guarantees must be made available for credits calling for terms of more than three years but not more than ten years.

To the extent that the provisions of the Regulatory Flexibility Act apply, if any, the General Sales Manager, Foreign Agricultural Service (FAS), certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities since there will not be a substantial number of such entities affected by this proposed rule. Consequently, no regulatory flexibility analysis is required under the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). The public is invited to comment on the impact of this rule on small entities, and the General Sales Manager will review this determination in light of those comments.

An assessment of the impact of this proposed rule, if promulgated, on the environment was made, and based on that evaluation, this action is not a major federal action and will have no foreseeable significant effects on the quality of the human environment. Consequently, no environmental impact statement is necessary for this rule. The environmental assessment is available for review in Room 4525, South Building, USDA, during normal business hours.

The public is invited to submit written comments regarding the proposed rule. Each person submitting comments regarding the proposed rule must include his or her name and address and give reasons for any suggested changes in the proposed rule. Copies of all written communications received will be available for examination by interested persons in Room 4525, South Agriculture Building, 14th Street and Independence Avenue, SW., Washington, D.C. 20250, during regular business hours.

List of Subjects in 7 CFR Part 1493

Agricultural commodities, Credit, Exports, Financing, Guarantees.

PART 1493—[AMENDED]

Accordingly, it is proposed to amend Part 1493 of Title 7 of the Code of Federal Regulations as follows:

1. The authority citation for Subpart A of Part 1493 is revised to read as follows:

Authority: Sec. 5(f), Pub. L. 80–89, 62 Stat. 1072, as amended by Sec. 405(a), Pub. L. 98–623, 98 Stat. 3409 (15 U.S.C. 714c(f)); Sec. 4(b), Pub. L. 89–808, 80 Stat. 1537, as amended by Sec. 101, Pub. L. 95–501, 92 Stat. 1685 and Sec. 1131, Pub. L. 99–198, 99 Stat. 1486 (7 U.S.C. 1707a(b)); 5 U.S.C. 301.

2. The title of Part 1493 is revised to read as follows: Part 1493—CCC Export Credit Guarantee Program (GSM–102) and CCC Intermediate Export Credit Guarantee Program (GSM–103).

3. The table of contents for Subpart A of Part 1493 is amended by adding at the end the following:

Sec.
1493.16 Alternative satisfaction of payment guarantees.
1493.17 OMB Control Number assigned pursuant to the Paperwork Reduction Act.

4. Section 1493.1 is revised to read as follows:

§ 1493.1 General statement.

(a) This part contains the regulations governing the Commodity Credit Corporation (CCC) Export Credit Guarantee Program (GSM–102) and the CCC Intermediate Export Credit Guarantee Program (GSM–103). Exporters of U.S. agricultural commodities usually require importers to guarantee payment of the selling price of commodities sold to such importers. The guarantee may be in the form of (1) an irrevocable foreign bank letter of credit issued in favor of the exporter who may draw drafts for the deferred payments to be presented to the foreign bank as such payments become due; or (2) an irrevocable foreign bank letter of credit which authorizes the exporter to draw drafts on a U.S. correspondent bank of the foreign bank. The exporter may assign the account receivable to a U.S. bank or financial institution so that the exporter may realize the proceeds of the sale prior to the deferred payment dates, as called for in the export credit sale. GSM–102 and GSM–103 are designed to protect the exporter or the exporter's assignee against loss from non-payment due to commercial and noncommercial risks under the foreign bank letter of credit or related obligation. By transferring some of the risk of loss due to non-payment by foreign banks from the exporters or their financing institutions to CCC, GSM–102 and GSM–103 are intended to: facilitate exportation; forestall or limit declines in exports; permit exporters to meet competition from other countries; and increase commercial exports of U.S. agricultural commodities.

(b) GSM–102 and GSM–103 will be administered by the General Sales Manager, Foreign Agricultural Service (FAS), U.S. Department of Agriculture.

(c) The provisions of Public Law 83–664 (Cargo Preference Act) are not applicable to the shipment of commodities under GSM–102 and GSM–103.

(d) GSM–102 and GSM–103 may be supplemented by USDA announcements.

5. Section 1493.2 is amended by revising paragraphs (e) and (f) to read as follows; adding new paragraphs (j) and (k) to read as follows; redesignating previous paragraphs (j) through (n) as (l) through (p), respectively; and revising newly redesignated paragraphs (n) and (o) to read as follows:

§ 1493.2 Definition of terms.

* * * * *

(e) "Eligible interest" means the maximum rate of interest which CCC agrees to pay the exporter, or the exporter's assignee, as indicated in CCC's payment guarantee, including any amendments to the payment guarantee. The payment guarantee may provide for automatic adjustments in the eligible interest during the term of the credit. Eligible interest shall not exceed the average investment rate of the most recent 52-week Treasury bills as announced by the Department of Treasury at the time CCC determines the eligible interest or at the time the eligible interest is adjusted.

(f) "Exported value" means the value of the commodity exported under the payment guarantee, basis f.a.s. or f.o.b. point of export, except that "exported value" may, upon approval by CCC, include freight costs for breeding animals if the animals are sold on c.&f. or c.i.f. basis. The exported value for breeding animals shall not include marine and war risk insurance for c.i.f. sales.

* * * * *

(j) "GSM–102" means the program under this subpart, also referred to as the "Export Credit Guarantee Program", under which the payment guarantees

VOL 51 ISS 86 MY 5 1986

issued are for a period not exceeding 3 years from the date of export.

(k) "GSM–103" means the program under this subpart, also referred to as the "Intermediate Export Credit Guarantee Program", under which the payment guarantees issued are for a period exceeding 3 years but not exceeding 10 years from the date of export.

* * * * *

(n) "Payment guarantee" means the written agreement under which CCC undertakes to protect the exporter or the exporter's assignee from losses due to non-payment by a foreign bank under the foreign bank's letter of credit supporting the exporter's export credit sales contract or under the foreign bank's obligation owed to the exporter's assignee related to the foreign bank's letter of credit issued in favor of the U.S. exporter.

(o) "Port value" means the total value of the export credit sales, less any discounts or allowances, basis f.a.s. or f.o.b. at U.S. points of export. Port value may, upon approval by CCC, include freight cost for breeding animals if the export credit sale is made basis c.&f. or c.i.f., less any discounts or allowances. Such values shall include the amount of the upward loading tolerance, if any, as provided for by the export credit sales contract.

* * * * *

6. Section 1493.3 is amended by revising the first sentence of paragraph (a) to read as follows:

§ 1493.3 Application for payment guarantee.

(a) An exporter shall submit a written application (e.g., letter, telex, or TWX) for a payment guarantee to the USDA office specified in section 1493.15 and should request coverage under GSM–102, if the credit terms are three years or less, or GSM–103, if the credit terms are more than three years but not more than 10 years. * * *

* * * * *

7. Section 1493.4 is amended by revising paragraphs (b), (c) and (d) to read as follows:

§ 1493.4 Payment guarantee.

* * * * *

(b) The payment guarantee shall become effective on the date(s) of export(s) of the agricultural commodities sold by the exporter to the importer and continue in force with respect to payments due during the period covered by the final payment schedule not exceeding (1) 36 months for credits covered by GSM–102 and (2) 120 months for credits covered by GSM–103, from the date(s) of such export(s). Exports made prior to receipt by CCC of a telephonic or written application for a payment guarantee or exports made after the final date for export shown on the payment guarantee or amendment thereof are ineligible for GSM–102 or GSM–103 coverage, except where it is determined by the Assistant General Sales Manager to be in the interest of CCC.

(c) The payment guarantee may contain such additional terms, conditions, and limitations as are deemed necessary or desirable by the Assistant General Sales Manager.

(d) The payment guarantee may be amended by the parties thereto, provided that such amendment is in conformity with GSM–102 and GSM–103 at the time the amendment is approved. Amendments may include a change in the credit period or an extension of time to export. Any amendment to the payment guarantee may be subject to an increase in the guarantee fee. The assignee may submit corrections to the payment schedule.

* * * * *

8. Section 1493.5 is amended by revising the second sentence to read as follows:

§ 1493.5 Guarantee rates.

* * * Guarantee rates charged by CCC under GSM–102 and GSM–103 will be available upon request from the USDA office specified in § 1493.15.

9. Section 1493.8 is amended by revising paragraph (a) and (b) (3) (iii) and (iv) to read as follows:

§ 1493.8 Notice of default.

(a) If the foreign bank issuing the letter of credit fails to make a remittance on the due date pursuant to the terms of the foreign bank letter of credit or related obligation, the exporter or the exporter's assignee shall notify CCC at the address indicated in Section 1493.15 by phone or wire within 10 calendar days of the due date, or any extension thereof by the Treasurer, or Assistant Treasurer, CCC. If made by phone it must be confirmed in writing. The notice shall include the payment guarantee number, the amount due, the date of refusal to pay and reason for default, if known.

(b) * * *

(3) * * *

(iii) Invoice(s) showing the exported value. If there is an intervening purchaser both the exporter's invoice to the intervening purchaser and the invoice to the foreign buyer should be included.

(iv) An instrument, in form and substance satisfactory to CCC, subrogating to CCC their respective rights for the amount of payment in default under the applicable export credit sale.

* * * * *

10. Section 1493.9 is amended by revising the second sentence of paragraph (a) to read as follows:

§ 1493.9 Payment of loss.

(a) * * * If CCC determines that it is liable to the exporter and/or the exporter's assignee, CCC will remit to the exporter or the exporter's assignee the amount of the combined principal and interest loss covered by the payment guarantee plus interest at the latest average investment rate of the most recent 52-week Treasury bills as announced by the Department of Treasury as of the date of default. * * *

* * * * *

11. Section 1493.10 is amended by revising paragraph (d) to read as follows:

§ 1493.10 Recovery of losses.

* * * * *

(d) Notwithstanding any other terms of the payment guarantee, the exporter shall be liable to CCC for any amount paid by CCC under the payment guarantee when and if it is determined by CCC that the exporter has been or is in breach of any contractual obligation, certification or warranty made by the exporter for the purpose of obtaining the payment guarantee or in fulfilling obligations under GSM–102 or GSM–103, and the exporter's assignee shall be liable to CCC for any amounts paid by CCC under the payment guarantee when and if it is determined by CCC that the exporter's assignee has not fulfilled any of the obligations under GSM–102 or GSM–103.

* * * * *

12. Section 1493.12 is amended by revising the second sentence to read as follows:

§ 1493.12 Covenant against contingent fees.

* * * For breach or violation of this or other obligations or warranties undertaken by the exporter in regard to a GSM–102 or GSM–103 payment guarantee, CCC shall have the right notwithstanding other rights provided under these regulations to annul coverage for any commodities not yet shipped and/or to proceed against the exporter.

13. A new § 1493.16 is added to read as follows:

§ 1493.16 Alternative satisfaction of payment guarantees.

CCC may, upon agreement of the exporter (or if the proceeds payable under the payment guarantee have been properly assigned, then the exporter's assignee), establish procedures, terms and conditions for the satisfaction of CCC's obligations under a payment guarantee other than those provided for in this subpart if CCC determines that those alternative procedures, terms and conditions are appropriate in rescheduling the debts arising out of any transaction covered by the payment guarantee and would not result in CCC paying more for an obligation than the amount of CCC's obligation.

14. A new § 1493.17 is added to read as follows:

§ 1493.17 OMB Control Number assigned pursuant to the Paperwork Reduction Act.

The information collection requirements contained in this regulation (7 CFR Part 1493, Subpart A) have been approved by the Office of Management and Budget (OMB) in accordance with the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Control Number 0551–0004.

Dated: April 25, 1986.

George J. Pope,

Acting General Sales Manager and Acting Associate Administrator, FAS, and Acting Vice President, Commodity Credit Corporation.

BILLING CODE 3410–10–M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 20

[Docket No. 20–16]

A.N. Tschaeche; Denial of Petition for Rulemaking

AGENCY: Nuclear Regulatory Commission.

ACTION: Denial of petition for rulemaking.

SUMMARY: The Nuclear Regulatory Commission is denying a petition for rulemaking submitted by A.N. Tschaeche. The petitioner requested that the Commission amend its regulations to state that full compliance with the Commission's regulations is evidence acceptable in a court of law that the licensee was not negligent, and that the Commission's regulations must be violated before a *prima facie* case is pleaded on the issues of negligence and causation in any action based on injuries claimed to have resulted from exposure to ionizing radiation. The Commission is denying the petition because it is inconsistent with the intent of the Commission's regulations and because the Commission lacks the legal authority to grant the petitioner's request.

ADDRESS: Copies of the petition are available for public inspection or copying for a fee at the NRC's Public Document Room at 1717 H Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Linda S. Gilbert, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: 301–492–7678.

SUPPLEMENTARY INFORMATION:

The Petition

On October 28, 1985, the Commission received a petition for rulemaking from A.N. Tschaeche. The petitioner requested that the NRC amend its regulations to state that a licensee's full compliance with the Commission's regulations, and particularly with the regulations set forth in 10 CFR Part 20, is evidence acceptable in a court of law that the licensee was not negligent, and that the Commission's regulations must be violated before a *prima facie* case is pleaded on the issues of negligence and causation in any action based on injuries claimed to have resulted from exposure to ionizing radiation. The petitioner further requested that the amended regulations clearly state that noncompliance with the Commission's regulations, and in particular, exceeding the standards set forth in 10 CFR Part 20, does not in and of itself confer negligence on the licensee. Finally, the petitioner requested that, if the Commission determines that it does not have the authority to comply with the petition, the Commission seek the requisite authority from the Congress.

Basis for the Request

The petitioner asserts that resources are being "recklessly, wantonly, and uselessly squandered on radiation injury claims cases, both Workman's compensation and in tort, that are brought against NRC licensees who have demonstrably complied with the Commission's regulations." He cites the *Silkwood* case as a well-known example, and questions the reasonableness of allowing a jury of laypersons to determine whether the Commission's regulations result in safety.

According to the petitioner, the specific issue is whether a licensee who complies with the Commission's regulations can be considered to have met its obligation to provide an adequately safe working environment for conducting its licensed activities. The petition encompasses all NRC regulations, but emphasizes those set forth in 10 CFR Part 20, particularly the external occupational dose limits in § 20.101 and the limits for intake of radionuclides in air and water in § 20.103. The petitioner argues that there is no evidence based on observation of humans that demonstrates any harm to an individual or group from NRC-licensed activities performed in accordance with NRC regulations. In addition, he states that there is no evidence from animal or other studies that demonstrates any harm or risk of harm to workers or the general public from such activities.

The petitioner urges that his proposal would save money, alleviate public fear of radiation, protect licensees against claims of negligence, and clarify the intent of NRC regulations. He therefore requests that the Commission affirmatively state that compliance with its regulations is sufficient to demonstrate the absence of negligence. If the Commission considers that statement overly broad, the petitioner requests that the Commission apply it to all of Part 20 and to Appendix I of Part 50. If the Commission finds even that statement too broad, the petitioner requests that the Commission apply it to §§ 20.101 and 20.103. According to the petitioner, this could be easily accomplished if the Commission were to adopt the point of view that activities performed in accordance with its regulations are safe unless and until experience demonstrates differently.

Reasons for Denial

As the petitioner anticipated, the Commission has no legal authority to grant the petitioner's request. In essence, the petitioner would have the Commission promulgate rules of evidence for the courts. This would clearly exceed the Commission's rulemaking authority. Rules of evidence are derived from statutes, case law, and court rules.

In addition, the petitioner's request is contrary to judicial precedent. In general, compliance with government safety regulations is accepted as evidence of a person's having acted reasonably but is not considered

UMI

VOL 51 ISS 86 MY 5 1986 UMI

conclusive proof of the absence of negligence. In its *Silkwood* decision, the District Court examined a number of cases in various contexts and reaffirmed that general rule. *Silkwood* v. *Kerr-McGee Corp.*, 485 F. Supp. 566, 577–79 (W. D. Okla. 1979), *aff'd in part and rev'd in part*, 667 F.2d 908 (10th Cir. 1981), *rev'd and remanded*, 464 U.S. 236 (1984), *on remand*, 769 F.2d 1451 (1985). The court found no authority for the proposition that a different rule should apply to nuclear safety regulations. Accordingly, the court held that evidence of Kerr-McGee's compliance with the Commission's regulations was not conclusive proof of the absence of negligence. Subsequent decisions in the case did not disturb that holding. Thus, *Silkwood* is controlling on this point.

As the petitioner pointed out, the District Court considered the intent of the Atomic Energy Commission (AEC) in promulgating its radiation protection standards. Because the AEC did not intend the standards to establish absolute safe levels of exposure below which no injury could occur, the court concluded that the standards were not dispositive of the issues of negligence or causation. The petitioner urges that the NRC change the intent of its regulations to establish such absolute levels and thereby preclude a finding of negligence if a licensee complies with NRC standards. However, the Commission has never taken the position that there is a level of radiation exposure below which one can conclusively presume that no injury will result. Rather, in view of scientific uncertainty about radiation exposure, the Commission has required its licensees to ensure that radiation exposures are kept "as low as is reasonably achievable." In short, the Commission lacks the technical basis to make the finding that the petitioner requests.

For this reason, it would be pointless for the Commission to ask Congress to give it the necessary legal authority to promulgate the requested rules. Similarly, it would serve no purpose to seek public comments on this petition for rulemaking, as is the Commission's usual practice. See 10 CFR 2.802(e).

Accordingly, the Commission denies the petition.

Dated at Bethesda, Maryland, this 23rd day of April, 1986.

For The Nuclear Regulatory Commission.

Jack W. Roe,

Acting Executive Director for Operations.

BILLING CODE 7590-01-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 523

[No. 86-428]

Liquidity Requirements

Dated: April 24, 1986.

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed rule.

SUMMARY: The Federal Home Loan Bank Board ("Board") is proposing to amend its regulations governing the liquidity requirements applicable to members of the Federal Home Loan Bank system and to institutions whose accounts are insured by the Federal Savings and Loan Insurance Corporation ("FSLIC") ("insured institutions"). The proposed amendments would make three significant changes to the requirements currently in effect. First, the Board proposes to amend the regulations to recognize the connection between an institution's liquidity needs and its outstanding firm commitments and loans in process. Therefore, these liquidity amendments would permit an institution to use its liquid assets to satisfy its liquidity requirement only to the extent that those assets exceed the total of the institution's firm commitments to disburse funds less 12.5 percent of its liquidity base. For purposes of this proposal, however, an institution would be required to perform this offset of liquid assets only against firm commitments requiring disbursements within six months of the date on which the institution must report its liquidity requirement.

Secondly, the Board proposes to exercise its authority to classify institutions for purposes of setting required liquidity and to implement variable liquidity requirements. Based on its supervisory experience and assessment of institutions' liquidity needs, the Board has developed a measure of an institution's asset/liability structure and resulting need for liquidity called the Liquidity Coverage Index ("LCI"). The Board proposes to use the LCI in classifying institutions for the purpose of setting required liquidity ratios. Each institution would then determine its liquidity requirement based on its LCI.

Finally, the Board proposes increasing the minimum liquidity required of all institutions to 6 percent of an institution's liquidity base, thereby increasing the current requirement of 5 percent by one percentage point.

The Board believes that these amendments are needed to raise levels of minimum required liquidity, to set different liquidity requirements based on different asset/liability structures and needs for liquidity, and to discourage institutions from making commitments in excess of their ability to deliver the funds committed.

DATE: Comments must be received by July 7, 1986.

ADDRESS: Send comments to Director, Information Services, Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552. Comments will be available for public inspection at this address.

FOR FURTHER INFORMATION CONTACT: Ben F. Dixon (202–377–6399), Financial Analyst, Office of Examinations and Supervision; Donald G. Edwards (202–377–6914), Director, General Research Division, Office of Policy and Economic Research; or Karen Knopp O'Konski (202–377–7240), Attorney, Office of General Counsel, Federal Home Loan Bank Board, at the above address.

SUPPLEMENTARY INFORMATION:

A. Background

Section 5A of the Federal Home Loan Bank Act, 12 U.S.C. 1425a (1982 & Supp. II 1984) ("Bank Act"), requires the Board to set liquidity requirements for institutions that are members of the Federal Home Loan Bank system or are insured by the FSLIC. By delegating this authority to the Board, Congress sought to create "meaningful and flexible liquidity" that could be increased "when mortgage money is plentiful, maintained in easily liquidated instruments, and reduced to add to the flow of funds to the mortgage market in periods of credit stringency." *Id.* at 1425a(a). Congress intended flexible liquidity "to support two main purposes" of the Bank Act, namely "sound mortgage credit and a more stable supply of such credit." *Id.* The regulatory tools given to the Board to achieve these purposes include the authority to define terms, to classify institutions for liquidity purposes on any basis it finds reasonably necessary or appropriate, to set the liquidity requirement anywhere between a minimum of 4% and a maximum of 10% of an institution's liquidity base, and to prescribe the method of calculating the liquidity requirement. *Id.*

The Board's current regulations require each institution to maintain an average daily balance of liquid assets not less than 5 percent of the average daily balance of its liquidity base during the preceding calendar month. In addition, each institution must maintain an average daily balance of short-term liquid assets not less than 1 percent of

the average daily balance of its liquidity base during the preceding calendar month. 12 CFR 523.11 (1985). The regulation also prescribes the method for calculating an average daily balance. *Id.* A member with less than $25,000,000 in total assets at the beginning of a fiscal year may, by resolution of its board of directors, figure the liquidity requirement as a percentage of its liquidity base at the end of the preceding calendar month, rather than as a percentage of the average daily balance of its liquidity base. The liquidity requirement may vary if the member is a mutual savings bank ("MSB"). An MSB must maintain an average daily balance of liquid assets not less than 5 percent of the average daily balance of its liquidity base. In lieu of the short-term liquid asset requirement prescribed for other members, however, a member MSB may elect to maintain commercial paper aggregating not less than the difference between the amount of liquid assets it would have been required to maintain absent its election and the actual amount of its liquid assets. *Id.*

In the Board's view, these regulations are no longer adequate to achieve the purposes intended by Congress because they do not permit adequate monitoring of an institution's true liquidity position or its true liquidity needs. Specifically, the regulations do not recognize the connection between an institution's liquidity needs and the commitments it has made to disburse funds. Sound business practices require that before an institution enters into legally binding commitments to disburse money, it should plan how it will fund those commitments as they come due. Otherwise, the institution will be required to drain its available liquidity in order to meet its obligations. As discussed in greater detail below, however, the Board has found among some segments of the industry a disturbing failure to engage in advance planning to fund commitments.

In addition, certain developments within the savings and loan industry have affected thrifts' liquidity needs. The advent of a secondary market for one-to-four family mortgages and of a repurchase market and the development of mortgage-backed securities mean that thrifts can readily convert certain types of loans into cash. The current liquidity regulations do not recognize these new sources of cash. They therefore do not permit the Board accurately to gauge an institution's true need for liquidity.

Moreover, recent financial deregulation and innovations have led to a far more complicated and heterogeneous industry than previously existed. As a result, institutions now have a diverse range of financial strategies, asset/liability structures, sources and uses of funds, and liquidity needs. The current liquidity requirements ignore this diversity by treating all institutions as if they were identical in nature and therefore had identical liquidity needs. A corollary to this problem of inflexibility is that the current regulations present the Board with a dilemma in that it must choose between liquidity requirements which are either clearly too high or too low for many institutions, since it is unable to differentiate among needs under the current regulations.

The Board believes that the best way to address these problems is to amend its regulations to take into account the effect on liquidity needs of new sources of ready cash and the extent of commitments an institution has made and to permit the Board to assess the relative needs of individual institutions for liquidity. This proposal is designed to achieve those results.

B. Description of Proposed Amendments

1. Overview

The proposed amendments to the liquidity requirements would make three significant changes to the requirements currently in effect. First, the amendments would require an institution to offset its liquid assets, as they are currently defined in 50 FR 13988 (1985) (to be codified at 12 CFR 523.10) and 12 CFR 523.10(gf) (1985), against its outstanding firm commitments to disburse funds (in excess of 12.5 percent of its liquidity base) before it could count those liquid assets toward meeting its liquidity requirement. Only disbursements that the institution is committed to make within six months of the date it reports its liquidity requirement would be included in this computation. The purpose of this portion of the proposal is to ensure that the institution can meet its obligations to disburse funds without draining its available liquidity.

Second, the amendments would establish a classification scheme for purposes of determining what an institution's liquidity requirement would be. The tool for establishing this scheme would be the LCI, which is designed to measure need for liquidity. Each institution would first calculate the value of its LCI. The figure obtained from this calculation would then be used to determine the institution's liquidity requirement, expressed as a percentage of its liquidity base.

Finally, the amendments would propose higher liquidity requirements industry-wide by setting a minimum liquidity requirement of 6 percent. Further, they would impose variable liquidity requirements ranging from 6 percent for institutions with positive LCI—indicating a moderate need for liquidity—to 10 percent for institutions with a significantly negative LCI—indicating a need for a relatively high level of liquidity.

2. Assets Eligible To Satisfy the Liquidity Requirement

Congress has given the Board plenary authority to regulate with respect to liquidity requirements. 12 U.S.C. 1425a (1982 & Supp. II 1984). This authority includes the authority to define terms as well as to prescribe the method by which the liquidity requirement is calculated. In accordance with its statutory authority, the Board's current regulations define, among other terms, the term "liquid assets." Moreover, the current regulations impose no conditions on an institution's use of liquid assets to meet its liquidity requirement. They permit an institution to use any asset defined as liquid in any amount to satisfy the requirement. The Board does not now propose to modify its current definitions of liquid assets. It does, however, propose to place a condition on an institution's use of its liquid assets to meet its liquidity requirement. Specifically, an institution could count liquid assets toward meeting its requirement only to the extent they exceed the amount of its firm commitments less 12.5 percent of liquidity base.

"Firm commitments" are defined in proposed § 523.10(o) as the total of a member's net commitments and its loans in process. Net commitments are commitments, due to be funded within six months of the date on which the liquidity requirement is reported, to originate loans (both residential and non-residential), plus commitments to purchase loans and other assets, plus firm take-out commitments, minus commitments to sell loans and other assets. For liquidity purposes, loans in process are loans that have been funded, not yet disbursed, but on which disbursements are due within six months of the reporting date. Commitments are not counted for this purpose unless they are legally binding, since the Board would otherwise require an institution to match its liquid assets against unenforceable obligations.

In essence, the eligible-assets portion of the proposal requires a dollar-for-dollar matching of liquid assets against

VOL 51 ISS 86 MY 5 1986 UMI

an institution's excess obligations to disburse funds before those assets may be used to satisfy the liquidity requirement. For purposes of the proposed rule, an institution is considered over-extended if its firm commitments exceed 12.5 percent of its liquidity base. Aside from the growth that such commitments imply, the Board also notes that some institutions have used loan commitments to generate disproportionately large front-end profit in the form of fees. The Board disapproves neither growth, within certain capitalization limits prescribed in its net-worth rule,[1] nor the generation of profits. What the Board wishes to discourage, however, is the practice of making commitments without adequate ready cash to fund those commitments.

The Board's Office of Policy and Economic Research ("OPER") has performed statistical analyses that show a drastic diminution in true liquidity for some institutions once their outstanding firm commitments are taken into account.[2] One such analysis, based on data reported as of the end of the second quarter of 1985, shows the amount of liquidity held by institutions if their commitments and loans in process are deducted from the amount of their liquid assets as defined in the Board's current liquidity regulations ("eligible liquidity"). 50 FR 13988 (1985) (to be codified at 12 CFR 523.10) and 12 CFR 523.10(g) (1985). For purposes of this analysis, OPER defined an "experimental liquidity variable" as an institution's eligible liquidity less its commitments and loans in process in excess of 10 percent of its liquidity base. OPER found that the 100 institutions with the lowest values of the experimental liquidity variable held a median value of—11 percent liquidity, as compared with an industry median of 13.1 percent. Under the currently applicable regulations, that some 100-firm sample was reporting a median liquidity of 7.2 percent, lower than the industry median of 13.3 percent, but still in excess of the Board's current requirement of 5 percent.

Under the current regulations, then, it is possible for institutions to report adequate regulatory liquidity at a time when their outstanding commitments and loans in process threaten a cash drain that significantly exceeds their true liquidity. Thus, under the current regulations, which do not take account of an institution's commitments and loans in process, an institution may mask its true liquidity position.

This statistical analysis is borne out by the Board's supervisory experience. For example, one institution that was declared insolvent by the FSLIC had reported liquidity of 4.9 percent as of the end of the third quarter of 1985. At that same time, however, the institution had $232,233,000 in outstanding commitments, an amount that its reported liquidity was inadequate to cover. Thus, although the institution reported liquidity of just under the regulatory requirement, it had committed itself to a cash outflow that its ready cash was insufficient to cover.

An institution that is over-extended in this way may turn to the secondary-mortgage or the repurchase market to obtain cash to fund its commitments, or it may seek advances from its Federal Home Loan Bank ("FHLBank") for that purpose. The first solution requires that the institution sell its prime assets, perhaps at "distress" prices, in order to meet its short-term need for cash. Having done so, it may have only poor-quality collateral to offer its Bank in exchange for an advance. In either case, the institution decreases the quality of its asset portfolio in exchange for cash that does not enhance its liquidity position.

The Board would add two observations regarding the portion of the proposed rule pertaining to eligible assets. First, it is intended to achieve results not accomplished by other regulations. For example, the Board is also proposing new regulatory capital requirements, published elsewhere in today's **Federal Register**. That proposal addresses, among other things, contingency capital requirements for certain types of loans. These proposed contingency capital requirements are designed to encourage prudent risk-taking by providing investors with a sufficient capital stake and to assure the FSLIC an adequate buffer against losses. By contrast, the portion of the liquidity amendments under discussion here addresses the institution's need for cash before its committed funds must be disbursed. Thus, it acts to smooth an institution's daily operations and reduce risk to operational stability, rather than to provide a cushion against losses. In short, the requirement imposed by the eligible-assets portion of the proposal is merely that an institution have enough cash to meet the commitments it has made.

Second, the Board anticipates that the eligible-assets portion of the regulation will primarily affect those institutions with disproportionately large amounts of firm commitments. Institutions that have heretofore engaged in prudent, balanced lending will not experience a significant impact. The work-sheet, which appears as an Appendix to this preamble for the purpose of illustrating the calculations it would require, should enable institutions to gauge the degree to which they will be affected by the eligible-assets portion of the regulation.

3. Liquidity Coverage Index

The Bank Act empowers the Board to set the liquidity requirement at any amount it deems appropriate on a scale of between 4 percent and 10 percent of a member-institution's liquidity base. 12 U.S.C. 1425a(b)(1), (b)(2) (1982 & Supp. II 1984). Liquidity base is statutorily defined as "withdrawable accounts and borrowings payable on demand or with unexpired maturities of one year or less . . ." *Id.* at 1425a(b)(2).[3] The Board is proposing to vary the liquidity requirement on a scale of between a minimum of 6 percent and a maximum of 10 percent of liquidity base according to an institution's need for liquidity.

No measure of this need is currently available. The Board's OPER has, however, developed a tool for this purpose, which it has designated the LCI. The LCI is the measure by which the Board proposes to classify institutions for purposes of setting their liquidity requirement.

Simply stated, the LCI is a measure of an institution's ability to generate ready cash as compared with its potential need for cash. Accordingly, proposed § 523.10(i) includes in the LCI the total of a member's liquid assets, together with its borrowing power and the repayments and prepayments of loans it can reasonably expect to receive. All these items represent sources of readily available funds.

The component of the LCI called "borrowing power" is intended to reflect an institution's ability to obtain ready cash by borrowing on the collateral of certain assets. Accordingly, it is defined in proposed § 523.10(j) as 80 percent of the book-value of the member's one-to-four-family mortgages; [4] 90 percent of the book-value of its mortgage-backed securities ("MBSs"); 80 percent of the book-value of assets that would qualify as liquid under current § 523.10(g) of the Board's liquidity regulations; less FHLBank advances; less reverse repurchase agreements; and less mortgage-backed bonds.

As mentioned previously both one-to-four-family mortgages and MBSs are easily convertible into cash. The LCI reflects book value rather than market value so that the value of these assets for purposes of calculating the liquidity requirement will not fluctuate with interest rates. Otherwise—in a rising interest-rate environment, for example—the LCI would work to increase an institution's liquidity requirement as the supply of mortgage money was becoming more constricted. Including one-to-four-family mortgages and MBSs in the LCI at their book value is therefore consistent with the statutory mandate of adjusting the liquidity requirements in accordance with the relative availability of mortgage credit. The Board recognizes, however, that inclusion of these assets in the LCI at their book value will preclude an institution from obtaining the benefit of any appreciation on those assets. Therefore, the Board specifically invites comments on whether the advantages of the book-value approach, as outlined, outweigh the advantages of a market-value approach. Finally, the discount factor applied in the LCI to these types of assets is intended to reflect the discount at which such assets are normally sold or accepted as collateral by the FHLBanks.

If a member institution has obtained FHLBank advances, entered into reverse repurchase agreements, or issued mortgage-backed bonds, it will have used some of its available collateral. Use of collateral reduces borrowing power: Assets pledged to obtain the funds are not available to collateralize new applications for cash. Thus, the value of advances, reverse repurchase agreement and mortgage-backed bonds is subtracted from borrowing power.

In addition to liquid assets and borrowing power, the LCI also permits inclusion of an amount for repayments of loan principal (including prepayments) since repayments also represent a source of readily available cash for the institution. The amount is determined by computing the total of repayments of loan principal that the institution received during the twelve-month period immediately preceding the liquidity reporting date and dividing that figure by 2. In this way, the figure used in the LCI is adjusted for seasonal variations, provides a reasonable basis for predicting the institution's anticipated loan repayments, and is computed for a time-period consistent with that used for maturing liabilities, which are discussed below.

The elements of the LCI described so far, that is, liquid assets, borrowing power, and loan repayments, all represent positive contributions, or potential contributions, to an institution's ready cash. In contrast, that ready cash will be negatively affected to the extent an institution must meet obligations in the near term. Therefore, to compute its LCI, a member must subtract the value of its maturing liabilities, which are defined, at proposed § 523.10(k), as financial liabilities with a fixed maturity date of six months or less from the reporting date.[5] FHLBank advances and passbook accounts are excluded from the definition of maturing liabilities because both are stable liabilities that the institution is unlikely to have to pay quickly or without notice.

As a final step, the total of all of the components of the LCI is multiplied by 100 and then divided by the member's liquidity base. This step converts a dollar amount into a ratio that is scaled to the institution's size. That ratio is the LCI. The worksheet appended to this preamble shows how the LCI is to be calculated.

4. Liquidity Requirement

The liquidity requirement is currently fixed at 5 percent of the liquidity base for all institutions. The Board proposes to raise the minimum requirement to 6 percent. An institution's liquidity requirement would increase, along a scale of between 6 percent and 10 percent of liquidity base, as its LCI diminished. This progression is indicated in the table set forth in proposed § 523.11. That section would first require a member to calculate its LCI. It would then impose a liquidity requirement of 6 percent for a member with an LCI of greater than 0, and 8 percent requirement for a member whose LCI fell between 0 and −25; and a 10 percent requirement for a member whose LCI was below −25.

The proposed increase in the minimum liquidity requirement serves one of the purposes for which the liquidity statute was enacted. By imposing liquidity requirements, Congress intended to provide the Board with a regulatory tool to expand the supply of mortgage credit in periods of credit stringency and to restrict that supply when such credit was plentiful. 12 U.S.C. 1425a(a) (1982 & Supp. II 1984). For example, the Board has previously lowered the liquidity requirement to compensate for "reduced savings flows into member institutions" in order to "help fund the large volume of forward mortgage commitments that institutions have outstanding, and to reduce the pressure for advances from Federal Home Loan Banks." 44 FR 62481 (Oct. 31, 1979). Data concerning the relative availability of mortgage credit are routinely prepared by the Board's OPER and presented to the Board on a regular basis. Based on the most recent such data, prepared by OPER in April, 1986, the Board notes that the value of mortgage loans closed, mortgage commitments made and outstanding, and private housing starts are currently at or near record highs. Further, the recent, dramatic decline in mortgage interest rates had led to a surge in demand for refinancing that is currently straining the capacity of origination and appraisal departments of mortgage lenders. In such an economic climate, the Board believes that an increase in the minimum liquidity requirement is consistent with the purposes of the statute.

This proposal would preserve the definition of "short-term liquid assets" and would continue the requirement that a member hold 1 percent of its liquidity base in short-term liquid assets. The proposal also retains the requirement that the value of the assets a member may use to satisfy its liquidity requirement and the member's liquidity base be computed as average daily balances. The LCI, however, is to be calculated at the end of each quarter for use in determining liquidity required in each of the following three months. Quarterly calculation of the LCI will insure that a member's liquidity requirement will remain stable through at least a quarter, enabling an institution to better predict its liquidity needs.

As described above, the current regulations provide special rules for MSBs, which are permitted to hold commercial paper to satisfy their liquidity requirements to an extent greater than that permitted other institutions, and for small institutions (defined as institutions with assets totalling less than $25,000,000), which may compute their liquidity requirement as a percentage not of the average daily balance of liquidity base, but of liquidity base as of the end of the preceding calendar month. The Board believes that these special rules are no longer necessary and, accordingly, it has deleted them from the proposed rule.

The election for MSBs was adopted at a time when such institutions could invest in commercial paper to a greater

[1] *See* 50 FR 6991 (Feb. 9, 1985).

[2] The discussion in this paragraph is based upon statistical analyses performed during the period from October 1985 to February 1986 by OPER to aid the Board as it considered proposing changes to the liquidity regulations.

[3] The statute permits the Board to determine the liquidity base for a member which is an insurance company. The Board has done so by defining that base as "the policy reserve of a member insurance company required by State law" plus its short-term borrowings. 12 CFR 523.10(c) (1985).

[4] The proposed section includes all mortgage loans and contracts that are federally insured or guaranteed; e.g., FHA- and VA-insured loans.

[5] Liquidity reporting requirements are discussed in greater detail in subsection 5, below.

BEST COPY AVAILABLE

VOL 51 ISS 86 MY 5 1986 UMI

extent than other members. The election was intended to accommodate this difference. The Garn-St Germain Depository Institutions Act of 1982, Pub. L. No. 97-320, 96 Stat. 1469, liberalized investment powers for federally-chartered savings and loan institutions. Moreover, many states have enacted parallel statutes giving similarly expanded investment powers to state-chartered institutions. The distinction between MSBs and other thrift institutions has, therefore, become blurred, and the need for a special election for MSBs is, in the Board's view, outdated.

Under the current regulations, small institutions may use a month-end figure rather than an average daily balance, in computing their liquidity base. The Board believes, however, that there is no longer a discernible difference between the operations of small institutions and their larger counterparts that would justify continuing this exception. Moreover, given the other reporting requirements to which small institutions are subject under this proposal, the requirement that such an institution compute its liquidity base as an average daily balance would not constitute a significant additional burden. The Board therefore proposes to eliminate the limited special exception currently available to small institutions, and invites comment concerning whether any reasons remain to continue the exception or whether there are any reasonable alternatives to eliminating it.

5. Miscellaneous Provisions

The Board recognizes that some institutions may be significantly affected by the eligible-assets portion of this proposal, which may in some cases result in an institution's failure to comply with the liquidity requirement immediately upon the effective date of any substantially similar final regulation. To mitigate this potential effect, the Board proposes a temporary exemption from compliance with the terms of the regulation for an institution that can show that its liquidity deficiency is primarily attributable to the amount of firm commitments it has made. The determination whether this showing has been adequately made would rest with the Principal Supervisory Agent ("PSA") and the Director of the Board's Office of Examinations and Supervision or his designee.

If the requisite showing has been made, then the institution would be required to submit a business plan to the PSA setting forth a plan to achieve compliance with its liquidity requirement. The Board wishes to emphasize the importance of such a plan. Today's amendments are designed to encourage sound cash-management policies. The business plan would promote such policies by requiring affected institutions to devise strategies to meet their liquidity needs.

Pursuant to a plan approved by the PSA, a member qualifying for this exemption may, for an interim period, use its liquid assets, without regard to its outstanding firm commitments, for purposes of meeting its liquidity requirement. The interim period could not exceed two calendar quarters from the effective date of the final regulation, starting with the first full calendar quarter after the effective date.

Moreover, such a member could seek and obtain the PSA's approval to fund its temporary liquidity deficiency with firm lines of credit from its FHLBank. A firm line of credit, as defined in proposed § 523.10(l), is a properly collateralized line of credit extended by a FHLBank to a member institution. The Board considers resort to this device for liquidity purposes to be an interim short-term solution to a member's liquidity problem. Accordingly, firm lines of credit could not be used for this purpose except for a period of two calendar quarters from the effective date of the final regulation.

This proposal would also amend § 523.10 to require reports and records that would enable the Board to monitor compliance with the amendments. The proposed amendments § 523.13 would require institutions to report their requied liquidity, assets eligible to satisfy the requirement, and any penalties assessed for deficiencies, as well as any other information that the Board finds necessary to monitor compliance with the requirements of the liquidity regulation. The Board anticipates that these reporting requirements would be incorporated into its current monthly and quarterly reporting system so that institutions could include the liquidity figures on forms amended for that purposes.

Finally, the proposal contains a provision invalidating, for liquidity purposes, any transaction into which an institution enters in order to evade compliance with the liquidity requirements.

APPENDIX—LIQUIDITY REQUIREMENT WORKSHEET

Part A—Required liquidity Ratio (Complete at end of Quarter)

1. Cash and liquid assets as defined in § 523.10(g) ..... 1. $____
2. Borrowing power based on uncommitted qualifying collateral:
   (a) Borrowing power of total qualifying collateral
   80 percent of book value of convential mortgage loans and contracts on 1-4 family dwelling units and FHA/VA and other federally insured or guaranteed mortgage loans and contracts ..... $____
   90 percent of book value of mortgage-backed backed securities ..... $____
   80 percent of book value of assets that would qualify as liquid under § 523.10(g) but for their remaining maturities ..... $____
   Total ..... (a) $____
   (b) Uses of qualifying collateral:
   FHLB advances ..... $____
   Reverse repurchase agreements ..... $____
   Mortgage-backed bonds ..... $____
   Total ..... (b) $____
   Borrowing power available (subtract line 2(b) from line 2(a)) ..... 2. $____
3. Cash repayment of loan principal at six-month rate (enter one-half of repayments received during past 12 months) ..... 3. $____
4. Financial liabilities maturing in six months or less, excluding passbook accounts and FHLB advances ..... 4. $____
5. Net liquidity coverage gap (subtract line 4 from the sum of lines 1, 2, and 3) ..... 5. $____
6. Liquidity base at end of quarter ..... 6. $____
7. liquidity coverage index (LCI) (divide line 5 by line 6 and multiply by 100) ..... 7. $____
8. Required liquidity ratio (%) (select requirement from following schedule based on value of LCI on line 7)
   If LCI is greater than zero, enter "0"
   If LCI is greater than -25 but not greater than zero, enter "5"
   If LCI is -25 or less, enter "10" ..... 8. $____

*Part B—Liquidity Requirement (Complete at end of Month)**

Liquidity requirement for month just ended

9. Required liquidity ratio in *decimal form* for month just ended (as calculated at end of previous quarter, line 8, Part A) ..... 9. $____
10. Average daily balance of liquidity base during preceding month ..... 10. $____
11. Liquidity requirement (multiply line 9 by 10 and enter requirement here) ..... 11. $____

Assets eligible to satisfy liquidity requirement

12. Liquid assets (as defined in § 523.10(g)) ..... 12. $____
13. Amount by which firm commitments exceed 12.5 percent of liquidity base Firm commitments outstanding (as defined in proposed amended § 523.10(o)) ..... (a) $____
    12.5 percent of liquidity base ..... (b) $____
    Subtract (b) from (a); if less then zero, enter zero ..... 13. $____
14. Liquid assets to the extent they exceed outstanding firm commitments less 12.5 percent of liquidity base (subtract line 13 from line 12; if less than zero, enter zero) ..... 14. $____

* Note.—All dollar amounts in Part B are averages of daily balances during month.

Initial Regulatory Flexibility Analysis

Pursuant to Section 3 of the Regulatory Flexibility Act, 5 U.S.C. 603, the Board is providing the following initial regulatory flexibility analysis.

1. Reasons, objectives, and legal bases underlying the proposed rules. These elements have been discussed elsewhere in the **SUPPLEMENTARY INFORMATION** regarding the proposal.

2. Small entities to which the rules will apply. This rule would apply to all members of Federal Home Loan Banks.

3. Impact of the proposed rules on small institutions. This rule would eliminate a current exception applicable to small institutions. This portion of the proposal is discussed elsewhere in the **SUPPLEMENTARY INFORMATION.**

4. Overlapping or conflicting rules. The Board has no rules prescribing liquidity requirements other than those contained in 12 CFR 523.10 through 523.14, which are the rules that would be amended by the proposed regulation.

5. Alternatives to the proposed rules. There are no alternatives that would achieve the Board's objectives as described elsewhere in the Supplementary Information.

The Board is providing a 60-day comment period for this rule. Comment is invited on all aspects of the proposal, including the appropriateness and effect of the proposed changes, and any additional or alternative measures that would serve the goals of the Board as outlined in the proposal. In addition, the Board specifically solicits comment on the effect this proposal would have in combination with others published elsewhere in today's **Federal Register**, such as the proposed rule on regulatory capital requirements.

List of Subjects in 12 CFR Part 523

Federal home loan banks, Flood insurance, Mortgages, Reporting and recordkeeping requirements.

Accordingly, the Federal Home Loan Bank Board hereby proposes to amend Part 523, Subchapter B, Chapter V, Title 12, Code of Federal Regulations, as set forth below.

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

PART 523—MEMBERS OF BANKS

1. The authority citation for Part 523 is revised to read as follows:

Authority: Sec. 5, 47 Stat. 727, sec. 416(a), 83 Stat. 401, as amended (12 U.S.C. 1425); sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, sec. 4, 80 Stat. 824, as amended (12 U.S.C. 1425a); sec. 17, 47 Stat. 736, sec. 405, 94 Stat. 132, sec. 25, 94 Stat. 1649, as amended (12 U.S.C. 1437); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 401–403, 405–407, 48 Stat. 1255–1257, 1259–1260, as amended (12 U.S.C. 1724–1726, 1728–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); sec. 503, 88 Stat. 1521, as amended (15 U.S.C. 1691, 1691a); sec. 302(b), 87 Stat. 982, as amended (42 U.S.C. 4106(b)); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1947 Supp., 1943–48 Comp., p. 1071.

2. Amend § 523.10 by adding the following new paragraphs (i) through (o) to read as follows:

§ 523.10 Definitions for purposes of this section, § 523.11 and § 523.12.

* * * * *

(i) *Liquidity Coverage Index.* A fraction, the numerator of which is 100, multiplied by the total derived by adding a member's liquid assets, its borrowing power, and ½ of the cash repayments (including prepayments) of loan principal it has received during the twelve months immediately preceding the reporting date, and subtracting from such sum its maturing liabilities; and the denominator of which is the member's liquidity base.

(j) *Borrowing power.* The total derived by adding the sum of 80 percent of the book value of a member's outstanding one-to-four-family mortgages, plus 90 percent of the book value of its mortgage-backed securities, plus 80 percent of the book value of assets that would qualify as liquid under § 523.10(g) but for their remaining maturities; and subtracting from such sum advances made to the member by the Federal Home Loan Bank in which it has membership, the member's reverse repurchase agreements, and the member's mortgage-backed bonds. For purposes of this section, one-to-four-family mortgages include FHA- and VA-insured mortgages and other federally insured or guaranteed mortgage loans and contracts.

(k) *Maturing Liabilities.* A member's financial liabilities with a fixed maturity date of six months or less from the reporting date. The term maturing liabilities does not include passbook accounts or advances made to a member by the Federal Home Loan Bank in which it has membership.

(l) *Firm line of credit.* A line of credit for an advance extended to a member institution by the Federal Home Loan Bank in which it has membership, so long as the line of credit is collateralized in accordance with the prevailing policies of collateralization for advances of that Federal Home Loan Bank.

(m) *Net commitments.* A member's commitments, other than loans in process, to originate loans; plus its commitments to purchase loans and other assets; plus its firm take-out commitments; minus its commitments to sell loans and other assets: *Provided,* that such commitments are due to be funded within 6 months of the date of the member's required liquidity report under § 523.13(a), and are evidenced by a writing whose terms impose a legally binding obligation upon the member to deliver or to accept delivery of the commitment that is the subject of the writing.

(n) *Loans in process.* Loans that a member has committed to fund and for which all proceeds have not been disbursed to the borrower: *Provided,* that the member is scheduled to disburse funds for such loans within six months of the date of its required liquidity report.

(o) *Firm commitments.* A figure equal to the total of net commitments and loans in process.

3. Amend § 523.11 by removing paragraph (e), by redesignating paragraphs (c) and (d) as paragraphs (d) and (e), respectively, by revising paragraphs (a) and (b) and by adding a new paragraph (c) to read as follows:

§ 523.11 Liquidity requirements.

(a) *Calculation of liquidity coverage index.* In order to determine its liquidity requirement for each calendar quarter, each member shall first calculate its liquidity coverage index. The liquidity coverage index shall be calculated at the end of each quarter, using figures accurate as of the last business day of that quarter, for use in determining the liquidity required in each of the following three months.

VOL 51 ISS 86 MY 5 1986 UMI

(b) *Calculation of liquidity requirement.* Except as otherwise provided in paragraph (d) of this section, for each calendar month, each member shall maintain an average daily balance of liquid assets, expressed as a percentage of the average daily balance of its liquidity base during the preceding calendar month, that corresponds with its liquidity coverage index as shown in the table set forth below. Each member, other than an insurance company, shall maintain an average daily balance of short-term liquid assets of not less than 1 percent of the average daily balance of its liquidity base during the preceding calendar month.

TABLE 1

Liquidity coverage index	Liquidity requirement (percent)
Greater than 0	8
Greater than −.25 but less than or equal to 0	9
Less than or equal to −.25	10

(c) *Assets eligible to satisfy the liquidity requirement.* A member may satisfy its liquidity requirement by maintaining an average daily balance of the required percentage of liquid assets, *Provided:* that the amount of such liquid assets eligible to satisfy the liquidity requirement must exceed the total of the member's outstanding firm commitments minus 12.5 percent of the member's liquidity base.

* * * * *

4. Amend § 523.12 by removing paragraph (a)(2)(i); by removing the paragraph designation "(ii)", and the heading "New Rule", and by removing paragraph (a)(2)(iii). The colon at the end of paragraph (a)(2) introductory text is changed to a period.

5. Amend § 523.12 by adding new paragraphs (d) and (e) to read as follows:

§ 523.12 Deficiencies and penalties.

* * * * *

(d) *Temporary Exemption from Deficiency.* During a period commencing on [effective date of final rule] and extending until [last business day of the second full quarter following the effective date of final rule] if, in the opinion of the Principal Supervisory Agent, and the Director of the Office of Examinations and Supervision or his designee, a deficiency in the amount of a member's assets eligible to satisfy the liquidity requirement results primarily from the large amounts of that member's firm commitments, the Principal Supervisory Agent shall require the member to submit for approval a business plan setting forth how the member will achieve compliance with its liquidity requirement. The business plan shall include the member's proposed restructuring of its assets and liabilities and shall specify the time within which the member will achieve compliance with the liquidity requirements. *Provided,* however, that the Principal Supervisory Agent shall not approve any such business plan that projects the member's compliance with the liquidity requirements at a time later than [last business day of the second full quarter following the effective date of final rule]. During such time period, the member may use the full extent of its liquid assets, its firm commitments notwithstanding, or if the Principal Supervisory Agent approves a business plan that specifically calls for the member temporarily to reduce its deficiency in assets eligible to satisfy the liquidity requirement by including firm lines of credit in such assets, the member may use such lines of credit, to such extent as the Principal Supervisory Agent may allow, so long as firm lines of credit are not included for a period longer than [last business day of the second full calendar quarter after effective date of final rule].

(e) *Transactions for purposes of evasion.* An institution's Principal Supervisory Agent may disregard any transaction entered into primarily for the purpose of evading the requirements of this section. An institution may seek review of any such determination by the Board.

6. Amend § 523.13 by adding the following sentences to the end of paragraph (a) to read as follows:

§ 523.13 Reports; records.

(a) *Reports.* Each member shall also report data relating to the determination of and compliance with liquidity requirements as specified in the periodic reports required by the Board in § 563.18 and related sections. The reported data shall include, but not be limited to, the liquidity required of the member, assets eligible to satisfy the liquidity requirement, and penalties assessed for deficiencies under § 523.12(c).

* * * * *

§ 523.3–3, 523.10, 523.11, 523.12, and 523.29 [Amended]

7. Amend § 523.3–3, § 523.10, § 523.11, § 523.12, and § 523.29, by removing the authority citations located at the end of the sections.

By the Federal Home Loan Bank Board.

[No. 86–427]

Definition of Regulatory Capital

Dated: April 24, 1986.

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed rule.

SUMMARY: The Federal Home Loan Bank Board ("Board") as the operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC" or "Corporation"), is proposing to amend its regulations pertaining to the definition of regulatory net worth applicable to all institutions the accounts of which are insured by the FSLIC ("insured institutions"). First, the Board is proposing to require that all financial statements issued by insured instititutions (including statements of condition required pursuant to 50 FR 2,662, 2,663 (1985) (to be codified at 12 CFR 545.115)) and all financial reports filed with the Board shall be prepared in accordance with generally accepted accounting principles ("GAAP"). Second, the proposed rule would substitute the term "regulatory capital" for "regulatory net worth" and would define "regulatory capital" to mean the sum of equity capital as determined in accordance with GAAP plus certain other items as determined appropriate by the Board based on risk analysis report ("RAR"). The Board believes that these actions will aid its supervisory efforts in evaluating the viability of insured institutions and the related risk to the Corporation.

This proposal is part of the Board's comprehensive review of appropriate capital requirements for insured institutions. The Board is also proposing today amendments to its regulatory capital requirements for insured institutions. Board Res. No. 86–426, published elsewhere in the Proposed Rules section of this issue. The proposals are designed to complement each other, and to operate in tandem to further the Board's goals of more effective monitoring the condition of insured institutions and the related risks to the Corporation. The Board will consider jointly comments filed on either proposal.

DATE: Comments must be received by July 7, 1986.

ADDRESS: Director, Information Services Section, Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street NW., Washington, DC 20552. Public comments received on this proposal and materials referred to in the preamble of this document will be publicly available at this address.

FOR FURTHER INFORMATION CONTACT: Christine M. Gattuso, Attorney, Office of General Counsel, (202) 377–6649; Thomas R. Bloom, Professional Accounting Fellow, Office of Examinations and Supervision, (202) 377–6392; M. Christian Mitchell, Professional Accounting Fellow, Office of Examinations and Supervision, (202) 377–6837; or Robert J. Pomeranz, Senior Policy Analyst, Office of Policy and Economic Research, (202) 377–6209, Federal Home Loan Bank Board, at the above address.

SUPPLEMENTARY INFORMATION: This proposal is adopted pursuant to the provisions of section 403(b) of the National Housing Act ("NHA"), 12 U.S.C. 1726(b), as amended by the Garn-St Germain Depository Institutions Act of 1982 ("DIA"), Pub. L. 97–320, 96 Stat. 1469, which gives the Board broad discretion to determine appropriate reserve requirements for insured institutions. Specifically, section 403(b) of the NHA requires all insured institutions to "provide adequate reserves in a form satisfactory to the Corporation, to be established in accordance with regulations made by the Corporation". Pursuant to its authority under this section, the Board established regulatory capital requirements for insured institutions and determined those components of capital which may be included in computing regulatory net worth.

Current Regulatory Practice and Net Worth Definition

Section 561.13 of the Insurance Regulations (50 FR 20,550, 20,553 (1985) and 50 FR 46,739, 46,742 (1985) (to be codified at 12 CFR 561.13)) sets forth the current definition of "regulatory net worth," which includes components of net worth as determined in accordance with GAAP as well as other components the Board has determined constitute net worth in accordance with regulatory accounting practices. The current differences in the definition and calculation of equity capital under GAAP and regulatory net worth for insured institutions reflect the fundamental distinctions in the basis and purpose of these concepts. GAAP developed to establish consistent accounting measurements and provides a uniform standard for investors and regulatory agencies to compare the financial condition of various entities. Regulatory accounting practices were developed by the Board as a supplement or substitute for GAAP in certain instances deemed appropriate to more effectively assess risk of loss to the FSLIC, to better evaluate the underlying viability of insured institutions or to establish standards where GAAP had not been clearly enunciated.

The Board recognizes that GAAP is a comprehensive basis of accounting and always has required insured institutions to prepare their financial statements on the basis of GAAP unless, by regulation or otherwise, the Board has permitted the use of regulatory accounting practices. *See* 12 CFR 563.23–3 (1985). Over a period of time, a number of concerns unique to the Board's regulatory role in evaluating risk to the FSLIC led it to permit or require insured institutions to depart from GAAP in certain instances. The Board believed that without those changes, GAAP could not fully reflect the ability of certain forms of capital to buffer the FSLIC from loss, or the risks attendant on certain transactions.

For example, certain Board-authorized practices affecting the definition of regulatory net worth evolved in response to unprecedented strains on thrift earnings and viability earlier in this decade, when rate deregulation and soaring interest rates severely eroded the value of the business' predominantly long-term, fixed-rate mortgage portfolio. The Board recognized that the state of the industry at the time and the uncertain economic environment made it very difficult for most insured institutions to obtain added capital through the issuance of those instruments which traditionally have constituted the capital accounts of insured institutions. Given the need to maintain public confidence in the industry during a period of financial and operational transition and the need to more precisely monitor the viability of the industry, the Board found it was appropriate to include in regulatory net worth certain items which served to buffer institutions and the FSLIC from losses, but which did not comprise equity capital under GAAP. *See e.g.* 47 FR 52,961 (Nov. 22, 1982) ("Appraised Equity Capital"). The Board recognized at the time that its actions were a departure from its past policy and from GAAP. *Id.*

Other regulatory practices affecting the net worth definition resulted from congressional action. Thus, by statute, Congress has mandated that for statutory and regulatory purposes mutual capital certificates and net worth certificates (authorized under section 202 of the DIA) shall be included in the general reserves and net worth of insured institutions. 12 U.S.C. 1464(b)(5)(A), (B), 1726(b) (1982 & Supp. II 1984)). These items, however, do not qualify as equity capital under GAAP.

A third category of regulatory practices affecting net worth include those designed to provide specific guidance during periods when GAAP had not yet been established for certain transactions. This was the case, for example, when the Board adopted accounting guidelines for insured institution transactions in futures. *See* 12 CFR 563.17–4(a) (1985).

Finally, the Board adopted certain other practices affecting net worth because of its view that GAAP did not accurately reflect the economic risks to institutions, and to the FSLIC, which might result from certain transactions. *See e.g.*, 50 FR 53,275 (Dec. 31, 1985) ("Classification of Assets").

Purpose and Description of Proposal

Upon reconsideration of the bases for the existing variances between GAAP and regulatory accounting practices affecting net worth for insured institutions, the Board is proposing to require insured institutions to rely more significantly on GAAP in computing and reporting their financial condition and results of operations. The proposal would therefore require all insured institutions to file all financial statements, including statements of condition required pursuant to 50 FR 2,622, 2,663 (1985) (to be codified at 12 CFR 545.115), and reports to the Board, on a GAAP basis with a reconciliation to regulatory capital.

In conjunction with this GAAP reporting requirement, the proposal also restructures the definition of regulatory capital to reflect the concepts embodied in RAR, and to streamline and remove those procedures the Board no longer deems appropriate for risk analysis reporting. This feature of the proposal should ensure comprehensive disclosure and minimize any potential for confusion on behalf of the public.

This restructured definition, in the Board's view, provides the most appropriate means of integrating the benefits of GAAP and regulatory accounting practices. The proposal achieves this balance by revising the provisions of § 561.13 to define "regulatory capital" as the sum of amounts derived by adding together (1) the amount of equity capital determined in accordance with GAAP, and (2) the amount of capital representing the sum of selected components now reflected in "regulatory net worth," the total of which the Board views as appropriate supplemental indices of risk. The sum of regulatory capital so computed would be

VOL 51 ISS 86 MY 5 1986 UMI

used to determine the institution's compliance with the Board's minimum regulatory capital requirements under § 563.13, as proposed to be amended and published elsewhere in the Proposed Rules section of this issue.

The Board also proposes to substitute the term "regulatory capital" for the term "regulatory net worth" in § 561.13. This change recognizes that the term "regulatory net worth" does not precisely parallel "net worth" or "equity" as defined by accounting literature, and reaffirms the Board's discretion to define the components of regulatory capital for purposes of its regulations, in a manner most appropriately suited to the objectives and responsibilities of the Board. The proposal would also amend Chapter V to clarify that all existing references in the Board's Regulations to "regulatory net worth" and "net worth" shall be construed to mean "regulatory capital."

The Board's modifications to GAAP are commonly referred to in the industry as "regulatory accounting practices," "regulatory accounting principles," or "RAP." Further, certain memoranda of the Board's Office of Examination and Supervision refer to this regulatory body of accounting as RAP. The Board recognizes that regulatory accounting guidelines do not constitute a comprehensive basis of accounting, and could prove misleading if categorized as "accounting principles." Thus, consistent with its goal of reaffirming the district purposes and functions of GAAP and regulatory risk analysis, this preamble as well as the proposed regulatory language substitute the term "risk analysis reporting" for "regulatory accounting practices" in describing the Board's modification of GAAP in determining the capital components considered appropriate for evaluating risk to the FSLIC.

A. Reporting in Accordance with GAAP

To assure consistency with the elements of the proposal affecting the components of regulatory capital, the Board is proposing to amend § 563.23–3 to require that all financial statements issued by insured institutions (including statements of condition required to be made publicly available pursuant to 50 FR 2.662, 2.663 (1985) (to be codified at 12 CFR 545.115) and all financial reports filed with the Board after the effective date of any final rule adopted shall be prepared in accordance with GAAP. At the same time, given the very different purposes of GAAP and regulatory measures of net worth, the Board also recognizes that many of the concepts embodied in regulatory accounting practices and "regulatory net worth" continue to serve a useful and valid role, complementing GAAP, in evaluating the viability of insured institutions and the related risk to the FSLIC. The proposal therefore requires institutions to include in all such financial statements and reports a full and fair disclosure of the reconciliation of equity captial, as determined in accordance with GAAP, with regulatory capital, as defined herein. The Board is reviewing all reports and forms currently required to be filed by insured institutions and will be revising such reports and forms if this rule is adopted as a substantially similar final rule.

The Board believes that requiring insured institutions to prepare all financial statements and all reports to the Board in accordance with GAAP will best serve the public interest for four reasons. First, requiring insured institutions to report on this basis would provide the Board a more consistent basis for analyzing and comparing the financial statements filed by all insured institutions. Currently, institutions subject to the Securities Exchange Act of 1934 (15 U.S.C. 78a. *et seq.*) are required to file financial statements prepared in accordance with GAAP with the Board or the Securities and Exchange Commission,[1] while other institutions may file regulatory reports with the Board based on regulatory accounting practices.

Because of the predominant role of GAAP in the public disclosure and reporting of other financial institutions as well as other entities in the business community, a greater reliance on uniform reporting in accordance with GAAP should provide the Board a more consistent, comprehensive basis to monitor the performance and soundness of the industry. This should significantly enhance industry stability by providing the Board with an additional tool to analyze and address supervisory concerns.

Second, the proposal also would benefit readers and users of financial statements by providing a consistent basis for analyzing and comparing insured institutions' financial statements. Third, the requirement also would give insured institutions an improved measure of their capacity to access the capital markets. Finally, by encouraging the use of GAAP, a recognized comprehensive body of accounting, the proposal will assure consistency with the accounting practices of other sectors of the business community.

[1] *See* 50 FR 53.294, 53.296 (1985) (to be codified at 12 CFR 563c.1(a)(2)) and 12 CFR 563c.1 (1985)); 17 CFR 210.4–01 (1986).

B. Components Included in Regulatory Capital

As explained in more detail below, the proposal would define regulatory capital as the sum of: (1) Equity capital as determined in accordance with GAAP ("equity captial"), (2) items which serve as the functional equivalents of capital for the FSLIC by providing a buffer against loss, and specific capital instruments created by congressional action and Board authority ("definitional capital"), (3) certain other components of capital as the Board determines to be consistent with its risk analysis conventions, and (4) risk analysis reporting forbearances.

In connection with this definition of regulatory capital, the components of definitional capital and certain other regualtory risk analysis conventions will continue to reflect RAR based on the Board's determination that risk analysis reporting better serves the Board's goal of assessing risk of loss to the FSLIC and assessing amounts available to buffer such loss. At the same time, the Board also is proposing to eliminate many of its current risk analysis conventions because it believes that such conventions are no longer appropriate.

1. Equity Capital

The Board proposes that equity capital shall be determined in accordance with GAAP. Equity capital represents the difference between the recorded values of an institution's assets and its liabilities, as determined under GAAP.[2] *See FASB Statement of*

[2] The Board notes that institutions may continue to use "push-down" accounting as set forth in the Board's Office of Examinations and Supervision Memorandum No. R 55. Push-down accounting is the establishment of a new accounting and reporting basis for a savings and loan association in its separate financial statements based on a purchase transaction in its voting stock that results in a substantial change in the ownership of the outstanding voting stock of the association. The purchaser may be an individual, a group of individuals, a corporation, or any other entity. While "push-down" accounting is recognized under GAAP, the Board believes that while GAAP continues to evolve in this area, continued specific guidance by the Board is necessary.

Additionally, the Board notes that insured institutions will continue to use the Board's current accounting procedures for wash sale transactions as set forth in the Board's Office of Examinations and Supervision Memorandum No. T 80–8 ("T80–8). T80–8 requires institutions to recognize profit or losses from those transactions in income currently unless the gain or loss is deferred in accordance with 50 FR 20.395 (1985) (to be codified at 12 CFR 563c.14(a)) and 12 CFR 563c.14 (1985). The Board recognizes that there currently is a divergence in application of GAAP and thus, the Board believes continued specific guidance is necessary with respect to these transactions.

Financial Accounting Concepts No. 6 (December 1985), which set forth a detailed discussion of equity capital.

2. Definitional Capital

This proposed category closely parallels the provisions of current § 561.13 and would include qualified subordinated debt, qualified redeemable preferred stock, income capital certificates, mutual capital certificates, outstanding net worth certificates, pledged certificates of deposit, and other nonwithdrawable accounts (excluding any treasury shares held by the insured institution), to the extent such nonwithdrawable accounts are not included in equity capital.

In the Board's experience, the inclusion of items such as subordinated debt and redeemable preferred stock in regulatory capital has had a beneficial effect on both insured institutions and the Corporation. Structurally, these items have two characteristics important for any component of capital: (1) They are subordinate to other obligations of the insured institution and (2) their medium-to-long-term nature makes them a reliable buffer against losses. Thus, the Board believes that for purposes of risk analysis these items should continue to be included in regulatory capital.[3] In the Board's view, these components, although not equity capital under GAAP, provide the FSLIC with protection analogous to traditional equity capital in the event of insolvency, and accordingly should be added to GAAP equity capital to arrive at regulatory capital.

Additionally, the Board believes that including mutual capital certificates, net worth certificates and income capital certificate in regulatory capital has also had a beneficial effect on insured institutions. Congress, by statute, has mandated that mutual capital certificates and net worth certificates shall constitute capital infusion and be included in the regulatory capital of insured institutions. 12 U.S.C. 1464(b)(5)(A), (B), 1728(b) (1982 & Supp. II 1984).[4] Income capital certificates were designed to provide a similar function.

3. Risk Analysis Reporting Pre-[Effective Date of Final Rule]

This category of regulatory capital would include only the components of risk analysis reporting permitted prior to the effective date of any final rule adopted, and for which further elections cannot be made. This category includes appraised equity capital, the deferral of certain gains and losses pursuant to 12 CFR 563c.14, and certain other practices enumerated in detail below.

a. *Appraised Equity Capital.* Under this category, an insured insititution may add to equity capital the amount of appraised equity capital as defined in 12 CFR 563.13(c), provided that the insured institution has included appraised equity capital as part of its regulatory capital prior to December 31, 1986.

The Board promulgated the appraised-equity-capital regulation in 1982 in response to serve industry-wide distress. Unprecedented losses severely depleted the industry's net worth and made it difficult for many institutions—the vast majority of which were then in the mutual form—to generate added capital through retained earnings or the issuance of traditional capital instruments. The Board determined that including this item in net worth was preferrable to forcing insured institutions that had experienced property appreciation to sell and leaseback their properties merely in order to maintain net worth. In the Board's view, during this period, such sale and leaseback transactions could have adversely affected the best interests of the association and the FSLIC fund. Moreover, the Board found that appraised equity capital represented a real, though unrealized, equity value that, in the case of merger or liquidation, would serve to protect the interests of the Corporation.

Because the rule was designed to bolster net worth during a limited recovery period for the industry, the authority to include appraised equity capital in regulatory capital was originally scheduled to expire on December 31, 1985. On October 24, 1985, by board Resolution No. 85–849, the Board extended that authority to December 31, 1986, and "grandfathered" elections under the appraised-equity-capital regulation so that insured institutions could continue to receive the benefit of the election after the provision expires. *See* 50 FR 45,986 (Nov. 6, 1985).

The Board believes that the current expiration date for the use of the appraised equity capital rule is appropriate. To avoid undue hardship for those institutions who relied on the rule, however, the proposal would permit those insured institutions that inlcuded appraised equity capital in their regulatory capital prior to December 31, 1986 to continue to include that appraised equity capital in their regulatory capital after the effective date of a final rule.

b. *Deferral of Loan Gains and Losses.* The proposal would also permit an insured institution, in computing its regulatory capital, to continue to exclude the unamortized amount of loan gains and to include the unamortized amount of loan losses, which were deferred pursuant to 12 CFR 563c.14, provided that the insured institution has excluded such gains and included such losses, in computing its regulatory capital prior to the effective date of a final rule. The Board originally authorized such deferrals of loan gains and losses in computing regulatory capital to facilitate the restructuring of insured institutions' portfolios. *See* 46 FR 42,275 (Aug. 20, 1981). The Board believes that insured institutions have had adequate time to achieve this purpose. The proposal therefore authorizes such gain and loss deferrals as a component of regulatory capital only if and to the extent that the insured institution has excluded such gains and included such losses prior to the effective date of a final rule.

In the Board's view, continued availability of this regulation until the effective date of a final rule and the current economic conditions provide insured institutions an opportunity to complete restructuring plans which depend on such factors.

c. *Miscellaneous.* In addition to the items referenced above, the proposal also would permit an insured institution to continue to include in regulatory capital amounts reflecting the RAR/GAAP differential for specific items provided that the insured institution elected to use RAR for these items prior to the effective date of a final rule. Under the proposal, an insured institution would include in its regulatory capital the amount representing the RAR/GAAP differential for the following items: accounting for the sale of real estate developed by the association or its subsidiary (12 CFR 563.23–1(f) (1985)), futures transactions (12 CFR 563.17–4(g) (1985)), and accretion of discounts and amortization of premiums on securities (12 CFR 563.23–1(a)(b) (1985)).

As discussed more fully below in subpart C, the Board is proposing to eliminate future RAR elections for these

[3] The Board notes that other financial regulatory agencies advocate the use of subordinated debt for these same reasons. *See* 50 FR 18,057 (April 24, 1985) (Federal Reserve System), 50 FR 11,128 (March 19, 1985) (Federal Deposit Insurance Corporation), and 50 FR 10,307 (March 14, 1985) (Office of the Comptroller of the Currency).

[4] For a detailed discussion of the Board's reasoning for originally including the items designated in this proposal as definitional capital as part of "regulatory net worth" *see* 50 FR 20,550 (May 17, 1985) (subordinated debt); 50 FR 46,739 (Nov. 13, 1985) (redeemable preferred stock); 45 FR 82,154 (Dec. 18, 1980) (mutual capital certificates); and 47 FR 58, 219 (Dec. 30, 1982) (net worth certificates)

VOL 51 ISS 86 MY 5 1986 UMI

items and to prospectively require insured institutions to account for such items under GAAP. The Board recognizes, however, that insured institutions currently may be accounting for these items under existing RAR and that treatment under proposed RAR may affect the amounts includable in regulatory capital for a period of years. For example, an insured institution may have elected in 1984 to accrete discounts on certain securities in accordance with RAR over a ten-year period. Under the proposal, the institution would be allowed to include in regulatory capital the amount representing the RAR/GAAP differential for the accretion of the discounts with respect to those securities through 1994. However, no future elections of RAR for these items would be permitted after the effective date of a final rule. The Board specifically seeks public comment on the appropriateness of including the RAR/GAAP differential amount of these miscellaneous items in the computation of insured institutions' regulatory capital.

4. Risk Analysis Reporting Post—[Effective Date of Final Rule]

The Board is also proposing to allow insured institutions to continue to include in their regulatory capital after the effective date of any final rule an amount which represents the difference between the treatment of certain items under GAAP and the treatment of those same items under RAR. Under the proposal, an insured institution would compute the items in this category under both RAR and GAAP for purposes of regulatory capital. The amount which represents the RAR/GAAP differential for a particular item would be added to or substracted from equity capital to arrive at regulatory capital. The Board believes that continuing to supplement GAAP with RAR with respect to these items will provide the Board with a more effective tool for analyzing risk of loss to the FSLIC.

First, this category would include amounts reflecting the RAR/GAAP differential treatment of loan origination and commitment fees pursuant to 12 CFR 563.23–1(f)(3) (1985).[6] The Board notes that the Financial Accounting Standards Board ("FASB") is in the process of changing GAAP for loan origination and commitment fees. However, the extent of the FASB's proposed changes and their resultant effect on the industry are unknown at this time. The proposal therefore authorizes continued use of the accounting procedures set forth in § 563.23–1(f)(3) with respect to these fees for purposes of determining regulatory capital until such time as the Board reevaluates the practicality of its continued use.

The second item in this proposed category is the amount of the RAR/GAAP differential in the treatment of gains or losses realized on options transactions pursuant to 12 CFR 563.17–5(g). *See* 50 FR 53,336, 53,340 (Dec. 31, 1985). The Board is proposing to allow the continued use of RAR with respect to options transactions because GAAP in this regard has not yet been defined by an authoritative body, such as the FASB or the AICPA. While the Board proposes to continue to specify regulatory accounting procedures in this area, the Board notes that the comment period for its proposed rule on accounting for options (50 FR 53,336 (Dec. 31, 1985)) has expired and that a final rule may change existing accounting procedures in this area.

The Board also proposes to continue use of RAR with respect to recordation of loss reserves pursuant to its classification of assets rule,[6] reevaluation of assets; adjustment of book value; and adjustment charges [7] and accounting for uncollectible interest with respect to 1–4 family mortgage loans pursuant to 12 CFR 563c.11. The Board's regulations in these areas are more restrictive than GAAP, and, consequently, an institution may be required to record a larger loss reserve than that required under GAAP.[8] In the Board's experience, GAAP understates the loss exposure to the FSLIC with respect to these items and, therefore, the Board believes that retention of RAR will serve to reduce the risk of loss to the FSLIC.

For example, § 563c.11 provides that any uncollected interest on certain loans [9] which have any portion due but uncollected for a period in excess of 90 days shall be classified as uncollectible, and, therefore, not included in an institution's net income or regulatory capital. Under GAAP, the accrual of interest on delinquent loans is discontinued when it is probable that the interest will not be received. GAAP relies heavily on management's judgment as to the probability of collection of delinquent interest. The Board believes that its regulations represent a conservative, objective accounting practice which provides insured institutions, their accountants, and the Board with uniform standards to evaluate uncollected interest on an industry-wide basis. In its experience, the Board has found that the regulation assists in the analysis of loan portfolio quality and institution collection policy. Additionally, the regulation prevents overstatement of income through long-term accrual of uncollected interest, which potentially could undermine the integrity of financial statements and reports. Thus, the Board proposes to retain its regulatory guidelines in this area.

While the Board has initially determined to permit continued adjustments to regulatory capital for these items, it may determine at a later date to adjust RAR to include or exclude certain other items as the Board determines to be appropriate for risk analysis.

5. Risk Analysis Reporting—Forbearances

The Board is also proposing to allow insured institutions to include in their regulatory capital after the effective date of a final rule additional items reflecting forbearances previously authorized, or which may be authorized in the future, by the Corporation, the Board, or the Principal Supervisory Agents. Most of the forbearances included in this category result from FSLIC merger transactions. In order to facilitate the acquisition of a troubled insured institution, the Principal Supervisory Agent or the Corporation, with Board approval, will in certain cases approve regulatory treatment for specific transactions which departs from GAAP. The Board believes that such forbearances are often required to facilitate the acquisition of a failed institution. Such forbearances are directly relevant to effective supervision and monitoring of risk to the FSLIC, and should be governed by risk analysis reporting. Thus, the Board believes it is in the best interests of the FSLIC fund and the thrift industry to continue to allow RAR in those instances where forbearance is authorized.

C. Elimination of Certain Risk Analysis Reporting Requirements

The Board proposes to eliminate altogether prospective authority for insured institutions to rely on five other accounting procedures heretofore permitted by the Board which represent departures from GAAP. By requiring

[6] The Board's accounting procedures with respect to loan origination and commitment fees are currently set forth in § 563.23–1(g)(3). If this proposal is adopted in final, paragraph (g) would be redesignated as paragraph (f).

[6] 50 FR 53,275 (1985) (to be codified at 12 CFR 561.16c, 571.1a).

[7] 50 FR 53,275 (1985) (to be codified at 12 CFR 563.17–2).

[8] *See e.g.*, 50 FR 53,275, *supra*.

[9] *See* 12 CFR 563c.11(b) (1985).

insured institutions to report the following items in accordance with GAAP, the proposal will afford the Board a more effective means of monitoring the effect of such transactions on institutions' condition for the reasons discussed below.

1. Sales of Real Estate Developed by the Association or its Subsidiary

The proposal would eliminate the Board's accounting regulations at 12 CFR 563.23–1(f) and require insured institutions and their service corporations to account for the sales of such real estate in accordance with GAAP. When the Board promulgated regulatory accounting procedures for this area, insured institutions were subject to more rigid downpayment requirements due to regulatory restrictions on loan-to-value ratios. Consequently, RAR was more restrictive than GAAP. The Board noted at the time that it would continue to review its accounting procedures in this area as GAAP evolved. Subsequently, the Board eased its loan-to-value requirements for real estate loans and, as a result, RAR became more liberal than GAAP. (*See* 48 FR 23,032, 23,037 (May 23, 1983)). The Board's supervisory experience indicates that GAAP now more consistently reflects the attendant risks to the FSLIC with respect to these sales of real estate. As a result, the proposal requires institutions to record the sale of such real estate in accordance with GAAP. *See FASB Statement of Financial Accounting Standards No. 66.*

2. Marketable Equity Securities

Under RAR (as set forth in the Board's "Examinations Objectives and Procedures" manual), institutions may record and carry marketable [10] equity securities at historical cost. GAAP, on the other hand, requires institutions to record and carry defined marketable equity securities at the lower of aggregate cost or market value. In the Board's experience, the variance from GAAP in this area does not result in increased protection to the FSLIC. The Board believes that GAAP more accurately reflects the risk to the FSLIC attendant in such transactions and therefore proposes that insured institutions record marketable equity securities in accordance with GAAP. *See FASB Statement of Financial Accounting Standards No. 12.*

3. Futures Transactions

The Board is proposing that institutions determine gains or losses arising from futures transactions in accordance with GAAP. When the Board developed RAR in this area, GAAP for such transactions had not been established. Because GAAP now provides definitive rules with respect to futures transactions, continued reliance on RAR is no longer appropriate. Accordingly, the Board is proposing to amend 12 CFR 563.17–4(g) to remove the accounting procedures for futures transactions. *See FASB Statement of Financial Accounting Standards No. 80.*

4. Accretion of Discounts on Securities and Amortization of Premiums on Securities

The Board is proposing to eliminate RAR in this area. Under the Board's regulations, premiums and discounts must be amortized or accreted over the life of the security or 10 years, whichever is less. GAAP currently requires that such items be amortized or accreted over the estimated life of the security. The Board now believes that the distinction between GAAP and RAR in this area is inconsequential. The Board believes that, to the extent that GAAP fully addresses a particular transaction and the attendant risks to the FSLIC, use of GAAP is preferable in order to promote uniform reporting standards. Thus, the Board is proposing to amend 12 CFR 563.23–1 to require that such premiums and discounts be determined in accordance with GAAP. *See FASB Statement of Financial Accounting Standards No. 65.*

5. Accounting for Gains and Losses With Respect to Transactions in Securities

The Board also is proposing to remove the accounting procedures set forth in 12 CFR 563.23–2 (1985). This section was promulgated in 1969 and provided for the deferral and amortization of gains and losses on the disposition of securities made for purposes of meeting the Board's liquidity requirements during the period beginning on December 11, 1969 and ending December 31, 1971. The regulation permitted such deferral and amortization only for a period of ten years from the dates referenced above, and is therefore obsolete. Accordingly, the Board is proposing to amend Part 563 by removing section 563.23–2.

The Board is providing a 60-day comment period for this proposal. Comment is invited on all aspects of the proposal, including the appropriateness of greater reliance on reporting in accordance with GAAP by insured institutions, the elements of regulatory capital as proposed and any recommended revisions to the proposal which would further the Board's stated goals of enhancing industry stability, improving accounting disclosures and more effective supervision, and maintaining a consistent, comprehensive basis for evaluating risk to the FSLIC.

[10] "Marketable" means those securities for which prices are readily available on a national market or in the over-the-counter market. The Board notes that mortgage-backed securities are not considered to be marketable equity securities. *See FASB Statement of Financial Accounting Standards No. 12*, for a more detailed description of marketable equity securities.

Initial Regulatory Flexibility Analysis

Pursuant to Section 3 of the Regulatory Flexibility Act, 5 U.S.C. 603 the Board is providing the following regulatory flexibility analysis.

1. *Reasons, objectives and legal basis underlying the proposed rule.* These elements are incorporated above in the **SUPPLEMENTARY INFORMATION** regarding the proposal.

2. *Small entities to which the proposed rule would apply.* The proposed rule would apply to institutions whose accounts are insured by the FSLIC.

3. *Impact of the proposed rule on small institutions.* The proposed rule would not have a substantial impact on small insured institutions.

4. *Overlapping or conflicting federal rules.* There are no known federal rules that duplicate, overlap, or conflict with this proposal.

5. *Alternatives to the proposed rule.* There are no alternatives that would be less burdensome than the proposal in addressing the concerns expressed in the **SUPPLEMENTARY INFORMATION** set forth above.

List of Subjects in 12 CFR Parts 541, 545, 561, 563, and 570

Accounting, Bank deposit insurance, Consumer protection, Credit, Electronic funds transfers, Investments, Manufactured homes, Mortgages, Reporting and recordkeeping requirements, Savings and loan associations.

Accordingly, the Board hereby proposes to amend Parts 541 and 545 of Subchapter C; Parts 561, 563, and 570 of Subchapter D, Chapter V; and references contained in Chapter V, Title 12, Code of Federal Regulations, as set forth below.

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

1. Amend this Chapter V by removing the phrases "net worth" and "regulatory net worth" wherever they appear in this Chapter and by inserting, in lieu thereof, the phrase "regulatory capital "

VOL 51 ISS 86 MY 5 1986 UMI

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

PART 541—DEFINITIONS

2. The authority citation for 12 CFR Part 541 is revised to read as follows:

Authority: Sec. 4, 80 Stat. 824, as amended (12 U.S.C. 1425a); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 402, 403, 48 Stat. 1256, 1257, as amended (12 U.S.C. 1725, 1726); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071.

3. Revise § 541.17 to read as follows:

§ 541.17 Regulatory capital.

Any reference to the terms "net worth" or "regulatory net worth" included in this subchapter shall mean "regulatory capital" as defined in § 561.13 of this Chapter.

§ 541.20 [Amended]

4. Amend § 541.20 by removing the authority citation located at the end of the section.

PART 545—OPERATIONS

5. The authority citation for 12 CFR Part 545 continues to read as follows:

Authority: Sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); Reorg. Plan No. 3 of 1947, 3 CFR, 1943–1948 Comp., p. 1071, unless otherwise noted.

6. Amend § 545.115 by revising paragraph (b) to read as follows:

§ 545.115 Statement of condition.

* * * * *

(b) Format. The information set forth in a Statement of Condition shall be presented in accordance with generally accepted accounting principles and shall include a full and fair disclosure of the reconciliation of equity capital, as determined in accordance with generally accepted accounting principles, with regulatory capital, as defined in § 561.13 of this chapter.

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 561—DEFINITIONS

7. The authority citation for 12 CFR Part 561 continues ot read as follows:

Authority: Pub. L. 95–147 of Oct. 28, 1977, Sec. 4, 82 Stat. 858, sec. 4, 80 Stat. 824, sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1425a, 1425b, and 1437); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); sec. 202, 90 Stat. 1469; sec. 409, 94 Stat. 160; secs. 401–407, 48 Stat. 1255–1260, as amended (12 U.S.C. 1724–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–1948 Comp., p. 1071, unless otherwise noted.

8. Revise § 561.13 to read as follows:

§ 561.13 Regulatory Capital.

Regulatory Capital is the sum of:

(a) Equity capital, as determined in accordance with generally accepted accounting principles ("equity capital");

(b) Definitional Capital, which is the sum of:

(1) income capital certificates, mutual capital certificates (issued pursuant to § 563.7–4 of this subchapter), outstanding net worth certificates issued in accordance with Part 572 of this subchapter or which the Corporation is committed to purchase by virtue of § 572.1(c), pledged certificates of deposit, and any other nonwithdrawable accounts (excluding any treasury shares held by the insured institution) to the extent such nonwithdrawable accounts are not included in equity capital. *Provided,* that for any non-permanent instrument qualifying as regulatory capital under this paragraph, either (i) the remaining period to maturity or required redemption (or time of any required sinking fund or other prepayment or reserve allocation, with respect to the amount of such prepayment or reserve) is not less than one year, or (ii) the redemption or prepayment is only at the option of the issuing insured institution and such payments would not cause the insured institution to fail or continue to fail to meet its regulatory capital requirement under § 563.13 of this subchapter; and *Provided further,* that capital stock may be included as regulatory capital without limitation if it would otherwise qualify but for either (A) a provision permitting redemption, in the event of a merger, consolidation, or reorganization approved by the Corporation where the issuing institution is not the survivor, or (B) a provision permitting a redemption where the funds for redemption are raised by the issuance of permanent stock;

(2) (i)Subordinated debt securities issued pursuant to § 563.8–1 of this subchapter: *Provided,* that an institution whose application to include subordinated debt in net worth pursuant to § 563.8–1 was approved prior to December 5, 1984, shall be permitted to continue to include 100 percent of the principal amount of such subordinated debt as regulatory capital until the remaining period to maturity (or time of any required sinking fund or other prepayment or reserve allocation, with respect to the amount of such prepayment or reserve) is less than one year; *Provided further,* that an institution that had filed a substantially complete application pursuant to § 563.8–1 prior to December 5, 1984, shall be permitted to include 100 percent of the subordinated debt issued pursuant to such application as regulatory capital until the remaining period to maturity (or time of any required sinking fund or other prepayment or reserve allocation, with respect to the amount of such prepayment or reserve) is less than one year if such subordinated debt otherwise is in compliance with the requirements of § 563.8–1 and if such application is not amended in any material respect subsequent to December 5, 1984; and *Provided further,* that except as otherwise provided in this paragraph (2)(i) and unless otherwise approved by the Corporation in writing, subordinated debt securities issued pursuant to § 563.8–1 after December 5, 1984, may be included as regulatory capital only in accordance with the following schedule:

Years to maturity of outstanding subordinated debt	Percent included in regulatory capital
Greater than or equal to 7	100
Less than 7 but greater than or equal to 6	86
Less than 6 but greater than or equal to 5	71
Less than 5 but greater than or equal to 4	57
Less than 4 but greater than or equal to 3	43
Less than 3 but greater than or equal to 2	29
Less than 2 but greater than or equal to 1	14
Less than 1	0

(ii) For purposes of determining the principal amount outstanding of an obligation issued at a discount which exceeds 10 percent of the face amount, the issuing institution shall treat as principal only the gross consideration actually received upon issuance plus the accrued interest not payable until maturity, as of the date of the computation. In the case of an instrument sold at a discount which exceeds 10 percent and which bears no stated rate of interest, the amount which can be added to principal each period is an amount equal to the accrued interest payable computed on the "level-yield" or "interest" method.

(iii) For purposes of computing the amount of subordinated debt includable as regulatory capital pursuant to this paragraph, the issuing institution must determine the effective maturity of each portion of the principal amount outstanding of the subordinated debt which is subject to required sinking-fund payments, other required prepayments and required reserve allocations, and calculate the percentage amount of each portion of the principal amount outstanding which may be included pursuant to the schedule set forth in this paragraph; and

(3) (i) Preferred stock that is redeemable at the option of the issuer (A) which was issued prior to July 23, 1985, or (B) which was issued after July 23, 1985: *Provided,* that the form of the security was approved prior to issuance pursuant to § 563.1 of this subchapter and states that no redemption may be made by the issuing institution if, after giving effect to such redemption, the insured institution would fail to meet its regulatory capital requirement under § 563.13 of this subchapter;

(ii) Mandatorily redeemable preferred stock which (A) was issued prior to July 23, 1985, or (B) was issued pursuant to § 563.7–5 of this subchapter, after July 23, 1985, was approved as to its form prior to issuance pursuant to § 563.1 of this subchapter, and was approved in writing by the Corporation for inclusion as regulatory capital, before or after its issuance, pursuant to § 563.7–5: *Provided,* that unless otherwise approved by the Corporation in writing, mandatorily redeemable preferred stock issued after July 23, 1985, may be included as regulatory capital only in accordance with the schedule set forth in paragraph (2)(i) of this section and consistent with the provisions of paragraphs (2)(ii) and (2)(iii) of this section:

(c) The sum of the following items determined in accordance with risk analysis reporting in effect prior to [effective date of final rule], and which an insured institution has included in computing and reporting its regulatory capital to the Corporation prior to [effective date of final rule]:

(1) Appraised equity capital (as defined in § 563.13(c) of this subchapter);

(2) The amount of unamortized loan gains and losses the exclusion or inclusion of which was deferred pursuant to § 563c.14 of this subchapter; and

(3) The amount of the following items computed by an insured institution in accordance with risk analysis reporting in effect prior to [effective date of final rule] and included in its financial statements prior to [effective date of final rule]. An institution may include an amount which represents the sum of the differences between the treatment of the following items under generally accepted accounting principles and the treatment under risk analysis reporting after [effective date of final rule]:

(i) Sales of real estate developed by the association or its subsidiary;

(ii) Futures transactions; and

(iii) Accretion of discounts and amortization of premiums on securities;

(d) The amount which represents the sum of the differences between the treatment of the following items under generally accepted accounting principles and the treatment under risk analysis reporting after [effective date of final rule]:

(1) loan origination and commitment fees calculated pursuant to § 563.23–1(f)(3) of this subchapter;

(2) gains or losses realized on options transactions pursuant to § 563.17–5(g) of this subchapter;

(3) valuation allowances established pursuant to asset classification and appraisals under §§ 561.16c, 563.17–2, and 571.1a of this subchapter; and

(4) uncollectible interest determined pursuant to § 563c.11 of this subchapter; and

(e) Risk analysis reporting for forbearances which shall include all forbearances and other practices authorized by the Corporation, the Board, or its Supervisory Agents.

(f) Notwithstanding paragraphs (a), (b), (c), (d), and (e) of this section, the term "regulatory capital" does not include any capital instrument or security which may be included as regulatory capital pursuant to any of those paragraphs if such capital instrument or security is held by a service corporations or other subsidiary, regardless of the organizational form of that entity, in which the insured institution directly or indirectly, (1) owns, controls, or holds with power to vote, or holds proxies representing, ten percent or more of the voting shares or rights, or (2) invested or contributed more than ten percent of such entity's capital, unless inclusion of regulatory capital is specifically approved by the Corporation in writing.

(g) Unless the context indicates otherwise, the term "net worth" or "regulatory net worth" wherever used in this subchapter shall mean "regulatory capital" as defined in this section, except that the term as used in § 563.8–4 shall not include items permitted to be used pursuant to § 563.13(c).

PART 563—OPERATIONS

9. The authority citation for 12 CFR Part 563 continues to read as follows:

Authority: Pub. L. 95–147 of Oct. 28, 1977, Sec. 4, 82 Stat. 858, sec. 4, 80 Stat. 824, sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1425a, 1425b, and 1437); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); sec. 202, 90 Stat. 1469; sec. 409, 94 Stat. 160; secs. 401–407, 48 Stat. 1255–1260, as amended (12 U.S.C. 1724–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–1948 Comp., p. 1071, unless otherwise noted.

§ 563.17–4 [Amended]

10. Amend § 563.17–4 by removing paragraph (g).

11. Amend § 563.23–1 by revising paragraphs (a) and (b) to read as follows:

§ 563.23–1 Premiums, discounts, charges and credits with respect to loans; and related items.

(a) *Purchase at a premium.* A premium paid by an insured institutin in connection with acquisition of a loan shall be accounted for in accordance with generally accepted accounting principles.

(b) *Purchase at a discount.* If an insured institution purchases a loan at a discount, the discount shall be deferred by a credit to an account descriptive of deferred income and shall thereafter be credited to income in accordance with generally accepted accounting principles. For purposes of this section, a loan shall be deemed to have been purchased at a discount if the price paid by the institution for the loan is less than the amount of the loan balance. Any charges by the purchaser in connection with the purchase of a loan shall be deducted from the purchase price to determine the amount of the discount.

* * * * *

§ 563.23–1 [Amended]

12. Amend § 563.23–1 by removing paragraph (f) and redesignating paragraph (g) as paragraph (f).

§ 563.23–2 [Amended]

13. Amend Part 563 by removing § 563.23–2.

14. Amend § 563.23–3 by revising paragraph (c) to read as follows:

§ 563.23–3 Accounting Principles and Procedures.

* * * * *

(c) Prepare all financial statements and financial reports to the Corporation on the basis of generally accepted accounting principles and include in all such financial statements and reports a full and fair disclosure of the reconciliation of equity capital, as determined in accordance with generally accepted accounting principles, to regulatory capital, as defined in § 561.13 of this subchapter.

15. Amend § 563c.14 by adding a new paragraph (f).

§ 563c.14 Accounting for gains and losses on the sale or other disposition of mortgage loans, redeemable ground-rent leases, and certain securities; matching the amortization of discounts and losses.

* * * * *

(f) *'Sunset' and 'Grandfather' Provisions.* Authority to exclude the unamortized amount of gain deferrals

VOL 51 ISS 86 MY 5 1986 UMI

and to include the unamortized amount of loss deferrals pursuant to § 561.13 in computing an institution's regulatory capital will cease as of [effective date of final rule]. Any insured institution that has excluded gain deferrals and included loss deferrals in computing its regulatory capital as of [effective date of final rule], may continue to exclude the unamortized amount of such gain deferrals and include the unamortized amount of such loss deferrals in computing its regulatory capital after [effective date of final rule].

PART 570—BOARD RULINGS

16. The authority citation for Part 570 is revised to read as follows:

Authority: Secs. 552, 559, 80 Stat. 383, 388, as amended (5 U.S.C. 552, 559); sec. 11, 47 Stat. 733, as amended (12 U.S.C. 1431(e)(2)(C); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 401–403, 405, 407, 48 Stat. 1255–1257, 1259–1260, as amended (12 U.S.C. 1724–1726, 1728, 1730; sec. 414, as added by sec. 522, 94 Stat. 165, as amended (12 U.S.C. 1730g); Reorg. Plan No. 3 of 1947, 3 CFR, 1943–48 Comp., p. 1071.

17. Amend § 570.4 by revising paragraph (a) to read as follows:

§ 570.4 Regulatory Capital.

(a) The term "regulatory capital" is defined in § 561.13 of this subchapter to mean the sum of equity capital as determined in accordance with generally accepted accounting principles, definitional capital, certain other components of capital as the Board determines consistent with its risk analysis conventions, and risk analysis reporting forbearances. To the extent regulatory capital would include reserves (except specific or valuation reserves), the rules set forth in paragraphs (b) and (c) of this section shall apply.

* * * * *

§ 570.11 [Amended]

18. Amend § 570.11 and § 570.12 by removing the authority citations located at the end of the sections.

By the Federal Home Loan Bank Board.

Jeff Sconyers,

Secretary.

[FR Doc. 86-9915 Filed 5-2-86; 8:45 am]

BILLING CODE 6720-01-M

---

12 CFR Parts 561, 563 and Ch. V

[No. 86-426]

Federal Savings and Loan Insurance Corporation; Regulatory Capital Requirements of Insured Institutions

Dated: April 24, 1986.

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed Rule.

SUMMARY: The Federal Home Loan Bank Board ("Board"), as the operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC" or "Corporation"), is proposed to amend its regulations pertaining to the level of and the method for calculating the minimum amount of regulatory capital [previously referred to as "regulatory net worth" or "net worth"] required for all institutions whose accounts are insured by the FSLIC ("insured institutions" or "institutions"). Based upon its supervisory experience and analysis of the industry's capital needs, the Board is proposing to revise and simplify the structure of its current net-worth regulation[1] to increase insured institutions' capital requirements to 6 percent of total liabilities over a six-year period with certain risk-related credits and incremental capital requirements (qualifying balance deductions and contingency components, respectively) applied to specified types of assets and liabilities. This proposed Board action would provide better protection for insured institutions, depositors, and the FSLIC deposit insurance fund from interest-rate risk, credit risk, and other conditions in the current financial environment that could compromise thrifts' financial stability.

If adopted as a final rule, this change would take effect beginning with the fourth quarter of this year (beginning October 1, 1986). Institutions would be required to satisfy these increased capital requirements for the first time on December 31, 1986, the last day of the fourth quarter of calendar year 1986. Institutions would be required to capitalize liability growth on or after October 1, 1986 at 6 percent, but could attain the 6 percent requirement for levels of liabilities existing prior to October 1, 1986 over six years.

DATE: Comments should be received by July 7, 1986.

ADDRESS: Send comments to the Director, Public Information Services Section, Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552. Comments will be available for public inspection at the above address. Economic studies upon which this regulation relies in part also will be available for public inspection, and any additional relevant studies also will be made available upon completion.

SUPPLEMENTARY INFORMATION: This regulation is revised pursuant to the Board's general authority under the National Housing Act ("NHA") and specifically under section 403(b), 12 U.S.C. 1726(b), as amended by the Garn-St Germain Depository Institutions Act of 1982 ("DIA").[2]

Overview

Adequate capital is a crucial factor in assuring the viability of insured institutions and shielding the FSLIC fund from excessive losses. First, adequate capital enhances stability by allowing thrifts to absorb losses in the value of their portfolios resulting from adverse economic factors. Furthermore, by limiting the extent of leveraging firms can undertake, higher capital ratios encourage prudent risk-taking. Higher capital requirements also stimulate more effective monitoring and control of management by thrifts' shareholders by forcing such shareholders to bear a higher proportion of the losses that result from risky investments or excessive growth.

The current net-worth regulation increased FSLIC-insured institutions' average regulatory capital requirements from approximately 1.8 percent as of December 31, 1984 to 2.9 percent as of December 31, 1985. The Board believes that further increasing this general

[2] Pub. L. 97-320, § 202(d) Stat. 1469, 1492.

capital requirement to 6 percent over time is appropriate to afford insured institutions, their depositors, and the FSLIC a more effective buffer against the risk inherent in the deregulated and highly competitive environment for thrift operations. The Board further believes that it is appropriate to adjust the 6 percent capital requirement to the extent that insured institutions reduce the risk (as reflected by their qualifying balances) or increase such risk (as reflected by their contingency factors and their rates of growth).

Immediate attainment of this level of capitalization is not feasible for a substantial number of institutions with the exception of those institutions that are currently required to have capital at or near the 6 percent level.[3] Accordingly, the proposal permits insured institutions to phase up to the 6 percent capital standard on their levels of liabilities existing prior to October 1, 1986 over a six-year period on a straight-line basis. To secure the maximum feasible benefits of increased capital on operations without undue disruption, this proposal requires institutions to capitalize liability growth over the institutions' levels as of October 1, 1986 at 6 percent. At moderate growth rates and current levels of profitability, the large majority of insured institutions should be able to meet the 6 percent regulatory capital requirement (before risk adjustment) over six years.

The Board is also proposing to modify the contingency factor of the current net-worth regulation to require: (1) 10 percent incremental capital on all direct investments; (2) 4 percent incremental capital on land loans and nonresidential construction loans; and (3) 2 percent incremental capital on letters of credit. The Board also proposes to recognize to a greater extent the risk reduction achieved by an institution holding a maturity-matched portfolio of housing-related investments with limited credit risk. Accordingly, the proposal modifies the qualifying balance deduction by decreasing an institution's capital requirement by an amount equal to the sum of: (1) 2 percent of the institution's eligible liquid assets; (2) 1 or 2 percent of the institution's qualifying adjustable-rate mortgages ("ARMs") depending on the ARMs' remaining adjustment level; (3) 2 percent of fixed-rate liabilities with remaining maturity of 3 years or more (the dollar weighted average remaining term-to-maturity of liabilities used in this exclusion must be at least 5 years) for which the institution has a corresponding amount of fixed-rate permanent 1–4 family residential mortgages or mortgage-backed securities (as defined in 12 U.S.C. 1464(c)(1)(S)) with equal or greater maturity; and (4) 2 percent of fixed-rate permanent 1–4 family residential mortgages or investment-grade mortgage-backed securities with remaining contractual term-to-maturity of two years or less.

The proposal also places a limitation on these qualifying balance deductions. For the first three years after the effective date of any final regulation adopted, an institution could not reduce its regulatory capital below 3 percent. During the fourth through sixth years, an institution could not reduce its minimum amounts of regulatory capital below 4 percent. After the sixth year an institution's minimum amount of regulatory capital could not drop below 5 percent.

The Board's proposal also would eliminate from its current net-worth regulation (1) the amortization factor; (2) the sliding-scale growth factor, (3) the current base factor calculation; and (4) the preferential growth treatment of institutions with assets of $100 million or less.

Related Regulatory Action

In addition to proposing this regulation, the Board today also is proposing amendments to its insurance regulations that would define regulatory capital in accordance with generally accepted accounting principles ("GAAP"), as modified by the Board to reflect regulatory risk. *See* Board Res. No. 86-427, published elsewhere in the Proposed Rule section of this issue. The proposal would also require insured institutions to prepare in accordance with GAAP all financial statements and financial reports which the Board requires to be issued to the public or submitted to the Board. Because defining regulatory capital is closely related to this proposed revision to the minimum required amount of regulatory capital, the Board will consider jointly comments filed on either proposal.

Prior Reserve and Net-Worth Regulations

From the time of its enactment in 1934 until 1980, Section 403(b) of the NHA, 12 U.S.C. 1726(b), contained a requirement that institutions establish a Federal insurance reserve of 5 percent of their insured accounts ("statutory reserve requirement"). Since the 1950's, the Board incorporated this statutory reserve requirement in its regulations and adopted its own regulatory reserve requirements. Most of the regulatory reserve accounts, plus other state-required reserves, could be used to satisfy the statutory reserve requirement. An institution could use five-year averaging and 20-year phase-in techniques to satisfy this requirement. One early regulatory reserve requirement, adopted by the Board in 1956, required institutions annually to credit 10 percent of their net income to reserves until their reserves equalled 12 percent of their insured accounts. Board Res. No. 9826, 21 FR 5483 (July 21, 1956). The requirement for a periodic net income credit to institutions' reserve accounts was preserved until 1972, but the criteria triggering the credit requirement were modified several times. In 1963, for example, the credit requirement was imposed when an institution's adjusted net worth was less than 12 percent of its "risk assets" (defined as total assets less cash, government obligations, Federal Home Loan Bank ("FHLB") stock, prepaid FSLIC premiums, and 60 percent of investments in insured and guaranteed loans). Board Res. No. 63-1712, 29 FR 45 (Jan. 3, 1964). Pursuant to that regulation, if an institution's adjusted net worth was less than 8 percent of its risk assets, its required credit-to-reserves ratio was the greater of 10 percent of its required net income or 6 percent of its growth in risk assets.

In 1972, the Board replaced the requirement to credit a portion of net income to reserves with a requirement that an institution maintain net worth equal to the greater of (1) 5 percent of insured accounts, plus 20 percent of scheduled items, or (2) the amount determined by the so-called Asset Composition and Net-Worth Index ("ACNWI"). The ACNWI assigned minimum net-worth percentages to specific types of assets, including real estate held for development or investment (7 percent) and investments in service corporations (10 percent). Board Res. No. 72-1415, 37 FR 26579 (Dec. 14, 1972).

In 1980, the Depository Institutions Deregulation and Monetary Control Act of 1980, [4] amended section 403(b) of the National Housing Act by replacing the former statutory reserve requirement of 5 percent of insured accounts with a range of 3 percent to 6 percent of insured accounts, with the specific percentage to be established by Board regulation. Following this amendment, the Board exercised its expanded discretion by establishing 4 percent of

[3] These include "de novo" institutions, and institutions that were previously insured by the Federal Deposit Insurance Corporation ("FDIC") or private-insurance systems and that converted to FSLIC insurance.

[4] Pub. L. No. 96-221, 94 Stat. 132.

VOL 51 ISS 86 MY 5 1986 UMI

insured accounts as the minimum reserve level needed to satisfy the statutory reserve requirement. Board Res. No. 80-694, 45 FR 76111 (Nov. 18, 1980). it simultaneously eliminated the former net-worth requirement of 5 percent of insured accounts and replaced it with a new liability-based test since the Board recognized that changed economic conditions, including greater competition for deposits, would cause institutions to issue securities and types of liabilities other than traditional deposits as sources of funds. That regulation required institutions to have net worth equal to at least 4 percent of liabilities. In 1982, the Board further exercised its statutory authority by reducing the reserve requirement to 3 percent of insured accounts and the net worth requirement to 3 percent of liabilities. Board Res. No. 82-19, 47 FR 3543 (Jan. 26, 1982). Both this 3 percent requirement and the earlier 4 percent requirement were calculated using 5-year-averaging and 20-year phase-in methods and permitted institutions to use the items in their net worth to satisfy their reserve requirements with the exception of subordinated-debt securities and specific-loss reserves. In adopting this reduction the Board found that it was unrealistic to impose higher reserve and net-worth requirements in the economic environment at that time and also stated that "many institutions are facing operating losses resulting almost exclusively from the disparity between the relatively low return received on their asset portfolio and the considerably higher return [paid] on their liabilities." The Board further concluded that "such losses are therefore largely beyond the current control of the institution." 47 FR at 3543.

The DIA gave the Board further discretion to set reserve standards by eliminating any specific statutory reserve range from 12 U.S.C. 1726(b) and left the Board discretion to establish such "adequate reserves" requirements as it considered satisfactory. DIA § 202(d). This action by Congress authorizes the Board to raise, as well as to lower, reserve requirements when necessary or appropriate.

These actions of Congress and the Board in the early 1980's in response to the industry's deteriorated financial condition directly resulted in significantly reducing the amount of capital that institutions were required to hold. The continued use of twenty-year phase-in and 5-year-averaging greatly exacerbated this situation. By December 1984, some institutions had minimum capital requirements of less than 1 percent of liabilities.

By adopting the current net-worth regulation in January 1985, the Board used its authority to reverse this trend. In response to the high-risk strategies and excessive leveraging that low levels of capital encourage, the Board increased its minimum net-worth requirements and structured the system of risk incentives and disincentives contained in the current regulation. The revised net-worth requirements were designed to enhance stability by discouraging growth at above-normal rates without sufficient capital to support such growth, and by discouraging excessive direct investments unsupported by adequate capital.

The Current Net-Worth Requirement

Insured institutions' minimum net-worth requirements are currently calculated using a four-factor formula. The four factors include a base factor, an amortization factor, a contingency factor, and a growth factor. Institutions' 1986 base factors are based on their minimum net-worth requirements as of December 31, 1985, including their 1985 growth factors and amortization factors but excluding their contingency factors and deductions for their qualifying balances. The amortization factors gradually eliminate the effects of using five-year-averaging and 20-year phase-in techniques on pre-1985 liabilities (these techniques were used in deriving the 1985 base factors from institutions' 1984 net-worth requirements). To phase out these techniques, the current rule requires institutions to have adequate net-worth to satisfy their amortization factors, which are calculated for each quarter (for twenty quarters beginning in March 1985) by adding 1/20 of the difference between 3 percent of their 1984 liabilities and their 1985 base factors. Their contingency factors are found by summing: (1) 2 percent of loans sold with recourse against the institution; (2) 10 percent of direct investments (excluding grandfathered investments) that exceed the greater of 10 percent of assets or twice regulatory net worth; and (3) 20 percent of scheduled items.

In general, under the current net-worth regulation growth factors vary on a sliding scale from 2.35 to 5 percent depending on an institution's size (treatment differs for an institution with $100 million or less of assets) and growth rate calculated on the basis of the institution's increase in total liabilities from the beginning of a calendar year to the end of the quarter for which the computation is made. If the institution has zero or negative growth, it receives a credit in the fourth quarter equal to the decline in liabilities multiplied by a fraction the numerator of which is the base factor at the beginning of the calendar year and the denominator of which is total liabilities as of the close of business of the last day of the preceding calendar year.

After summing these four factors (base, amortization, contingency, and growth factors) the institution makes a final adjustment to determine required net worth. This adjustment is called the qualifying balance deduction. Qualifying balances include interest-bearing liquid assets, one-half of adjustable-rate mortgages, and fixed rate liability sources that have remaining term to maturity of more than five years. An institution can reduce its minimum net-worth requirement by 3 percent of qualifying balances but cannot reduce it by more than ten percent of its requirement computed absent deduction of qualifying balances.

Board's Policy Rationale for Increasing Capital Requirements

After evaluating a number of factors, the Board believes that the current capital level of the industry is too low to serve as an adequate buffer against the economic and financial risk confronting insured institutions and the FSLIC.

First, institutions' capital reserves must be large enough to withstand "normal" variations in institutions' earnings. Since most financial institutions earnings are closely related to interest-rate movements, the increased volatility in interest rates since 1979 is reflected in correspondingly increased volatility in institutions' "normal" earnings. Thus, such institutions' capital buffers must protect the institutions, depositors, and the FSLIC against increased risk of financial loss stemming from interest-rate mismatches in institutions' portfolios. This risk from interest-rate fluctuations is exacerbated further by the nature of thrift portfolios, which have traditionally been composed of long-term fixed-rate assets and short-term liabilities.[5] Given the current

[5] Adjustable-rate mortgages ("ARMs") are key assets for insured institutions seeking to protect themselves from the effects of interest-rate risk, but there has been great fluctuation in their issuance and market acceptance in the last several years. Such ARMs represented approximately 45 percent of all single family conventional mortgages originated by insured institutions in January 1982. This figure dropped to about 30 percent in May 1983, but dramatically increased to 75 percent in August 1984. In March 1986, they represented about 27 percent of such mortgage originations.

interest-rate environment, the Board is concerned that unless institutions have an increased incentive to maturity match their portfolios, institutions may mismatch their return on assets and cost of funds in the same manner that led them to their financial difficulties in the early 1980s. The proposal would provide such incentives by requiring higher capital to induce management to protect their portfolios against future losses from interest-rate fluctuations, by permitting institutions to decrease their required regulatory capital through qualifying balance deductions that recognize investment and financing strategies undertaken to decrease interest-rate risk.

Second, the Board's decision to reduce reserve and capital requirements in the 1980 to 1983 period was in response to the major financial problems of insured institutions resulting from substantial negative spreads between institutions' asset yields and liability costs during that period. Current interest rates and the interest-rate spreads between institutions' assets and liabilities, however, have returned to 1978 levels thereby making it feasible for the large majority of institutions to attain a higher capital requirement over a six year period. For example, in 1981 and 1982 thrifts' average annualized cost of funds were 10.42 and 11.38 percent respectively, while their average annualized return on mortgages was 9.91 and 10.65 respectively. On the other hand, for 1984 and 1985 their average annualized cost of funds was 10.03 and 9.20 percent respectively, while their average annualized return on mortgages was significantly higher, 11.66 and 11.53 percent respectively. Furthermore, as a result of the improvement in thrifts' profits, a favorable market for thrift equity issues and the effects of the current net-worth regulation, the regulatory net worth of thrifts rose to $46.6 billion at the end of 1985, increasing thrifts' average regulatory net worth-to-assets ratio to 4.36 percent from 3.67 percent at the end of 1984. Although current spreads between thrifts' assets and liabilities are favorable to thrifts and their average net-worth ratios have increased, the fact that the interest-rate environment remains highly volatile by historical standards damands that increased capital cushions be developed while feasible to protect against future adverse interest-rate movements.

Third, the far more competitive environment in which thrifts operate necessitates greater minimum capital requirements. Insured institutions have in recent years been required to compete with other types of financial institutions by offering high investment yields in order to attract and retain deposits and capital. This competitive environment reduces operating margins and increases the need for additional capital to buffer potential losses.

Fourth, the new expanded asset powers of federally–and state–chartered insured institutions have provided beneficial diversification opportunities for insured institutions, but have also increased the risk-taking opportunities of such institutions. Some institutions that have exercised these expanded asset powers without adequate risk evaluation or protection have developed severe asset-quality problems that until recently had not existed to any substantial extent in the thrift industry. Four years ago roughly 80 percent of FSLIC's cases were primarily caused by interest-rate-problems, while 20 percent were due primarily to asset-quality problems. Recently that ratio has almost completely reversed itself to 30 percent interest-rate-spread problems and 70 percent asset-quality problems. This is particularly significant because resolution of asset-quality problems is substantially more costly for the FSLIC. Given the crucial role that capital plays in influencing firms' risk-taking behavior, the Board believes that higher capital requirements will result in prudent use of expanded asset powers.

Finally, raising industry capital requirements is appropriate in view of the commercial lending powers granted to insured institutions by the DIA and state legislation. Currently, commercial banks are required to maintain significantly higher capital ratios than thrifts. The Federal bank supervisory agencies (the Federal Reserve Board, the Office of the Comptroller of the Currency, and the Federal Deposit Insurance Corporation) all generally require ratios of total capital to total assets of not less than 6 percent, with required ratios of primary capital to total assets of not less than 5.5 percent. The FDIC, as did the other banking regulators in adopting these standards, fully considered and discussed the needs of insured commercial banks for the levels of capital in the interest of bank safety and soundness. *See* 50 FR 11136 (March 19, 1985). The Board's current proposal would raise thrifts' capital ratio requirements toward parity with the capital ratio requirements for commercial banks. Furthermore, attaining such parity was recommended by the Bush Task Group on Regulation of Financial Services,[6] which concluded that comparable capital requirements for federally-insured banks and thrifts were appropriate to improve the overall safety and soundness of the financial system.

Liability Component

The Board is proposing to require insured institutions to have, after a six-year phase-in period, regulatory capital equal to 6 percent of all liabilities ("liability component") before adjustment for institutions' qualifying balances or contingency components, as discussed below. Institutions would have six years to achieve this capitalization rate on their level of liabilities on the proposed October 1, 1986 effective date of this regulation ("base liabilities").[7] The proposal would require institutions immediately to capitalize at 6 percent growth over their levels of total liabilities existing on October 1, 1986 ("increased liabilities"). Institutions would be required to calculate and satisfy the increased requirement both as to the first phase-in for base liabilities, as well as the 6 percent requirement on growth over base liabilities, for the first time on December 31, 1986.

Base Liabilities Amount

Institutions would determine their minimum required amount of regulatory capital for their base liabilities for a quarter ("base liabilities amount") by multiplying their base liabilities by the liability factor for that quarter. The liability factor is a percentage rate increasing from the initial rate of 3 percent by .125 percent per quarter (.5 percent per year) until reaching 6 percent in six years. For example, an institution with $100 million of liabilities on October 1, 1986, would compute its base liabilities amount for its first-quarter computation by multiplying $100 million (its base liabilities) times 3 percent (the first quarter's liability factor).

The proposal would require an institutional to maintain a base amount of regulatory capital equal to the greater of (1) 3 percent of its total liabilities or (2) the sum of its base factor, growth factor (adjusted to reflect any decrease in liabilities in 1986 computed pursuant to § 563.13(g)(4)(b)), and amortization factor under the current net-worth

[6] Blueprint for Reform: The Report of the Task Group on Regulation of Financial Services 83–84 (1984).

[7] Base liabilities would equal the book value of an institution's total liabilities on the proposed October 1, 1986 effective date and does not refer to specific liabilities on an institution's balance sheet.

VOL 51 ISS 86 MY 5 1986 UMI

regulation as of October 1, 1986 ("October base"). Certain institutions, because of relatively higher rates of growth, will have an October base requirement exceeding 3 percent of total liabilities. The proposal would require such an institution to meet the schedule for attaining 6 percent capitalization on base liabilities only when the quarterly increase in the liability factor reaches a level that makes such an institution's required base liabilities amount exceed its October base requirement. For example, institution A may have an October base requirement of 4 percent for total liabilities. Based on increases of .5 percent a year in the liability factor, the standard industry liability factor will reach 4 percent for the quarter beginning October 1, 1986. Thus, beginning with the quarter commencing January 1, 1986, Institution A will be required to increase its liability factor at .125 per quarter and correspondingly increase its base liabilities amount to track the phase-in schedule for those institutions that would have been required initially to maintain a 3 percent base liabilities amount of regulatory capital assuming that the regulation becomes effective on October 1, 1986. Until that time, it would be required to maintain a 4 percent level.

Amortization Factor Elimination

Under the current net-worth regulation, this factor would be eliminated by 1990; the Board's proposal would eliminate it immediately. In the Board's view, continued retention of an amortization factor would inhibit progress toward the goal of 6 percent required capital. The proposed six year phase-in for requiring 6 percent capital on base liabilities provides ample time for most institutions to comply. Preserving the factor would, in effect, unjustifiably allow the five-year averaging and twenty-year phase-in techniques (the effects of which are being eliminated over five years by the amortization factor) to continue to decrease capital requirements.

Retaining this provision also would increase the need for rapid capital accumulation in the later years of the transition period. By eliminating the current amortization factor, the Board's proposal provides for an orderly transition to more appropriate capital rates.

Increased Liabilities

A. General

The Board believes that it is essential for institutions immediately to capitalize at 6 percent all liabilities in excess of their levels existing on the proposed October 1, 1986 effective date. Requiring 6 percent capital for all such increased liabilities would immediately encourage more prudent risk-taking and sounder risk underwriting, and provide better portfolio protection with regard to such growth. Furthermore, requiring institutions to capitalize all net increments to their liability bases at 6 percent would reduce the need to raise an even larger amount of capital at the end of the six year transition period for liabilities incurred during the transition period. Board experience indicates that raising such a level of capital in a short period could cause significant industry problems, especially for institutions growing at slower rates, who could be forced to raise large amounts of capital in a relatively brief time period. Such institutions might be forced to make asset sales on terms less favorable than would otherwise be deemed satisfactory. On the other hand, efforts to rapidly accumulate capital through the issuance of a high volume of securities could create a temporary market glut of such securities significantly exceeding the market demand for such securities, and thereby adversely affecting the price and marketability of such securities. The proposal averts the necessity for such a rapid accumulation of capital by requiring six percent capitalization of institutions' liability increases over current levels, as well as phasing in over six years the 6 percent requirement on current liability levels.

B. Neutral Treatment of all Institutions

The Board also is proposing to delete the special lower capital requirement for institutions with assets of $100 million or less. Under the current rule, such institutions growing at an annual rate not exceeding 15 percent may continue to use five-year averaging in computing their minimum net-worth requirements. This computation method allows institutions to average their liabilities over a five year period and to apply their capitalization requirements to this averaged number, thereby understating real growth, decreasing the institutions' capital requirements and allowing increased leverage of investments. Institutions having $100 million or less in assets are also exempt from the preapproval requirement for growth at annual rates exceeding 25 percent. The Board's supervisory experience reflects the problems that can be caused by unrestrained growth, particularly when combined with risky investments, by even very small institutions. Furthermore, the supervisory records of such institutions reflect considerable manipulation of the $100 million threshold by some of them. By eliminating preferential treatment for such institutions, the proposal will better serve the Board's goal of ensuring adequate capital levels and enhanced safety and soundness throughout the industry.

C. Pre-approval for Certain Growth Rates

The Board is concerned that a 6 percent capital requirement augmented by the contingency component, but offset by the qualifying balances deduction, may not be sufficient to prevent the harmful effects of high growth levels and to induce prudent risk-taking by insured institutions growing at high rates. Accordingly, the Board is also proposing to supplement the basic increase in capital requirements with the retention of its current growth regulation, § 563.13–1, which requires prior approval by institutions' Principal Supervisory Agents ("PSAs") for growth by institutions at rates higher than 25 percent annually (i.e., institutions with ending total liabilities on a given quarterly report that are more than 12.50 percent above total liabilities as of the beginning of that two-quarter period). The amended language of the proposed regulation would rephrase the prior requirement to prohibit institutions from increasing their total liabilities within any two quarter period at a rate greater than 12.50 without prior approval of the institution's PSAs. In addition, the proposal authorizes the PSAs of institutions growing at faster rates to require such institutions to have up to 4 percent incremental capital for such growth.

The Board believes that retaining its growth regulation, as amended, is necessary to address its continuing concerns about the inherent riskiness of rapid growth unaccompanied by an adequate capital buffer. The Board discussed extensively in the preamble to the net-worth regulation the dangers of such highly leveraged growth. *See* 50 FR at 6694–6697. Between December 1983 and December 1984, the industry's liability base grew at a rate of 19.46 percent. At the same time, its capital base grew only 11.74 percent. Most alarming was the rapid growth of institutions with low net worth. Institutions with less than 1 percent net worth at year-end 1984 had average growth in 1984 of 30.6 percent. Those with between 1 and 3 percent net worth grew at a 22.2 percent rate. The current net worth rule focused on curbing such practices by requiring institutions to earn their growth. The trend towards

unrestrained, highly leveraged growth was halted in 1985: The 1985 industry-wide rate of growth was 7.9 percent. Institutions hving less than 1 percent net worth at year-end 1984 shrunk during 1985 by 3.4 percent. Institutions with between 1 and 3 percent net worth grew by only 4.6 percent. At the other end of the spectrum, institutions with over 5 percent net worth grew at an 11.7 percent rate, down only slightly from their 15 percent rate in 1984. The Board seeks to benefit the industry by continuing to restrain highly leveraged growth.

Combining the growth regulation with a 6 percent capital requirement as adjusted for risk also will assure evenhanded treatment of all institutions during and after the six-year phase-in period and will also achieve the stated goal. In fact, the combination of the increased capital requirements and the growth regulation moots the need for a sliding scale growth factor. The proposal simply deals with varying rates of growth by different methods. First, the proposal would retain the growth regulation requiring PSA approval for growth over 12.5 percent in a two-quarter period and would authorize PSAs to require up to four percent incremental capital on growth over this level by such institutions. Institutions that grew rapidly and were subject to a 5 percent marginal capital requirement under the current net-worth regulation would have this fact reflected in their October bases. As noted previously, if an institution's October base exceeds 3 percent, it may not reduce its base liabilities amount below that level. Finaly, and most importantly for the Board's goals, institutions would have to capitalize at 6 percent any growth over existing levels on October 1, 1986. Institutions growing more rapidly than other institutions after that date would have a correspondingly higher capital requirement resulting from such incremental growth. Therefore, the Board believes that its proposal has adequate provisions to restrain highly leveraged, undercapitalized growth.

The Board specifically requests comment, however, on whether Supervisory Agents should be authorized to notify institutions within ten days of the filing of a growth plan required by § 563.13–1(b) that all requested information has been filed or that additional information is necessary. The Board has become aware that in some instances requiring PSAs to act within this ten day timeframe can be logistically difficult or create undue pressure.

De Novo Institutions

As stated above, the Board has preliminarily decided to implement a gradual transition over six years to 6 percent capital levels for all insured institutions. Given this Board goal, the Board believes that it would be inappropriate to allow institutions already required to maintain capital ratios exceeding 3 percent to retreat before moving toward 6 percent. Consistent with this preliminary determination, "de novo" institutions' liability components (*i.e.* required amount of regulatory capital on base liabilities) shall be the higher of their "de novo" requirements pursuant to § 563.13(b)(2) or six percent of total liabilities. The proposal also requires "de novo" institutions to continue to satisfy the incremental capital requirements under their contingency components and permits them to continue to incorporate the benefits of qualifying balance deductions. However, consistent with the Board's goal for all insured institutions at the end of the transition period, the proposal would not allow the minimum required regulatory capital of "de novo" institutions to fall below 5 percent after qualifying balances deductions.

For the same reasons, the proposal also mandates that other institutions currently required to meet net worth standards exceeding three percent (*i.e.*, institutions formerly insured by the Federal Deposit Insurance Corporation or by privately-funded insurance systems) maintain their liability components at the higher of their current requirements or their minimum required amounts of regulatory capital under this regulation.

Growth Through Merger or Acquisition

The Board would treat mergers (i.e. mergers, consolidations, or purchases of assets and assumptions of liabilities) and branch acquisitions (acquisitions of less than substantially all of the liabilities of institutions in which the selling institutions continue in operation as separate entities, which includes but is not limited to branch acquisitions) (hereafter referred to as "branch acquisitions") consistently with their treatment under the current net worth regulation, with modifications for consistency with changes that would be made by the proposed regulation. The minimum regulatory capital requirement, beginning in the quarter the transaction becomes effective, would be equal to the sum of each of the institutions' liability components (consisting of their base liabilities amounts plus increased liabilities amounts) and contingency components minus any qualifying balance deductions [subject to the applicable minimum requirements (three, four, or five percent depending on the number of years after the regulation's effective date, if adopted)] set forth in § 563.13(b)(1)]. "De novo" institutions and other types of institutions not subject to the standard regulatory requirements (*i.e.* former FDIC- or privately-insured institutions) will calculate their minimum required regulatory capital after mergers by combining the institutions' liability-based requirements (such as seven percent or six percent of total liabilities for "de novo" institutions) plus their contingency components minus their qualifying balances. For example, excluding contingency components and qualifying balances, if a "de novo" institution with a capital requirement of 6 percent of $300 million in total liabilities (amounting to an $18 million capital requirement) merged with another "de novo" institution with a 7 percent requirement on total liabilities of $200 million (amounting to a $14 million capital requirement) on December 31, 1986, the merged institution would have a $32 million capital requirement on combined liabilities of $500 million, for a liability-based capital requirement of 6.4 percent. The minimum required amounts of regulatory capital of such institutions, however, would not be allowed to drop below 5 percent of total liabilities after adding their contingency component amounts and subtracting their amounts of qualifying balance deductions.

In computing the minimum regulatory capital of an insured institution after it has made a branch acquisition, the base liabilities of the acquiring institution beginning in the quarter in which the transaction becomes effective shall be the base liabilities of the acquiring institution calculated to include the amount of liabilities acquired. Using that level of base liabitities, the acquiring institution would compute its minimum required amount of regulatory capital pursuant to § 563.13(b)(1). For example, if an institution with base liabilities on January 1, 1987 of $100 million (and a base liabilities amount of $3 million) acquired $10 million of liabilities on February 1, 1987, the acquiring institution's base liabilities would increase to $110 million and be subject to the 3.125 percent liability factor on March 31, 1987.

For purposes of computing institutions' growth pursuant to § 563.13–1, institutions' total liabilities as of the beginning of a two-

VOL 51 ISS 86 MY 5 1986 UMI

consecutive-quarter period ("beginning liabilities") shall be computed as follows for branch acquisitions and mergers. First, beginning liabilities shall be deemed to include any increases in total liabilities from branch acquisitions during the two-quarter period. Second, in the case of mergers occurring during the two-quarter period, the beginning liabilities of the combined institution would be deemed to include the total liabilities of the merged and continuing institutions as of the first day of that two-quarter period.

Contingency Component

The current net-worth regulation includes a contingency factor which requires incremental capital, above, and beyond that required by application of the base factor, for certain assets that pose additional risk to insured institutions and the FSLIC. 50 FR 6891, 6911 (1985) (to be codified at 12 CFR 563.13(g)(5)). The contigency factor presently requires additional capital equal to the sum of 2 percent of recourse liabilities (as that term is defined in 50 FR 38636, 38639 (1985) (to be codified at 12 CFR 561.8)), 20 percent of scheduled items (as that term is defined in 50 FR 53275, 53282 (1985) (to be codified at 12 CFR 561.15)), and 10 percent of total direct investments made after December 10, 1984, which exceed the greater of 10% of an institution's total assets or twice its regulatory net worth. *Id.*

The Board is proposing substantial modifications to the contingency factor, and redesignating it the "contingency component", based upon its determination that the current provision does not provide a sufficient capital reserve against the risks posed by certain types of investments. The current incremental capital requirements for scheduled items and recourse liabilities would remain unchanged. The Board is proposing, however, to amend the direct-investment component of the contingency component to require 10 percent incremental capital for all direct investments, except certain "granfathered" investments made prior to December 10, 1984, by deleting from the contingency component the current provision that excludes direct investments which are less than or equal to 10 percent of an institution's total assets or twice its regulatory net worth. The Board is also proposing to include in the contingency component a 4 percent capital requirement on loans for unimproved land, developed building lots, and acquisition and development of land ("ADL") (collectively referred to as "land loans"), a 4 percent capital requirement on nonresidential-construction loans, and a 2 percent capital requirement applicable to letters of credit.

1. Direct Investment

The Board is proposing to require a 10 percent capital reserve against aggregate direct investment as defined in 50 FR 6912, 6928 (1985) (to be codified at 12 CFR 563.9–8(b)(1)). Under the current regulation, the amount of direct investment that must be included in the net worth calculation depends on the amount of such investments held by the institution on the December 10, 1984 date of publication of the proposal in the **Federal Register.** If direct investments at that time exceeded a threshold amount, direct investments made after that date are subject to a 10 percent reserve requirement. Otherwise, the current regulation assesses no capital requirement on aggregate direct investments up to the threshold amount, but direct investments in excess of such an amount require a ten percent capital reserve. On the basis of more than one year's experience with the direct investment component of the contingency factor, and statistical studies indicating that high levels of direct investments are associated with high FSLIC costs from failed institutions even if such institutions had less than the greater or twice net worth or 10 percent of assets in direct investments, the Board is proposing to extend the 10 percent reserve requirement to all direct investments, no matter when made.

The Thrift Failures Study, performed by the Bank Board's Office of Policy and Economic Research ("OPER"),[8] found that the greater the direct investments of a failed institution, the greater the losses incurred by the FSLIC. These results were statistically significant at a 95 percent confidence level. The study covered 31 institutions (all the institutions for which there were complete data on FSLIC costs) that had failed in 1982 and 1983 and which required FSLIC outlays to resolve. A second study, the FSLIC Losses Study, completed in February 1986,[9] expanded the Thrift Failures Study to include an examination of 88 institutions that failed between 1982 and 1984 and required FSLIC outlays to resolve. Again the study found that the greater the level of direct investments, the greater were the FSLIC losses when an institution failed. A study completed in April 1986, the Updated FSLIC Losses Study, used an expanded sample that included 324 institutions that failed between 1982 and October 1985 and obtained results similar to those of the earlier studies.[10] Because most of the institutions surveyed in these studies had direct investments significantly less than 10 percent of assets, the findings suggest that regardless of their level, direct investments are associated with higher FSLIC costs.

Statistical studies done by OPER also indicate that more prudent selection of direct investments—even for nondistressed thrift institutions—may be neded. In order to evaluate the effect of direct investments on the performance of thrift institutions, OPER statistically examined the effect of direct investments on net worth for a sample of 488 randomly selected thrift institutions in 1982–1984.[11] The results, again significant at a 95% confidence level, suggest that direct investments pose a threat to net worth in nondistressed as well as distressed institutions.

A further statistical study examined the effects of direct investment on net worth in 1985.[12] A study of the 1985 period is important because the 1984 adoption of the quarterly financial report ("Quarterly Report") and the 1985 requirement to report as direct investments certain ADL loans that had characteristics more like direct investments than loans [13] meant that for 1985 better data were available than in the past regarding the effect of direct investments, land loans and nonresidential-construction loans on net worth. In addition, the study used data for all FSLIC-insured thrift institutions whereas all previous studies used a smaller sample of institutions. The study found that in 1985 increases in direct investments were associated with a decline in Section H market-value net worth, suggesting that for the period studied direct investments posed a threat to thrift industry net worth. The results of this study with regard to land loans and non-residential construction loans are discussed *Infra.*

In addition to statistical studies, evidence from the Board's supervisory experience with direct investments of particular institutions has demonstrated the tremendous potential of such investments to damage net worth irreparably. For example, in an institution placed in receivership in 1985, direct real estate investments close to $240 million contributed to a negative net worth of $4 million. Another institution placed in receivership in 1985 has been required to recognize losses of more than $60 million on direct real estate investments of $170 million. Also in 1985, FSLIC made contributions to capital of an institution that had direct real estate investments of over $200 million, which required loss reserves of up to $100 million. In a large institution that was placed in receivership in 1986, direct investments constituted 8.8% of assets. The exclusion of direct investments under 10 percent of assets from the net worth calculation permitted $6.8 million to be excluded from the institution's calculation of required net worth. A higher net worth requirement reflecting these investments would have provided a significantly larger cushion for the institutions and the FSLIC.

The problem of losses associated with direct investments identified by these studies and supervisory experience is addressed to a certain extent by the classification of assets regulation recently adopted by the Board. Board Res. No. 85–1154, 50 FR 53275 (Dec. 31, 1985). This regulation requires additional net worth or the establishment of reserves for those assets which, upon examination, are found to be either nonperforming or exhibiting substantial weakness. Classification is a method for identifying, at an earlier date than is otherwise possible, assets that may result in losses, but it does not provide significant incentive for more than prudent investments. Nor does it require the institution to provide a cushion of extra capital before losses occur, at a time when the institution is more likely to have resources to absorb losses that may be realized at a later date. Furthermore, investments in securities, a significant component of direct investment, are excluded entirely from the classification of assets regulation. The Board has as a result determined that the classification of assets regulation is not a substitute for requiring increased capital reserves against direct investments.

Because both statistical and supervisory evidence have lent support to the connection between even small amounts of direct investment and thrift and FSLIC losses, the Board is proposing to require further protection in the form of additional capital reserves against direct investments. The Board believes that, as an initial step in this direction, the exemption for the first ten percent of direct investments should be deleted. As a result, the contingency factor component of regulatory capital would include 10 percent of all direct investments.

The current net worth regulation effectively grandfathers direct investments made prior to the December 10, 1984 date of publication of the proposal in the **Federal Register.** The Board believes that imposing a capital requirement on these previously exempt investments would unduly disrupt operations, and consequently is grandfathering these investments. Consequently, the new requirement would apply only to direct investments acquired after December 10, 1984.

Because the net worth regulation permits consolidated treatment for direct investments of service corporations and finance subsidiaries as an alternative to considering investment in the subsidiary a direct investment, the proposal would retain this exclusion for direct investments in subsidiaries, provided that all investments made by the subsidiary which would be subject to the contingency component if made by the parent are aggregated with those of its parent for purposes of computing the parent's contingency component.

2. Land Loans and Nonresidential-Construction Loans

As indicated above, the Board is proposing to include in the contingency component a 4 percent incremental capital requirement for land loans and nonresidential-construction loans. It is the Board's view that additional risks inherent in each of these types of assets necessitate an incremental capital requirement.

More specifically, the Board's examination experience has demonstrated that land loans are inherently more risky than residential mortgage loans because the land providing collateral for such loans generates no income or cash flow and has substaintial carrying costs in the form of debt service and property tax. Because of the absence of any cash flow associated with such loans, these loans pose a high degree of credit risk. Further, land, as a commodity, is subject to very wide fluctuations in value depending on any number of factors, including trends in the local economy.

The Board's concern with land loans and nonresidential-construction loans also stems from the nature of the underlying product. Because these types of assets are associated with nonstandard and nonfinished product, it is inherently more difficult to obtain an accurate appraisal of the value of the anticipated final product. In fact, the Board's supervisory experience is replete with cases which demonstrate that virtually any institution can obtain a grossly inflated appraisal for a project of this type, if it so desires.[14] The collateral for these types of loans, however, rests primarily on the value of the final product. Lack of an accurate appraisal, therefore, leads to significant uncertainty regarding the value of the collateral. As a result, these assets are subject to more uncertainty in their returns.

These assets are also associated with projects that require substantial time to complete. The need for long lead times between initial loan commitments and completion of the final products results in substantial market risk. Further, uncertainties regarding possible market absorption, performance of the developer or builder, possible interest-rate risk, and appraisal of such projects

[11] "Empirical Evaluation of the Determinants of Net Worth for the Thrift Institutions Insured by the Federal Savings and Loan Insurance Corporation 1982–1984," forthcoming OPER Working Paper No. 127, March 5, 1986 hereafter referred to as "Net Worth Study"). In this study, the OPER evaluated the effect of diffrent variables upon four measures of net worth, including net worth as defined by regulatory accounting principles ("RAP"), and generally accepted accounting principles ("GAAP"); tangible net worth (calculated by adjusting GAAP net worth to omit intangible assets); and a proxy for market value net worth (calculated by adjusting tangible net worth for the market value of an institution's fixed rate mortgage portfolio based on prevailing interest rates).

[12] Memorandum from R. Dan Brumbaugh, Director, Policy Analysis Division, OPER to Robert J. Sahadi, Acting Director, OPER (April 22, 1986) ("1985 Net Worth Study"). In this study, the proxy for market value net worth was calculated by using the interest-rate gaps reported in Section H of institutions' Quarterly Reports. The other measures of net worth utilized in this study were the same as those used in OPER's Net Worth Study discussed above. Because this study used information from the entire industry (*i.e.*, the total population), reference to confidence intervals is inappropriate.

[13] See 50 FR 18233, 18236 (1985) (to be codified at 12 CFR 571.17).

[14] One institution, placed in FSLIC receivership in 1984, grew from $22.6 million in assets to $320.2 million in one year. This growth was due in part to an expansion in land loans secured by the underlying properties. The institution committed to provide all or substantially all of the necessary funds to acquire the properties. The land loans typically had a one year term and were made to shell corporations with investors guaranteeing the loans. In many instances, the land was sold and resold many times in one day to artificially inflate prices. Often the loans were based on appraisals that used the inflated price of the last sale, and they covered full purchase price, loan fees, interest and closing costs. One hundred nineteen of these land loans were made by the institution, totalling $73,943,000. Losses to the FSLIC were estimated at $48,636,000 on these loans. Independent appraisals were received on 42 additional land loans, which indicated a loss of $31 million or 76.4 percent on the $40.6 million of land loans.

VOL 51 ISS 86 MY 5 1986 UMI

when future demand is unclear are inherent characteristics of these types of assets.

The risks and uncertainties associated with these types of loans are exacerbated by the fact that the actual life of these loans may be longer than the initial term. Thus, it has been the Board's experience that the evolving practice in nonresidential construction lending is not to insist on a firm take-out from another lender to provide the permanent financing. Instead, the lender may be forced to provide interim financing by committing to extend a "mini-perm" loan, which is an intermediate-term balloon note, until long-term financing can be arranged. This can effectively convert a three year loan into, *e.g.*, a six or seven year loan. This practice exposes a lender to substantial credit risk associated with extending a loan beyond the originally contemplated term, market risk arising due to the extended period between conception and completion of such projects and the possibility that the project may be sold or leased for less than the projected price, and interest-rate risk where the lender is forced to extend the mini-perm at a fixed or concessionary interest rate.

Studies performed by the OPER, which are described above, strongly indicate that problems associated with these types of loans are a relatively recent phenomenon for insured institutions, first identified in 1984 and becoming a significant problem in 1985.[16] These studies suggest that, since 1984, these types of loans have been associated with reductions in the market value of institutions and have negative effects on other measures of new worth.

More specifically, the Net Worth Study discussed above also evaluated the effect of construction loans on net worth in 1984[16] and the effect of land loans on net worth for the period 1982 to 1984. The results regarding construction loans indicated that increases in levels of construction loans were statistically associated with a decline in estimated market-value net worth. The results were significant at a 95 percent confidence level.[17]

[16] FSLIC Losses Study, *supra;* Net Worth Study, *supra;* and Updated FSLIC Losses Study, *supra.*

[16] Data regarding construction loans were derived from the Quarterly Reports filed with the Office of Examinations and Supervision, the first of which were filed in March, 1984. Prior to this time, data were not available to separately analyze the effect of construction loans on net worth.

[17] Although the results indicated that construction loans pose a threat to market-value net worth, the availability of only one period's data suggested the need for further study of the correlation between these variables.

The Net Worth Study also found that in 1984 increased levels of land loans[18] were statistically associated with a decline in net worth calculated under RAP and GAAP, as well as tangible net worth. These results were significant at 90 and 95 percent confidence levels. As with the results for the construction loan variable, these results suggested that land loans posed a threat to net worth which developed in 1984.

The effect of land loans on FSLIC losses was separately examined in the original FSLIC Losses Study and the Updated FSLIC Losses Study. Both studies showed at a 95 percent confidence level that land loans were associated with higher costs to the FSLIC. These results confirm that land loans became a significant problem for insured institutions in 1985.

The 1985 Net Worth Study described above also examined the effects of land loans and nonresidential-construction loans on net worth of FSLIC-insured institutions. The results of this study overwhelmingly confirmed the results derived in the prior Net Worth Study of the 1982 to 1984 period. The updated study found that increases in land loans and nonresidential-construction loans in 1985 were associated with a decline in market-value net worth. These results indicate that for the period studied land loans and nonresidential-construction loans posed a threat to thrift-industry net worth.

Statistics computed by the OPER also show that thrifts with very high levels of land loans and nonresidential-construction loans reported substantially higher levels of problem assets (real-estate owned ("REO") and loans to facilitate sale of REO ("LTFS")) than other institutions.[19] More specifically, as of December 31, 1985, all insured institutions with January 1, 1985 assets of $100 million or more had a ratio of REO and LTFS to assets of 1.324 percent. The 40 institutions in the country with assets of at least $100 million and the highest proportion of nonresidential-construction loans had a ratio of REO and LTFS to assets of 2.304 percent, a statistically significant departure from the industry average.

The Board's supervisory experience supports these statistics and confirms that a number of institutions have experienced severe financial difficulties because of these types of loans. The institutions that have failed recently and caused the largest losses to the FSLIC have all involved substantial losses from land and nonresidential-construction loans (collectively referred to as "ADC-type loans"). Examples include Mainland Savings Association of Houston, Texas, Bell Savings and Loan Association of San Mateo, California, and State Federal Savings and Loan Association of Corvalis, Oregon. The bank regulatory agencies also have increasingly experienced similar problems with commercial real-estate loans.[20]

Examination of the FSLIC's experience at an institution, for which the FSLIC was appointed receiver in 1986, illustrates the risk associated with ADC-type loans and the potential for substantial losses to the FSLIC fund due to such loans. The assets of this institution increased 224 percent between December 1983 and February 1985, from $340 million to $760 million. It net worth, however, during this period declined precipitiously from $10,913,284 (or 3 percent of assets) to negative $4,453,000 (or −.7 percent of assets). The institution's rapid decline into insolvency was due primarily to its decision to invest 76 percent of its assets in high-risk ADC-type loans. It is estimated at this time that the decision of this institution to pursue a high-risk asset portfolio—in essence gambling at the FSLIC's expense—will result in losses to the FSLIC of up to $400 million. The Board believes that the incentive to gamble at the expense of the FSLIC, which at this time is shared by all institutions with low net worth, would be removed by requiring an adequate capital reserve against such high-risk assets as proposed in this rule *before* an institution may make such investments.

The Board has found that increased supervision cannot adequately curb the risk posed by these loans. The problems associated with these loans are often masked by the very nature of the loans. These assets are often characterized by high fee income, the payment of interest through an interest reserve, and the establishment of associated loan-in-process accounts. Because such loans often have nominal periodic "paper" payments from an interest reserve, such loans cannot become delinquent as long as the interest reserve lasts.

[18] While the OPER studies (the FSLIC Losses, Net Worth, and Updated FSLIC Losses Studies) refer to the land loan variable as "ADL", the data analyzed in the ADL variable for each of these studies included all information set forth in the relevant Quarterly Reports for line item A060, which includes developed building lot, unimproved land and ADL loans.

[19] Memorandum from Joseph A. McKenzie and Connie Young to Robert Sahadi, Acting Director, OPER, dated April 14, 1986.

[20] *See, e.g.*, "Guidelines for Troubled Real Estate Loans," Examining Circular of the OCC (Oct. 30, 1985).

Indeed, ADC-type loans and similar assets can allow thrifts to report dramatic profitability from large up-front fees and high interest rates credited from an interest reserve at the same time that the underlying project becomes a disaster. For example, one institution, for which the FSLIC was appointed received in 1985, reported profits, due to large self-funded fees, just before it in fact became hopelessly insolvent. Thus, reported profits at thrifts with high levels of ADC-type loans and similar assets can be grossly exaggerated.[21]

As indicated above, these problems are addressed to a certain extent by the classification of assets regulation recently adopted by the Board. Board Res. No. 85–1154, 50 FR 53275 (Dec. 31, 1985). Classification of assets, however, is an after-the-fact measure which, by itself, clearly does not sufficiently protect the FSLIC fund for two reasons. First, the validity of classification of assets cannot be determined until an examination is conducted; these examinations can only be performed on a periodic basis. The Board's supervisory experience indicates, however, that the overall financial stability of an institution and the performance of assets can change drastically between one examination and another and even between submissions of financial reports.

A second reason the classification of assets regulation alone is inadequate to fully address the risks associated with these types of assets is the fact that the establishment of loss reserves for specific assets to protect the FSLIC from losses quickly becomes meaningless where adjustments to income, and establishment of loss reserves under that regulation render an institution insolvent, due to inadequate capital reserves to absorb the realization of such losses. Two institutions for which FSLIC recently was appointed conservator illustrate this problem. Each of these institutions reported total net assets as of December 1985 of $665,755,000 and $306,455,000, respectively. Each institution had heavy concentrations of ADC-type loans. As a result of an examination which commenced in June 1985, it became apparent that between January 1984 and September 1985 the institutions had jointly originated 95 ADC-type loans, in excess of $1 million each, totaling $350 million.

After a review of loan appraisals by examiners, it was determined that many of these ADC-type assets should have been classified as loss or doubtful pursuant to the classification of assets regulation. Classification of the problem assets and establishment of specific loss reserves for these assets revealed that each institution was in fact insolvent. If, however, these institutions had been required to support their heavy asset concentration in ADC-type loans (29 percent and 58 percent of total net assets, respectively) with incremental capital, insolvency and potential losses to the FSLIC may have been avoided.

In these circumstances, the Board believes that it is essential that an insured institution accumulates a certain level of capital to absorb potential losses *before* it embarks upon lending strategies that entail an above-average degree of risk to it and to the FSLIC. For this reason, the incremental capital requirement proposed by the Board for such loans as part of the regulatory capital contingency factor would be in addition to any reserve required pursuant to the classification of assets regulation.

An additional problem inherent in ADC-type assets is that these assets can be improperly reported by thrifts as loans when, under proper accounting procedures, they are direct investments. To the extent that loans such as these are properly classified as direct investments, the 10 percent capital requirement proposed for all direct investments, which is discussed above, would address risk associated with such loans. However, it has been the Board's supervisory experience that even though classification problems with these types of assets should be diminished due to issuance of the Board's accounting guidelines (50 FR 18233, 18236 (1985) (to be codified at 12 CFR 571.17)), distinguishing between these types of loans and direct investments continues to be a difficult exercise. Furthermore, while examining institutions, examiners have routinely encountered ADC-type direct investments which were either intentionally or unintentionally misclassified as loans. The Board is considering issuing new accounting guidelines to address this problem; it is not clear, however, that issuance of such guidelines will be sufficient to prevent this misclassification.

The critical effect of such misclassification upon the net worth of an institution and the FSLIC fund in general is demonstrated in the examination reports of a number of failed institutions and can be illustrated by reference to an institution which required FSLIC assistance in 1985. The institution became insolvent during January, 1985, when it reported a deficit net worth of $433,151 which declined rapidly to $9.16 million. The majority of this decline was due to imprudent acquisition, development, and construction lending.

In an audit of this institution performed for the fiscal year ended June 30, 1984, pursuant to GAAP the auditors reclassified 37 ADC-type assets totalling $76,612,840 as direct investments rather than loans. That amount represented 17.1 percent of total assets for the period, and was considered to be an extremely high concentration in projects in which the institution had assumed virtually all of the economic risk. Moreover, that reclassification required corresponding adjustments to income—a reduction of $1.9 million for interest and fees not actually received from the loans and interest capitalization in the amount of $1.2 million at the institution's weighted average cost of funds—thus further reducing the institution's net worth. In addition to the auditors' findings, the examiners found $32.4 million in loans which were required to be reclassified as direct investments, with a corresponding income adjustment of $594,000.

In the Board's view, failure to require additional capital for these ADC-type assets could result in the FSLIC alone assuming the risk of misclassification and adjustments of an institution's income and net worth. In fact, failure to require additional capital for these types of loans could provide an incentive to institutions to misclassify direct investments as ADC-type loans in order to avoid the 10 percent capital requirement for direct investments.

It has been the Board's examination experience that unlike losses from the realization of adverse interest-rate risk, which often are due to changes in the macroeconomic operating environment and which may be beyond the control of individual institutions, losses on ADC-type loans stem largely from the underwriting and investment policies ("operating policies") of individual institutions. The examples discussed above reveal severe loan underwriting and loan administration deficiencies with regard to these types of loans, including failure to verify project progress prior to disbursing draws,

[21] Indeed, by growing rapidly, an institution can run a variant of a pyramid scheme whereby it keeps its reported net income positive even after the earlier real estate loans begin to go into default and the thirft plummets into even greater insolvency in reality (but not on its books). This situation was virtually out of control before the Board adopted the current net-worth rule. Even after the effective date of the current rule, however, thrifts with very large ADC portfolios grew roughly 220% faster than other thrifts. Memorandum from Joseph A. McKenzie and Connie Young to Robert Sahadi, Acting Director, OPER, dated April 14, 1986.

VOL 51 ISS 86 MY 5 1986 UMI

appraisals not conforming with the Board's Memorandum R–41b, and little or no management analysis of project feasibility or the ability of the borrower to repay the loan.

In the present deregulated environment, the operating policies adopted by each institution often assume much greater importance as the major determinant of overall performance. The Board recognizes that a principal element of deregulation is greater freedom for an individual institution to select its own operating policy.[23] Further, detailed regulation of each institution's operating policies is neither feasible due to staffing limitations nor necessary—most institutions are capable of selecting prudent operating policies if motivated to do so.

The Board also recognizes that institutions with low net worth do have an incentive to invest heavily in ADC-type loans or other high-risk investments and gamble on the return on these assets at the FSLIC's risk; in a very real sense these institutions have nothing to lose. Implementing additional capital requirements for such loans, however, would provide motivation for each institution to make prudent operating decisions and to set prudent operating policies by giving it a significant stake in adverse as well as positive outcomes for its decisions. Conversely, requiring additional capital would discourage irresponsible operating policies because the first brunt of losses from "bad" operating policies would fall on the institution's capital reserve rather than on the FSLIC insurance fund. For these reasons, the Board has preliminarily concluded that, while selection and implementation of operating policies are in an institution's discretion (with Board oversight where necessary), the freedom to set such policies should be contingent upon the institution maintaining adequate regulatory capital to assure that the brunt of "bad" operating decisions is borne first by the institution and not the FSLIC fund.

Because, as discussed above, the threat of loss to the FSLIC fund due to these types of loans is a relatively recent phenomenon and the threat, at this time, is not perceived to be as great for these loans as for direct investments, the Board is proposing a 4-percent additional capital requirement applicable to these assets. It may well be, however, that the potential threat posed to the FSLIC by these assets is as great as that posed by direct investments, and that a comparable capital requirement (10 percent) should, therefore, be assessed. The Board specifically requests comment regarding the sufficiency of a 4-percent additional capital requirement for these assets.

3. Letters of Credit

The Board is proposing a 2-percent capital requirement on letters of credit. The Board of Governors of the Federal Reserve System recently proposed a rule requiring supplemental capital on letters of credit issued by state member banks. *See* 51 FR 3976 (Jan. 31, 1986).

A letter of credit is a contingent liability of the issuer. Most letters of credit unconditionally obligate the issuer to immediately honor the letter of credit when presented for payment. While some letters of credit, namely, standby letters of credit, are written with the expectation that they will never have to be honored, they will be presented for payment only if the party that obtained the letter of credit defaulted on an obligation. Since some act of default triggers the presentation of such a letter of credit, the honoring of this type of letter of credit amounts to the extension of credit to a borrower that is in default. Letters of credit which are not triggered by an act of default, such as trade or standard letters of credit, also amount to an extension of credit to the person or entity seeking the letter of credit.

For this reason, the Board believes that it is appropriate to require a modest capital holding against these contingent liabilities. The Board specifically solicits comment regarding the appropriateness and sufficiency of a 2-percent additional capital requirement for all letters of credit.

Reduction in Required Capital for Certain Classes of Assets and Liabilities

The current net-worth requirement permits an institution to reduce its minimum required capital by deducting specified "qualifying balances". Board Res. No. 85–79B, 50 FR 6691, 6909 (1985) (to be codified at 12 CFR 563.13(b)(4)). The Board is proposing to expand the qualifying balance deduction by including additional items as eligible for this deduction and raising the maximum amount that may be deducted; it is also proposing to alter the proportion of these items eligible for the deduction. The Board believes that these changes are appropriate to more accurately reflect the reduction in an institution's risk exposure associated with a maturity-matched portfolio that has limited credit risk.

Specifically, the Board is proposing to define qualifying balances to include the institution's liquid assets as defined in 12 CFR 523.10,[23] plus its qualifying ARMs, plus one-to-four family residential mortgages represents permanent rather than construction financing or investment-grade mortgage-related securities with remaining contractual term-to-maturity of two years or less, fixed-rate liabilities with remaining term-to-maturity of three years or more (the dollar weighted average term to maturity of liabilities used in this exclusion must be at least five years) for which the institution has a comparable amount fixed-rate permanent one-to-four family residential mortgages and/or investment-grade mortgage backed securities of equal or greater maturity. This increase in the qualifying balance deduction would be subject to the limitation that for the first three years after the effective date of the regulation, if adopted in final form, an institution would not be allowed to reduce its overall capital requirement below three percent. After the third year, an institution would not be allowed to reduce its overall requirement below four percent and after the sixth year the minimum would be five percent. Because this cap is substantially higher than the current maximum deduction of ten percent of the amount of net worth that would otherwise be required, the Board is proposing to reduce from three percent to two the proportion of qualifying balances that may be deducted from the net worth requirement, except that only one percent of the amount of ARMS with lifetime caps less than 250 basis points above the rate may be excluded.

The original rationale for the qualifying balance deduction was to recognize the lessened interest rate and credit risk associated with certain types of investments and to give institutions some incentive to reduce risk. At the time that the qualifying balance deduction was adopted, the Board noted:

As proposed, the Board has adopted a reduction of the net worth requirements for insured institutions holding certain qualifying balances. The reduction is structured to

[22] In a policy statement adopted by the Board on June 23, 1984, the Board specifically recognized that the duties of boards of directors of insured institutions include overseeing the management of the various types of risk which effect their institutions. 12 CFR 571.3 (1986).

[23] A proposed amendment to the liquidity requirements, Board Res. No 86–428, published elsewhere in the Proposed Rule section of this issue, if adopted in final might result in a numbering change and could also affect the substance of the definition. When adopting any final amendments to the net worth requirement, the Board will take into account the impact of any amendments to the definition of liquid asset.

BEST COPY AVAILABLE

reflect the lower reserve needs, due to reduced risk, of institutions that hold such qualifying balances.

* * * * *

In the past, restricted asset and liability powers made it difficult for many insured institutions to alleviate maturity imbalances. At present, however, due to expanded borrowing authority, flexible-yield mortgage authority, and a growing control over deposit composition resulting from the phase-out of deposit rate controls, the Board believes these associations have the ability to begin to alleviate their maturity imbalances. Through this amendment, the Board seeks to structure the net worth requirements to reflect the reserve needs of institutions holding maturity-balancing assets and liabilities and to provide institutions with maturity imbalance problems with an incentive for restructuring their holdings of assets and liabilities to make cyclical fluctuations in profitability more manageable.

Board Res. No. 80–694 p. 6–7, 45 FR 76,111 (Nov. 6, 1980). The intervening years have demonstrated that the management of interest-rate risk through maturity matching, and credit risk through prudent investment, is imperative, and that it is incumbent on the Board to promote prudent risk management strategies by insured institutions.

Furthermore, the three Federal regulators for commercial banks have proposed a system for adjusting their current capital requirements according to the degree of risk of certain bank assets. Various types of assets, including certain off-balance sheet items, are assigned one of four broad risk categories, which are then weighted. The regulation proposed by the Federal Reserve Board ("FRB"), for example, cited the need for certain changes:

While there may be a number of reasons for these balance sheet adjustments, the Board is concerned that they may be, in part, a response to the imposition of capital requirements that do not distinguish explicitly among various risk categories of assets and that do not make explicit allowance for the lessened threat to capital inherent in low-risk activities. Thus, some banking organizations appear to be reducing their holdings of low-risk assets and deemphasizing their conduct of low-risk activities in an effort to meet more stringent capital requirements. Although these adjustments may improve or otherwise maintain capital ratios at what appear to be acceptable levels, they do not, especially in conjunction with the growth in off-balance-sheet risks, strengthen an organization's risk profile. Indeed, such adjustments could, under certain circumstances, undermine an organization's financial condition.

51 FR 3976, 3977 (Jan. 31, 1986). The Office of the Comptroller of the Currency's ("OCC") advance notice of proposed rulemaking explains the basic components of the system. This document states that this system shall not increase the capital requirements of most institutions, but could well decrease the OCC's capital requirements of 6 percent total capital and 5.5 percent primary capital. Although the risk-related elements (qualifying balances and contingency component) of the Board's current proposal differ from the FRB's and the OCC's proposed system by recognizing the land and housing-related character of thrifts' traditional assets, the risk-related considerations of the proposals are similar. *Id.*

The Board recognizes that by expanding the qualifying balance deduction it will establish an effective minimum net-worth requirement of less than six percent for some institutions. The Board wishes to encourage institutions to make loans and investments with low levels of both credit risk and interest-rate risk. Market conditions, however, may be such that institutions specializing in low-risk housing-related investments may be unable to achieve a competitive rate of return on their equity if minimum regulatory capital is set at six percent of liabilities. In expanding the qualifying balance deduction, the Board is proposing to allow institutions specializing in low-risk investments to achieve higher leverage and thereby generate a competitive rate of return on equity.

Specifically, the Board is proposing to allow inclusion in the qualifying balance of all "qualifying" adjustable-rate mortgages. This would replace the current regulation permitting qualifying balance treatment for half of all adjustable-rate mortgages. A qualifying adjustable-rate mortgage is one that meets *all* the following criteria:

- It is secured by an owner-occupied, one-to-four family dwelling;
- The initial loan-to-value ratio is 80 percent or less, or amounts in excess of 80 percent are covered by private mortgage insurance;
- The first rate-change date is no more than 24 months after closing;
- Subsequent rate-change dates are at intervals no greater than one year;
- Limitations on the amount of annual rate-change, if included, permit annual changes of at least one percent;
- If a maximum lifetime rate is included, it must be at least five percent above the fully indexed initial rate (this is what the first-year rate would be without any initial rate concession);
- The rate on the loan is not at its life-of-loan maximum rate, provided that if the rate is less than 250 basis points below the maximum, the deduction is limited to one percent of the amount of the loan.

A mortgage that meets these conditions has the limited credit risk usually associated with home mortgages, and is protected from interest-rate risk by the adjustment feature.

Second, the Board is proposing to include in the qualifying balance deduction certain one-to-four family mortgage loans. This deduction would be limited to loans secured by first liens, not including loans for construction or home improvement. The proposal also includes investment grade mortgage-backed securities (as defined in 12 U.S.C. 1464(c)(1)(S))[24] that have a contractual remaining term to maturity of two years or less. These securities are generally backed by one-to-four family mortgages, or guaranteed by a government agency such as the Federal National Mortgage Association or the Federal Home Loan Mortgage Corporation. Securities that are backed by nontraditional mortgages, such as mortgages on commercial property, are overcollateralized as much as 250% in order to secure the investment-grade rating, thus making credit risk to the purchaser of the security slight [25]. Therefore, these mortgages and mortgage-backed securities generally are intrinsically safe investments with little credit risk; the short time to maturity reduces interest-rate risk to acceptable levels.

The Board is also proposing to impose new limits on one aspect of qualifying balances. The current credit for fixed-rate liabilities with remaining maturity of more than five years will be revised so that the remaining maturity is three years or more but the weighted average is at least five years. Also, the deduction will be allowed only so long as the institution has one-to-four family residential mortgages or investment-grade mortgage-related securities of equal or greater maturity. This recognizes the appropriate match already existing at many institutions between these assets and liabilities.

Finally, the Board is proposing that during the first three years after the effective date of this amendment, an institution could not use the deduction to reduce its overall capital requirement

[24] Section 5(c)(1)(S) of the Home Owners' Loan Act, 12 U.S.C. 1464(c)(1)(S) (1982 & Supp. II 1984) permits investment by federally-chartered associations in mortgage-backed securities, defined to include mortgage-related securities as defined in section 3(a)(41) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(41)). This definition generally encompasses collateralized mortgage obligations.

[25] As noted below, overcollateralization may indicate some risk to the issuer of such a security.

VOL 51 ISS 86 MY 5 1986 UMI

below three percent. For years four through six, the minimum would be four percent, and thereafter the deduction for qualifying balances could not reduce an institution's overall requirement below five percent. The Board believes that this phased approach will encourage lower-risk investment without permitting net worth to be impaired.

The rationale for these changes is to recognize the low level of interest-rate risk associated with these assets and liabilities. The Board believes the approach of giving credit for certain categories is the best practicable operational scheme.

The most comprehensive measure of interest-rate risk is duration gap. [26] This is the difference between duration of assets and duration of liabilities. Duration is a concept of corporate finance, and it is a time-denominated summary measure of the receipt of the cash flows from an asset. For example, since mortgages have periodic interest payments, repayments, an prepayments, the duration of a mortgage is much less than its stated maturity.

While duration gap is the ideal interest-rate risk measure, it is operationally difficult to compute. It would require institutions to report the information currently required on section H of the Board's Quarterly Report in much more detail. This would impose an additional reporting burden, and the data would be difficult to verify. Furthermore, the calculation of duration requires a set of explicit assumptions regarding the rate of prepayment of every coupon class of mortgages.

Alternatively, the Board could use a hedged gap figure it now computes from the section H data from each institution. The hedged gap is the difference between the dollar value of assets maturing or repricing within a set time period and the corresponding liabilities, all divided by assets; the data are adjusted for hedging activities. The hedged gap, like duration, depends upon explicit prepayment assumptions. Unlike duration, the hedged gap is not a summary measure; rather it is a one-year gap, a two-year gap, and a forth. However, the Board believes that to select a specific gap to be the key element in net worth calculation would decrease an association's inclination and responsibility to monitor all gaps. The limiting effect of a rigid decision to determine a single point above which extra capital is required and beneath which less capital is required is also a consideration. Consequently, the Board has, for pruposes of this proposal, adopted the approach of recognizing matches between specific assets and liabilities rather than a gap analysis approach.

The Board specifically solicits comments on whether to give consideration to hedging techniques and/or interest-rate swaps that may significantly reduce an institution's interest-rate risk exposure. The Board is concerned with the feasibility of monitoring the use of these techniques to assure that they are effectively reducing an institution's interest-rate risk.

Miscellaneous

Finance Subsidiary Exclusions. Section 563.13–2(c)(1) of the Board's regulation excludes from computation of a parent institution's total liabilities for net worth purposes the amount of new proceeds of certain securities issued through finance subsidiaries and certain other designated subsidiaries, if the securities issuance and the supporting collateral are substantilly duration matched. Board Res. No. 85–1155, 50 FR 53260 (Dec. 31, 1985). This exclusion was justified on the grounds that this duration-matching virtually eliminated any interest-rate risk for the parent institution from the finance subsidiary's securities issuance. While the Board still believes that such an exclusion gives institutions greater flexibility in financing, the Board is concerned that the finance subsidiary may subject the parent to credit risk without a corresponding capital requirement. Many securities issuances issued directly or indirectly by finance subsidiaries are collateralized at rates of between 103 and 105 percent by mortgage-backed securities issued by, or guaranteed as to principal and interest by the Federal Home Loan Mortgage Corporation, Federal National Mortgage Corporation or Government National Mortgage Corporation. However, a limited number of securities issuances backed by other types of mortgages and receivables are collateralized (as authorized by the regulation) at up to 250 percent of the gross proceeds of the securities issued. Such overcollateralization can reflect market concern for the quality of the underlying collateral. Therefore, investors may demand concessions on price, collateral level, and collateral substitution that will cause significant credit risk to be absorbed by the issuing finance subsidiary and its parent institution. The Board also seeks to remove any regulatory incentive for institutions to originate or purchase assets of dubious quality. For these reasons, the Board is hesitant to exclude from an institution's total liabilities the new proceeds of issuances that require substantial overcollateralization.

Accordingly, the Board proposes to limit the execlusion under § 563.13–2(b)(1) to those securities that are substantially duration-matched and that are collateralized by assets whose market value is less than 110 percent of the gross proceeds of the securities issuance. The Board solicits comment on the appropriateness of this overcollateralization maximum for duration-matched securities issuances and on other means of addressing the credit risk of such issuances.

Solicitation of Comments

The Board solicits comments on all aspects of this proposed regulation. The Board specifically requests comments on the relationship of this proposal with the rule also proposed today defining regulatory capital in accordance with GAAP as modified by the Board to reflect regulatory risk and requiring insured institutions to prepare all Board-required financial statements and financial reports in accordance with GAAP. Commenters also should address alternative methods of addressing the Board's concerns and achieving the Board's goals set forth in either regulation in an equally effective manner.

Finally, the Board wishes to reiterate that if this proposed regulation is adopted substantially as proposed, the Board anticipates that it would become effective on October 1, 1986. If adopted in final, insured institutions would be required to compute their regulatory capital requirements under this regulation for the first time on December 31, 1986. As under the current regulation, insured institutions would be required to meet this regulatory capital requirement on the date it is computed, in this case on December 31, 1986.

Initial Regulatory Flexibility Analysis

Pursuant to section 3 of the Regulatory Flexibility Act, 5 U.S.C. 603, the Board is providing the following regulatory flexibility analysis.

1. *Reasons, objectives and legal basis underlying the proposed rule.* These elements are incorporated above in the **SUPPLEMENTARY INFORMATION** regarding the proposal.

2. *Small entities to which the proposed rule would apply.* The proposed rule would apply to institutions whose accounts are insured by the FSLIC.

3. *Impact of the proposed rule on small institutions.* The proposed rule would eliminate for insured institutions with assets of $100 million or less preferential treatment in calculating the growth factor under § 563.3(g)(4) of the Board's regulations and the exemption for such institutions from § 563.13–1 for the reasons discussed above in the **SUPPLEMENTARY INFORMATION** regarding the proposal. The proposed regulations would treat all institutions identically regardless of their size.

4. *Overlopping or conflicting federal rules.* There are no known federal rules that duplicate, overlap, or conflict with this proposal.

5. *Alternatives to the proposed rule.* There are no alternatives that would be less burdensome than the proposal in addressing the concerns expressed in the **SUPPLEMENTARY INFORMATION** set forth above.

List of Subjects in 12 CFR Parts 561 and 563.

Bank deposit insurance, Investments, Reporting and recordkeeping requirements, Savings and loan associations.

Accordingly, the Board hereby proposes to amend Parts 561 and 563 of Subchapter D, Chapter V, Title 12, Code of Federal Regulations, as set forth below.

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

1. Amend this Chapter V by removing the phrases "net-worth" or "regulatory net worth" wherever they appear in this chapter and by substituting the phrase "regulatory capital".

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 561—DEFINITIONS

2. The authority citation for Part 561 continues to read as follows:

Authority: Pub. L. 95–147 of Oct. 28, 1977, Sec. 4, 82 Stat. 856, sec. 4, 80 Stat. 824, sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1425a, 1425b, and 1437); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); sec. 202, 96 Stat. 1469; sec. 409, 94 Stat. 160; secs. 401–407, 48 Stat. 1255–1260, as amended (12 U.S.C. 1724–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–1948 Comp., p. 1071, unless otherwise noted.

3. Amend Part 561 by adding new §§ 561.18 and 561.19 to read as follows:

§ 561.18 Land loan.

The term "land loans" means a loan:

(a) Secured by real estate upon which all facilities and improvements have been completely installed, as required by local regulations and practices, so that it is entirely prepared for the erection of structures thereon;

(b) To finance the purchase of land and the accomplishment of all improvements required to convert it to developed building lots; and

(c) Secured by land upon which there is no structure.

§ 561.19 Nonresidential construction loan.

The term "nonresidential construction loan" means a loan for the construciton of structures other than one-to-four family residences.

PART 563—OPERATIONS

4. The authority citation for Part 563 continues to read as follows:

Authority: Pub. L. 95–147 of Oct. 28, 1977, Sec. 4, 82 Stat. 856, sec. 4, 80 Stat. 824, sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1425a, 1425b, and 1437); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); sec. 202, 96 Stat. 1469; sec. 409, 94 Stat. 160; secs. 401–407, 48 Stat. 1255–1260, as amended (12 U.S.C. 1724–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–1948 Comp., p. 1071, unless otherwise noted.

5. Amend § 563.13 by revising paragraph (a)(1), (b)(1), (2), (3)(i), (ii), (b)(4) and (5), and paragraphs (g) and (h) to read as follows:

§ 563.13 Regulatory Capital Requirement.

(a) *Scope.* (1) This section sets forth the requirements for the maintenance of regulatory capital, as defined in § 563.13 of this subchapter, by insured institutions. Compliance with the requirements of this section shall be considered to be compliance with the reserve requirements of section 403(b) of the National Housing Act (12 U.S.C. 1726(b)). Any reference to "net worth" or "regulatory new worth" in this subchapter shall be deemed to be a reference to regualtory capital.

* * * * *

(b) *Minimum required amount.*—(1) *General Rule.* Except as provided in paragaphs (b)(2) and (b)(3) of this section, the minimum regulatory capital requirement for any calendar quarter (commencing with the quarter ending December 31, 1986) shall be an amount equal to the sum of the following:

(i) The liability component; and

(ii) The contingency component

minus any deduction for qualifying balances (as defined in paragraph (b)(4) of this section).

An institution's required amount of regulatory capital under this computation method shall not be less than three percent of total liabilities for the period from December 31, 1986 until December 31, 1988; and shall not be less than four percent of total liabilities for the period from December 31, 1988 until December 31, 1992; and shall not be less than five percent of total liabilities on or after January 1, 1993.

(2) *Exceptions for de novo and other institutions.* (i) The minimum regulatory capital requirement for *de novo* institutions shall be an amount computed in accordance with paragraph (b)(1), but the liability component for such an institution shall be seven percent of its total liabilities from its commencement of operations through its first full fiscal year, and six percent of total liabilities thereafter: *Provided,* that the mininim required amount of regulatory capital for such institutions shall not be less than five percent of their total liabilities.

(ii) *De novo* institutions which elect to have their applications for insurance of accounts processed in accordance with the policy set forth in § 571.6(a)(2) of this subchapter, but that do not additionally qualify under § 571.6(a)(3), shall have a minimum amount of regulatory capital computed in accordance with paragraph (b)(1), but the liability component for such an institution shall be seven percent of its total liabilities for the period between the commencement of operations through its first three full fiscal years, and six percent of liabilities thereafter: *Provided,* that the minimum required amount of regulatory capital for such institutions shall not be less than five percent of their total liabilities.

(iii) Institutions other than *de novo* institutions that are required to meet regulatory capital requirements exceeding the initial minimum three percent requirement under paragraph (b)(1) of this section (including institutions formerly insured by the Federal Deposit Insurance Corporation or by privately funded insurance systems) shall have liability components equal to the higher of the liabilities-related portion of their specifically mandated capital requirements or the minimum amount of regulatory capital required under paragraph (b)(1).

(3) *Mergers, consolidations, or purchases of assets and assumption of liabilities.* (i) Except as provided in paragraph (b)(3)(ii) and (iii), for any merge, consolidation, or purchase of assets and assumption of liabilities, the minimum regulatory capital requirement, beginning in the quarter in which the transaction became effective, shall be equal to the sum of each of the institutions' liability components (which for *de novo* institutions and other types of institutions not subject to the initial minimum three percent requirement

VOL 51 ISS 86 MY 5 1986 UMI

shall constitute the liability-based portion of their minimum regulatory capital requirements) and contingency components minus any qualifying balance deductions, and subject to the applicable minimum requirements (three, four or five percent depending on the time period) set forth in paragraph (b)(1).

(ii) For any acquisition of less than substantially all of the liabilities of an institution in which the selling institution continues in operation as a separate entity (including, but not limited to, branch acquisitions), the base liabilities of the acquired institution beginning in the quarter in which the transaction becomes effective shall be the base liabilities of the acquiring institution calculated to include an amount equal to the liabilities so acquired. The acquiring institution's minimum amount of regulatory capital shall be computed by the method set forth in paragraph (b)(1) of this section.

(iii) * * *

(4) *Qualifying Balance Deduction.* (i) The amount of the minimum regulatory capital requirement imposed by paragraphs (b) (1), (2), (3) or (4) of this section will be reduced by two cents for each dollar of "qualifying balances" held by an institution: *Provided,* that the total amount of deductions allowed pursuant to this paragraph shall not reduce an institution's minimum regulatory capital requirement otherwise imposed by paragraphs (b) (1), (2), (3) of (4) below three percent of total liabilities for any period until December 31, 1989; below four percent of total liabilities for the period from December 31, 1989, until December 31, 1992; and shall not be less than five percent of total liabilities on or after January 1, 1993.

(ii) "Qualifying balances," as used in this paragraph means

(*a*) Interest-bearing liquid assets, as described in § 523.10 of this Chapter (including accrued interest on unpledged assets that qualify as liquid assets within that definition or that would so qualify except for their maturities), provided that they will mature within one year;

(*b*) All "qualifying" adjustable-rate mortgages, which include only those adjustable-rate mortgages that meet all of the following criteria: (*i*) are secured by owner-occupied, one-to-four family dwellings, (*ii*) incorporate a first rate-change date no more than 24 months after closing, (*iii*) establish subsequent rate-change dates at intervals no greater than one year with permissible rate-changes of at least one percent, (*iv*) include a maximum life-of-loan rate at least five percent above the fully indexed first-year initial rate, excluding any initial rate concession, (*v*) include a maximum loan-to-value ratio of 80 percent or private mortgage insurance on the difference between the loan amount and 80 percent of value, and (*vi*) the current rate of the loan is not at its life-of-loan maximum rate, *Provided,* that if the current rate is less than 250 basis points below the maximum rate, the qualifying balance deduction pursuant to subparagraph (b) will be limited to one percent of the amount of the loan;

(*c*) All one-to-four family residential mortgage loans secured by first liens that are not for the purpose of financing construction, and investment-grade mortgage-backed securities (as defined in 12 U.S.C. 1464(c)(1)(S)) with a remaining term to maturity of two years or less; and

(*d*) Fixed-rate liability sources of funds (including outside borrowings and Federal Home Loan Bank advances but excluding certificate accounts permitting withdrawal of account funds prior to maturity) that have a remaining term to maturity of more than three years (the dollar weighted average term-to-maturity of liabilities used in this exclusion must be at least 5 years) only so long as such sources of funds are offset by permanent one-to-four family residential mortgages or investment-grade mortgage-backed securities (as defined in 12 U.S.C. 1464(c)(1)(S)) of equal or greater maturity.

(5) *Calculation period and maintenance requirement.* An institution shall calculate its minimum regulatory capital requirement pursuant to this section as of the end of each calendar quarter commencing with the quarter ending December 31, 1986 and shall maintain regulatory capital in an amount not less than the minimum requirement so calculated from the end of the quarter for which the minimum requirement was calculated until the end of the next succeeding calendar quarter.

* * * * *

(g) *Definitions.* For purposes of this section.

(1) "Total liabilities" means total assets net of loans in process, specific reserves and deferred credits other than deferred taxes, minus regulatory capital as defined in § 561.13 of this subchapter.

(2) "Base liabilities amount" means an amount of capital which equals the higher of

(i) An institution's base liabilities multiplied by the liability factor for that quarter, or

(ii) The sum of an institution's base factor, growth factor (adjusted for decreases in liabilities in accordance with § 563.13(g)(4)(i)(*b*)), and amortization factor as of October 1, 1986 (its "October base").

(3) "Base liabilities" means an institution's level of total liabilities on [the effective date of this regulation] or the institution's total liabilities at the end of a quarter for which regulatory capital is being computed if less than its total liabilities on [the effective date of this regulation].

(4) "Increased liabilities amount" means an amount of capital equal of six percent of an institution's total liabilities in excess of its base liabilities.

(5) "Liability component", except as otherwise provided in paragraph (b)(2) and (b)(3) of this section, means an amount of capital equal to

(i) For the period commencing October 1, 1986 and ending December 31, 1992 an institution's base liabilities amount plus its increased liabilities amount;

(ii) For the period commencing January 1, 1993 six percent of total liabilities.

(6) "Liability factor" means a percentage rate of base liabilities that will be three percent in the first quarter that this regulation is effective and that will increase by .125 percent per quarter (.5 percent per year) until equal to six percent.

(7) "Contingency Component" is the sum of:

(i) Two percent of recourse liabilities (as that term is defined in § 561.8 of this subchapter) resulting from the sale of any loan;

(ii) Twenty percent of the institution's scheduled items (as that term is defined in § 561.15 of this subchapter);

(iii) Subject to the provisions of paragraph (g)(7)(iii)(*b*) of this section,

(*a*) An amount equal to ten percent of the dollar amount of aggregate direct investment as defined in § 563.9–8(b)(1) of this subchapter made after December 10, 1984;

(*b*) For the purposes of paragraph (g)(7)(iii)(*a*) of this section,

(*1*) "Made after December 10, 1984" excludes such investments to which the institution was legally committed on or before that date, or such projects for which definitive plans were in existence on or before that date;

(*2*) Investments made in any service corporation or operating subsidiary may be excluded *Provided,* that any investment made by such service corporation or operating subsidiary which if made by the parent would be included in the parent's contingency component shall be included in the total of such investments of the parent institution.

(iv) Four percent of all land loans and nonresidential construction loans;

(v) Two percent of all letters of credit.

(8) "De novo institution" means a savings and loan association, building and loan association, homestead association, cooperative bank or savings bank which has filed with the appropriate Federal Home Loan Bank and application for insurance of accounts, or a request for a commitment to insure accounts, or an application to organize a Federal association, which was not approved prior to December 2, 1983, and the business of which has not been conducted previously under any charter.

(h) *Transactions for purpose of evasion.* An institution's Principal Supervisory Agent may disregard any transaction entered into primarily for the purposes of reducing an institution's minimum required amount of regulatory capital, or otherwise evading the requirements of this section. An institution may seek review and final decision by the Corporation of any such determination.

6. Revise § 563.13–1 to read as follows:

§ 563.13–1 Liability growth.

(a)(1) No insured institution shall increase its total liabilities within any two-quarter period at a rate greater than 12.50 percent without prior approval of the institution's Principal Supervisory Agent.

(2)(i) The rate of increase in liability growth requiring prior approval under paragraph (a)(1) shall be computed by subtracting an institution's total liabilities as of the beginning of a two-consecutive-quarter period from its total liabilities as of the end of the two-consecutive-quarter period. This amount shall not exceed 12.5 percent of the institution's total liabilities as of the beginning of the two-consecutive-quarter period, unless expressly approved in advance by the institution's Principal Supervisory Agent.

(ii) The method of computation set forth in paragraph (a)(2)(i) of this section shall be used by an institution commencing operations as an insured institution or initially becoming subject to this regulation, although such an institution's first computation under this section must be made at the end of the second quarter during which the institution operates or is subject to this regulation for all or a portion of the quarter. If an institution commences operation or initially becomes subject to this regulation within a quarter, the institution shall be permitted to grow up to 6.25 percent during that quarter.

(iii) For purposes of computing an institution's growth pursuant to paragraph (b)(i) and (ii) of this section, an institution's total liabilities as of the beginning of a two-consecutive-quarter period shall include (*a*) any increases in liabilities during the two-quarter period resulting from the acquisition of substantially less than all of the liabilities of an institution after which the selling institution continues in operation as a separate entity (including, but not limited to, branch acquisitions), and (*b*) the total liabilities of the merged and continuing institutions as of the beginning of the two-quarter period in the case of a merger, consolidation, or purchase of assets and assumption of liabilities that occur during the two-quarter period.

(3) Nothwithstanding the provisions of paragraphs (a)(1) or (2) of this section, an insured institution which increases its liabilities through merger, consolidation, or purchase of assets and assumption of liabilities, for which prior review and approval under §563.22 of this part is required, shall not be required to file an application under paragraph (b) unless such institution otherwise increases its liabilities by an amount in excess of 12.50 percent within any two consecutive quarter period.

(b) To obtain the prior written approval from its Principal Supervisory Agent, an institution shall submit a written growth plan. A growth plan shall cover a period of time not to exceed one year, and shall include the following information:

(1) The institution's regulatory capital as of the end of the preceding calendar quarter and its estimated regulatory capital as of the end of the period covered by the growth plan;

(2) The amount of liabilities the institution expects to obtain;

(3) A listing of the proposed sources of and the methods by which the liabilities will be obtained;

(4) The costs, rates, and maturities of liabilities sought to be obtained; and

(5) The planned uses of any liabilities obtained.

(c) No institution shall alter a written growth plan upon which approval has been granted or materially diverge from such a plan without the prior approval of its Principal Supervisory Agent.

(d) Within ten days of the filing of a growth plan or any additional information, the Principal Supervisory Agent shall notify the applicant in writing either that all information required under paragraph (b) of this section has been filed or that additional specified information must be filed. Unless the Principal Supervisory Agent takes objection to, or conditionally approves the plan within 30 days of the date of written notice that all required information has been filed, the plan shall be deemed to be approved. Based on the institution's growth plan, the Principal Supervisory Agent may require an institution to maintain not more than four percent additional regulatory capital over that required by § 563.13(b)(1) on all or a portion of the institution's growth over the 12.50 percent rate computed in accordance with paragraph (a) of this section. In determining whether to take objection to a growth plan, to conditionally approve a growth plan, or to require additional regulatory capital, the Principal Supervisory Agent shall consider the following factors:

(1) The impact of the plan upon the institution's regulatory capital;

(2) The risk of the corresponding investments, the likelihood of obtaining the projected return, the level of diversification, and the ability of the institution to underwrite the incremental volume of investments;

(3) The relative maturities of the liabilities and corresponding investments;

(4) The extent to which the liabilities are derived from or through a single source;

(5) Whether the interest to be paid on the liabilities corresponds with generally prevailing rates for similar liabilities;

(6) The financial strength of the institution, including the level of its regulatory capital which shall not be less than that required by § 563.13(b);

(7) The stability of the institution's earnings over the six preceding calendar quarters;

(8) The extent to which the institution's overall policies are consistent with economical home financing, as evidenced by whether the institution would comply with the definition of "qualified institution" set forth in § 584.2–2(b) of this chapter; and

(9) Whether the overall policies, conditions, and operation of the applicant afford a basis for supervisory objection.

§ 563.13–2 [Amended]

7. Amend § 563.13–2(c)(1) by adding after the word "management" the phrase "and collateralized by assets whose market value (exclusive of the reduction of such market values for credit considerations) is less than 110 percent of the gross proceeds of the securities issuance."

FEDERAL TRADE COMMISSON

16 CFR Part 13

[File No. 821-0143]

Lithium Corporation of America; Proposed Consent Agreement With Analysis to Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed Consent Agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would prohibit, among other things, a Gastonia, North Carolina chemical company from entering into any agreements fixing prices or restricting sales of any lithium product. Additionally, respondent would be prohibited from acting as an agent for any lithium producer when such action might unreasonably restrain competition.

DATE: Comments will be received until July 7, 1986.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th St. and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: FTC/G-402, Jerry Philpott, Washington, DC 20580. (202) 254-7051.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and section 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

Chemicals, Trade practices.

Before Federal Trade Commission

[File No. 821-0143]

Agreement Containing Consent Order

In the Matter of Lithium Corporation of America, a corporation.

The Federal Trade Commission (Commission) has initiated a non-public investigation of certain aspects of the structure and conduct of the market for lithium and certain producers and sellers thereof including Glithco Energy Corporation (Glithco), formerly Lithium Corporation of America, a wholly owned subsidiary of Gulf Resources and Chemical Corp. On or about July 19, 1985, Lithium Corporation of America (LCA), a new corporate entity, acquired substantially all of the assets of Glithco Energy Corporation. LCA and Glithco having been furnished with a copy of a draft complaint that the Bureau of Competition proposed to present to the Commission for its consideration and which, if issued by the Commission, would have charged Glithco with violating the Federal Trade Commission Act; and it now appearing that counsel for the Commission and for LCA are willing to enter into an agreement containing an Order in settlement of that complaint:

It is hereby agreed by and between LCA, by its duly authorized officer and attorney, and counsel for the Commission, that:

1. Lithium Corporation of America (LCA) is a corporation organized, existing and doing business under and by virtue of the laws of the State of Delaware maintaining its principal offices at 449 North Cox Road, Gastonia, North Carolina 28052.

2. On or about July 19, 1985, LCA acquired substantially all of the assets of Glithco Energy Corporation, formerly Lithium Corporation of America, a wholly owned subsidiary of Gulf Resources and Chemical Corporation.

3. LCA admits all of the jurisdictional facts set forth in the draft complaint attached hereto.

4. LCA waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seeks judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and,

(d) Any claim under the Equal Access to Justice Act.

5. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify LCA, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

6. This agreement is for settlement purposes only and does not constitute an admission by LCA that the law has been violated as alleged in the draft complaint attached hereto.

7. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to provisions of § 2.34 of the Commission's Rules, 16. CFR 2.34, the Commission may, without further notice to LCA, (1) issue its complaint corresponding in form and substance with the draft complaint attached hereto and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service upon LCA. Delivery by the U.S. Postal Service of the complaint and decision containing the following order to LCA's address as stated in this agreement shall constitute sufficient service. LCA waives any right it may have to any other manner of service.

8. The complaint contemplated hereby may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

9. LCA has read the complaint and order contemplated hereby. LCA understands that once the order has been issued, it will be required to file one or more compliance reports showing it has fully complied with the order. LCA further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

For the purpose of this Order, the following definitions shall apply:

1. "LCA" means Lithium Corporation of America, as well as its officers, employees, divisions, subsidiaries, successors, assigns and the officers or employees of LCA's divisions, subsidiaries, successors and assigns.

2. "Lithium product(s)" means any lithium chemical mined, extracted or milled from a natural resource including but not limited to: (a) Lithium ore (petalite, lepidolite or spodumene); (b) lithium carbonate; (c) lithium hydroxide; (d) lithium chloride; and (e) lithium sulfate.

3. "Person" means any natural person, corporate entity (including subsidiaries thereof), partnership, joint venture, trust, association, governmental or other legal entity whether foreign or domestic.

4. "Lithium seller" means any person engaged in the mining, extracting, milling or sale of any lithium product.

5. "Lithium producer" means any person engaged in the production of any lithium product by mining, extracting, or milling such product from a natural resource, or the exclusive or substantially exclusive agent or distributor of such person in the sale or distribution of such lithium product. Lithium producer does not include any joint venture between LCA and other persons none of which is engaged in the production by mining, extracting or milling of any lithium product or is the exclusive or substantially exclusive agent or distributor of such person in the sale or distribution of such lithium product.

6. "Nonpublic information" means trade secrets or commercial or financial information which is confidential and has not been disseminated to the public.

7. "Sub-HSR transaction" means acquiring, directly or indirectly, the stock, share capital or assets of or any other interest in any lithium seller that is not reportable under the provisions of Section 7A of the Clayton Act, 15 U.S.C. 18a, and the rules promulgated thereunder but would be reportable if:

A. the Size-of-the-Parties Test as set forth in Section 7A(a)(2) of the Clayton Act were deemed inapplicable; and

B. five (5) million dollars were substituted for fifteen (15) million dollars in the size of transaction test set forth in Section 7A(a)(3)(B) as well as The Minimum Dollar Value Exemption set forth in Rule § 802.20(a).

8. "Tolling" means the secondary-recovery of any lithium chemical by a person for which such services are compensated.

I.

It is ordered that LCA shall cease and desist, directly or indirectly, or through any corporate or other device in connection with the offering for sale, sale or distribution of any lithium product in or affecting commerce as "commerce" is defined in the Federal Trade Commission Act, as amended, from, directly or indirectly:

A. Entering into, cooperating in or carrying out any agreement, combination, conspiracy, understanding or planned common course of action between or among itself and any lithium producer to:

1. Adopt, establish, fix or maintain, directly or indirectly, the price, terms or conditions of sale for the sale of any lithium product to any third person; or

2. Refuse to deal with any third person seeking to purchase any lithium product from any lithium producer.

B. Soliciting, inducing, coercing, intimidating or compelling any lithium producer to refuse to deal with any person seeking to purchase any lithium product.

C. Taking any action to communicate, furnish, exchange, receive or discuss, directly or indirectly, with any lithium producer any nonpublic information relating to:

1. The price, terms or conditions of sale for any lithium product;

2. The costs of mining, extracting, milling, or selling any lithium product;

3. Forecasts of sales or supply of any lithium product; or

4. Plans for marketing any lithium product.

Provided, however, that nothing contained in Subparagraph C of this Paragraph shall prohibit LCA from:

Providing to or receiving from any lithium producer such information as is reasonably necessary for and solely related to the good faith negotiating for, entering into, or carrying out (a) a purchase, sale or tolling agreement of any lithium product between LCA and such lithium producer; (b) acquisition of LCA or a substantial portion of its business or the acquisition by LCA of all or a substantial part of any lithium producer; and (c) any joint venture involving another lithium producer that is not reportable under Paragraph IV of this Order.

II.

It is further ordered that LCA shall cease and desist, directly or indirectly, or through any corporate or other device in connection with the offering for sale, sale or distribution of any lithium product in or affecting commerce as "commerce" is defined in the Federal Trade Commission Act, as amended, from purchasing from any lithium producer and reselling, or acting as an agent for any lithium producer in the sale of, any lithium product where such purchase, resale or agency unreasonably restrains competition.

III.

Paragraphs I and II of this Order do not prohibit conduct that is permitted by the Export Trading Company Act of 1982, 15 U.S.C. 4001-4021 (1982), or the Webb-Pomerene Act, 15 U.S.C. 61-66 (1982), or any amendments thereto, or conduct to which Subsection (a) of Section 5 of the Federal Trade Commission Act does not apply under the Foreign Trade Antitrust Improvements Act of 1982, Public Law 97-290, Title IV, or any amendments thereto. If within five (5) years from the date this Order becomes final, an application is made by LCA under Title III of the Export Trading Company Act of 1982 for an Export Trade Certificate of Review relating to any lithium product, copies of the application and all documents filed by LCA in support thereof shall be filed simultaneously with the Commission.

IV.

It is further ordered that for a period of five (5) years from the date this Order becomes final, LCA shall within twenty (20) days after entering into any sub-HSR transaction provide the Federal Trade Commission written notification of such transaction and provide such information for LCA and the acquired party as required by the Notification and Report Form set forth in the Appendix to Part 803 of Title 16 of the Code of Federal Regulations, as amended.

V.

It is further ordered that LCA shall, within sixty (60) days after service upon it of this Order, file with the Commission a report in writing, setting forth in detail the manner and form in which it has complied with this Order. LCA also shall submit such further written reports as the staff of the Commission may from time to time request in writing to assure compliance with this Order.

VI.

It is further ordered that LCA shall notify the Commission at least thirty (30)

VOL 51 ISS 86 MY 5 1986 UMI

days prior to any proposed corporate change, such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation that may affect compliance with the obligations arising out of this Order.

Analysis of Proposed Order to Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Lithium Corporation of American (LCA).

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Complaint

LCA is a Delaware corporation that mines lithium ore and processes it into lithium chemicals, which it sells in the United States and elsewhere. The complaint prepared for issuance by the Commission with the proposed order alleges that since at least 1980 and continuing at least until June 1984, Glithco Energy Corporation [1] agreed with two Chinese companies to restrain trade in lithium products. According to the complaint, Glithco agreed with China Metallurgical Import and Export Corporation (CMIEC) and Xinjiang Non-Ferrous Metals Corporation (XNMC) that Glithco would purchase lithium hydroxide from CMIEC and that CMIEC would refuse to deal with chemical traders seeking to purchase lithium. XNMC manufactured, and CMIEC sold, lithium in competition with Glithco.

As a result of this conduct, the complaint alleges, competition between Glithco, CMIEC, and XNMC in the sale of lithium products was reduced or eliminated. Competition between Glithco and other chemical traders of lithium products was also reduced or eliminated as a result of Glithco's exclusive distribution agreement with CMIEC and its actions to ensure that CMIEC would refuse to deal with such traders. The complaint also alleges that consumers of lithium products have been deprived of free and open competition in the trading of those products and that the importation of lithium products into the United States has been restrained.

The Proposed Order

The proposed order is intended to prohibit LCA from restraining competition in lithium products and thereby to assure that the market is open to competition by the Chinese firms, chemical traders, and others who wish to sell lithium products in United States commerce.

Paragraph I of the order prohibits LCA from entering into or carrying out any agreement involving any other lithium producer to fix the price of any lithium product or to refuse to deal with any third person that seeks to purchase any lithium product. LCA is also prohibited by this paragraph from soliciting or coercing any such agreement to refuse to deal and from exchanging certain categories of non-public information with any other lithium producer.

Paragraph II of the order prohibits LCA from purchasing and reselling any lithium product, or acting as an agent in the sale of any lithium product, where its activities unreasonably restrain competition.

Paragraph III of the order provides that Paragraphs I and II do not prohibit conduct permitted under the Export Trading Company At of 1982 or the Webb-Pomerene Act.

Paragraph IV of the order requires that for a five-year period, LCA must notify the Commission within twenty days after it enters into certain acquisitions of lithium sellers that would not be reportable under the Hart-Scott-Rodino Act's premerger notification provisions.

Paragraphs V and VI are procedural. Paragraph V requires LCA to file a compliance report within sixty days of service of the order. Paragraph VI requires LCA to notify the Commission at least thirty days in advance of any important changes in its corporate structure, such as dissolution or sale.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Emily H. Rock,

Secretary.

BILLING CODE 6750-01-M

[1] Glithco was formerly Lithium Corporation of America, as wholly owned subsidiary of Gulf Resources and Chemical Corporation. On or about July 19, 1985, LCA, a new corporate entity, acquired substantially all of the assets of Glithco.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD796-12]

Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, SC

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of the South Carolina Department of Highways and Public Transportation and local government representatives the Coast Guard is considering changing the regulations governing the Ben Sawyer Bridge, mile 462.2 at Sullivans Island, by permitting weekend openings to be further limited. This proposed is being made because of reports of vehicular congestion. This action should accommodate the needs of vehicular trafic yet still provide for the reasonable needs of navigation.

DATE: Comments must be received on or before June 19, 1986.

ADDRESSES: Comments should be mailed to Commander (oan), Seventh Coast Guard District, 51 SW. 1st Avenue, Miami, Florida 33130. The comments and other materials referenced in this notice will be available for inspection and copying at 51 SW. 1st Avenue, Room 816, Miami, Florida. Normal office hours are from 7:30 a.m. to 4 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Mr. Walt Paskowsky, (305) 536-4103.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal. Persons desiring acknowledgment that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Commander, Seventh Coast Guard District, will evaluate all communications received and determine a course of final action on this proposal. The proposed regulations may be changed in light of comments received.

Drafting Information

The drafters of this notice are Mr. Walt Paskowsky, Bridge Administration Specialist, project officer, and Lieutenant Commander Ken Gray, project attorney.

Discussion of Proposed Regulations

The bridge presently opens on signal on Saturdays, Sundays, and federal holidays except from 2 p.m. to 6 p.m. when it need open only on the hour and half hour. The proposed rule would extend this time period by six hours (9 a.m. to 7 p.m.) and limit routine openings to one per hour during this period. This change was temporarily implemented in the summer of 1985 for evaluation purposes (50 FR 31367) and generated no complaints from mariners. This change is intended to space draw openings and virtually eliminate "back to back" openings which can contribute significantly to vehicular traffic delays during these periods.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. We conclude this because the regulations exempt tugs with tows. Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Proposed Regulations

PART 117—DRAWBRIDGE OPERATION REGULATIONS

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations, as follows:

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46 and 33 CFR 1.05-1(g).

2. Section 117.911 is proposed to be amended by revising paragraph (c) to read as follows:

§ 117.911 Atlantic Intracoastal Waterway, Little River to Savannah River.

* * * * *

(c) *Ben Sawyer (SR 703) bridge across Sullivans Island Narrows, mile 462.2 between Sullivans Island and Mount Pleasant.* The draw shall open on signal; except that, the draw need not open from 7 a.m. to 9 a.m. and from 4 p.m. to 6 p.m., Monday through Friday, except federal holidays. On Saturdays, Sundays, and federal holidays from 9 a.m. to 7 p.m. the draw need open only on the hour.

* * * * *

Dated: April 21, 1986.

R.P. Cueroni,

Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District.

[FR Doc. 86-10034 Filed 5-2-86; 8:45 am]

BILLING CODE 4910-14-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposed Endangered Status for Cambarus Zophonastes

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to determine a cave crayfish, *Cambarus zophonastes*, to be an endangered species under the authority contained in the Endangered Species Act of 1973, as amended. This obligate cave dweller has been found only in one cave in Stone County, Arkansas. The species does not have an acepted common name. Groundwater contamination, collecting, and low population levels represent major potential threats to *Cambarus zophonastes*. Groundwater contamination is especially important because most of the stream channels in the cave's recharge area are sinking streams, which can readily introduce pollutants or contaminants into the cave system. This proposal, if made final, will implement the protection of the Endangered Species Act of 1973, as amended, for this cave crayfish. The Service seeks relevant data and comments from the public.

DATES: Comments from all interested parties must be received by July 7, 1986. Public hearing requests must be received by June 19, 1986.

ADDRESS: Comments and materials concerning this proposal should be sent to the Endangered Species Field Station, U.S. Fish and Wildlife Service, Jackson Mall Office Center, Suite 316, 300 Woodrow Wilson Avenue, Jackson, Mississippi 39213. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Dennis B. Jordan at the above address (601/960-4900 or FTS 490-4900).

SUPPLEMENTARY INFORMATION:

Background

Cambarus zophonastes is an albinistic cave crayfish endemic to the White River Basin in north-central Arkansas (Smith 1984). This obligate cave crayfish was first collected in 1961 and described in 1964 from five specimens takens from the type locality (Hobbs and Bedinger 1964). *Cambarus zophonastes* lacks pigment in the body and eyes, which are reduced, and the overall body length reaches about 65mm. It can be distinguished from related species by the following features of its carapace: the rostrum has strongly convergent margins bearing spines, and the areola is more than 29 times longer than wide. The species is known from only the type locality and only eight specimens are known to exist in zoological collections. Over 170 additional caves in north-central Arkansas have been searched without *Cambarus zophonastes* being found. A survey of 436 caves and ten springs in Missouri revealed two closely related species *(Cambarus hubrichti* and *Cambarus setosus)* but failed to reveal *Cambarus zophonastes* (Smith 1984).

The type locality is situated in the Ozark Mountains, and the cave is formed in the Plattin Limestone (Hobbs and Bedinger 1964). This cave is a solution channel, most of which is wet year-round. It contains much mud, and many of its passages are flooded during storms and wet seasons. About 150 feet (45 meters) inside the cave is a pool ranging from 1 to at least 20 feet (0.3-7 meters) in depth with a narrow, shallow stream entering it from the cave's interior, This stream flows through 1,400 feet (425 meters) of cave passage (Smith 1984). Water from the cave emerges as three springs located about 150 feet (45 meters) from the cave entrance. The crayfish has been found only in the cave pool. The Arkansas Natural Heritage Commission and The Nature Conservancy recently purchased a 160-acre (65-hectare) tract that includes the cave's entrance. The primary recharge area consists of 3.51 square miles (9 square kilometers) (Aley and Aley 1985) and is largely privately owned. Population trends for *Cambarus zophonastes* have not been documented. The largest number of individuals sighted during a single trip was 15 crayfish recorded by a scuba diver in 1983. The toal population is estimated to be fewer than 50 individuals (Smith 1984).

VOL 51 ISS 86 MY 5 1986 UMI

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations promulgated to implement the listing provisions of the Act (50 CFR Part 424) set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Cambarus zophonastes* (no common name) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Groundwater contamination represents a major threat to *Cambarus zophonastes*. The only known population is in a geographic area characterized by sinking streams. A sinking stream is a surface water course that loses significant quantities of water into the subsurface in very localized areas. Sinking streams are of extreme importance in supplying water and nutrients to caves. This rapid flow of water into caves also allows the easy introduction of pollutants. A hydrological study of the area (Aley and Aley 1985) has identified threats to this system. An electrical transmission line crosses the recharge area for this cave. The use of herbicides to clear the right-of-way for this line could contaminate the cave. A State highway borders the recharge area for the cave and is a potential source for accidental spills of materials hazardous to water quality. A 4,000 gallon (15,140 liter) spill of gasoline occurred on the highway in March 1985. There are three industrial operations within the cave recharge area that threaten the water quality. All three industries store petroleum products that could spill or leak into the cave. One of the industries, a concrete plant, contributes silt to the cave when its sediment ponds overflow (Aley and Aley 1985). The City of Mountain View has grown rapidly and will likely expand into the topographic basin, within which some subdivision roads have already been built. Continuing development presents a major threat to water quality in the cave from the use of septic tanks to dispose of wastewater.

B. *Overutilization for commercial, recreation, scientific, or educational purposes.* Obligate cave species characteristically live longer and have considerably lower reproductive capacities than their surface relatives. Cooper (1975), in his study of crayfish in Shelta Cave, Alabama, found the cave species *Orconectes australis* to have only 10 to 60 attached ova, while surface species of *Orconectes* had up to 574 attached ova. *Cambarus zophonastes* probably also has low reproductive capabilities. The removal of adults from a limited population with a likely low reproductive potential would seriously endanger the existence of the population. With a maximum of 15 individuals of *Cambarus zophonastes* ever observed and with a total population estimate of 50 individuals, the removal of any reproducing females would dramatically impact and could eliminate a year's recruitment. The limited habitat and population size make the species vulnerable to vandalism and taking.

C. *Disease or predation.* Disease and predation have not been documented for this species.

D. *The inadequacy of existing regulatory mechanisms.* This species is not recognized or protected as a rare species by any existing Federal or State regulation. Arkansas requires a scientific collecting permit for collecting any species, except taking for fish bait under other State regulations. This affords very limited protection owing to the difficulty of apprehending violators and limited resources for law enforcement.

E. *Other natural or manmade factors affecting its continued existence.* Obligate cave species apparently have very low reproductive rates, as evidenced by the limited information available on other cave species (Poulson 1961). This low reproductivity is partially due to the limited energy availability in caves. This cave likely served as a maternity roost site for gray bats (*Myotis grisescens*), a species listed as endangered, at one time in the past (Harvey *et al.* 1981). The abandonment of this roost site represents a loss of energy input, in the form of guano, to the cave's aquatic community. This loss of energy reduces the available food supply and may have limited or reduced the population size of *Cambarus zophonastes*. Reproduction of *Cambarus zophonastes* is further impacted by low numbers of mature individuals, which reduces genetic diversity and the likelihood of successful mating encounters. Low reproductive capabilities and the small, single population naturally limit this species' ability to recover from any adversity.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list *Cambarus zophonastes* as endangered. Endangered status was chosen because this species is known from only one cave system with an estimated population of only 50 individuals. The species is especially vulnerable to water quality degradation at this site. It therefore requires the greatest possible protection available under the Act. The reason critical habitat is not being proposed is discussed in the next section.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extend prudent and determinable, the Secretary designate any habitat of a species which is considered to be critical habitat at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for this species at this time. As discussed under Factor B in the "Summary of Factors Affecting the Species," *Cambarus zophonastes* is endangered by taking, an activity difficult to prevent. Publication of critical habitat descriptions would make this species even more vulnerable and increase enforcement problems. All involved parties and land owners will be notified of the location and importance of protecting this species' habitat. Protection of this species' habitat will be addressed through the recovery process and through the section 7 jeopardy standard (see below). Therefore, it would not be prudent to determine critical habitat for *Cambarus zophonastes* at this time.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402, and now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(4) requires Federal agencies to confer with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. Federal involvement with this species is expected to be minimal. The continuing development of this region could lead to sub-surface water degradation that may involve the Environmental Protection Agency or other agencies with jurisdiction over groundwater. The Federal Housing Authority may be required to consult with the Service on Federal loans for housing development within the cave's recharge area.

The Act and implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take, import or export, ship in interstate commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits are at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities. In some instances, permits may be issued during a specified period of time to relieve undue economic hardship that would be suffered if such relief were not available.

Public Comments Solicited

The Service intends that any final rule adopted will be accurate and as effective as possible in the conservation of endangered or threatened species. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning any aspect of this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to *Cambarus zophonastes;*

(2) The location of any additional populations of *Cambarus zophonastes* and the reasons why any habitat should or should not be determined to be critical habitat as provided by Section 4 of the Act;

(3) Additional information concerning the range and distribution of this species; and

(4) Current or planned activities in the subject area and their possible impacts on *Cambarus zophonastes.*

Final promulgation of the regulation on *Cambarus zophonastes* will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be filed within 45 days of the date of the proposal. Such requests must be made in writing and addressed to the Endangered Species Field Supervisor (see **ADDRESSES** section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined by the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Regulation Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend part 17, Subchapter B of Chapter I, Title 50 of the Code Federal Regulations, as set forth below:

1. The Authority citation for Part 17, continues to read as follows:

Authority: Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411 (16 U.S.C. 1531 *et seq.*).

2. It is proposed to amend § 17.11(h) by adding the following, in alphabetical order under CRUSTACEANS, to the List of Endangered and Threatened Wildlife:

§ 17.11 Endangered and threatened wildlife.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 86-318]

USDA Cooperative Gypsy Moth Suppression and Regulatory Projects—1985: Availability of Site-Specific Environmental Analysis; Finding of No Significant Impact; and Decision to Cooperate

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This document provides notice that site-specific environmental impact statements have been prepared for proposed gypsy moth treatment areas in Minnesota and Oregon. The States of Minnesota and Oregon have decided to initiate gypsy moth eradication programs using *Bacillus thuringiensis (B.t.)*. Based on the evaluation of the Final Environmental Impact Statement, as Supplemented—1985 (EIS) and the site-specific environmental analysis prepared for the proposed treatment areas in Minnesota and Oregon, the Animal and Plant Health Inspection Service (APHIS) has determined that the proposed treatments pose no significant adverse impact on the environment of those areas and, accordingly, has decided to cooperate with the States of Minnesota and Oregon in gypsy moth eradication programs.

ADDRESSES: Copies of this site-specific environmental analysis prepared for the proposed treatment area(s) in Minnesota and Oregon are available for public inspection in a State office in the State where the analysis was conducted. Addresses of these State offices are as follows:

Minnesota Department of Agriculture, Division of Plant Industry, 90 West Plato Boulevard, St. Paul, Minnesota 55107;

Oregon Department of Agriculture, Plant Division, Agriculture Building, Salem, Oregon 97310.

Copies are also available for public inspection at the Field Operations Support Staff, Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 663, Federal Building, Hyattsville, MD 20782.

FOR FURTHER INFORMATION CONTACT: Gary Moorehead, Staff Officer, Field Operations Support Staff, Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 663, Federal Building, Hyattsville, MD 20782, (301) 436-8295.

SUPPLEMENTARY INFORMATION: The final Environmental Impact Statement (FEIS), as supplemented 1985, on the Gypsy Moth Suppression and Eradication Projects was filed with the U.S. Environmental Protection Agency (EPA) on March 18, 1985. A notice was published in the **Federal Register** on February 18, 1986 (51 FR 5750–5751) announcing the availability of the final addendum to the FEIS. A notice was published in the **Federal Register** on April 7, 1986 (51 FR 11769) announcing that the Animal and Plant Health Inspection Service had decided to adopt Alternative 4, Integrated Pest Management (IPM), for gypsy moth eradication projects. The document of April 7, 1986, also stated that decisions concerning APHIS participation in cooperating with States on eradication projects will be on the basis of site-specific environmental analyses prepared for proposed treatment areas in the States in accordance with the National Environmental Policy Act (NEPA) regulations, APHIS guidelines implementing NEPA, and other applicable laws.

The States of Minnesota and Oregon have prepared a separate site-specific environmental analysis for proposed treatment areas in their States for 1986. The site-specific environmental analyses are available upon request (see "**ADDRESSES**"). Site-specific environmental analysis were prepared for each of the following proposed treatment areas:

Minnesota: approximately 225 acres in the city of Apple Valley;

Oregon: approximately 195,000 acres in the county of Lane, and approximately 5,000 acres in the county of Douglas.

Each site-specific environmental analysis discusses the environmental effects of the program for those areas that are proposed to be treated. Based on a review of these site-specific environmental analyses, it has been determined that there are no unique characteristics or aspects of or within the proposed treatment areas or any treatment options discussed for possible use in the site-specific environmental analysis that would place any of these areas or treatment options outside the scope of considerations addressed in the EIS.

Further, the Department has been notified by the State Departments of Agriculture for the States of Minnesota and Oregon that each of these States have decided to conduct aerial spray treatment programs using *B.t.* and appropriate other tools.

Based on the Department's review of the EIS and each site-specific analysis, and in accordance with the National Environmental Policy Act and the Department's EIS, the Department has decided to cooperate with the States of Minnesota and Oregon in the conduct of these programs.

The Organic Act of September 21, 1944, as amended (7 U.S.C. 147a), authorizes APHIS to cooperate with States to retard the artificial, long-range spread of the gypsy moth and to eradicate isolated infestations of the pest.

B.t., in accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136 *et. seq.*), are registered by the Environmental Protection Agency (EPA) for use against gypsy moth. They will be applied according to the label directions and APHIS operating procedures.

Done at Washington, D.C., this 30th day of April, 1986.

A. P. Ford,

Deputy Administrator, Plant Protection and Quarantine, Animal and Plant Health Inspection Service.

[FR Doc. 86-9994 Filed 5-2-86; 8:45 am]

BILLING CODE 3410-34-M

VOL 51 ISS 86 MY 5 1986 UMI

[Docket No. 85-042]

Interstate Transportation of Animals and Animal Products; Laboratories Approved To Conduct Official Pseudorabies Tests

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This document gives notice of laboratories approved under the pseudorabies regulations (9 CFR Part 85) to conduct official pseudorabies tests.

FOR FURTHER INFORMATION CONTACT: Dr. L.W. Schnurrenberger, VS, APHIS, USDA, Room 820, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8487.

SUPPLEMENTARY INFORMATION:

The pseudorabies regulations (contained in 9 CFR Part 85 and referred to below as the regulations) include provisions concerning the use of official pseudorabies tests for determining the disease status of swine and certain other livestock. Under the regulations, a test may be designated as an official pseudorabies test if the test is approved by the Deputy Administrator of Veterinary Services (referred to below as the Deputy Administrator) and if the test is conducted in a laboratory approved by the Deputy Administrator.

Laboratories have been approved by the Deputy Administrator to conduct the Microtitration Serum-Virus Neutralization Test (referred to in the list below as SN), the Enzyme-Linked Immunosorbent Assay Test (referred to in the list below as ELISA), or both tests. The regulations also state that such approved laboratories will be listed in a Federal Register notice. Accordingly, this notice lists those laboratories which are approved by the Deputy Administrator and indicates the test or tests for which they are approved.

BILLING CODE 3410-34-M

Agricultural Stabilization and Conservation Service

Virginia Sun-Cured, Maryland, Cigar-Filler (Type 41) and Cigar Binder (Types 51 and 52) Tobaccos; Referenda Results for 1986 Through 1988 Crops

ACTION: Notice of Results of Marketing Quota Referenda for 1986 Through 1988 Crops of Virginia Sun-Cured, Maryland, Cigar-Filler (Type 41) and Cigar Binder (Types 51 and 52) Tobaccos.

SUMMARY: This notice proclaims the results of marketing quota referenda for Virginia sun-cured, Maryland, cigar-filler (type 41), and cigar binder (types 51 and 52) tobaccos which were held during the period February 24 through February 27, 1986, in accordance with section 312(c) of the Agricultural Adjustment Act of 1938, as amended.

The referenda were conducted in order to determine whether producers of these kinds of tobacco favor or oppose marketing quotas. Since Virginia sun-cured tobacco producers did not disapprove national marketing quotas, such quotas will be in effect for the three marketing years 1986-1987, 1987-1988, and 1988-1989. Since Maryland, cigar-filler (type 41) and cigar binder (type 51 and 52) tobacco producers opposed national marketing quotas, such quotas will not be in effect for the three marketing years 1986-1987, 1987-1988, and 1988-1989.

EFFECTIVE DATE: May 5, 1986.

FOR FURTHER INFORMATION CONTACT: Donald M. Blythe, Tobacco and Peanuts Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, 20013, (202) 447-2715.

SUPPLEMENTARY INFORMATION: This notice has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum 1512-1 and has been classified "not major". This notice has been classified as "not major" since it will not result in: (1) An annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, Federal, State or local government agencies, or a geographic region; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of Federal Assistance Program to which this notice applies as set forth in the Catalog of Federal Domestic Assistance are: Title: Commodity Loan and Purchases; Number: 10.051.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice of determination since the Agricultural Stabilization and Conservation Service is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this notice.

This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, Published at 48 FR 29115 (June 24, 1983).

On January 31, 1986, the Secretary of Agriculture announced that national marketing quotas would be in effect for Virginia sun-cured, Maryland, cigar-filler (type 41) and cigar binder (types 51 and 52) tobaccos for the three marketing years beginning on October 1, 1986, subject to approval by producers of each of these kinds of tobaccos in separate referenda.

During the period February 24 through February 27, 1986, referenda for Virginia sun-cured, Maryland, cigar-filler (type 41) and cigar binder (types 51 and 52) tobaccos were conducted. Section 312(c) of the 1938 Act provides that if more than one-third of such producers voting in the referenda oppose national marketing quotas such results shall be proclaimed by the Secretary and national marketing quotas shall not be in effect.

Since the only purpose of this notice is to announce the results of referenda, it is hereby determined that no further public rulemaking is required. Accordingly, the results of such referenda are set forth below:

Notice

Results of the national marketing quota referenda for the 1986 through 1988 crops Virginia sun-cured, Maryland, cigar-filler (type 41) and cigar binder types 51 and 52) tobaccos.

(1) Referenda period. The national marketing quota referenda for the 1986-1987, 1987-1988, and 1988-1989 marketing years for Virginia sun-cured, Maryland, cigar-filler (type 41) and cigar binder (types 51 and 52) tobaccos were held during the period February 24 through February 27, 1986, in accordance with 7 CFR Part 717.

(2) *Farmers Voting.* The following is a summary, by State, of the results of each referendum:

State	Yes	No	Total
Virginia Sun-Cured [1]			
Virginia	96	5	101
Totals	96	5	101
Maryland [2]			
Maryland	202	641	843
Pennsylvania	20	191	211
Virginia	2	2	4
Totals	224	834	1,058
Cigar-Filler (Type 41) [3]			
Pennsylvania	46	296	342
Totals	46	296	342
Cigar-Binder (Types 51 and 52) [4]			
Connecticut	1	59	60
Massachusetts	6	18	24
Totals	7	77	84

[1] Of those voting, 96 producers, or 95.05 percent, favored Virginia sun-cured tobacco marketing quota and 5 producers, or 4.95 percent, opposed quotas.

[2] Of those voting, 224 producers, or 21.17 percent, favored Maryland tobacco marketing quotas and 834 producers, or 78.83 percent, opposed quotas.

[3] Of those voting, 46 producers, or 13.46 percent, favored cigar-filler (type 41) tobacco marketing quotas and 296 producers, or 86.55 percent, opposed quotas.

* Of those voting, 7 producers or 8.33 percent favored cigar binder (types 51 and 52) tobacco marketing quotas and 77 producers, or 91.67 percent, opposed quotas.

(3) *Marketing quotas will be in effect for the 1986 through 1988 crops for Virginia sun-cured tobacco.* Since less than one-third of the producers of Virginia sun-cured tobacco voting in the referenda voted to disapprove marketing quotas and since the 1985–1986 marketing year is the last of three consecutive years for which marketing quotas previously proclaimed will be in effect, national marketing quota shall be in effect for Virginia sun-cured tobaccos for the marketing years 1986–1987, 1987–1988, and 1988–1989.

(4) *Marketing quotas will not be in effect for the 1986 through 1988 crops of Maryland, cigar-filler (type 41) and cigar binder (type 51 and 52) tobaccos.* Since more than one-third of the producers of Maryland, cigar-filler (type 41) and cigar binder (types 51 and 52) tobacco voting in the referenda opposed quotas, national marketing quotas shall not be in effect for Maryland, cigar-filler (type 41) and cigar binder (types 51 and 52) tobaccos for the marketing years 1986–1987, 1987–1988, and 1988–1989.

Authority: Secs. 312(c), 52 Stat. 46, as amended, 7 U.S.C. 1312(c).

Signed at Washington, DC, on April 29, 1986.

Milt Hertz,

Acting Administrator, Agricultural Stabilization and Conservation Service.

Department of the Air Force

USAF Scientific Advisory Board; Meeting

April 28, 1986.

The USAF Scientific Advisory Board Ad Hoc Committee on Appropriate Air Force Technology efforts to Complement the Strategic Defense Initiative Program will meet at the Pentagon, Washington, DC, on May 19, 1986, from 1:30 pm to 5:00 pm and on May 20, 1986, from 8:00 am to 3:30 pm.

The purpose of the meeting will be for the Directed Energy Weapons (DEW) Subpanel to review and discuss Air Force space-related DEW programs.

The meeting concerns matters listed in section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly, will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at 202–697–8845.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

Department of the Army

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates of Meeting: Friday, 23 May 1986.

Times of Meeting: 0830–1630 hours.

Place: Pentagon (Room 2E715B), Washington, DC.

Agenda: The Army Science Board Ad Hoc Subgroup on Chemical/Biological Warfare Intelligence will meet for its initial meeting to discuss CBW intelligence research and development needs, intelligence gaps, and current analytic efforts in the CBW arena. This meeting will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 1, subsection 10(d). The classified and nonclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695–3039 or 695–7046.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710-08-M

Corps of Engineers, Department of the Army

Intent To Prepare a Draft Supplemental Environmental Impact Statement (DSEIS) for the Agana River Flood Control Improvements, Agana, Territory of Guam.

AGENCY: US Army Corps of Engineers, DOD Honolulu District.

ACTION: Notice of intent to prepare draft Supplemental Environmental Impact Statement (DSEIS).

SUMMARY: 1. The US Army District, Engineer, Honolulu is studying the feasibility of constructing flood control improvements of the Agana River, Territory of Guam. The purpose of the project is to eliminate the flooding problems which occur in Agana during heavy rains.

2. The Corps published a final Environmental Impact Statement (EIS) for the project in March 1977. This DSEIS will address impacts associated with changes to the project, and will include new information developed since the original FEIS.

3. As part of the original EIS process, the Corps held meetings and workshops in Agana. They have participated with Government of Guam agencies in an additional workshop held in June 1985. Local interest groups, private organizations and parties, and Federal and local agencies have been contacted during the course of the study. At this time, the DSEIS will address the effects of the proposed changes to the project on fish and wildlife resources, historic sites, water resources, parks and social considerations identified by local residents at the public workshops. The U.S. Fish and Wildlife Service will provide their opinion of the project effects on fish and wildlife resources for inclusion in the DSEIS. Consultation with the US Advisory Council on Historic Preservation, National Park Service, Territorial Historic Preservation Officer, Guam Environmental Protection Agency, US Environmental Protection Agency, National Marine Fisheries Services, Guam Division of Aquatic and Wildlife Resources and the Guam Coastal Management Program will be competed during the study as appropriate.

4. Scoping meetings were held in 1984 and 1985 and additional meetings are not planned at this time.

5. The DSEIS will be made available for public review about May 15, 1986.

Questions about the proposed action and DSEIS can be answered by: Mr. James Pennaz, Project Manager, US Army Engineer District, Honolulu, Building T–1, Fort Shafter, Hawaii, 96858–5440. Telephone: (808) 438–1907.

Dated: April 18, 1986.

John O. Roach, II,

Army Liaison Officer with the Federal Register.

Bonneville Power Administration

Proposed Variable Industrial Rate; Close of Comment Deadline

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice of Close of Comment.

BPA File No.: VI–86. BPA requests that all comments submitted in response to this notice contain the file number designation VI–86.

SUMMARY: On December 18, 1985, BPA published a notice of Proposed Variable Industrial Rate and Opportunity for Public Review and Comment in the **Federal Register** (FR 51577). The notice included a request for comments on the variable industrial rate proposal, and stated that a deadline for submitting comments to BPA would be announced in a subsequent published notice.

BPA is now announcing the close of comment date. Comments must be received by 5 p.m., May 16, 1986, in order to be considered and included in the Official Record on the development of the variable industrial rate. Address comments to Ms. Donna L. Geiger, BPA Public Involvement Manager, Bonneville Power Administration, P.O. Box 12999, Portland, Oregon 98212.

FOR FURTHER INFORMATION CONTACT: Ms. Kathleen S. Johnson, Public Involvement office at the address above. Telebone numbers, voice/TTY, for the Public Involvement office are: 503–230–3478 in Portland; toll-free 800–452–8429 for Oregon outside of Portland; 800–547–6048 for Washington, Idaho, Montana, Wyoming, Utah, Nevada, and California.

Issued in Portland, Oregon, on April 24, 1986.

Peter T. Johnson,

Administrator.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER85-644-004 et al.]

Duke Power Co. et al.; Electric Rate and Corporate Regulation Filings

April 28, 1986.

Take notice that the following filing have been made with the Commission:

1. Duke Power Company

[Docket No. ER85-644-004]

Take notice that on April 23, 1986 Duke Power Company tendered for filing a refund report in compliance with the Commission's letter order date March 13, 1986. Refunds were made to Duke Power Company's wholesale customers.

Comment date: May 12, 1986, in accordance with Standard Paragraph H at the end of this notice.

2. New England Electric Transmission Corporation, Vermont Electric Transmission Company

[Docket No. ER86-421-000]

Taken notice that New England Electric Transmission Corporation (NEET), and Vermont Electric Transmission Company (VETCO) on April 24, 1986 tendered for filing executed amendments to two existing agreements relating to the transmission of electricity between Hydro-Quebec and the New England Power Pool.

The amendments are: (i) Amendment No. 3 to the Phase 1 Terminal Support Agreement between NEET and the participating New England utilities; and (ii) Amendment No. 3 to the Phase I Vermont Transmission Line Support Agreement between VECTO and the participating New England utilities. According to the applicants, the Amendments are necessary to (i) make changes and clarifications needed to prevent the loss of investment tax credits, and (ii) extend the initial terms of the agreement. The proposed effective date of the amendments is June 30, 1986.

Comment date: May 12, 1986, in accordance with Standard Paragraph E at the end of this notice.

3. Kansas Gas and Electric

[Docket No. ER85-432-003]

Take notice that in April 21, 1986, Kansas Gas and Electric Company tendered for filing a report of refunds made to Chanute, Fredonia, and Iola, Kansas. The refund amount reflects the final settlement rates for Service Schedule E.

The refund amounts include interest from the date payment was received through April 18, 1986 at the appropriate interest rate.

Comment date: May 12, 1986, in accordance with Standard Paragraph H at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

H. Any person desiring to be heard or to protest the filing should file comments with the Federal Energy Regulatory Commission 825 North Capitol Street, NE., Washington, D.C. 20426, on or before the comment date. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on

VOL 51 ISS 86 MY 5 1986 UMI

file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-10006 Filed 5-2-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. ER86-416-000 et al.]

Electric Rate and Corporate Regulation Filings; Black Hills Corp. et al.

April 25, 1986.

Take notice that the following filings have been made with the Commission:

1. Black Hills Corporation dba Black Hills Power and Light Company

[Docket No. ER86-416-000]

Take Notice that Black Hills Corporation, doing business as Black Hills Power and Light Company (Black Hills) on April 21, 1986, tendered for filing an agreement between Black Hills and the City of Gillette, Wyoming which provides for an amendment and extension of Black Hills Rate Schedule FERC No. 28 and its Supplement No. 1 to provide for the continued sale of seasonal non-firm power and energy.

The reasons for the proposed changes are to extend the term until September 30, 1988, provide for the extension of the term for additional seasons, if not cancelled by either party, and provide rate changes which reflect the competitive market for non-firm power deliveries.

Copies of the filing were supplied to City of Gillette, Wyoming and the regulatory commissions of the states of Wyoming, South Dakota, and Montana.

Comment date: May 8, 1986, in accordance with Standard Paragraph E at the end of this notice.

2. Central Illinois Public Service Company

[Docket No. ER86-420]

Take notice that Central Illinois Public Service Company (Central Company) on April 21, 1986, tendered for filing an Interconnection Agreement dated June 1, 1986, and a Facilities Agreement dated October 1, 1982 and amended on November 1, 1985, between Central Illinois Public Service Company (Central Company) and Northern Indiana Public Service Company (Northern Company).

The Interconnection Agreement provides for coordinated interconnection operation including the interchange of Power and Energy under Service Schedule A, Emergency Service, Service Schedule B, Short Term Power Service Schedule C, Interchange Power, Service Schedule D, Coordination of Scheduled Maintenance of Generating Facilities, and Service Schedule E, Limited Term Power.

The Facilities Agreement and Amendment No. 1 cover a 138 KV interconnection being established between Central Company and Northern Company with an inservice date of June 1, 1986.

Copies of this filing have been sent to Northern Indiana Public Service Company, the Public Service Commission of Indiana and the Illinois Commerce Commission.

Comment date: May 8, 1986, in accordance with Standard Paragraph E at the end of this notice.

3. Illinois Power Company

[Docket No. ER86-419-000]

Take notice that on April 21, 1986, Illinois Power Company ("Illinois Power") tendered for filing Amendment No. 16 dated April 1, 1986 to the Interconnection Agreement dated March 1, 1964 between Illinois Power and Commonwealth Edison Company ("Edison").

Amendment No. 16 incorporates a new Service Schedule F, Term Energy; replaced existing Service Schedule B, Interchange Power with a new Service Schedule B, Economy Energy and Service Schedule E, General Purpose Energy; amends Serivce Schedules A, Emergency Energy, C, Short-Term Power and D, Maintenance Energy to include specific energy charges when a third party is involved in the interchange transaction; and also amends Service Schedule C, Short-Term Power to include flexibility in the demand charge.

The parties request an effective date of June 15, 1986.

Illinois Power states that a copy of this filing was served upon Commonwealth Edison Company and the Illinois Commerce Commission.

Comment date: May 8, 1986, in accordance with Standard Paragraph E at the end of this notice.

4. El Paso Electric Company

[Docket No. EC86-18-000]

Take notice that on April 21, 1986, El Paso Electric Company ("EPEC") filed, pursuant to Rule 207 of the Rules of Practice and Procedure of the Federal Energy Regulatory Commission ("Commission") and section 204 of the Federal Power Act, a combined Petition for Order Disclaiming Jurisdiction and Application for Authorization of the Issuance of Securities and Assumption of Liabilities. In its Petition for Order Disclaiming Jurisdiction, EPEC requests that the Commission (i) issue an order disclaiming jurisdiction over a proposed sale and leaseback of up to all of EPEC's undivided ownership interest in Unit 2 at the Palo Verde Nuclear Generating Station ("PVNGS") and up to all or a proportionate share of EPEC's interest in one-third of certain of the common facilities at PVNGS (the "PVNGS Unit 2 Facilities") for the reason that the PNGS Unit 2 Facilities are nonjurisdictional generating facilities and (ii) issue an order disclaiming jurisdiction over the proposed institutional investors, who would be owner participants under the lease documents (the "Equity Investors") and owner trustees (the "Lessors") of the PVNGS Unit 2 Facilities and determining that the Equity Investors and the Lessors will not, as a result of their acquiring an ownership interest in PVNGS or the leaseback of such interest to EPEC, become "public utilities" as that term is defined in section 201(e) of the Federal Power Act. In its petition, EPEC states that the Equity Investors and the Lessors of the PVNGS Unit 2 Facilities will purchase and leaseback such Facilities solely as an investment and that the Equity Investors and the Lessors will assert no operating control over the PVNGS Unit 2 Facilities and that such Facilities will be used for the same purposes as previously by EPEC.

In its Application under section 204 of the Federal Power Act for Authorization of the Issuance of Securities and Assumption of Liabilities, EPEC seeks authorization from the Commission to issue securities and assume obligations and liabilities in connection with the proposed sale and leaseback transactions.

EPEC is an electric utility incorporated and existing under the laws of the State of Texas, with its principal place of business at 303 North Oregon Street, El Paso, Texas 79901. It is authorized to transact business as a foreign corporation in the State of New Mexico adn Arizona. EPEC owns a 15.8% undivided ownership interest in the PVNGS Unit 2 Facilities.

Under the construction and completion schedule established for PVNGS Unit 2, Unit 2 is expected to be synchronized with EPEC's main transmission grid on or about April 29, 1986. The purchase price for the PVNGS Unit 2 Facilities is estimated at up to approximately $700,000,000. EPEC requests that the Commission issue its orders and authorizations in this proceeding on or before June 15, 1986 in order for the proposed transactions to be closed on or before July 15, 1986.

Comment date: May 8, 1986, in accordance with Standard Paragraph E at the end of this notice.

5. Western Massachusetts Electric Company

[Docket No. ER86-416-000]

Take notice that on April 18, 1986, Western Massachusetts Electric Company (WMECO) tendered for filing Notices of Termination of the folloiwng rate schedules:

Purchase Agreement With Respect to Doreen and Woodland Road Gas Turbine Units between Western Massachusetts Electric Company and Vermont Electric Generation and Transmission Cooperative, Inc. ("VEG&T"), effective date November 1, 1982 (WMEC) rate schedule number 212).

Agreement With Respect to Gas Turbine Units located at Doreen and Woodland Road Substations between Western Massachusetts Electric Company and Vermont Electric Generation and Transmission Cooperative, Inc., effective date December 1, 1982 (WMEC rate schedule number 219).

Comment date: May 6, 1986, in accordance with Standard Paragraph E at the end of this notice.

6. Tampa Electric Company

[Docket No. ER86-294-000]

Take notice that on February 11, 1986, Tampa Electric Company (Tampa Electric) tendered for filing Service Schedule J providing for negotiated interchange service between Tampa Electric and Florida Power Corporation (Florida Power). Tampa Electric submitted Service Schedule J for inclusion as a supplement under the existing contract for interchange service between Tampa Electric and Florida Power, designated as Tampa Electric's Rate Schedule FPC No. 6, and Florida Power's Rate Schedule FPC No. 60. Tampa Electric's filing includes a Certificate of Concurrence submitted by Florida Power in lieu of an independent filing.

Tampa Electric also tendered for filing, as a supplement to the Service Schedule J under its rate schedule, a Letter of Commitment providing for the sale by Tampa Electric to Florida Power of energy from up to 300 megawatts of reserved, coal-fired capacity. On April 21, 1986, Tampa Electric tendered for filing supplemental information with respect to the reservation charge under the Letter of Commitment.

Tampa Electric proposes an effective date of February 6, 1986 for the Service Schedule J and Letter of Commitment, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing, as amended, have been served on Florida Power and the Florida Public Service Commission.

Comment date: May 6, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-9967 Filed 5-2-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP86-441-000 et al.]

Natural Gas Certificate Filings; Northwest Pipeline Corp. et al.

Take notice that the followings filings have been made with the Commission:

1. Northwest Pipeline Corporation

[Docket No. CP86-441-000]

April 24, 1986.

Take notice that on April 14, 1986, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP86-441-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to construct and operate certain natural gas facilities for the sale and delivery of natural gas to The Washington Water Power Company (WWP), an existing customer of Northwest's under the certificate issued to Northwest in Docket No. CP82-433-000 pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

It is stated that Northwest proposes to provide an additional 6-inch tap on its 16-inch Spokane sales lateral adjacent to an existing WWP sales delivery point, the Kettle Falls meter station.

Northwest further states that in maintaining various mainline facilities along the Spokane lateral, it plans to install a 16-inch block value adjacent to the existing Kettle Falls Tap which would permit isolation of that segment of the pipeline. Northwest says the Spokane lateral has gas supply inputs at both ends. It is explained that the proposed tap would be located on the opposite side of the block valve from the existing tap thus enabling Northwest to provide back-up service to the Kettle Falls meter station should the block valve be closed due to line failure or maintenance requirements in the segment of the pipeline serving the existing tap. Northwest states it would pay for all construction costs associated with the tap. Northwest estimates that the total cost of the proposed construction would be approximately $12,600, including the Commission filing fee.

Northwest intends to provide firm service to the proposed tap by utilizing quantities of natural gas presently authorized for sale and delivery to WWP at the Kettle Falls meter station, under the existing ODL-1 Rate Schedule now in effect.

Northwest states that the proposed service is conditioned upon the availability of pipeline capacity sufficient to provide such service without detriment or disadvantage to Northwest's existing customers who are dependent on Northwest's general system supply.

Comment date: June 9, 1986, in accordance with Standard Paragraph G at the end of this notice.

2. Northern Natural Gas Company, Division of InterNorth, Inc.

[Docket No. CP86-435-000]

April 25, 1986.

Take notice that on April 11, 1986, Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), 2223 Dodge Street Omaha, Nebraska 68102, filed in Docket No. CP86-435-000 an application pursuant to section 7(c) of the Natural Gas Act and § 284.221 of the Commission's Regulations for a blanket certificate of public convenience and necessity authorizing the transportation of natural gas on behalf of others, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northern states that it intends to transport natural gas on behalf of shippers and elects to become a transporter under the terms and conditions of the Commission's Order No. 436, in Docket No. RM85-1, as

BEST COPY AVAILABLE

VOL 51 ISS 86 MY 5 1986 UMI

amended. Northern states that it accepts and will comply with the conditions in paragraph (c) of § 284.221, which paragraph references Subpart A of Part 284 of the Commission's Regulations. Northern notes that its transportation rates to be charged under Part 284 of the Commission's Regulations are set forth in the stipulation and agreement as filed in Docket No. RP85–206–000 currently pending before the Commission. Northern further states that acceptance of a blanket certificate would be contingent upon the Commission's approval of the stipulation and agreement as filed in Docket No. RP85–206–000.

Comment date: May 20, 1986, in accordance with Standard Paragraph F at the end of this notice.

3. Tennessee Gas Pipeline Company, a Division of Tenneco Inc.

[Docket No. CP86–443–000]

April 24, 1986.

Take notice that on April 14, 1986, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP86–443–000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Olin Corporation (Olin), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Tennessee requests authorization to transport up to 32 billion Btu equivalent of natural gas per day on an interruptible basis for Olin. Tennessee states that the gas to be transported is produced from reserves located within Louisiana which Olin has the right to purchase. Tennessee proposes to receive these quantities for the account of Olin at the tailgate of the Acadia processing plant, Acadia Parish, Louisiana (Acadia), and the existing interconnections between the facilities of Tennessee and United Gas Pipe Line Company at Tennessee's Meter No. 2–0391 in Jefferson Davis Parish, Louisiana (Iowa), at Tennessee's Meter No. 1–0864 in Ouachita Parish, Louisiana (West Monroe), at Tennessee's Meter No. 2–0500 in St. Mary's Parish, Louisiana (Centerville), and at Tennessee's Meter No. 2–0538 in Terrebonne Parish, Louisiana (Lirette). Tennessee states that it would, in turn, transport and deliver thermally equivalent quantities of gas, less any quantities retained for Tennessee's fuel and uses and gas lost and unaccounted for, to Olin at a point of delivery located at the Gabe extraction plant, in Gabe, Kentucky (Gabe). Tennessee states that it would have the right but not the obligation to accept quantities of gas in excess of the transportation quantity, provided that such excess quantity not exceed 25 percent of the 32 billion Btu transportation quantity.

Tennessee proposes to charge a rate for this transportation service consisting of the following charges:

Point of receipt	Rate per million btu's (cents)	GRI (cents)	Fuel percent
Acadia	32.72	1.32	3.31
Iowa	32.72	1.32	3.31
West Monroe	24.66	1.32	2.59
Centerville	32.72	1.32	3.31
Lirette	32.72	1.32	3.31

Tennessee states that the applicable rate, indicated above, plus the applicable GRI surcharge, would be multiplied by the total quantity of million Btu's of gas delivered by Tennessee for the account of Olin during the month. Tennessee further states that Olin would provide to Tennessee, at no cost to Tennessee, a daily quantity in million Btu's of gas for Tennessee's system fuel and uses and gas lost and unaccounted for equal to the applicable percentage indicated above. Tennessee states that it may, at its sole option, elect to provide the applicable fuel quantities to Olin at Tennessee's weighted average cost of gas.

Tennessee explains that Olin's Doe Run Plant, an organic chemicals plant at Brandenburg, Kentucky, was built and historically operated using as its raw materials low cost ethane and higher hydrocarbons extracted by Tennessee at Tennessee's stripping plant near Gabe, Kentucky. Tennessee asserts that the continued viability of the Gabe plant as a source of ethane depends on access to lower priced gas available on the spot market and the ability to have that gas transported to Gabe.

Comment date: May 16, 1986, in accordance with Standard Paragraph F at the end of this notice.

4. Southern Natural Gas Company

[Docket No. CP86–432–000]

April 25, 1986.

Take notice that on April 10, 1986, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202–2563, filed in Docket No. CP86–432–000 an application pursuant to section 7 of the Natural Gas Act for a limited-term certificate of public convenience and necessity authorizing the transportation of natural gas for Alabama Gas Corporation (Alagasco), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Southern proposes to transport up to 17 billion Btu of natural gas per day for Alagasco, as agent for Gulf States Steel (Gulf States), on an interruptible basis, for a one-year term. It is indicated that Gulf States would purchase the gas from Consolidated Fuel Supply, Inc. (Consolidated) for its Gadsden, Alabama, plant. Southern states that it would receive the gas for the account of Alagasco at various existing points on Southern's contiguous pipeline system. Southern proposes to redeliver equivalent volumes of gas, less 3.25 percent for fuel and company-use gas, at an existing delivery point to Alagasco at the Gadsden area delivery point.

Southern proposes to charge Alagasco a transportation rate of 39.9 cents per million Btu where the aggregate of the volumes transported by Southern for Alagasco under any and all transportation agreements between Southern and Alagsco, when added to the volumes delivered under Southern's Rate Schedule OCD, does not exceed Alagasco's daily contract demand from Southern. For those volumes that exceed Alagasco's daily contract demand, Southern proposes to charge 64.9 cents per million Btu. In addition Southern proposes to collect the GRI surcharge of 1.35 cents per Mcf.

Southern also requests flexible authority to add delivery points in the event that Gulf States obtains alternative sources of supply of natural gas. It is stated that the redelivery point, the recipient, and the maximum daily transportation volume would remain unchanged. It is further stated that providing certain information with regard to the addition of any delivery points.

Southern states that the transportation arrangement would enable Gulf States to diversify its natural gas supply sources and to obtain gas at competitive prices. In addition, it is indicated that Southern would obtain take-or-pay relief on all volumes transportation pursuant to the agreement.

Comment date: May 16, 1986, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, a motion to intervene or a protest in accordance

with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules and Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

Robert E. Boardman; Notice of Application

April 28, 1986.

Take notice that on April 21, 1986, Robert E. Boardman filed an application pursuant to section 305(b) of the Federal Power Act to hold the following positions:

Director, Green Mountain Power Corporation

Director, National Life Insurance Company

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with the Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before 5/12/86. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. RP85–8–003, et al.]

Canyon Creek Compression Co., et al.; Filing of Pipeline Refund Reports and Refund Plans

April 25, 1986.

Take notice that the pipelines listed in the Appendix hereto have submitted to the Commission for filing proposed refund reports or refund plans. The date of filing, docket number, and type of filing are also shown on the Appendix.

Any person wishing to do so may submit comments in writing concerning the subject refund reports and plans. All such comments should be filed with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before May 12, 1986. Copies of the respective filings are on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. RP86–54–001]

Florida Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

April 25, 1986.

Take notice that Florida Gas Transmission (FGT) on April 23, 1986, tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheets:

Substitute Original Sheet No. 50A
Substitute Original Sheet No. 50B

The above listed tariff sheets are being filed pursuant to the Commission's order issued March 28, 1986 accepting and suspending subject to refund and conditions, the proposed tariff sheets filed on February 28, 1986 in Docket No. RP86–54–000. FGT states these tariff sheets are in full compliance with the Commission's order of March 28, 1986. The proposed effective date is April 1, 1986, the date previously approved by the Commission.

Copies of the filing were served on FGT's jurisdictional customers, interested state commissions and parties on the official service list in the instant docket.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before May 2, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party

VOL 51 ISS 86 MY 5 1986 UMI

must file Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. G-11815-000, et al.]

Marathon Oil Co. (Operator), et al.; Application for Certificates, Abandonments of Service and Petitions to Amend Certificates [1]

April 25, 1986.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before May 13, 1986, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

[1] By Partial Assignment and Bill of Sale executed 1-13-86, effective 12-1-85, Sun Exploration and Production Company assigned all of its interest in the Ohio-Sun Unit to Marathon Oil Company.
[2] Property sold to Ollsearch Corporation.
[3] Property sold to Vernon E. Faulconer, Inc.
[4] Property sold to Combined Resources Corporation.
[5] Property sold to Childress Royalty Company.
[6] Property sold to Kaiser-Francis Oil Company.
[7] Property sold to Source Petroleum, Inc.
[8] Deletion of acreage. Leases have been released and ARCO no longer owns an interest in acreage to be deleted.
[9] By Assignment effective 10-1-73, Diamond Shamrock assigned acreage to RPL Oil Company, small producer certificate holder in Docket No. CS64-41.
[10] Property sold to Thomas C. Mueller Oil & Gas.
[11] Federal Lease OCS-G-5398 (Vermilion Blocks 12 & 29) was released on 12-31-85, when no longer deemed to be capable of producing gas in paying quantities.
[12] Pursuant to Article XII, Paragraph F of the Agreement dated 10-12-83, MIDCO elected to terminate the Agreement as of 6-15-86 due to Amoco's imposition of an unacceptable alternate price as well as a lack of concurrence as to the construction of certain key contractual provisions, particularly, the market-tracking pricing mechanism.
[13] Gas depleted and wells were plugged and abandoned in August 1985. The Contract has been terminated effective 2-14-86.
[14] Gas depleted and the Contract has been terminated effective 1-27-86.
[15] Applicant acquired certain interests in the Lizzie E. Howell Unit and Zoldoske Unit from Sun Exploration and Production Company, under two instruments entitled "Partial Assignment and Bill of Sale" executed on 10-17-85, effective 9-1-85.
[16] Not economically feasible to produce at this rate.
[17] Effective 2-13-86 applicant assigned its interest in the leases and wells dedicated to the contract filed in Docket No. G-8683 to Mr. W. S. (Bill) Chesnutt.
[18] Contract Expired 1-19-86. There have been no deliveries of gas to the purchaser since January 1983. Purchaser removed sales meter in May 1985. No gas production from fields dedicated to the contract and rate schedule is anticipated.
[19] The natural gas reserves are depleted to the extent that continuance of service is unwarranted.
[20] To market gas to Union Texas Petroleum in order to increase sale volumes. Due to oversupply of gas, Panhandle Eastern has been unable to market gas at an acceptable rate.
[21] By Assignment of Oil and Gas Lease and Bill of Sale effective 7-15-85, Cities Service Oil and Gas Corporation sold and assigned to W. L. Kirtman, Inc., all of its interest in the Hinkhouse A Lease, Comanche County, Kansas, Lease No. 6-1547404, limited to the Morrow Formation.
[22] Phillips Petroleum Company assigned its interest in a portion of State Lease Nos. 2220 and 2221, and in TIPCO Lease No. LA 622-01, and State Lease No. 11423 to TIPCO Offshore Development by assignment dated 11-15-85.
[*] The wells contain a heavy concentration of carbon dioxide.
[**] Property sold to Delaware Royalty Company, Inc.
[**] A portion of Shell Western E&P Inc. acreage, has been assigned to BILL C. Cotner dba Meadco Properties effective 11-1-85.
[**] Partial surrender of acreage back to lessor(s).
[**] Applicant is filing under Gas Purchase Contract dated 2-26-86.
[**] All acreage has been assigned to Rosewood Resources Inc.

Filing Code: A—Initial Service; B—Abandonment; C—Amendment to add acreage; D—Amendment to delete acreage; E—Total Succession; F—Partial Succession.

BILLING CODE 6717-01-M

[Docket No. RP86-68-000]

Northwest Central Pipeline Corp.; Proposed Changes in FERC Gas Tariff

April 25, 1986.

Take notice that on April 22, 1986 Northwest Central Pipeline Corporation (Northwest Central) tendered for filing Eighth Revised Sheet No. 6 to Original Volume No. 1 and Second Revised Sheet No. 2A, Second Revised Sheet No. 91 and Second Revised Sheet No. 219 to Original Volume No. 2 of its FERC Gas Tariff. The proposed effective date of these revised tariff sheets is May 23, 1986.

Northwest Central states that the filing proposes a change in its currently effective rates which would result in an increase in annual revenues of approximately $25.3 million, inclusive of transportation and gathering services, based on the test period (the twelve months ended December 31, 1985, adjusted for known changes through September 30, 1986). Northwest Central states that the increased rates are required to reflect an overall rate of return of 14.61 percent, increases in administrative and general expenses and a decline in sales volumes.

Northwest Central also states that Second Revised Sheet No. 2A reflects an increase in the presently effective Rate Schedule T-1 interruptible transportation rates, and Second Revised Sheet Nos. 91 and 219 reflect an increase in the gathering rate in Rate Schedule X-12 and X-21. Further, the Company indicates that the new Rate Schedule T-1 rates have been designed in accord with 18 CFR 284.7, promulgated in Order Nos. 436, *et seq.*, so as to permit the continuation on the Company's system of certain "grandfathered" transportation.

Northwest Central states that this filing was served on each of its customers and affected state commissions pursuant to § 154.16(b) of the Commission's Regulations.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 2, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb

Secretary.

BILLING CODE 6717-01-M

VOL 51 ISS 86 MY 5 1986 UMI

[Docket No. CP86-438-000]

Tennessee Gas Pipeline Company, a Division of Tenneco Inc.

April 24, 1986.

Take notice that on April 9, 1986, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP86-438-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Tenngasco Corporation (Tenngasco), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Tennessee requests authorization to transport up to 32 billion Btu equivalent of natural gas per day on an interruptible basis for Tenngasco, as agent for Olin Corporation (Olin), pursuant to the terms of a gas transportation agreement dated April 4, 1986. Tennessee states that, in those instances where interim transportation agreements are not utilized, Tennessee would receive the natural gas from Tenngasco at various receipt points upstream of its station 95 (see appendix [1]) and would deliver a thermally equivalent quantity of gas, less quantities for Tennessee's fuel and uses, gas lost and unaccounted for, and plant thermal reduction due to processing, to Tenngasco at the Gabe delivery point. It is stated that, where interim transportation agreements are utilized, Tennessee would receive the natural gas from Tenngasco at the receipt points and would transport an equivalent quantity to the interim delivery points set forth in the agreement with Tenngasco. Tennessee requests the right but not the obligation to accept quantities of gas in excess of the proposed 32 billion Btu but not to exceed 25 percent of the 32 billion Btu transportation quantity. Tennessee states that Tenngasco would provide to Tennessee, at no cost to Tennessee, a daily quantity of gas for Tennessee's system fuel and uses and gas lost and unaccounted for.

Tennessee proposes to charge for this transportation service the product of the rate set forth in the appendix hereto and the total million Btu of gas delivered by Tennessee for the account of Tenngasco during the month from each source. Tennessee also proposes to charge Tenngasco a GRI surcharge of 1.32 cents per million Btu of gas delivered to the Gabe delivery point.

Tennessee states that it would accept the associated liquid hydrocarbons (exclusive of oil) produced with the transportation quantity, when applicable, and transport and deliver such liquid hydrocarbons for the account of Tenngasco or to Tenngasco's producers' separation and storage facilities. Tennessee proposes to charge Tenngasco for the transportation of liquids the applicable charges set forth in the appendix hereto. Tennessee states that it may, at its sole option, elect to provide the applicable fuel quantities to Olin at Tennessee's weighted average cost of gas. Tennessee further states that it would charge for plant thermal reduction (PTR), when applicable, a rate equal to that specified in the appendix multiplied by the total million Btu for PTR delivered.

Tennessee explains that Olin's Doe Run plant, an organic chemical plant at Brandenburg, Kentucky, was built and historically operated using as its raw materials low cost ethane and higher hydrocarbons extracted by Tennessee at Tennessee's stripping plant near Gabe, Kentucky. Tennessee asserts that the continued viability of the Gabe plant as a source of ethane depends on access to lower priced gas available on the spot market and the ability to have that gas transported to Gabe.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 16, 1986, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Tennessee to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-10005 Filed 5-2-86; 8:45 am]

BILLING CODE 6717-01-M

[1] The appendix is available from the Commission's Division of Public Information.

[Docket No. RP86-53-001]

Transwestern Pipeline Co.; Proposed Changes in FERC Gas Tariff

April 25, 1986.

Take notice that Transwestern Pipeline Company (Transwestern) on April 23, 1986, tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets:

Substitute First Revised Sheet No. 76D
Substitute Original Sheet No. 76E

The above listed tariff sheets are being filed pursuant to the Commission's order issued March 28, 1986 accepting and suspending subject to refund and conditions, the proposed tariff sheets filed on February 28, 1986 in Docket No. RP86-53-000. Transwestern states these tariff are in full compliance with the Commission's order of March 28, 1986. The proposed effective date is April 1, 1986, the date previously approved by the Commission.

Copies of the filing were served on Transwestern's jurisdictional customers, interested state commissions and parties on the official service list in the instant docket.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before May 2, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the

Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Office of Hearings and Appeals

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Notice of implementation of special refund procedures and solicitation of comments.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the disposition of $748,515.01 in court-ordered settlement funds obtained from Southland Royalty Company, a crude oil producer. This money is being held in escrow following the settlement of litigation involving Southland Royalty Company and the Department of Energy.

DATE AND ADDRESS: Comments must be filed within 30 days of publication of this notice in the Federal Register and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, D.C. 20585. All comments should conspicuously display a reference to case number HEF-0582.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director, Office of Hearings and Appeals, 1000 Dependence Avenue, S.W. Washington, D.C. 20585.

SUPPLEMENTARY INFORMATION: In accordance with the procedural regulations of the Department of Energy (DOE), 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision concerns funds obtained as a result of a December 5, 1984 Agreed Final Judgment entered by the United States District Court for the Western District of Oklahoma in settlement of litigation between Southland Royalty Company and the DOE. In that litigation, Southland challenged the DOE's interpretation of the "newly discovered crude oil" regulations.

The Proposed Decision sets forth the procedures and standards that the DOE has tentatively formulated to dispose of the contents of an escrow account funded by the firm pursuant to the court order. The decision proposes to place the money into a pool of crude oil moneys pursuant to the DOE's Statement of Restitutionary Policy for crude oil claims. *See* 50 FR 27400 (1985), Fed. Energy Guidelines ¶ 90,508 (1985).

Any member of the public may submit written comments regarding the proposed refund procedures. Commenting parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice in the Federal Register, and should be sent to the address set forth at the beginning of this notice. All comments received in this proceeding will be available for public inspection between the hours of 1:00 to 5:00 p.m., Monday thorugh Friday, except Federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E-234, Independence Avenue SW., Washington, D.C. 20585.

Dated: April 22, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decision and Order of the Department of Energy

Implementation of Special Refund Procedures

April 22, 1986

Name of Firm: Southland Royalty Company

Date of Filing: May 10, 1985

Case Number: HEF-0582

Pursuant to the procedural regulations of the Department of Energy (DOE), 10 CFR Part 205, Subpart V, the Economic Regulatory Administration (ERA) filed a Petition for the Implementation of Special Refund Procedures with the Office of Hearings and Appeals (OHA) in connection with a court order involving Southland Royalty Company (hereinafter referred to as Southland). The petition requests that OHA formulate and implement procedures to distribute funds obtained pursuant to the court order to remedy the effects of alleged violations of DOE regulations. Pursuant to the order, Southland remitted $748,515.01 in principal and interest to the DOE as restitution for violations of the DOE pricing and certification regulations. Those funds are being held in an interest-bearing escrow account under the jurisdiction of the DOE pending receipt of instructions from the OHA regarding their final distribution.

I. Jurisdiction

The Subpart V regulations set forth general guidelines by which the OHA may formulate and implement a plan to distribute funds received as a result of an enforcement proceeding. The Subpart V process may be used in situations where the DOE is unable to identify readily the persons who may be eligible to receive refunds or to ascertain readily the amounts that such persons should receive. 10 C.F.R. § 205.280. For a more detailed discussion of Subpart V and the OHA's authority to fashion procedures to distribute refunds, *see Office of Enforcement*, 9 DOE ¶ 82,508 (1981) *(Coline)* and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981) *(Vickers)*.

We have reviewed the record in the present case and have concluded that it would be difficult to identify the parties who may be entitled to receive restitution from the funds paid to the DOE pursuant to the court order and to determine the amounts such persons should receive. Therefore, we accept jurisdiction over the funds at issue.

II. Background

A. History of the Proceedings

In 1981, Southland joined Seneca Oil Company and others in a lawsuit against the Department of Energy challenging the DOE's interpretation of the "newly discovered crude oil" regulations. *Seneca Oil Co. v. DOE*, Civil Action No. 81-215-T (W.D. Okla.). The Temporary Emergency Court of Appeals upheld the DOE's interpretation of those regulations and directed the District Court to grant the DOE's motions for appropriate orders to secure recovery of overcharges from Southland and the other plaintiffs. *Seneca Oil Co. v. DOE*, 712 F.2d 1384 (Temp. Emer. Ct. App. 1983). Accordingly, the United States District Court for the Western District of Oklahoma entered an Agreed Final Judgment in favor of the DOE in the *Southland* proceeding. The judgment settled all matters between the DOE and Southland concerning Southland's pricing and certification of crude oil produced and sold from four properties (Jordan, Frazier, Reay, and Simmons) as newly discovered crude oil. The judgment provided that the amount remitted to the DOE pursuant to the court order was to be distributed in a Subpart V proceeding.

B. Regulatory Background

Southland, like other producers of crude oil, was subject to the Mandatory Petroleum Price Regulations set forth in 6 C.F.R. Part 150 and 10 CFR Part 212. The DOE regulations, in effect from August 19, 1973 until January 27, 1981, governed prices charged in crude oil sales to first purchasers by defining ceiling prices for various tier classifications of crude oil. The regulations permitted producers to sell certain crude oil, such as "newly discovered crude oil" and crude oil

VOL 51 ISS 86 MY 5 1986 UMI

produced from a "stripper well property" at market price levels. When a producer sold crude oil, it was required to certify in writing to the purchaser the respective volumes of crude oil belonging to each tier classification in each purchase. 10 CFR § 212.131. When a refiner processed the crude oil, it was required to report these certifications to the DOE to enable the agency to administer the Crude Oil Entitlements Program. 10 CFR 211.67.

Under the Entitlements Program, refiners with above-average access to price-controlled oil made cash payments, through the purchase of entitlements, to refiners with below-average access to price-controlled oil. The program was intended generally to equalize access to the benefits of crude oil price controls among all domestic refiners and among all consumers of petroleum products. Because of the way the program worked, it also had the effect of dispersing overcharges resulting from crude oil miscertifications throughout the domestic refining industry. This aspect of the Entitlements Program is discussed at length in *Union Oil Co. v. DOE*, 668 F.2d 797 (Temp. Emer. Ct. App. 1982), *cert. denied*, 459 U.S. 1202 (1983), and in the OHA's report to the District Court in the Stripper Well Exemption Litigation, *Report of the Office of Hearings and Appeals, In re The Department of Energy Stripper Well Exemption Litigation*, MDL No. 378 (D. Kan., filed June 21, 1985); 13 DOE ¶ 90,507 (1985) (hereinafter referred to as "OHA Stripper Well Report"). Thus, to the extent that Southland miscertified old crude oil as newly discovered crude oil, the impact of the violations was spread throughout the domestic refining industry by the operation of the Entitlements Program.

C. DOE Policy regarding Crude Oil Overcharges

The OHA Stripper Well Report was issued on June 19, 1985. As a result of the findings in the Report, the DOE issued a Statement of Restitutionary Policy regarding overcharge funds associated with entitlements-period crude oil miscertifications whose impact was spread through the Entitlements Program. 50 FR 27400 (July 2, 1985), Fed. Energy Guidelines, § 90,508 (1985). The statement, issued on June 21, 1985, announced that no claims for direct restitution would be accepted in such cases, and the Department would maintain such overcharges in escrow to afford the Congress the opportunity to select the means of making indirect restitution *Id.*

In light of the DOE policy statement, the OHA issued an order announcing that it would apply the policy in special refund proceedings involving overcharge funds attributable to entitlements-period crude oil certification violations. 50 FR 27402 (July 2, 1985). After soliciting comments from potentially aggrieved parties regarding the application of the policy to pending refund proceedings, the OHA stated in *Amber Refining, Inc.*, 13 DOE § 85,217 (1985) that it will apply the DOE policy in crude oil refund cases.

III. Proposed Procedures

In view of the Departmental reatitutionary policy regarding entitlements-period crude oil certification violations, we propose that no claims be allowed with respect to the Southland crude oil overcharges and that the funds be pooled with other crude oil funds for disposition in accordance with departmental policies. *See* 50 FR 27402 (July 2, 1985); 50 FR 27400 (July 2, 1985); 50 FR 1919 (January 14, 1985).

It Is Therefore Ordered That: The refund amount remitted to the Department of Energy by Southland Royalty Company on January 4, 1985, pursuant to the court's order in *Seneca Oil Company v. DOE*, Civil Action No. 81-215-T shall be distributed in the manner set forth in the foregoing Decision.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPPE FRI-3011-7]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests (ICRs) that have been forwarded to the Office of Management and Budget (OMB) for review. The ICR describes the nature of the solicittion and the expected impact, and where appropriate includes the actual data collection instrument. The following ICRs are available for review and comment.

FOR FURTHER INFORMATION CONTACT: Patricia Minami, (202) 382-2712 or FIS 382-2712.

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: Development of New Source Performance Standards for Large Boilers (EPA ICR #1294). (This request is for a new, one-time collection.)

Abstract: The purpose of this ICR is to grather information to respond to anticipated public comments addressing the effect of a New Source Performance Standard (NSPS) for industrial-commercial-institutional steam generating units on the number of steam generating units constructed or refurbished.

Respondents: Owners of large boilers (over 100 million BTUs).

Office of Policy, Planning and Evaluation

Title: Radon Information Effectiveness Survey (EPA ICR #1296). (This is a request for a new survey.)

Abstract: EPA will obtain data from respondents in New York State on how well different information formats and delivery methods lead those at higher risks from radon to seek more corrective measures than those at lower risks. The Agency will evaluate the effectiveness of the information program in reducing the risks from radon as an alternative to regulatory actions.

Respondents: Two thousand households in New York State which have been measured for radon levels.

Office of Pesticides and Toxic Substances

Title: Tolerance Petitions and New Inert Ingredient Clearance (EPA ICR #0597). (This is a request to renew a previously approved ICR; it now includes the clearance or exemption from clearance for inert ingredients.)

Abstract: The Federal Food, Drug, and Cosmetic Act requires that an acceptable level of pesticide residue be established before it can be used on food or feed crop. Information and data are developed in support of the requested tolerance, exemption, or new inert ingredient clearance.

Respondents: Pesticide manufacturers. * * *

Comments on all parts of this notice may be sent to:

Nanette Liepman, U.S. Environmental Protection Agency, Office of Standards and Regulations (PM-223), Information and Regulatory Systems Division, 401 M Street, SW., Washington, DC 20460
and
Wayne Leiss (ICRs #1294 and 1296), or Carlos Tellez (ICR #0597), Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building (Room 3228), 726 Jackson Place, NW., Washington, DC 20503

Dated: April 28, 1986.

Daniel J. Fiorino,

Acting Director, Information and Regulatory Systems Division.

Pesticide Products Containing Carbon Tetrachloride; Notice of Intent To Cancel Registrations and Notice of Transmittal and Availability of Draft Notice To Cancel

Correction

In FR Doc. 86-8606 beginning on page 15372 in the issue of Wednesday, April 23, 1986, make the following corrections:

1. On page 15372 in **SUPPLEMENT INFORMATION**, in the second column, in the fifteenth line from the bottom, and in the third column, in the second full paragraph, first and seventeenth lines, "CCl_4" should read "CCl_4"; and

2. On page 15373, in the first column, in the fourth line of the third complete paragraph, "not" should read "now", and in the next line insert "not" after "chosen".

Certain Chemicals Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). This notice announces receipt of twenty-seven PMNs and provides a summary of each.

DATES: Close of Review Period:

[OPTS-59763 FRL-3012-4]

Alkyd; Certain Chemical Premanufacture Notice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). In the **Federal Register** of November 11, 1984, (49 FR 48066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. PMNs for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of one such PMN and provides a summary of it.

DATES: Close of Review Period:

Y 86-127—May 14, 1986.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-611, 401 M Street, SW., Washington, DC 20460, (202) 382-3725.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission by the manufacturer on the exemption received by EPA. The complete non-confidential document is available in the Public Reading Room E-107 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday excluding legal holidays.

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

April 29, 1986.

Background

On June 15, 1984, the Office of Management and Budget (OMB) delegated to the Board of Governors of the Federal Reserve System (Board) its approval authority under the Paperwork Reduction Act of 1980, as per 5 CFR 1320.9, "to approve of and assign OMB control numbers to collection of information requests and requirements conducted or sponsored by the Board under conditions set forth in 5 CFR 1320.9." Board-approved collections of information will be incorporated into the official OMB inventory of currently approved collections of information. A copy of the SF 83 and supporting statement and the approved collection of information instrument(s) will be placed into OMB's public docket files. The following forms, which are being handled under this delegated authority, have received initial Board approval and are hereby published for comment. At the end of the comment period, the proposed information collection, along with an analysis of comments and recommendations received, will be submitted to the Board for final approval under OMB delegated authority.

DATE: Comments must be received on or before May 20, 1986.

VOL 51 ISS 86 MY 5 1986 UMI

ADDRESS: Comments, which should refer to the OMB Docket number (or Agency form number in the case of a new information collection that has not yet been assigned an OMB number), should be addressed to Mr. William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th and C Streets, NW., Washington, D.C. 20551, or delivered to room B-2223 between 8:45 a.m. and 5:15 p.m. Comments received may be inspected in room B-1122 between 8:45 a.m. and 5:15 p.m., except as provided in § 261.6(a) of the Board's Rules Regarding Availability of Information, 12 CFR 261.6(a).

A copy of the comments may also be submitted to the OMB desk officer for the Board: Robert Neal, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: A copy of the proposed form, the request for clearance (SF 83), supporting statement, instructions, and other documents that will be placed into OMB's public docket files once approved may be requested from the agency clearance officer, whose name appears below.

Federal Reserve Board Clearance Officer—Martha Bethea—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202-452-3822).

Proposal to approve under OMB delegated authority the extension without revision of the following reports:

1. Report title: Statement Regarding Security Devices that do not meet the Minimum Requirements of Regulation P.
Agency form number: FR 4003
OMB Docket number: 7100-0112
Frequency: On occasion
Reporters: State member banks.
Small businesses are affected.
General description of report: This recordkeeping requirement is mandatory [12 U.S.C. 1882(b)]; no confidentiality issues arise since the information is maintained in the files of the State member banks.

Any state member bank not meeting the minimum standards for security devices, as outlined in Regulation P, must maintain in its files a record outlining the reasons for not meeting the standards.

2. Report title: Written Security Program for State Member Banks as Required by Regulation P.
Agency form number: FR 4004
OMB Docket number: 7100-0112
Frequency: One-time
Reporters: State member banks.
Small businesses are affected.
General description of report: This recordkeeping requirement is mandatory [12 U.S.C. 1882(b)]; no confidentiality issues arise because the records are maintained in the files of the state member banks.

All state member banks must maintain in their files a written security program outlining procedures to deter external crime and to assist in the apprehension of persons who commit these crimes.

3. Report title: Annual Statement of Compliance with the Bank Protection Act of 1968.
Agency form number: FR 4005
OMB Docket number: 7100-0112
Frequency: Annually
Reporters: State member banks.
Small businesses are affected.
General description of report: The annual statement is mandatory [12 U.S.C. 1882(b)] and is given confidential treatment [5 U.S.C. 552(b)(4)].

State member banks are required by the Federal Reserve Board to file with the appropriate Federal Reserve Bank an annual statement of compliance with Regulation P.

Board of Governors of the Federal Reserve System, April 29, 1986.

James McAfee,
Associate Secretary of the Board.

[FR Doc. 86-9969 Filed 5-2-86; 8:45 am]
BILLING CODE 6210-01-M

Bankers Trust New York Corp., New York, NY; Propose to Underwrite and Deal in Certain Securities to a Limited Extent

Bankers Trust New York Corporation, New York, New York, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.23(a)(3) of the Board's Regulation Y (12 CFR 225.23(a)(3)), for permission to engage through BT Securities Corporation ("Company"), in the activities of underwriting and dealing in, to a limited extent, the following securities which are eligible for purchase by banks for their own account but not eligible for banks to underwrite and deal in (hereinafter "ineligible securities"):

(1) Commercial paper;

(2) Municipal revenue bonds (obligations issued or guaranteed by a state or any political subdivision thereof, including industrial development bonds as to which the issuer or the governmental unit on behalf of which the industrial development bonds are issued is treated for federal tax purposes as the owner of the facility financed by bond proceeds);

(3) Mortgage-related securities (certificates representing fractional, undivided beneficial ownership interests in promissory notes secured by residential real estate mortgages and obligations collateralized by pass-through certificates of the Federal Home Loan Mortgage Corporation, the Federal National Mortgage Association or the Government National Mortgage Association or by residential mortgage whole loans, where the debt service requirement for these obligations are met by the cash flow from the pledged mortgage collateral); and

(4) Consumer-receivable-related securities (obligations secured by or representing an interest in loans or receivables of a type generally made to or due from consumers) (hereinafter "CRRs").

Company has previously applied for approval under § 225.25(b)(16) of Regulation Y (12 CFR 225.25(b)(16)) to underwrite and deal in securities and money market instruments that banks are expressly authorized to underwrite and deal in under section 16 of the Glass-Steagall Act (12 U.S.C. 24 Seventh), including U.S. government obligations and general obligations of states and their political subdivisions. The foregoing activities are presently conducted by Applicant and Applicant's principal banking subsidiary, Bankers Trust Company, but would be transferred to Company. Thereafter and upon consummation of the proposal, Company would commence underwriting and dealing in ineligible securities subject to the limitations set forth in the application. The activities would be performed through Company's offices in New York, serving customers in the United States and abroad.

Section 4(c)(8) of the Bank Holding Company Act provides that a bank holding company may, with Board approval, engage in any activity "which the Board after due notice and opportunity for hearing has determined (by order or regulation) to be so closely related to banking or managing or controlling banks as to be a proper incident thereto." The Board has not previously approved the proposed activities for bank holding companies.

Applicant states that the proposed activitis are so closely related to banking or managing or controlling banks as to be a proper incident thereto on the basis of its belief that banks engage in activities that it believes are functionally and operationally similar to those involved in the application, including discounting commercial paper; underwriting and dealing in eligible U.S. government and municipal securities, mortgage-backed securities and money market instruements; assessing credit and interest rate risk; and purchasing and pooling mortgage loans.

In determining whether a particular activity is a proper incident to banking, the Board considers whether the performance of the activity by an affiliate of a holding company can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest or unsound banking practices. Applicant maintains that permitting bank holding companies to engage in the proposed activities would be procompetitive and would enable holding companies to provide increased services to customers. In addition, Applicant believes the proposal would not result in adverse effects.

The application also presents issues under section 20 of the Glass-Steagall Act (12 U.S.C. 377). Section 20 of the Glass-Steagall Act prohibits the affiliation of a member bank, such as Bankers Trust Company, with a firm that is "engaged principally" in the "underwriting, public sale or distribution" of securities.

Applicant states that it would not be "engaged principally" in such activities on the basis of restrictions that would limit the amount of the proposed activity relative to the total business conducted by Company and relative to the total market in such activity.

During any two-calendar-year period, the Company's underwriting and dealing in ineligible securities ("ineligible activity") will account for no more than 15 percent of its total activities, measured by compliance at any time with two of the three indicia set forth below:

(1) The dollar volume of underwriting commitments (or underwriting sales if larger) and dealer sales attributable to ineligible activities as a percentage of the total dollar volume of all of Company's activities;

(2) The average assets acquired in connection with ineligible activity as a percentage of the average assets acquired in connection with all of Company's activities; and

(3) The gross income (*i.e.*, income, including gross interest income, before expenses and taxes) from ineligible activities as a percentage of the gross income from all of Company's activities.

In addition, Applicant will limit Company's involvement in the market for ineligible activity so that:

(1) The amount of commercial paper outstanding at any time underwritten by Company, and the amount of commercial paper held in inventory by Company on any day, will not exceed 10% of the average amount of dealer-placed commercial paper outstanding during the prior four calendar quarters (Applicant would reduce this limit from 10 percent to 3 percent if the Board determines that such a reduction in market share is legally required);

(2) With respect to the municipal securities covered by this Application, the volume of such securities underwritten domestically by Company in each calendar year will not exceed 3% of the total amount of such securities underwritten domestically by all firms during the prior calendar year, and the amount of such securities held by Company for dealing would not exceed at any time 3% of the total amount of such securities underwritten domestically by all firms during the prior year;

(3) With respect to the mortgage-related securities and CRRs covered by the application, taken together, the volume of such securities underwritten domestically by Company in each calendar year will not exceed 3% of the total amount of such securities underwritten domestically by all firms during the prior calendar year, and the amount of such securities held by the Company for dealing would not exceed at any time 3% of the total amount of such type of security underwritten domestically by all firms during the prior year.

While the Board has decided to publish Bankers Trust's proposal for comment, the Board does not thereby take any position on the "engaged principally" issue under the Glass-Steagall Act or other issues raised by the proposal under the Bank Holding Company Act. Publication of the proposal has been ordered by the Board solely in order to seek the views of interested persons on the issues presented by the application and does not represent a determination by the Board that the proposal is consistent or inconsistent with the Glass-Steagall Act or that the proposal meets or is likely to meet the standards of the Bank Holding Company Act. The Board previously published for comment applications by Citicorp (50 FR 20847) and J.P. Morgan & Co. Incorporated (50 FR 41025) to underwrite and deal in the proposed ineligible securities.

Comments are requested on the scope of activity permitted by the phrase "engaged principally" under the Glass-Steagall Act, including whether the phrase contemplates the type of limitations involved in this application, which are based on the Applicant's market share and on a percentage of the affiliate's total business activities. The Board also seeks comment on whether the term "engaged principally" in section 20 would preclude a member bank affiliate from engaging in activities restricted by this section on a substantial and regular or non-incidental basis and without regard to the amount of other activities conducted by the affiliate.

Comments are also requested on whether the proposed activities are "so closely related to banking or managing or controlling banks as to be a proper incident thereto," and whether the proposal as a whole can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices."

Upon the expiration of the public comment period, depending upon the comments received, the Board may wish first to consider the legal issue presented by the application under the Glass-Steagall Act in order to determine whether there is a legal basis for considering whether the activities could be permitted for a bank holding company under the Bank Holding Company Act.

Any request for a hearing on these questions must, as required by § 262.3(e) of the Board's Rules of Procedure (12 CFR 262.3(e)), be accompanied by a statement of the reasons why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of New York.

Any comments or requests for hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, not later than June 2, 1986.

VOL 51 ISS 86 MY 5 1986 UMI

Board of Governors of the Federal Reserve System, April 30, 1986.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

First Colonial Bankshares Corp., Formation of, Acquisition by, or Merger of Bank Holding Companies

The company listed in this notice has applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.24) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that application or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Comments regarding this application must be received not later than May 27, 1986.

A. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *First Colonial Bankshares Corporation,* Chicago, Illinois; to acquire 91.02 percent of Avenue Bancorporation, Oak Park, Illinois, and thereby indirectly acquiring 86.3 percent of the voting shares of Avenue Bank and Trust Company of Oak Park, Oak Park, Illinois, and 88.0 percent of the voting shares of Avenue Financial Corporation, Oak Park, Illinois, and thereby indirectly acquire 86.7 percent of the voting shares of Avenue Bank Northwest, Niles, Illinois; 94.5 percent of the shares of Avenue Bank of Elk Grove, Elk Grove Village, Illinois; and 96.1 percent of the voting shares of The Northlake Bank, Northlake, Illinois.

Board of Governors of the Federal Reserve System, April 29, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

First Corp.; Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo,* either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 23, 1986.

A. Federal Reserve Bank of St. Louis (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *First Corporation,* Henderson, Kentucky; to engage *de novo* through its subsidiary in the offering and sale of insurance by a finance company to a borrower to insure tangible personal property, except household goods, offered as security for a loan exceeding $300 against any substantial risk of loss, damage, or destruction for an amount not to exceed the actual value of such property or the approximate amount of the loan, whichever is greater, pursuant to § 225.25(b)(8)(i)(A) of the Board's Regulation Y and section 4(c)(8)(B) of the Bank Holding Company Act. These activities will be conducted in Madisonville, Kentucky and at loan branch offices in the cities of Madisonville, Owensboro, Henderson, Hopkinsville, Paducah, Central City, Franklin, Bowling Green and Glasgow, Kentucky.

Board of Governors of the Federal Reserve System, April 29, 1986.

James McAfee,

Associated Secretary of the Board.

BILLING CODE 6210-01-M

Security Pacific Corp.; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 23, 1986.

A. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Security Pacific Corporation,* Los Angeles, California; to acquire 100 percent of the voting shares of Arizona Bancwest Corporation, Phoenix, Arizona, and thereby indirectly acquire The Arizona Bank, Phoenix, Arizona. In connection with this application, SPC Acquisition Inc. has applied to become a bank holding company by acquiring Arizona Bancwest Corporation.

Security Pacific Corporation, Los Angeles, California, and SPC Acquisition Inc., have also applied to acquire:

(1) Bancwest Life Insurance Company, Phoenix, Arizona, and thereby engage in the reinsurance of life insurance issued by others in respect of credit extended by SPC affiliates to the extent authorized by § 225.25(b)(9) of the Board's Regulation Y;

(2) Bancwest Insurance Agency, Inc., Phoenix, Arizona, and thereby engage in business as an agent for the sale of credit life and disability insurance in respect of credit extended by SPC affiliates to the extent authorized by § 225.25(b)(8) of the Board's Regulation Y; and

(3) Bancwest Financial Services Company, Phoenix, Arizona, and thereby engage in commercial finance and leasing to the extent authorized by § 225.25(b)(1)(iv) and (b)(5) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, April 28, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 86E-0096]

Determination of Regulatory Review Period for Purposes of Patent Extension; Mexitil

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for Mexitil and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of a patent which claims this human drug product.

ADDRESS: Written comments and petitions should be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Michael W. Cogan, Office of Health Affairs (HFY-20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1382.

SUPPLEMENTARY INFORMATION: The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) generally provides that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under that act, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA recently approved for marketing the human drug product Mexitil, an antiarrhythmic indicated for supression of symptomatic ventricular arrhythmias. Following FDA's approval, Boehringer-Ingelheim International GmbH filed a patent term restoration application with the U.S. Patent and Trademark Office, which then requested FDA's assistance in determining the patent's eligibility for patent term restoration. In a letter dated March 24, 1986, FDA advised the Patent Office that the product had undergone a regulatory review period and that Mexitil represented the first commercial marketing or use of its active ingredient, mexiltine hydrochloride. Shortly thereafter, the Patent Office requested that FDA determine the product's regulatory review period.

FDA has determined that the applicable regulatory review period for Mexitil is 5,588 days. Of this time, 4,401 days occurred during the testing phase of the regulatory review period, while 1,187 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act became effective:* September 14, 1970. FDA records show that the investigational new drug application (IND) became effective on September 14, 1970 (30 days after its receipt by the agency; see 21 CFR 312.1(b)(4)). The applicant refers to a later IND more directly relied upon by the sponsor seeking marketing approval of Mexitil. However, because some data essential to the agency's approval of Mexitil were gathered under the earlier IND, FDA has used the effective date of the earlier IND to calculate the regulatory review period.

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the Federal Food, Drug, and Cosmetic Act:* October 1, 1982. FDA has verified that the new drug application (NDA 18-873) was initially submitted on October 1, 1982.

3. *The date the application was approved:* December 30, 1985. FDA has verified that NDA 18-873 was approved on December 30, 1985.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations

VOL 51 ISS 86 MY 5 1986 UMI

of the actual period for patent extension. In its application for patent extension, this applicant seeks 2 years of patent extension.

Anyone with knowledge that any of the dates as published is incorrect may, on or before July 7, 1986, submit to the Dockets Management Branch (address above) written comments and ask for a redetermination. Furthermore, any interested person may petition FDA, on or before October 31, 1986, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, Part 1, 98th Cong., 2d Sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Dockets Management Branch (address above) in three copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 29, 1986.

Allen B. Duncan,

Deputy Associate Commissioner for Health Affairs.

BILLING CODE 4160-01-M

[Docket No. 86E-0111]

Determination of Regulatory Review Period for Purposes of Patent Extension; Wellbutrin

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for Wellbutrin and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of a patent which claims this human drug product.

ADDRESS: Written comments and petitions should be directed to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Michael W. Cogan, Office of Health Affairs (HFY–20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–1382.

SUPPLEMENTARY INFORMATION: The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) generally provides that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under that act, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA recently approved for marketing the human drug product Wellbutrin, an antidepressant for treatment of depression in patients who fail to respond adequately to or who cannot tolerate alternative antidepressant treatments. Following FDA's approval, Burroughs Wellcome Co. filed a patent term restoration application with the U.S. Patent and Trademark Office, which then requested FDA's assistance in determining the patent's eligibility for patent term restoration. In a letter dated March 26, 1986, FDA advised the Patent Office that the product had undergone a regulatory review period and that Wellbutrin represented the first commercial marketing or use of its active ingredient, bupropion hydrochloride. Shortly thereafter, the Patent Office requested that FDA determine the product's regulatory review period.

FDA has determined that the applicable regulatory review period for Wellbutrin is 5,634 days. Of this time, 4,165 days occurred during the testing phase of the regulatory review period, while 1,469 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act became effective:* July 30, 1970. FDA has verified that the investigational new drug application (IND) became effective on July 30, 1970 (30 days after its receipt by the agency; see 21 CFR 312.1(b)(4)). The applicant refers to a later IND more directly relied upon by the sponsor seeking marketing approval of Wellbutrin. However, Because some of the data essential to the agency's approval of Wellbutrin were gathered under the earlier IND, FDA thus used the effective date of the earlier IND to calculate the regulatory review period.

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the Federal Food, Drug, and Cosmetic Act:* December 23, 1981. FDA has verified that the new drug application (NDA 18–644) was initially submitted on December 23, 1981.

3. *The date the application was approved:* December 30, 1985. FDA has verified that NDA 18–644 was approved on December 30, 1985.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations of the actual period for patent extension. In it application for patent extension, this applicant seeks 2 years of patent extension.

Anyone with knowledge that any of the dates as published is incorrect may, on or before July 7, 1986, submit to the Dockets Management Branch (address above) written comments and ask for a redetermination. Furthermore, any interested person may petition FDA, on or before October 31, 1986, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit burden, the petition must contain an FDA investigation. (See H. Rept. 857, Part 1, 98th Cong., 2d Sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Dockets Management Branch (address above) in three copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 29, 1986.

Allen B. Duncan

Deputy Associate Commissioner for Health Affairs.

BILLING CODE 4160-01-M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Meetings; Alaska Land Use Council

As required by the Alaska National Interest Lands Conservation Act (ANILCA), Pub. L. 96–487, dated December 2, 1980, section 1201, Paragraph (h), the Alaska Land Use Council will meet at 9:00 a.m., Monday, June 9, 1986, in the room 117, U.S. Federal Building and Court House, 701 C Street, Anchorage, Alaska.

The tentative agenda will include Council consideration of:

—Alaska Land Use Council Work Program Recommendations for 1986–87
—Aniakchak National Monument and Preserve General Management Plan
—Bering Land Bridge National Preserve General Management Plan
—Cape Krusenstern National Monument General Management Plan
—Katmai National Park and Preserve General Management Plan
—Kobuk Valley National Park General Management Plan
—Noatak National Preserve General Management Plan
—Wrangell/St. Elias National Park and Preserve General Management Plan
—State Cultural Assistance Directory
—Stikine River Access Study Report, and
—Other items as may be appropriately considered by the Council.

Any individual desiring to appear before the Council to address any of the above matters or matters of general concern to the Council should contact either Cochairman's office before the close of business Tuesday, May 27, 1986.

For further information contact:

Alaska Land Use Council, Office of the Federal Cochairman, P.O. Box 100120, Anchorage, Alaska 99510, (907) 272–3422, (FTS) 271–5485

Alaska Land Use Council, Office of the State Cochairman Designee, Pouch AM, Juneau, AK 99811, (907) 465–3562

2800 Denali St, Suite 700, Anchorage, AK 99503, (907) 274–1581.

The public is invited to attend.

William P. Horn,

Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310-10-M

Bureau of Land Management

Nevada: Proposed Withdrawal and Reservation of Lands

Correction

In FR Doc. 86–8157, appearing on page 12574, in the issue of Friday, April 11, 1986, make the following correction.

In the third column, second line, after the first W½ insert a "comma".

BILLING CODE 1505-01-M

Bureau of Reclamation

[INT—DES 86–21]

Kesterson Program; Merced and Fresno Counties, CA.; Availability of Draft Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the Department of the Interior has prepared a draft environmental impact statement (DEIS) addressing alternative plans for the cleanup of Kesterson Reservoir and the San Luis Drain (SLD). This DEIS has been prepared in cooperation with the Fish and Wildlife Service and the Army Corps of Engineers.

Kesterson Reservoir and the SLD are contaminated with selenium originating from drainwater discharges that are scheduled to cease on June 30, 1986. This DEIS describes the environmental impacts of four alternative plans, in addition to a No-Action Alternative, for Kesterson Reservoir and SLD cleanup and disposition, and potential offsite wetland mitigation. Alternative plans for reservoir cleanup consist of: 1) Vegetation harvesting, maintaining the ponds wet or dry and monitoring (Flexible Response Plan); 2) using a water or soil cover to immobilize selenium in the reservoir sediments (Immobilization Plan); 3) onsite disposal of contaminated sediments and vegetation, and restoring the majority of the reservoir to wetland habitat (Onsite Disposal Plan); and 4) offsite disposal of contaminated sediments and vegetation, and creating upland habitat on the majority of the reservoir (Offsite Disposal Plan). Each of the four plans includes complementary alternatives for the SLD and potential offsite mitigation for loss of Kesterson Reservoir wetland habitat.

Reclamation's proposed action is a phased approach. The Flexible Response Plan (wet option) would be implemented first. If water quality or biological monitoring indicates the plan is unsuccessful, the Immobilization Plan would be implemented. If monitoring indicates the Immobilization plan is also unsuccessful, the Onsite Disposal Plan would be implemented.

Copies are available for inspection at the following locations:

Director, Office of Environmental Affairs, Room 7429, Bureau of Reclamation, Washington, DC 20240, Telephone: (202) 343–4991

Regional Director, Bureau of Reclamation, Mid-Pacific Region, 2800 Cottage Way, Sacramento, CA 95825, Telephone: (916) 978–5048

Division of Acquisition and Property Management, Document Systems Management Branch, Library Section, Code 823, Engineering and Research Center, Denver Federal Center, Denver, CO 80225, Telephone: (303) 236–6963.

Single copies of the statement may be obtained on request to the Director, Office of Environmental Affairs, or the Regional Director at the above addresses. Copies will also be available for inspection in libraries in the project vicinity. Review comments must be received by the date indicated on the cover sheet of the document.

Public Hearings will be held at the following times and places:

June 17, 1986, 7:00 p.m., Merced county Fairgrounds (Floral Bldg.), 4th and F Streets, Los Banos, CA

June 18, 1986, 7:00 p.m., Fresno Convention Center (Wine Room), 700 M Street, Fresno, CA

June 19, 1986, 7:00 p.m., Gustine Elementary School Gymnasium, Highway 33 and Grove Street, Gustine, CA.

Individuals and representatives of interested organizations will have an opportunity to make oral presentations for the record on the DEIS at the hearings. Those persons intending to testify should limit their oral presentation to 10 minutes. A sign-up sheet for presentations will be provided at each hearing. Written statements from those unable to attend and from those wishing to supplement their oral presentation at a hearing should be received at the Bureau of Reclamation's Sacramento, California, office by June 26, 1986, for inclusion in the hearing record.

Dated: April 30, 1986.

Bruce Blanchard,

Director, Office of Environmental Project Review.

BILLING CODE 4310-48-M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[V-85-2]

Variance Applications; AMAX Lead Company of Missouri

AGENCY: Occupational Safety and Health Administration, Labor Department.

ACTION: Notice of Cancellation of Hearing on Application for Permanent Variance.

SUMMARY: This notice announces cancellation of the hearing scheduled for May 6, 1986, on the application of AMAX Lead Company of Missouri for a permanent variance from Table II of the standard prescribed in 29 CFR 1910.1025(f)(2). The variance application concerns the limitation on the use of half-mask, air-purifying respirators to areas where the lead concentration in air is less than 10 times the permissible exposure limit (PEL). The Occupational Safety and Health Administration has determined, after additional investigation, that a permanent variance will be granted in this matter.

DATES: The hearing had been scheduled to begin at 9:30 a.m. on May 6, 1986, at the Federal Building, Courtroom No. 2, Room 502, U.S. court of Appeals, U.S. Courthouse and Custom House, 1114 Market Street, St. Louis, Missouri 63101.

FOR FURTHER INFORMATION CONTACT: James J. Concannon, Director, Office of Variance Determination, U.S. Department of Labor, Room N-3656, 200 Constitution Avenue, NW., Washington, D.C. 20210, telephone: 202-523-7193.

Authority: This document was prepared under the direction of Patrick R. Tyson, Acting Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210 (Sec. 6, 84 Stat. 1593 (29 U.S.C. 655); 29 CFR Part 1911; and Secretary of Labor's Order No. 9-83 (48 FR 35736)).

Signed at Washington, D.C. this 30th day of April, 1986.

Patrick R. Tyson,

Acting Assistant Secretary.

BILLING CODE 4510-26-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-155]

Consumers Power Co., Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering the approval of disposal of approximately 5300 cubic feet of contaminated soil by leaving it in place proposed by Consumers Power Company (the licensee) for the Big Rock Point Plant, located in Charlevoix County, Michigan.

Environmental Assessment

Identification of Proposed Action: The proposed action by the NRC would approve the disposal of contaminated soil by leaving it in place at the facility, as proposed by the licensee's request dated August 16, 1985. The request for approval is submitted pursuant to 10 CFR 20.302. The total volume of contaminated soil is estimated to be 5300 cubic feet.

The Need for the Proposed Action: In May of 1984, soil underneath the turbine building was contaminated by a leak of condensate from a 2-inch diameter aluminum pipe also located under the floor of the turbine building. The pipe normally carries condensate to the condensate storage tank. Approximately 3×10^{-3} Ci of Co-60, Mn-54, Ce-134 and Ce-137, plus shorter-lived radionuclides, may have been released into the soil. After removal of eight 55-gallon drums of contaminated soil, and reduction by radioactive decay, the quantities remaining as of July 1985 are estimated by the licensee to be about 7×10^{-6} Ci of Co-60, 2×10^{-3} Ci of Mn-54, 1.1×10^{-3} Ci of Ce-134 and 1.0×10^{-3} Ci of Ce-137, totalling about 3×10^{-6} Ci.

Environmental Impacts of the Proposed Action: In the attachment to the letter of August 16, 1985, the licensee provided information on the geology and hydrology of the area, on behavior of currents in the adjacent waters of Lake Michigan, and on the soil sampling done to determine the extent of the contamination. The licensee also provided an assessment of the potential radiological impacts of leaving the soil in place.

The staff has reviewed the information submitted by the licensee. Considering the size of storage tanks involved and measured concentrations of radionuclides, the staff judges that the licensee's estimates of the quantity of water and the quantities of radionuclides leaked to the soil are reasonable but subject to some uncertainty. The analyses of soil samples show that the concentrations of radionuclides remaining in the soil are small. The staff judges the licensee's estimates of the volume of soil contaminated and of the total quantities of radionuclides remaining in the soil to be only approximate. However, based on review of the submitted information on the site geology and hydrology and the results of soil sampling, the staff considers the concentrations of radionuclides in the soil and the potential extent of the soil contamination to be adequately defined.

The staff has evaluated the impacts of leaving the contaminated soil in place, and finds that the potential environmental impacts are insignificant. For conservatism, the staff based its estimates of doses from the soil on the radioactivity concentrations in the soil at the sampling point (outside of the excavated area) showing the highest concentrations of contamination.

The average concentrations of the significant radionuclides at this location, with some correction for background, are:

Mn-54	2.5×10^{-7} Ci/m³	2.6×10^{-11} Ci/m³
Co-60	3.2×10^{-7} Ci/m³	7.3×10^{-5} Ci/m³
Ce-134	2.0×10^{-6} Ci/m³	4.3×10^{-6} Ci/m³
Ce-137	2.4×10^{-6} Ci/m³	1.9×10^{-6} Ci/m³
	8.0×10^{-6} Ci/m³ * (July 10, 1984)	2.8×10^{-4} Ci/m³ * (10 years from now)

*For comparison, radioactive K-40 occurs naturally in soil at an average concentration of 1.0×10^{-5} Ci/m³.

For its estimates of the potential impacts of any release of the radioactivity to the waters of Lake Michigan, the staff used the licensee's estimate of the total quantities leaked. The total quantities of the more important radionuclides leaked were estimated by the licensee to be, as of May 30, 1984:

Mn-54	1.30×10^{-4} Ci
Co-60	2.40×10^{-4} Ci
Ce-134	1.22×10^{-4} Ci
Ce-137	1.74×10^{-4} Ci
	6.33×10^{-4} Ci

Results of the staff's evaluation of the impacts are provided in Table 1.

TABLE 1.—Potential Impacts of Leaving the Soil in Place

	Estimated dose rate *
Occupational Radiation Exposure:	
Working above the contaminated soil, 1000 hours/year.	1.0 mrem
Working in a hole in the soil, per week	(*)
Inhalation of contaminated dust, dose to the lung, per year.	(*)

TABLE 1.—Potential Impacts of Leaving the Soil in Place—Continued

	Estimated dose rate *
Potential Exposure of the Public:	
Living above the contaminated soil, per year	(b,d)
Eating vegetables grown in the soil, per year	(c,d)
Shoreline recreation	(*)
Eating fish	(*)
Drinking water	(*)

*=All doses are radiation dose to the total body of an individual unless otherwise specified. Dose estimates are primarily based on the methodology of U.S. NRC Regulatory Guide 1.109, Rev. 1, and on the concentrations of radionuclides in the soil at the maximum sampling point outside the excavated area.

b=Less than 1.0 mrem.

c=Less than 0.1 mrem.

d=With 10 more years' radioactive decay, but no further removal by groundwater transport or other processes.

*=Less than 0.1 mrem to any individual if all leaked quantities were released to Lake Michigan at once; release by groundwater transport through the soil will result in smaller doses.

These results show that exposure rates due to leaving the contaminated soil in place are at most only about 3 mrem per year to the total body. For perspective, the radiation from the naturally occurring radionuclides in soils and rocks plus cosmic radiation give a person in Michigan a whole-body dose rate of about 89 mrem per year outdoors, which may be altered as much as 20 mrem per year by the type of construction of the person's residence (e.g., wood frame or brick) and the amount of time spent in it. The staff's estimate of about 3 mrem per year is highly conservative because the soil sampling indicates that at most only a few hundred square feet are so highly contaminated, and that most of the contamination is at depths where the overlying soil and concrete would shield people from the radioactivity more effectively than is assumed in the staff's calculations. It is unlikely that a member of the general public would be exposed to the contaminated soil until after the plant decommissioning, 10 years or more in the future, since most of the contaminated soil is located under the turbine building. The staff's estimates of potential exposures from release of the contamination to the waters of Lake Michigan are conservative because they are based on the modeling assumption of an instantaneous release of all the leaked quantities (as of May 30, 1984) of radionuclides into Lake Michigan, with no allowance for the retention of contamination in the soil which is evidenced by the results of analysis of soil samples.

With regard to the nonradiological impacts, the staff judges that leaving the soil in place has the smallest impact.

Based on our review and evaluation of the proposed disposal, we find that:

(1) The radiation exposures to the nuclear station workers involved in the disposal are small compared to the routine occupational exposures at the Big Rock Point Plant.

(2) The possible radiation risks to members of the general public as a result of such disposal are well below regulatory limits and small in comparison to the doses they receive each year from natural background radiation.

(3) The nonradiological environmental impacts of the proposed procedure are minor.

Alternatives to the Proposed Action: The principal alternative to leaving the contaminated soil in place would be to dig it up, package it in 55-gallon drums or other suitable containers and ship it to a disposal facility licensed to dispose of low level radioactive waste. This would be costly, requiring, for example, the shipping of more than 700 55-gallon drums. It could also require the disruption of the overlying turbine building. On the basis of the above analysis and evaluations and after weighing the environmental, technical, and other benefit against the environmental costs, the staff concludes that the action called for under NEPA and 10 CFR Part 51 is the issuance of an approval of the proposed waste disposal procedure.

Alternative Use of Resources: The principal result of this action does involve the use of resources beyond the scope used during normal plant operations; however, this new use of land is not significant, as the land involved is located, and will remain in place, underneath the floor of the turbine building. This action involves no other critical materials or resources.

Agencies and Persons Consulted: The Commission's staff reviewed the licensee's request and has not consulted other agencies or persons.

Finding of no Significant Impact

The Commission has determined not to prepare an evnironmental impact statement for the proposed action.

Based upon the foregoing environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the licensee's request for approval dated August 16, 1985, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC 20555 and at North Central Michigan College, 1515 Harvard Street, Petosky, Michigan 49770.

Dated at Bethesda, Maryland, this 29th day of April 1986.

For the Nuclear Regulatory Commission.

Draft Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a new guide planned for its Regulatory Guide Series together with a draft of the associated value/impact statement. This

VOL 51 ISS 86 MY 5 1986 UMI

series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, WM 407-4 (which should be mentioned in all correspondence concerning this draft guide), is entitled "Methods for Estimating Radioactive and Toxic Airborne Source Terms for Uranium Milling Operations" and is intended for Division 3, "Fuels and Materials Facilities." It is being developed to provide guidance acceptable to the NRC staff on methods, models, data, and assumptions for estimating airborne emissions of radioactive and toxic materials from uranium mills to be used in preparing environmental reports. NUREG/CR-4068, "Methods for Estimating Radioactive and Toxic Airborne Source Terms for Uranium Milling Operations," provides additional information on radioactive and toxic material releases.

This draft guide and the associated value/impact statement are being issued to involve the public in the early stages of the development of a regulatory position in this area. They have not received complete staff review and do not represent an official NRC staff position.

Public comments are being solicited on both drafts, the guide (including any implementation schedule) and the draft value/impact statement. Comments on the draft value/impact statement should be accompanied by supporting data. Written comments may be submitted to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Comments may also be delivered to Room 4000, Maryland National Bank Building, 7735 Old Georgetown Road, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Copies of comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC. Comments will be most helpful if received by July 7, 1986.

Although a time limit is given for comments on these drafts, comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC. Requests for single copies of draft guides (which may be reproduced) or for placement in an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at this 28th day of April 1986.

For the Nuclear Regulatory Commission.

Karl R. Goller,

Director, Division of Radiation Programs and Earth Sciences, Office of Nuclear Regulatory Research.

BILLING CODE 7590-01-M

[Docket No. 50-382]

Louisiana Power & Light Co.; Withdrawal of Application for Amendment to Facility Operating License

The United States Nuclear Regulatory Commission (The Commission) has granted the request of Louisiana Power and Light Company (the licensee) to withdraw a portion of its December 2, 1985 application for a proposed amendment to Facility Operating License No. NPF-38, which authorizes operation of the Waterford Steam Electric Station, Unit No. 3, located in St. Charles Parish, Louisiana. The proposed amendment would have changed a reference in Administrative Control 6.4.1 of the Technical Specifications from section 5.2 of ANSI 3.1-1978 to section 5.5 of the same ANSI Standard. The Commission issued a Notice of Consideration of Issuance of Amendment in the **Federal Register** on January 29, 1986 (51 FR 3715). By letter dated April 15, 1986, the licensee withdrew this portion of its application for the proposed amendment. The Commission has considered the licensee's April 15, 1986 letter and has determined that permission to withdraw this portion of the December 2, 1985 application for amendment should be granted.

For further details with respect to this action, see (1) the application for amendment dated December 2, 1985; and (2) the licensee's letter dated April 15, 1986, withdrawing a portion of the application for license amendment. The above documents are available for public inspection at the Commission Public Document Room, 1717 H Street NW., Washington, DC and at the University of New Orleans Library, Louisiana Collection, Lakefront, New Orleans, Louisiana 70122.

Dated at Bethesda, Maryland, this 28 day of April, 1986.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

White House Science Council; Meeting

The White House Science Council, the purpose of which is to advise the Director, Office of Science and Technology Policy (OSTP), will meet on May 15 and 16, 1986 in Room 5104, New Executive Office Building, Washington, D.C. The meeting will begin at 6:00 p.m. on May 15, recess and reconvene at 8:00 a.m. on May 16. Following is the proposed agenda for the meeting:

(1) Briefing of the Council, by the Assistant Directors of OSTP, on the current activities of OSTP.

(2) Briefing of the Council by OSTP personnel and personnel of other agencies on proposed, ongoing, and completed panel studies.

(3) Discussion of composition of panels to conduct studies.

The May 15 session and a portion of the May 16 session will be closed to the public.

The briefing on some of the current activities of OSTP necessarily will involve discussion of material that is formally classified in the interest of national defense or for foreign policy reasons. This is also true for a portion of the briefing on panel studies. As well, a portion of both of these briefings will require discussion of internal personnel procedures of the Executive Office of the President and information which, if prematurely disclosed, would significantly frustrate the implementation of decisions made requiring agency action. These portions of the meeting will be closed to the public pursuant to 5 U.S.C. 552b(c) (1), (2), and 9(B).

A portion of the discussion of panel composition will necessitate the disclosure of information of a personal nature, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Accordingly, this portion of the meeting will also be closed to the public, pursuant to 5 U.S.C. 552b(c)(6).

Because of the security in the New Executive Office Building, persons wishing to attend the open portion of the meeting should contact Annie L. Boyd, Secretary, White House Science Council at (202) 456-7740, prior to 3:00 p.m. on May 14. Ms. Boyd is also available to provide specific information regarding time, place and agenda for the open session.

Jerry D. Jennings,

Executive Director, Office of Science and Technology Policy.

April 30, 1986.

BILLING CODE 3170-01-M

PEACE CORPS

Agency Information Collection Activities Under OMB Review

AGENCY: Peace Corps.

ACTION: Notice of submission of public use form review request to the Office of Management and Budget.

SUMMARY: Pursuant to the Paperwork Reduction Act of 1981 (44 U.S.C. Chapter 35), the Peace Corps has submitted to the Office of Management and Budget a request to approve the use of the Peace Corps Volunteer Delivery System Questionnaire through July 31, 1989. The form is completed voluntarily by those invited to attend a staging event prior to Peace Corps training and by those attending a stateside training. The Questionnaire provides information concerning individual experiences in being processed through the Volunteer Delivery System. This information is necessary for Peace Corps to evaluate the effectiveness of the Volunteer Delivery System. Though there are demographic questions, such questions will not/cannot be used to identify specific individuals who have filled out the Questionnaire. Information about the form:

Agency Address: Peace Corps, 806 Connecticut Avenue, NW., Washington, DC 20526

Title of Request: Approval of use

Frequency of Collection: On occasion

General Description of Respondents: Individuals who attend pre-training stagings prior to becoming a Peace Corps Volunteer

Estimated Number of Responses: 3,000 annually

Estimated Hours for Respondents to Furnish Information: Thirty (30) minutes each

Respondents Obligation to Reply: Voluntary

Comments: Comments on this form request should be directed to Francine Picoult, Desk Officer, Officer of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

A copy of the form may be obtained from Phillip Seder, Office of Placement, 806 Connecticut Avenue, NW., Room 906, Washington, DC 20526. Mr. Seder may be called on area code 202-632-6595.

This is not a request to which 44 U.S.C. 3504(h) applies.

This notice is issued in Washington, DC, on April 30, 1986.

Linda Rae Gregory,

Associate Director for Management.

Robert E. McClendon,

Certifying Officer, Peace Corps.

BILLING CODE 6051-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-23187; File Nos. SR-PSDTC-84-16; SR-PCC-85-04; and SR-PSDTC-83-09]

Self-Regulatory Organizations; Pacific Securities Depository Trust Co. and Pacific Clearing Corp.; Order Approving and Withdrawing Proposed Rule Change

The Pacific Securities Depository Trust Company ("PSDTC"), on December 17, 1984, filed a proposed rule change (File No. SR-PSDTC-84-16) under section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"). The Pacific Clearing Corporation ("PCC"), PSDTC's sister clearing agency, on June 5, 1985, filed a companion proposed rule change (File No. SR-PCC-85-04) under that Section of the Act. The Commission published notice of the proposals in the **Federal Register** on January 24 and June 17, 1985, respectively, to solicit public comment.[1] No public comment was received. This Order approves the proposals.[2]

I. Introduction

PSDTC's proposal would establish a bearer municipal bond program. Specifically, the proposal would make certain bearer municipal bonds eligible for deposit at PSDTC and would establish procedures for their book-entry processing. The proposed procedures, among other things, govern deposits of certificates, book-entry deposits, book-entry deliveries, pledges, interest collection and payment, call and maturity processing and withdrawals in bearer or, in some cases, registered form.[3]

PCC's proposal would authorize PCC to provide services to PSDTC participants using the bearer municipal bond program. Specifically, PCC securities proceesing windows could be used to deposit and withdraw bonds. Also, interest payable to PSDTC participants with respect to bearer

[1] Securities Exchange Act Release No. 21660 (January 14, 1985), 50 FR 3440 (January 24, 1985) and Securities Exchange Act Release No. 22132 (June 1[illegible] 1985), 50 FR 25144 (June 17, 1985).

[2] The Commission also is granting PSDTC's request to withdrew File No. SR-PSDTC-83-09, which was published for comment in Securities Exchange Act Release No. 20340 (November 2, 1983), 48 FR 51301 (November 18, 1983). The proposals approved today replace File No. SR-PSDTC-83-09.

[3] Because PCC/PSDTC already provide almost identical services for registered municipal securities, PCC/PSDTC participants now will be able to use the same processing system to handle all municipal securities transactions, rather than dual systems depending upon form of issuance.

BEST COPY AVAILABLE

VOL 51 ISS 86 MY 5 1986 UMI

bonds on deposit at PSDTC will be reflected on PCC transaction blotters, settlement sheets and pay/collect reports.

II. Description

Under the proposals, all processing must occur in special PSDTC Bearer Municipal Bond Accounts. Participants may make deposits to these accounts by delivering certificates, in good deliverable form,[4] to a PCC or PSDTC processing window at any of PCC/PSDTC's offices. Similarly, participants may withdraw certificates from these accounts or convert book-entry positions in bearer bonds to registered form (when conversion is authorized by the issuer) by submitting appropriate instructions to one of PCC/PSDTC's offices.

PSDTC's proposed system would enable PSDTC's participants to make book-entry deliveries and pledges of bearer bond positions to other participants, including pledgee-participants banks. PSDTC participants could effect free and valued book-entry deliveries of bearer bond positions by manual or PCC/PSDTC's Pacific Participant Terminal System ("PPTS") instructions. Participants could instruct PSDTC to make book-entry deliveries to their accounts or to third parties' accounts at other registered securities depositories, *i.e.*, the Depository Trust Company ("DTC") the Midwest Securities Trust Company ("MSTC") and the Philadelphia Depository Trust Company ("Philadep"). Participants would effect pledges by forwarding instructions to PSDTC on a special pledge deposit form or by entering an appropriate instruction on PPTS.

The proposals would provide participants with several important ancillary services. First, PSDTC would provide a coupon clipping, collection and payment service. PSDTC participants would receive coupon interest payments for deposited bearer municipal bonds automatically (*i.e.*, without any participant instruction). On record dates, PSDTC will advise participants of their account positions and projected interest payments. PSDTC will forward clipped bond coupons to issuer's paying agents. On payable date, PCC will include the interest payments in participants' next-day settlement reports. On the following day, the interest payments will be included in participants' PCC Net Settlement Sheets and reflected on participants' PCC Pay/Collect Reports. PSDTC plans to pay interest to participants, even if PSDTC does not receive interest payments from paying agents prior to paying interest to participants. In that case, PSDTC will recover any finance costs by changing each participant a daily finance charge on the uncollected balance.[5] This charge will be reflected as Bearer Interest Charges on nonthly billing statements.

Second, PSDTC would provide bond call processing services. PSDTC will monitor and be responsible for processing calls published in the *Standard and Poor's Called Bond Report, Wall Street Journal (West Coast Edition)* and *Los Angeles Times*. Participants will remain responsible for monitoring bond call notices in other financial publications. PSDTC will be responsible for processing these other calls if a participant advises PSDTC of the pending call at least five business days before the call date. PSDTC will submit called certificates to the redemption agent, cancel participants' positions in redeemed bonds, collect redemption proceeds and disburse proceeds to participants by issuing checks.[6] For whole issue calls and redemptions, PSDTC will submit to the issuer's redemption agent all positions in the called security issue and will make the security issue ineligible for continued and future deposit at PSDTC. For partial redemptions, PSDTC will use an impartial lottery to allocate the call among all participants' positions.[7]

Third, PSDTC will process maturing bonds. PSDTC will submit maturing certificates to the appropriate paying agent. On maturity date, maturity values will be reflected on PSDTC Member Position and Cash Reports and all participants' positions in the maturing bond issue will be cancelled. PSDTC will issue checks for maturing bonds on the business day after maturity date. Like uncollected interest payments, maturity payments not collected by PSDTC from paying agents prior to PSDTC's payment to participants will result in daily finance charges to participants.

PSDTC's proposal includes a fee schedule for these proposed services. The fees cover account dues,[8] book-entry movements,[9] custody services,[10] deposits[11] and withdrawals.[12] Incidental expenses and research costs associated wtih special requests will be passed through to participants.

PSDTC plans initially to operate the program on a limited basis with a small number of bearer municipal bond issues eligible for deposit. To be included in the initial operation of the program, certificates must be in multiples of $1000 and must have imprinted CUSIP numbers. PSDTC intends gradually to increase eligible issues to meet its participants' needs. (In fact, participants can request that PSDTC make an issue eligible.) In addition, PSDTC and the other depositories hope to standardize their eligibility criteria. In any event, PSDTC currently is receiving daily computer tapes from DTC containing a listing of all DTC-eligible issues. PSDTC compares this report to its eligibility list and any issues not yet PSDTC-eligible are made eligible immediately.

Under an agreement between PSDTC and Security Pacific Clearing and Services Corporation ("Security Pacific"), Security Pacific will perform most custodial and certificate handling services for PSDTC's bearer municipal securities bond program. Security Pacific at all times will maintain custody of deposited bonds in California. Security Pacific will collect interest, redemption and maturity payments from paying agents and will pay PSDTC these amounts in next-day funds on applicable payable dates. If Security Pacific experiences delays in collecting payments from paying agents, Security Pacific will charge PSDTC a daily financing charge for payments advanced to PSDTC.[13] If, however, Security Pacific fails timely to present bonds for call or maturity payments or to make interest payments to PSDTC, Security Pacific will pay PSDTC the applicable daily finance charges. PSDTC and Security Pacific each will bear the risk of damages arising out of their own acts or omissions. Moreover, Security Pacific's performance under the Agreement, including the full and prompt payment of all monies due PSDTC (after due notice from PSDTC), would be guaranteed by Security Pacific's parent, Security Pacific Corporation ("SPC"), a regulated bank holding company.

PCC/PSDTC and Security Pacific have created an elaborate safeguarding system designed to ensure the safeguarding of securities and finds in their possession or for which they are responsible. First, access to Security Pacific's securities processing area will be restricted to employees with security badges and visitors who must be "signed in" by appropriate Security Pacific personnel. All securities processing areas will be monitored by cameras. Similarly, access to Security Pacific's vault will be restricted to certain employees and elaborate vault control procedures have been developed for opening and closing the vault. Furthermore, Security Pacific will microfilm (in duplicate) and verify all deposited securities. PSDTC and Security Pacific will reconcile their bearer municipal bond positions each week and all activity will be monitored daily. The reconciliation will be done automatically and breaks will be immediately researched. Any needed adjustments will be researched and completed by PCC/PSDTC's Stock Record department in San Francisco. Security Pacific plans to audit vault contents at least three times per year, and SPC will continue to audit Security Pacific each year, focusing on securities processing controls. Finally, PSDTC, on request, will be able to inspect, during regular business hours, Security Pacific's facilities and audit its books and records as they relate to Security Pacific's PSDTC processing activities.

III. PCC/PSDTC's Rationale

PCC/PSDTC believe that the proposals are consistent with the Act because they would reduce physical deliveries of bearer municipal securities, enhance the safekeeping of those securities, and enhance the interface between registered securities depositories. PCC/PSDTC also believe that the proposals are consistent with the Act because they equitably allocate fees and other charges among participants.

[4] A security is in "good deliverable form" under PSDTC's procedures if: (1) The issue must be eligible for deposit as bearer bond; (2) an appropriate deposit must be correctly completed; (3) the CUSIP number must be printed on the certificate; (4) therpar value of the certificates must equal the share quantity on the deposit form; (5) deposits presented up to and on payable date, minus one month, must have all the current coupons attached in correct sequence and not mutilated or cancelled; (6) legal opinions must be printed on the bond or attached to the cetificate and (7) certificates for which a call notice has been published on or prior to delivery date will not constitute good delivery.

[5] PSDTC will calculate finance charges by averaging the daily high and low New York broker call rate in the Los Angeles edition of the *Wall Street Journal*.

[6] Participants that do not want PSDTC to process their called bonds must withdraw them from PSDTC prior to a date to be specified for each call.

[7] *See* Part X(B) of the proposed procedures in File No. SR-PSDTC-86-16 for a detailed description. PSDTC's lottery procedures are similar to those used by other registered clearing agencies.

[8] Dues are $250 per month for the first bearer municipal bond account and $60 per month for each sub-account.

[9] Most book-entry movement fees are $1.50.

[10] Custody service fees are $1.85 per issue per month, plus $0.01 per CUSIP value on deposit each month (as of the escond to last day of the month).

[11] Deposit fees range from $5 to $13, depending on time of deposit.

[12] PSDTC would assess $5 for each withdrawal instruction (per issue), plus $0.04 per $1000 per value, up to $20. In addition, PSDTC would assess participants requesting certificates in registered form $2.50 per transfer.

[13] The finance charge will be based on the broker call rate in the Los Angeles edition of the *Wall Street Journal*.

IV. Discussion

As discussed below, the Commission is approving PCC/PSDTC's proposals. The Commission believes that the proposals promote the prompt and accurate processing of municipal securities transactions and are consistent with PCC/PSDTC's duty to safeguard securities and funds under Section 17A of the Act. The Commission also believes that the proposed fees are equitably allocated consistent with that Section of the Act.

Under the proposal, PSDTC will make its automated depository services available to participants for bearer municipal bonds for the first time. Currently, PSDTC participants must process and settle their bearer municipal securities transactions outside the depository environment using labor-intensive, inefficient and costly procedures or by becoming direct or indirect participants in one of the securities depositories with a bearer municipal bond processing program (DTC or MSTC). PSDTC's new program should enable PSDTC participants to compare and settle eligible bearer municipal securities trades in an automated, centralized system using procedures that generally are far more efficient than physical processing. Indeed, the proposed program should promote the increased immobilization of bearer municipal bonds that, until now, have remained outside the automated, safe and efficient National Clearance and Settlement System (the "National System").[14] In fact, certain classes of institutional investors in California for the first time will have the opportunity to use National System facilities for their large municipal bearer bond holdings.[15]

These proposals also will enable PSDTC participants to access the entire National System. That is, they now will have a door through which they can compare and book-entry settle their bearer municipal bond transactions with remote municipal securities dealers. For the first time, PSDTC participants will be able to compare and book-entry settle promptly and accurately their transactions in those securities with DTC participants in New York or MSTC participants in Chicago.[16] Moreover, the addition of PSDTC should enhance competition among depositories for bearer municipal bond business and, as a result, encourage more efficient bearer municipal securities processing systems.

With respect to the safeguarding of securities and funds, the Commission believes that PCC/PSDTC have chosen to rely on a subcustodian that has extensive experience safekeeping bearer instruments and processing payments related to those instruments, particularly interest payments made in exchange for bearer certificate coupons. This experience is particularly significant regarding bearer securities because of their ready negotiability. Moreover, the subcustodian's performance will be guaranteed by SPC, thereby reinforcing the elaborate system of protections and internal controls established under the proposal. As described above, this specially designed system should protect PSDTC and its participants against the risk of loss inherent in bearer securities.[17] The Commission notes, however, that PSDTC's determination to utilize a subcustodian in no way releases PSDTC of its securities and funds safeguarding and other responsibilities under section 17A of the Act. In this regard, the Commission believes that the reporting, auditing and related oversight measures

[14] The proposals will promote municipal dealer compliance with Municipal Securities Rulemaking Board ("MSRB") Rules G-12 and G-15. Since February 1, 1985, those Rules have required municipal securities dealers that participate in a registered clearing agency to use that clearing agency's automoated comparison and book-entry settlement services for certain transactions. *See* Securities Exchange Act Release No. 20365 (November 14, 1983, 48 FR 52531 (November 18, 1983), approving these amendments to MSRB Rules G-12 and G-15.

[15] The Commission understands that California-domiciled insurance companies are unable to deposit portfolio and special deposit securities (including bearer municipal bonds) in out-of-state depositories. *See* Letter dated February 4, 1986, to Bruce Bunner, Commissioner, California Insurance Department from Richard Ketchum, Director, Division of Market Regulation. The proposal would enable these insurance companies to deposit eligible bearer municipal securities in PSDTC, an important depository component of the National System, and to take advantage of such services as the National Institutional Delivery System, which provides automated customer-side confirmation, affirmation and book-entry settlement capabilities.

[16] Both MSTC and DTC have bearer municipal bond processing systems in place. *See* File No. SR-MSTC-83-2, Securities and Exchange Act Release No. 19888 (June 20, 1983), 48 FR 29083 (June 24, 1983) and File No. SR-DTC-83-03, Securities Exchange Act Release No. 18094 (August 14, 1981), 46 FR 42559 (August 21, 1981).

[17] As described above, PSDTC (and several other depositories) advance to participants municipal bond interest and maturity payments on payment date in next-day funds, even when an issuer's paying agent failes to pay PSDTC on time. While PSDTC charges its participants interest on these extensions of credit from payment date, PSDTC remains exposed to financial risk for the entire amount of the advanced funds if an issuer first delays paying PSDTC and then becomes insolvent and defaults in its payment obligations and a participant to whom PSDTC advances funds uses them and also becomes insolvent. The Commission requests PSDTC (and the other depositories) to reconsider the risks of this payment policy and to analyze whether existing financial safeguards meet this risk.

VOL 51 ISS 86 MY 5 1986 UMI

with respect to Security Pacific that have been incorporated into the proposed rule change, if carefully followed, should enable PSDTC to determine whether Security Pacific is discharging its subcustodial responsibilities.

The Commission also agrees with PCC/PSDTC that its decision to limit the number of municipal securities issues eligible for deposit during initial phases of its program is consistent with PCC/PSDTC's obligation to safeguard securities and funds under the Act. The Commission, however, encourages PCC/PSDTC to expand the number of eligible issues as expeditiously as possible, consistent with its statutory obligations, to provide uniform eligibility in the National System. Uniform eligibility enables dealers and custodians that participate in more than one depository to settle all transactions conveniently through a single settlement account, without additional expense or delays associated with monitoring different depository eligibility lists.[18]

Finally, the Commission believes that PSDTC's proposed fees for bearer municipal securities processing services are equitably allocated among PDSTC's participants using those services. Although the proposal would establish higher fees for deposits close to PCC/PSDTC cut-off times, those fees may encourage participants to deposit securities earlier in the day when PCC/PSDTC can process them more efficiently. As most recently discussed in Securities Exchange Act Release No. 23080,[19] the Commission believes that a registered clearing agency, consistent with the Act, may impose graduated service fees that encourage participants to use clearing agency services efficiently.

V. Withdrawal of File No. SR–PSDTC–83–09

PSDTC requested that the Commission order the withdrawal of File No. SR–PSDTC–83–09 because the proposals approved today were to replace it. The Commission is granting that request.

[18] *See* Division of Market Regulation, United States Securities and Exchange Commission, *Draft Staff Report, Progress and Prospects: Depository Immobilization of Securities and Use of Book-Entry Systems*, at 31 (June 14, 1985); Division of Market Regulation, United States Securities and Exchange Commission, *Report of the Division of Market Regulation 1984 Securities Processing Roundtable*, at 20–22 (May 31, 1984).

[19] *See* 51 FR 12415 at 12420 (April 10, 1986) (approval of similar above-cost deposit fees at DTC).

VI. Conclusion

On the basis of the foregoing, the Commission finds the proposed rule changes (File Nos. SR–PSDTC–84–16 and SR–PCC–85–04) consistent with the Act and, more specifically, with section 17A of the Act.

Accordingly, it is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule changes (SR–PSDTC–84–16 and SR–PCC–85–04) be, and they hereby are approved.

It is also ordered, pursuant to section 19(b)(2) of the Act, that File No. SR–PSDTC–83–09 be, and hereby is, withdrawn.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: April 29, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010–01–M

[Release No. 15075; File No. 812–6316]

Freedom Investment Trust; Application for Order Relating to Contingent Deferred Sales Loads and Quarterly Distributions of Long-Term Capital Gains

April 28, 1986.

Notice is hereby given that Freedom Investment Trust ("Applicant"), Three Center Plaza, Boston, MA 02108, filed an application on March 11, 1986, and an amendment thereto on April 15, 1986, for a Commission order pursuant to section 6(c) of the Investment Company Act of 1940 (the "Act") exempting Applicant from the provisions of (i) sections 2(a)(32), 2(a)(35), 22(c) and 22(d) of the Act and Rule 22c–1 thereunder, to permit assessment of a contingent deferred sales load ("CDSL") on certain redemptions of shares of Freedom Equity Value Fund ("Equity Series"), Freedom Government Plus Fund ("Government Series") and any subsequent similar series (collectively, "Funds"); (ii) section 22(d) to permit waiver or deferral of any otherwise applicable CDSL; and (iii) section 19(b) of the Act and Rule 19b–1 thereunder to permit the Government Series to make quarterly distributions of long-term capital gains on certain options and futures transactions. All interested person are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act and the rules thereunder for the text of the applicable provisions.

Applicant represents that it is registered under the Act as a diversified, open-end, management investment company. Applicant's shares are offered to the public through broker-dealers pursuant to distribution agreements with Tucker, Anthony & R. L. Day, Inc. ("Tucker Anthony"), Applicant's principal underwriter. Applicant's investment adviser is Tucker Anthony Management Corporation.

Applicant proposes to offer Fund shares without the imposition of a front-end sales load and proposes instead to impose a CDSL upon redemption, with certain exceptions described in the application. Applicant represents that no CDSL will be imposed upon redemption on amounts derived from: (1) Increases in the value of an account, including reinvestment of dividend income and capital gains distributions, above the total cost of shares being redeemed due to increases in the net asset value per share of the Fund; or (2) purchases made more than three years prior to the redemption. Applicant states that the amount of the CDSL, if any, will depend upon the year during which the shares being redeemed were purchased; the CDSL will be 3.0% if redemption occurs within twelve-months of purchase, 2.0% if redemption occurs during the next twelve-month period, 1.0% if redemption occurs during the third twelve-month period, and 0% if redemption occurs thereafter. The CDSL imposed upon redemption would not, in the aggregate, exceed 3% of the aggregate purchase payments made by the investor. Applicant also states that in determining the amount of the CDSL, shares held the longest will be assumed to be the first redeemed. According to the application, this will result in any CDSL being imposed at the lowest possible rate.

Applicant proposes to assist in financing the distribution of shares pursuant to plans adopted under Rule 12b–1 under the Act (the "Plans"). The Plans currently provide that the Value Series and the Government Series will accrue daily and pay monthly to Tucker Anthony a distribution fee calculated at the rate of .75% and 50%, respectively, of average daily net assets. Tucker Anthony also will receive the proceeds of any unwaived CDSL. Applicant represents that its Board of Trustees, in their periodic review of the Plans, will consider the use by Tucker Anthony of revenues raised by the CDSL.

Applicant proposes to waive the CDSL under certain circumstances described in the application. Applicant also proposes to defer the CDSL on certain exchanges of shares between Funds. Any applicable CDSL will be payable when a shareholder redeems shares of the Fund acquired as a result of the exchange rather than at the time of exchange. The amount of the CDSL will be calculated from the date of the initial purchase of the exchanged shares. Applicant represents that it will comply with the provisions of Rule 22d-1 under the Act in connection with the proposed waivers and deferrals of the CDSL.

Applicant also requests permission for the Government Series to distribute quarterly net long-term capital gains on transactions in options, futures and options on futures. The Government Series will seek a high current return by investing in securities issued, guaranteed or otherwise backed by the United States Government ("Government Securities"), by writing covered call and put options on Government Securities and by purchasing put options on such securities. It also reserves the right to purchase and sell futures contracts with respect to Government Securities and options thereon for hedging purposes. The Government Series has been designed for investors who seek a high current return with frequent, periodic distributions and not for those who seek long-term capital appreciation. Its current return will be derived from interest income from Government Securities, premiums from expired put and call options on Government Securities, net gains from closing purchase and sale transactions with respect to certain options and futures contracts on Government Securities, premiums from expired put and call options on such futures contracts, net gains from closing purchase and sale transactions with respect to certain of those options and net gains from sales of Portfolio securities on the exercise of options or otherwise. The Government Series will pay dividends from net investment income monthly; distributions of net short-term capital gains will be made quarterly.

Applicant seeks an exemption that would allow the Government Series to distribute quarterly net long-term capital gains recognized on transactions in options, futures and options on futures. Distribution of any net long-term capital gains recognized or deemed recognized on other investments during a fiscal year will be made with the first quarterly distribution after the fiscal year closes. Applicant represents that under the Internal Revenue Code of 1954, options on Government Securities, futures contracts and options thereon are all considered "Section 1256 Contracts." In general, 60% of the realized gain or loss with respect to 1256 Contracts are treated as long-term capital gain or loss, and 40% are treated as short-term capital gain or loss ("60/40 rule"). Applicant submits that the 60/40 rule was devised to prevent possible tax abuses and not to limit the frequency with which registered investment companies may distribute capital gains from transactions in section 1256 Contracts. Applicant states that the Government Series objective of a high current return clearly contemplates the seeking of net gains from options on Government Securities and attempts to hedge its portfolio with futures contracts and options thereon. Further, Applicant states that permitting quarterly distributions of capital gains will not encourage more frequent trading in the Government Series portfolio than what is appropriate in light of the investment objective. Therefore, Applicant contends that whether the entire amount of these gains, as opposed to only the short-term portion, is distributed quarterly will not affect the investment decisions of the investment adviser. Applicant represents that it will clearly distinguish any distribution of capital gains from distribution out of net interest income in the notice to shareholders accompanying the distribution.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 23, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant(s) at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Wayne, Duplin and Sampson Counties, North Carolina.

FOR FURTHER INFORMATION CONTACT: Roy C. Shelton, District Engineer, Federal Highway Administration, 310 New Bern Avenue, P.O. Box 26806, Raleigh, North Carolina 27611, Telephone (919) 856–4330.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the North carolina Department of Transportation (NCDOT), will prepare an environmental impact statement (EIS) on a proposed highway project in Wayne, Duplin and Sampson Counties. The proposed action would be the construction of a fully controlled US 117 connector from the Mount Olive Bypass in Wayne County through Duplin County to proposed I–40 in Sampson County. The proposed project is needed to provide a connector to I–40 from the Mount olive-Goldsboro vicinity. This will allow quicker access to the

VOL 51 ISS 86 MY 5 1986

Wilmington area or the Raleigh area via I-40.

The project consists of widening the existing 2 lane US 117 to a 4 lane divided facility from NC 55 at Mount Olive to the existing 4 lane section at Calypso. From this point a 4 lane divided facility will be built on new location to connect with I-40.

Alternatives under consideration include (1) the "no-build," and (2) a fully controlled access highway, part of which will be on new location.

Letters describing the proposed action and soliciting comments are being sent to appropriate Federal, State and local agencies. A public meeting has been held in the study area. A public hearing will also be held. Information on the time and place of the public hearing will be provided in the local news media. The Draft EIS will be available for public and agency review and comment at the time of the hearing. No formal scoping meeting is planned at this time.

To ensure that the full range of issues related to the proposed action are addressed and all significant issues identified, comments and questions concerning the proposed action should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The provisions of OMB Circular No. A-95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects apply to this program)

Issued on April 25, 1986.

Roy C. Shelton,

District Engineer.

BILLING CODE 4910-22-M

Weight-Distance Truck Tax Study; Workshop on Alternative Federal/State Administrative Plans for Administering a Weight-Distance Tax

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of workshop on Federal/State administrative plans.

SUMMARY: Section 933 of the 1984 Deficit Reduction Act (DRA), requires the Secretary of Transportation, in consultation with the Secretary of the Treasury to conduct a study to evaluate the feasibility and ability of a national weight-distance tax (WDT) to: (1) Provide the greatest degree of equity among users; (2) ease the costs of compliance for Federal highway use taxes; (3) improve the efficiency of administering highway use taxes; (4) evaluate the evasion potential; and (5) assess the benefits to interstate commerce.

Under the concept being evaluated, a national WDT would replace all Federal heavy vehicle highway use taxes other than fuel. The report is due to Congress by October 1, 1987.

The purpose of this notice is to announce a workshop, open to the public, at which Federal/State cooperative approaches for administering a national WDT will be presented and discussed.

DATE: The workshop will be held from 8:00 a.m. to 4:00 p.m. on June 4 and from 8:00 a.m. to 3:00 p.m. on June 5, 1986, in Washington, D.C.

ADDRESS: The workshop will be held in the auditorium of the Federal Aviation Administration, U.S. Department of Transportation, 800 Independence Avenue SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Mr. James R. Link, Chief, Highway Revenue Analysis Branch, (202) 426-0570; or Mr. Michael J. Laska, Office of the Chief Counsel, (202) 426-0762, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590.

SUPPLEMENTARY INFORMATION:

Background

Section 933 of the DRA of 1984 (Pub. L. 98-369, 98 Stat. 494) directs the Department of Transportation, in consultation with the Department of the Treasury to conduct a study of the feasibility and ability of weight-distance truck taxes to provide equity among highway users, to ease compliance costs, and improve administrative efficiency. Further, the study is to evaluate the evasion potential of such taxes and assess the benefits to interstate commerce of replacing all Federal heavy vehicle highway use taxes, except the fuel taxes, with a WDT.

The FHWA has explicitly structured the study to solicit pertinent information and to keep the public informed. An initial study plan was published in the **Federal Register** on April 17, 1985 (50 FR 15270), and comments were requested to be submitted to Docket 85-20 which is open until October 1, 1986. The FHWA has consulted with representatives of the trucking industry and State officials since the beginning of the study and will continue to do so in a variety of ways throughout the study.

Study Approach

The FHWA is the lead agency for the national WDT study. The overall technical approach is to:

—Prepare a working paper to analyze a wide range of alternative weight-distance tax options.

—Document procedures for administering the current Federal truck taxes (heavy vehicle use tax and excise taxes on truck and tire sales).

—Identify at least two specific WDT options and develop at least two plans for administering a national WDT. One plan would involve Federal agencies only; the other plan would be a Federal/State cooperative effort.

—Assess the feasibility of the tax options and administrative plans using the criteria provided by the Congress under Section 933 of the 1984 DRA.

—Compare the existing tax structure to alternative weight-distance taxes and the existing administrative structure to alternative WDT administrative plans.

Briefing Package

A briefing package describing the study approach in more detail was distributed to industry representatives and others in December 1985 by FHWA. The package contained four sections:

Section 1—Overall study approach;
Section 2—Chronology of completed work;
Section 3—Tasks underway and future direction of the study;
Section 4—Request for comments on the weight-distance tax study approach and activities presented.

Working Paper

The FHWA will make available shortly a working paper that describes the development and screening of alternative national weight-distance taxes. It discusses the following:

—Recent major WDT studies;
—Characteristics of State weight-distance taxes;
—Components of a national WDT;
—Criteria for screening tax options;
—Tax options recommended for detailed analysis to study the feasibility of a national WDT.

Public Meeting

A public meeting, as announced in the **Federal Register** January 31, 1986, was held March 19 in Washington D.C., to discuss the overall study approach and information requested in the briefing paper. Prepared statements were given by representatives of the Private Truck Council of America; American Retreaders' Association; Western Highway Institute; American Trucking Associations; and the Association of American Railroads. Two individuals representing carriers made brief statements from the floor.

Workshop

Four Federal/State cooperative scenarios for administering a WDT will be presented and discussed at a workshop in Washington, D.C., on June 4 and 5, 1986.

Three scenarios are alternative approaches to administering a national WDT. A fourth scenario explores a two-tiered tax structure (heavy vehicle use tax and fuel tax) as an option to a national WDT.

The first Federal/State scenario assumes there is a strong Federal role in the administration of a national WDT. The Federal Government would be responsible for processing, auditing, and collecting a national WDT. The State role would be primarily checking for proof-of-payment of a national WDT.

The second scenario assumes a strong State role in the administration of a national WDT. States would process, audit, collect, and enforce a national WDT. The Federal Government would provide standards and guidelines to the States for the respective administrative activities. This scenario will be discussed from the perspective of States that do not have a WDT.

The third scenario is similar to the second except that it is to be discussed from the perspective of a State that has WDT and explicity considers how the administration of a national WDT might be combined with the administration of other State truck taxes such as registration, fuel, and a WDT.

The fourth scenario focuses on a two-tiered truck tax structure. The two taxes are assumed to be a heavy vehicle use tax and fuel tax. The Federal/State administration of this type of tax will be explored based first on a strong Federal and limited State role and then based on a strong State and reduced Federal role.

A paper is being written for each scenario that discusses the issues and probable impacts involved in administering a national WDT under a Federal/State approach. The papers will be made available at the workshop and summarized by the authors. Panelists representing State and Federal Government perspectives and the trucking industry will comment on each plan. Workshop attendees will be invited to comment on each plan in a general session as well as in small working groups.

The workshop is open to the public, but space is limited to about 200 people. There is no registration fee or pre-registration necessary for the workshop, however, participants will be asked to sign a register list between 8:00 and 8:30 a.m. on June 4 and will be assigned to a group to discuss one of the four scenarios.

Issued on: April 28, 1986.

R.A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

NATIONAL COUNCIL ON THE HANDICAPPED

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Council on the Handicapped. This notice also describes the functions of the Council. Notice of this meeting is required under section 522 (b)(10) of the "Government in Sunshine Act" (Pub. L. 94–409).

DATE: May 12, 1986, 9:00 a.m. to 4:00 p.m.; May 13, 1986, 2:00 p.m. to 4:00 p.m.; May 14, 1986, 9:00 a.m. to 3:30 p.m.

ADDRESS: Radisson Mark Plaza Hotel; 5000 Seminary Road West; Alexandria, Virginia.

FOR FURTHER INFORMATION CONTACT: Maureen McInerny, National Council on the Handicapped, 800 Independence Avenue, SW, Suite 814, Washington, DC 20591 (202) 453–3846.

The National Council on the Handicapped is an independent Federal agency comprised of 15 members appointed by the President of the United States and confirmed by the Senate. Established by the 95th Congress in Title IV of the Rehabilitation Act of 1973 (as amended by Pub. L. No. 95–602 in 1978), the Council was initially an advisory board within the Department of Education. In 1984, however, the Council was transformed into an independent agency by the Rehabilitation Act Amendments of 1984 (Pub. L. No. 98–221).

The Council is charged with reviewing all laws, programs, and policies of the Federal Government affecting disabled individuals and making such recommendations as it deems necessary to the President, the Congress, the Secretary of the Department of Education, the Commissioner of the

VOL 51 ISS 86 MY 5 1986 UMI

Rehabilitation Services Administration, and the Director of the National Institute of Handicapped Research (NIHR).

The meeting of the Council shall be open to the public. The proposed agenda includes:

Reports from the Chairman and the Executive Director Workplan Development
Committee Reports in the areas of research, adult services, children's issues, and public affairs
NIHR briefing
Communications seminar
Council's discussion of unfinished business
Council's discussion of new business

Records shall be kept of all Council proceedings and shall be available after the meeting for public inspection at the National Council on the Handicapped.

Signed at Washington, DC, on April 30, 1986.

Lex Frieden,

Executive Director.

BILLING CODE 8130-02-M

8

TENNESSEE VALLEY AUTHORITY

TIME AND DATE: 10:30 a.m. (CDT), May 7, 1986.

PLACE: Hopkinsville Community College Auditorium, Academic Building, North Drive Hopkinsville, Kentucky.

STATUS: Open.

Agenda

Approval of minutes of meeting held on April 10, 1986.

Discussion Items

1. An Update on the Effects of the Tennessee Valley Drought.

Action Items

B—Purchase Awards

B1. Negotiation CG-459613—Indefinite quantity term agreement for genuine Ingersoll-Rand pump parts for any TVA fossil or hydro plant.

C—Power Items

C1. Memorandum of Understanding with United States of America, Department of the Army, covering arrangements for TVA to relocate certain of Army's electric power facilities located on the Redstone Arsenal reservation.

D—Personnel Items

D1. Creation of an Ungraded Executive Group titled the Senior Management Service within the Management and Specialist Schedule, which is to be initially established in the Office of Nuclear Power.

E—Real Property Transactions

E1. Grant of permanent easement to City of Huntsville, Alabama, for a sewerline affecting 0.87 acre of Wheeler Reservior land in Madison County, Alabama—Tract XTWR-94S.

E2. Sale of Permanent Easement to South Central Bell Telephone Company for the construction, operation, and maintenance of a telephone equipment building, affecting approximately 0.06 acre of Wheeler Reservoir land located in Limestone County, Alabama—Tract XWR-617B.

F—Unclassified

F1. Contract No. TV-69457A Between TVA and Center for Occupational Research and Development providing for cooperation in a skills retraining program for dislocated Tennessee Chemical Company workers in Copper Hill, Tennessee.

F2. Supplement to Agreement No. TV-42893A with the Alabama Elk River Development Agency providing for continued cooperation in the Elkmont rural village demonstration project in Limestone County, Alabama.

F3. Supplement to Cooperative Agreement among TVA, Agricultural Stabilization and Conservation Service, and Soil Conservation Service covering arrangements for a project to demonstrate the use of animal waste management systems to improve water quality in the Bear Creek floatway in Franklin and Marion Counties, Alabama (TV-66539A).

F4. Supplement to Contract No. TV-66199A with W.S. Fleming & Associates, Inc., providing for research activities by TVA in support of the Mountain Cloud Chemistry/Forest Exposure Study.

F5. Supplement to Interagency Agreement No. TV-61855A with the U.S. Department of Energy covering arrangements for a Southeastern Regional Biomass Energy Program.

CONTACT PERSON FOR MORE INFORMATION: Craven H. Crowell, Jr., Director of Information, or a member of his staff can respond to requests for information about this meeting. Call (615) 632-8000, Knoxville, Tennessee. Information is also available at TVA's Washington Office (202) 245-0101.

Dated: April 30, 1986.

John G. Stewart,

Manager of Corporate Administration and Planning.

Part II

Department of Transportation

Federal Aviation Administration

14 CFR Part 71

Establishment of Airport Radar Service Areas; Final Rule

VOL 51 ISS 86 MY 5 1986 UMI

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 85-AWA-6]

Establishment of Airport Radar Service Areas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action designates Airport Radar Service Areas (ARSA) at the seven airports listed below. Each location designated is a public or military airport at which a nonregulatory Terminal Radar Service Area (TRSA) is currently in effect. Establishment of each ARSA will require that pilots maintain two-way radio communication with air traffic control (ATC) while in the ARSA. Implementation of ARSA procedures at each of the affected locations will reduce the risk of midair collision in terminal areas and promote the efficient control of air traffic.

EFFECTIVE DATE: 0901 U.t.c., June 5, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Burns, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

History

On April 22, 1982, the National Airspace Review (NAR) plan was published in the **Federal Register** (47 FR 17448). The plan encompassed a review of airspace use and the procedural aspects of the air traffic control (ATC) system. The FAA published NAR Recommendation 1-2.2.1, "Replace Terminal Radar Service Areas (TRSA) with Model B Airspace and Service (Airport Radar Service Areas)," in Notice 83-9 (48 FR 34286, July 28, 1983) proposing the establishment of ARSA's at Columbus, OH, and Austin, TX. Those locations were designated ARSA's by SFAR No. 45 (48 FR 50038, October 28, 1983) in order to provide an operational confirmation of the ARSA concept for potential application on a national basis. The original expiration dates for SFAR 45, December 22, 1984, for Austin and January 19, 1985, for Columbus were extended to June 20, 1985 (49 FR 47170, November 30, 1984).

On March 6, 1985, the FAA adopted the NAR recommendation and amended Parts 71, 91, 103 and 105 of the Federal Aviation Regulations (14 CFR Parts 71, 91, 103 and 105) to establish the general definition and operating rules for an ARSA (50 FR 9252), and designated Austin and Columbus airports as ARSA's as well as the Baltimore/Washington International Airport, Baltimore, MD (50 FR 9250). Thus far the FAA has designated 11 ARSA's as published in the **Federal Register** on November 1, 1985 (50 FR 45718), 11 ARSA's on December 9, 1985 (50 FR 50254), 12 on February 7, 1986 (51 FR 4872), 11 on March 10, 1986 (51 FR 8284), and 6 on May 8, 1986 (51 FR 11886) in the implementation of this NAR recommendation.

On September 30, 1985, the FAA proposed to designate ARSA's at 8 airports under Airspace Docket No. 85-AWA-6 (50 FR 39822). This rule designates ARSA's at seven of these airports. Interested parties were invited to participate in this rulemaking proceeding by submitting comments on the proposals to the FAA. Additionally, the FAA has held informal airspace meetings for each of the proposed airports. In response to public comments received the FAA has modified several of the proposals.

Related Rulemaking

In addition to the airports addressed here and those previously designated, the FAA published proposed ARSA designations for 4 additional airports on September 30, 1985 (50 FR 39822).

Discussion of Comments

The FAA received comments on the basic ARSA program as well as comments directed toward the proposed individual designations. Additionally, several of the comments on individual designations are common or speak to the basic program itself. Discussion of the comments is divided into two sections. The first addresses common and ARSA program comments, the second addresses comments on the proposals at particular locations.

ARSA Program Comments

Comments received from the Aircraft Owners and Pilots Association (AOPA) and several others claimed that the notification for some of the informal airspace meetings held for some of the candidate airports was inadequate. The schedule of the meetings was published in the Notice of Proposed Rulemaking (NPRM) on September 30, 1985 (50 FR 39822). Additionally, the FAA sent announcements to individuals, fixed-base operators, aviation user organizations, and to the news media organizations in each airport's area. The ARSA program has received considerable coverage in newsletters and official publications of aviation organizations and the schedule of the meetings mailed to members. Furthermore, a 182-day comment period was provided for Airspace Docket No. 85-AWA-6 in which the public could make comment to the public docket on the proposals. For the above reasons the FAA believes the opportunity was sufficient to permit full public comment on the proposals.

AOPA and others commented that, notwithstanding the statement by the FAA in the Regulatory Evaluation contained in the notice, increased air traffic controller personnel and equipment would be needed to handle the increased traffic expected due to the mandatory provisions of the ARSA. FAA's experience with the current ARSA's has been that while there is an increase in the amount of traffic being handled by controllers, this increase is significantly offset by the reduction in the amount of control instructions that must be issued under ARSA procedures as compared to TRSA procedures. However, the FAA recognizes that the potential exists for a need to establish additional controller positions at some facilities due to increased workload should the expected efficiency improvements in handling traffic not fully offset the increased number of aircraft handled. Further, FAA does not expect to incur additional equipment costs in implementing the ARSA program. In some instances, previously adopted plans to replace or modify older existing equipment may be rescheduled to accommodate the ARSA program. However, no new equipment is expected to be required as a result of the ARSA program.

Several commenters, including AOPA and the Experimental Aircraft Association (EAA), disagreed with the FAA's conclusion that the additional air traffic could be accommodated with existing manpower at locations where TRSA participation was low. The FAA's conclusion for the total program was in part based upon the fact that participation in the existing TRSA's was quite high and, therefore, an increase from the present levels to 100% would not be a significant change. The commenters, while not agreeing with this conclusion, claimed that the FAA's rationale did not apply where participation was low and thus additional manpower would be needed at these locations if ARSA was designated. The FAA recognizes that participation in the TRSA program is relatively low at some of the candidate locations. However, this is in large part due to the controllers' walkout of 1981 and the subsequent reduction in fully qualified controllers which led to the discontinuance of TRSA services. A sufficient number of controllers is assigned at the facilities to which the commenters refer and those facilities are ready to provide the service to the increased number of pilots. This factor was considered by the FAA in its initial evaluation of the ARSA program.

AOPA claimed the staffing at one facility more than doubled in the year prior to implementation of their ARSA. The facility's authorized staffing of 26 controllers did not change. In the facility in question, on January 1, 1985, there were 27 controllers on board but in January 1986, there were the authorized 26 on board. The FAA finds the AOPA claim to be without merit.

The Soaring Society of America (SSA) objected to the ARSA program because it does not provide the same level of safety and service to all classes of aviation. As with other regulations, this rule affects different operators in different ways depending on their respective need to operate in controlled airspace or near the airports involved. The FAA does not agree that this variation in impact is reason not to adopt a rule which benefits the majority of users.

The SSR claims the FAA is changing the criteria that an operating control tower is the only requirement for an airport to be eligible for an ARSA. The FAA has not departed from the NAR criteria which would replace TRSA with ARSA at airports with an operating control tower served by a level III, IV, or V Radar Approach Control Facility.

The SSA claimed that the ARSA rule should state that the ultimate responsibility for separation from other aircraft operating in VFR conditions rests with the pilot. While the FAA agrees that such is the case, the agency does not agree that the ARSA rule must so state. Unless a new or amending provision to the Federal Aviation Regulations (FAR) specifically deletes, amends, or supersedes existing sections, the existing regulations still apply. The ARSA rule (50 FR 9252, 9257, March 6, 1985) did not alter the sections of the FAR that establish that level of responsibility.

AOPA faulted the FAA's implementation of the ARSA program. The FAA stated in the proposal that the benefits of standardization and simplicity were nonquantifiable, and that the safety benefits anticipated by the FAA were not attributable to any given candidate but were based upon implementation of the program on a national basis. According to AOPA this evidenced the need to further evaluate the program at the current locations so that benefits could be individually assessed and each candidate evaluated accordingly. The FAA does not agree. The benefits of standardization and simplicity would always be nonquantifiable regardless of the amount of evaluation, yet they received considerable emphasis by the NAR Task Group. Overall national midair collision accident rates are relatively low, and accident rates within individual categories of airspace are lower still. Additionally, accidents at specific locations are random occurrences. Therefore, estimates of potential reductions in absolute accident rates resulting from the ARSA program cannot realistically be disaggregated below the national level. Additionally, the FAA does not believe that these considerations should be cause for delaying a program that was recommended by a majority of the members of the National Airspace Review, and which has already produced positive results at most of the designate locations.

Numerous commenters also objected to the proposals based upon their belief that air traffic in several of the proposed locations was too great for the ARSA program. The FAA believes that such a point argues strongly for the establishment of an ARSA rather than the converse.

Some commenters, including AOPA, predicted that user costs incurred due to delays will be greater than was estimated by the FAA, and that these costs will be experienced more at some sites than at others. In the NPRM, FAA acknowledged that initial delay problems would vary from site to site, that estimates of delays were quite preliminary, that at some facilities the transition process is expected to go very smoothly, and that at other sites delay problems will dominate the initial adjustment period. These cost estimates are expected to be transitory in nature in that actual delays will be reduced as pilots and controllers become exprienced with ARSA procedures. This has been the case at the three locations where ARSA has been in effect for an appreciable period, and is the trend at those locations more recently designated.

AOPA discounted the FAA delay estimates claiming that they were based upon a standard ARSA. The FAA does not agree. FAA's preliminary delay estimates were based upon the ARSA proposed for the individual locations, whether standard or modified.

Several commenters questioned the validity of FAA's estimates of the time savings expected to be realized as a result of the greater flexibility allowed air traffic controllers in handling traffic within an ARSA. FAA wants to reemphasize that its estimates of expected savings in time and money which will result from the greater flexibility allowed air traffic controllers in handling traffic within an ARSA are quite preliminary. These estimated savings may or may not offset the delay anticipated at some sites after initial establishment of an ARSA, but are expected to provide overall time savings to all traffic, IFR as well as VFR, which will exceed delay as controllers gain experience with ARSA operating procedures.

Other commenters questioned the operating cost and passenger time values used to calculate delay costs and time savings. The values used are weighted averages of overall activity within an aircraft category for various aircraft types, and represent a typical mix of air passengers. FAA recognizes that for some specific operations actual operating cost and passenger time values will exceed the average values used, while in other cases, the actual values will be less. However, weighted averages represent the most appropriate and equitable measure to use when assessing *overall* impacts. Further, because the delay resulting from implementing ARSA procedures is expected to be transitory and efficiency improvements in the movement of traffic are ultimately expected to result, those operators whose variable cost and passenger time values exceed the averages used in the regulatory evaluation may in fact realize above average benefits.

AOPA claimed that at least half the number of NORDO aircraft in the United States, or 20,900 aircraft, would have to purchase two-way radios in order to enter the ARSA and land at or depart from airports within the ARSA. This is well in excess of the number estimated by the FAA. The FAA does not agree with the AOPA conclusion because each airport receiving ARSA designation has an airport traffic area requiring two-way radio communications at the primary airport at present. Therefore, no additional cost will be incurred for purchase of radios for aircraft landing at or departing from primary airports receiving ARSA designation.

Further, some commenters, including AOPA, expressed concern that older 360 channel transceivers would not be adequate to operate within an ARSA. Frequencies compatible with 360

VOL 51 ISS 86 MY 5 1986 UMI

channel transceivers are available at all ARSA locations. Therefore, operators of 360 channel equipment will not need to install new radios to operate within an ARSA.

SSA claimed that some FAA field personnel had indicated that a transponder would be needed to enter an ARSA, and thus, the cost to implement the program was grossly underestimated. An operable two-way radio is the only avionics required for flight in an ARSA. A transponder is not required and the costing estimates are correct.

AOPA and other commenters stated that the proposed ARSA's would derogate rather than improve safety, as a result of increased frequency congestion, pilots concentrating on their instruments and placing too much reliance upon ACT rather than "see and avoid," and the compression of air traffic into narrow corridors as pilots elect to circumnavigate an ARSA rather than receive ARSA services. In addition to increasing the risk of aircraft collision, the commenters claimed that compression would increase the impact of aircraft noise on underlying communities and cause aircraft to be flown closer to obstructions.

As indicated above, while an increased number of aircraft will be using radio frequencies, the amount of "frequency time" needed for each aircraft is reduced in an ARSA compared to the current TRSA. This has been the experience of the FAA at the current ARSA facilities.

AOPA claims that since the communications and readback procedures in ARSA's do not differ from those utilized in TRSA's there would be no reduction in "frequency time" needed for each pilot to acknowledge instructions or information, and thus, the partial offset indicated by the FAA was not justified. The offset in based upon fewer as well as shorter transmissions for each pilot, thus the FAA does not agree with this claim.

The FAA evaluated the flow of air traffic around the Austin, TX, and Columbus, OH, ARSA's during the confirmation period to determine if compression was occurring. This evaluation was performed by observing the radar at Austin, TX, and by both radar observations and the use of extracted computer data at Columbus, OH. Following the designation of an ARSA at Baltimore/Washington International Airport (BWI), the FAA evaluated the flow of air traffic there for a period of 90 days by observing the radar and extracting computer data to determine if compression was occurring. Additionally, the FAA has continually monitored for the possibility of compression at all recently designated locations. Compression has not been detected at any of these locations. However, compression of air traffic is a site-specific effect that could occur at a particular location regardless of its absence elsewhere. Thus, although the FAA does not believe compression of traffic will occur at any of the proposed airports, the agency will continue to monitor each designated ARSA and make adjustments if necessary.

AOPA, SSA, and other commenters claimed that the FAA provided no demonstrable evidence that the ARSA program would improve aviation safety. The FAA continues to believe the implementation of the ARSA program will enhance aviation safety. The program requires two-way radio communication between ATC and all pilots within the designated areas. Air traffic controllers will thus be in a much improved position to issue complete traffic information to the pilots involved, and thus, safety will be improved.

AOPA, and several other commenters, requested that VFR corridors be established at several of the subject locations along routes that are currently contained within an airport traffic area (ATA). The NAR Task Group noted in their evaluation of the TRSA program that under FAR § 91.87 pilots operating under VFR to or from a satellite airport within an ATA are excluded from the two-way radio communications requirement. The Task Group noted that this was acceptable until the volume of air traffic at the primary airport dictated the installation of a radar approach control. The Task Group recommended, and the FAA adopted, the ARSA program as a safety improvement addressing this problem. Thus, the FAA does not believe provisions for VFR corridors that penetrate an ATA in most cases are warranted or in keeping with that recommendation.

SSA claimed that the grouping of ARSA's such as that adopted in the Sacramento Valley area would create "squeezing" of traffic in the corridors between the blocks of ARSA airspace. One area in question, between Sacramento and Beale Air Force Base (AFB), is approximately 20 miles wide. The FAA does not agree that "squeezing" will occur in this area. Additionally, other user organizations have requested VFR corridors between adjacent or grouped ARSA's and these ARSA's have been modified to accommodate this request.

AOPA and others commented that several of the proposals will require pilots to violate FAR § 91.79 (14 CFR 91.79) regarding minimum safe altitudes. The section states in part, "Except when necessary for takeoff or landing, no person may operate an aircraft below . . . an altitude of 1,000 feet above the highest obstacle within a horizontal radius of 2,000 feet of the aircraft [when over any congested area of a city, town, or settlement, or over any open air assembly of persons]." The commenters claim that the 1,200-foot base altitude of the 5- to 10-mile portion of the ARSA will force pilots to violate FAR § 91.79 where obstacles extend more than 200 feet above the ground. There are two alternatives available to pilots in such a situation which permit compliance with the regulation. Namely, pilots may participate in ARSA services and thus not be limited to the 1,200-foot base, and secondly, a pilot may deviate 2,000 feet horizontally from the obstacle.

Furthermore, AOPA claims that the above response does not adequately respond to the issue. They claim that deviations of 2,000 feet horizontally would increase workload and reduce the efficiency of see-and-avoid, and thus, potentially reduce safety. The FAA does not encourage deviation but encourages participation which will not require deviation and will result in controllers providing radar assistance for see-and-avoid.

SSA, and other commenters, claimed that designation of these ARSA's may negatively impact cross-country glider flights operating out of airports 20 miles, or more, from these ARSA's. While some deviations may be required, the FAA does not agree that the minor deviations that may be required will result in negatively impacting cross-country glider operations.

Several commenters noted that the proposal did not contain an environmental assessment. Under existing environmental regulations the proposed establishment of a Terminal Control Area (TCA) or a TRSA does not require an environmental assessment. The agency environmental regulations have not yet been amended to reflect ARSA procedures. However, because the potential environmental impact and regulatory effects of ARSA designation fall between those of the TCA and ARSA designations, the FAA finds that no environmental assessment is required for an ARSA designation.

AOPA, EAA, and other commenters indicated that the FAA had failed to demonstrate a need for the ARSA program itself, as well as a need for several of the individual proposed locations. Additionally, comments were received that faulted some of the features of the ARSA. Most of these comments went beyond the scope of the subject proposal and were addressed when the FAA adopted the recommendation of National Airspace Review (NAR) Task Group 1–2.2 (50 FR 9252, March 6, 1985). However, the FAA believes the need for the ARSA program was adequately demonstrated by the task group that reviewed the TRSA program and recommended the ARSA as the former's replacement. The task group faulted the TRSA program in several of its aspects and through consensus agreement determined the preferred features of the ARSA prior to making their recommendation to the FAA. Justification for the ARSA program has been the subject of previous FAA rulemaking, and the program was adopted after consideration of public comment. Response to comments on ARSA's at particular locations is made below.

AOPA, EAA, SSA, and others commented that several of the proposed ARSA's failed to meet the criteria for designation. The criteria for this group of candidates was recommended by the NAR Task Group and adopted by the FAA. Namely, ". . . excluding TCA locations, all airports with an operational airport traffic control tower and currently contained within a TRSA serviced by a Level III, IV, or V radar approach control facility shall have [an ARSA] designated; unless a study indicates that such designation is inappropriate for a particular location." (49 FR 47184, November 30, 1984).

AOPA, EAA, and others commented that the existence of a TRSA in the above mentioned category should not be considered as justification for an ARSA. After a review of all comments received to the above referenced proposal, the FAA adopted that NAR recommendation (50 FR 9252, March 6, 1985). Therefore, absent a finding that designation would be inappropriate, the existence of a TRSA within that criteria is deemed sufficient for designation.

AOPA, EAA, and others indicated that several of the proposed locations do not meet the criteria that the FAA is considering for future ARSA candidates. The FAA has circulated proposed criteria for future application. However, whatever the nature of any criteria eventually adopted, this group of locations which qualify as ARSA candidates under the adopted NAR criteria would not be affected.

Several commenters suggested the top of the ARSA be lowered from 4,000 feet above field elevation. Absent strong justification for lowering this altitude, the FAA has not adopted these recommendations. The agency's rationale for nonadoption is set forth immediately above.

Several commenters, including AOPA and EAA, indicated that at several of the proposed ARSA's the TRSA was working quite well and that there was no need to change something that was working. The FAA acknowledges that TRSA's are functional and beneficial, to a point. However, the NAR Task Group did not fault individual TRSA locations but the TRSA program itself and recommended its replacement. The FAA concurred with the assessment and has determined that the ARSA program is an improvement over the TRSA program from the standpoints of both safety and service. Thus, the quality of service being provided at TRSA locations should not constitute a roadblock to improvement.

Several commenters claimed the reduced separation standards of the ARSA program would derogate rather than enhance safety. The elimination of the Stage III separation requirements was recommended by users, all of whom are vitally interested in aviation safety, and adopted by the FAA. This aspect of the ARSA program received considerable FAA attention during the confirmation period at Austin, TX, and Columbus, OH. The FAA agrees with the task group that the Stage III separation standards are not needed for safety in a mandatory participation area.

Several commenters requested that the ARSA be described in statute rather than nautical miles. Numerous user organizations and the NAR itself have recommended that the FAA adopt nautical-mile descriptions rather than statute. It is the intention of the FAA to establish all new descriptions according to that recommendation.

Several commenters objected to proposals where the ARSA was in proximity to other airports. According to these commenters pilots would not know whether they should be in contact with the ARSA approach control facility or in contact with the control tower at the secondary airport, or on unicom. The FAA does not view this situation as different from that existing at many of these locations today. Through pilot education programs and experience with ARSA procedures this situation will improve. Also, as at present, when a pilot contacts the wrong FAA facility the controllers will give appropriate instructions.

AOPA, SSA, and other commenters objected to several of the proposed ARSA's based upon the claim that the FAA had failed to evaluate the cumulative effect of the proposed ARSA's and other regulatory airspace. The evaluation for each ARSA included all factors known to the FAA, including the proximity of other regulatory airspace.

AOPA and SSA objected to the ARSA's based upon a claim that an insufficient amount of pilot education had been accomplished by the agency. AOPA cited South Bend, IN as an example where there were 19 days between the informal airspace meeting and the closing of the comment period, and SSA claimed that the comment period and a single informal airspace meeting were insufficient. The FAA does not agree. The example cited by AOPA and SSA referenced the comment period, not the total period to provide for pilot education. Pilot education will continue after the comment period has ended and beyond the effective date of the ARSA's. Further user meetings will be held for each designated location following implementation of the ARSA's.

Underlying a great many of the comments received was the idea that some provision should be made so that pilots could continue their current practices without contacting the responsible ATC facility. While the FAA has made modifications from the standard ARSA in cases where circumstances warrant, the basic thrust of the ARSA program is to require two-way communication with the responsible approach control facility, and not to make modifications in the program to provide for nonparticipation.

AOPA commented that FAA underestimated the one-time cost of distributing Letters to Airmen and the Advisory Circular, and neglected costs related to the informal public meetings. Both of these issues were discussed in the detailed regulatory evaluation of the NPRM, which has been available in the regulatory docket since publication of the NPRM. The availability of this detailed evaluation was indicated in the introductory paragraph of the regulatory evaluation summary included in the **Federal Register** NPRM (50 FR 39822, 39824, September 30, 1985). AOPA's comments assumed that every active pilot would be notified as least once. However, FAA intends to mail individual Letters to Airmen only to those pilots living in the vicinity of ARSA sites, and consequently its cost estimate is less than that of AOPA. The total one-time cost of distributing Letters to Airmen and the Advisory Circular was also prorated to reflect only those sites included in the notice, and both total and prorated cost estimates were provided in the notice. Further, as FAA indicated in the detailed regulatory evaluation, the expenses associated with public meetings will be incurred

VOL 51 ISS 86 MY 5 1986 UMI

regardless of whether or not an ARSA is ultimately established at a proposed site, and consequently these expenses are more appropriately considered sunkeh costs attributable to the rulemaking process rather than implementation costs of the ARSA program. Similarly, information on ARSA's following the establishment of a new site will also be disseminated at aviation safety seminars conducted throughout the country by various district offices. These seminars are regularly provided by the FAA to discuss a variety of aviation safety issues, and, therefore, will not involve additional costs strictly as a result of the ARSA program.

SSA faulted the FAA for using the aviation safety seminars for pilot education on ARSA's. They claim these seminars do not reach many pilots and the seminars are reserved during this year for the FAA "Back to Basics" program. The FAA does not agree. The aviation safety seminars are for all pilots and for education on all aspects of aviation which would include the ARSA program.

SSA, and other commenters questioned whether the FAA considered the impact of the proposed ARSA's on individuals in making its Regulatory Flexibility Determination, and whether the threshold for determining if a significant economic impact on a substantial number of small entities had been exceeded because some small entities might be impacted. The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small entities are not unnecessarily and disproportionately burdened by government regulations. Small entities are independently owned and operated small businesses and small not-for-profit organizations. Individual citizens, as such, are not considered small entities under the terms of the RFA; however, an individual whose business is a sole proprietorship would be considered a small entity under the RFA. Some of the small entities which could be potentially affected by implementation of the ARSA program include the fixed-base operators, flight schools, agricultural operations and other small aviation businesses located at satellite airports located within 5 miles of the ARSA center. If the mandatory participation requirement were to extend down to the surface at these airports, where under current regulations participation in the TRSA and radio communication with ATC is voluntary, operations at these airports might be altered, and some business could be lost to airports outside of the ARSA core. Because FAA is excluding almost every satellite airport located within the 5-mile ring to avoid adversely impacting their operations, and in some cases will achieve the same purposes through Letters of Agreement between ATC and the affected airports establishing special procedures for operating to and from these airports, FAA expects to virtually eliminate any adverse impact on the operations of small satellite airports which potentially could result from the ARSA program. Similarly, FAA expects to eliminate potential adverse impacts on existing flight training practice areas, as well as, soaring, ballooning, parachuting, ultralight, and banner towing activities, by developing special procedures which will accommodate these activities through local agreements between ATC facilities and the affected organizations. For these reasons, a substantial number of small entities, defined in FAA Order 2100.14, "Regulatory Flexibility Criteria and Guidance," as more than one-third (but not less than eleven) of the small entities subject to a proposed rule, clearly will not be impacted by this rulemaking. Therefore, adoption of this final rule will not result in a significant economic impact on a substantial number of small entities.

Numerous commenters objected to the ARSA designations claiming they would simply provide the FAA with the basis for additional regulatory restrictions. The FAA does not believe this to be a valid objection. While the agency has no current plans for further regulatory action which imposes additional restrictions, such action if it should ever become a reality would be the subject of additional rulemaking and would of necessity be judged on its own merits, as should these proposals.

The Air Line Pilots Association concurred with the proposal as an improvement in operational efficiency and a significant contribution to a reduction of midair collision potential.

The Air Transport Association endorsed the proposed designations as an improvement in safety with specific comments indicated below.

The General Aviation Manufacturers Association endorsed the ARSA's as an improvement in safety and concurred with the FAA's philosophy regarding some deviation from the standard model.

Comments were received which were supportive of each of the ARSA's addressed here as an improvement in aviation safety, and stating that participation by all pilots was only equitable and that normal safety concerns dictated mandatory two-way communications. The FAA agrees.

Comments on Particular Locations

Albuquerque International Airport, NM

The manager of Double Eagle Aviation claims that aircraft departing Double Eagle II Airport who wish to proceed east or south will be in the ARSA before two-way radio communications can be established. The aircraft in question are primarily fast turboprop-powered aircraft. He also claims the ARSA shelf altitude of 6,900 feet will interfere with the traffic pattern altitude at Double Eagle II Airport. The FAA does not agree. Departures from Double Eagle II Airport routinely establish two-way communications with Albuquerque Approach Control before proceeding east or south because of the proximity to the final approach courses at Albuquerque International Airport. Therefore, the rule requiring two-way communications prior to entering the ARSA should cause no adverse impact over present operations. The base of the shelf area which begins approximately 1½ miles east of Double Eagle II Airport is 6,900 feet MSL which provides adequate relief for the traffic pattern. For these reasons, the FAA finds the operation at Double Eagle II Airport should not be adversely impacted by the ARSA.

The manager of Double Eagle Aviation offered to provide a location for a transceiver to allow two-way communications to be established prior to departure from the airport. The FAA appreciates the generous offer but will evaluate total operations prior to considering additional radio coverage for this area.

The Soaring Society of America stated that the proposed Albuquerque ARSA will not affect their training and towing routes but claimed their cross-country routes might be affected. As stated above, the FAA will watch this operation closely and, if necessary, enter into local agreements to minimize or eliminate adverse effects on the cross-country soaring operations.

The Air Transport Association commented supporting the proposed Albuquerque ARSA.

Greater Cincinnati International Airport, Covington, KY

Several commenters claimed the ARSA should be tailored by omitting the area beyond the Ohio River to the northwest to alleviate impact on present training areas. The FAA does not agree. As stated above, the FAA can enter into agreements with affected parties for the use of training areas and practice areas within the ARSA.

The Chairman of the Aviation Administration Department of Northern Kentucky University, AOPA, and other commenters claimed that the floor of the outer core was too low and suggested raising the floor of the outer core to 2,500 feet. The FAA does not agree. The proposed altitude of 2,100 feet MSL provides more than the 1,200 feet above ground level base altitude provided for in the basic ARSA design.

The Lunken Airport Users Committee and other commenters requested a delay in implementation of the ARSA until runway repairs at Lunken Airport are completed. They claimed the runway construction requires use of an alternate runway that in turn will force pilots to fly under the ARSA shelf at unsafe altitudes in order to depart the traffic pattern, to avoid entering the ARSA within a mile of the departure end of the runway. The FAA does not agree. Lunken Airport has an operating control tower and use of the mutual airspace will be jointly agreed to between the facilities.

Indianapolis International Airport, IN

Several commenters claimed the ARSA would adversely affect the traffic pattern at Eagle Creek Airport which is located 6 miles north of Indianapolis International Airport. The FAA does not agree. The altitude of the outer core in the vicinity of Eagle Creek Airport is 2,100 feet MSL. The traffic pattern altitude at the airport is from 1,650 to 1,900 feet MSL. This is safely below the proposed altitude of the ARSA shelf.

Several commenters claimed it would be difficult to be informed of a letter of agreement dealing with operations in the traffic pattern at Speedway Airport. Other commenters claimed the ARSA would have an adverse impact on operations in the Speedway Airport traffic pattern. The FAA agrees. For these reasons, an airspace cutout of the inner core has been made to allow for operations in the traffic pattern at Speedway Airport.

A commenter claimed the ARSA would have an adverse effect on banner towing operations over Indiana University/Purdue University at Indianapolis (IUPUI). The FAA does not agree. IUPUI is located approximately 6½ miles east of the airport under the core shelf. Normal banner towing activities in this area would not require prior ATC approval.

The Indianapolis Airport Authority, AOPA, and others expressed concern that the proposed ARSA will adversely affect operations at the airports in the Greater Indianapolis area. The FAA has made allowances and modifications to the ARSA to allow operations to and from these airports to continue with little or no change from past operations.

The Air Transport Association supports the proposed Indianapolis ARSA.

Phoenix Sky Harbor International Airport, AZ

The Arizona Pilots Association (APA), AOPA, and the Scottsdale Pilots and Aviation Assocation (SPAA) objected to the ARSA as proposed for Phoenix stating it is unsafe and utilizes more airspace than necessary. The APA and SPAA submitted alternate proposals which proposed to raise the floor to the north of the airport by defining a new quadrant. The FAA does not agree that the proposed ARSA is unsafe. The FAA has studied both the APA and SPAA proposals in depth. The FAA agrees that portions of both proposals can meet the aviation community's needs and provide the safety intended in the ARSA. The SPAA proposal does not entirely conform to the basic ARSA configuration as adopted by the FAA. The APA proposal conforms to the ARSA criteria and will be adopted in part by the FAA. The FAA wishes to commend the SPAA and the SPA for their contributions to aviation safety in the ARSA program.

The Arizona Balloon Club and the Arizona Soaring Association objected to the meeting claiming that their members were not notified in the same manner as pilots with medical certificates. Investigation into this allegation disclosed that a special mailing to these balloon and glider pilots had been made. It was pointed out that some pilots may have moved and had not updated their current addresses either with the post office or the FAA.

The owner of an air freight company and AOPA objected to the proposal citing the possibility of delays into and out of the ARSA. As previously stated, the FAA recognizes that delays initially may occur but will vary from one airport to another. However, delays are expected to be transitory in nature and will decrease as both pilots and controllers gain more familiarity with the ARSA.

The United States Air Force and the Commanders of Luke and Williams AFB's objected to the implementation of an ARSA at Phoenix Sky Harbor International Airport at this time. All agreed with the basic ARSA program but requested a delay in implementation at Phoenix until such time as ARSA's at Luke and Williams AFB's could be implemented. The FAA does not agree. The AFB's in question do not qualify as ARSA candidates under existing criteria. The benefits derived from the proposed ARSA at Phoenix should not be withheld from users of the system until such time as the AFB's in question qualify for and are proposed as ARSA candidates. If at a future date these bases qualify for and are proposed as ARSA candidates, there is no assurance an ARSA would be implemented at either.

The United States Air Force Reserve based at Phoenix Sky Harbor International Airport supports the Headquarters United States Air Force position on the Phoenix ARSA.

The Arizona Hang Gliding Association opposed the proposed ARSA in areas of concern for their members claiming that the southwest segment encompassing South Mountain was not needed. The association requested that the 4,000 to 5,100 feet MSL area encompassing South Mountain be omitted from the ARSA. They claimed the area would restrict their flying and soaring in this area and that it is not necessary since it is only 1,100 feet from the base to the top. The FAA does not agree. The FAA believes the benefits of the ARSA are for all pilots and to deny this area of protection to those who traverse this area would not be consistent with the overall ARSA program. Local procedures may be agreed to whereby the hang gliding and soaring activities in this area may continue as usual. It will be in the best interest of all users for the FAA to be aware of specific activity in this area.

The City of Phoenix, Office of the Police Chief, claimed the ARSA may possibly have an adverse effect on the police fixed-wing aircraft response and surveillance activities over the city. The FAA, through local agreements if necessary, has and will continue to work with law enforcement agencies to eliminate most negative impact on necessary police activities.

The City of Casa Grande voiced opposition to the implementation of an ARSA at Phoenix. The concern of the city is appreciated but they should not be affected by the ARSA as the city is located approximately 30 miles southeast of Phoenix Sky Harbor Airport.

The City of Scottsdale and the Arizona Airspace Utilization Committee supported the Arizona Pilots Association position on the ARSA.

The Arizona Department of Transportation objects to the proposal as a safety detractor.

The Tucson Department of Transportation objected to the proposed

VOL 51 ISS 86 MY 5 1986 UMI

ARSA, citing altitudes to the north as a major safety concern.

Numerous individuals and corporations voiced approval of the ARSA program at Phoenix.

Standiford Field Airport, Louisville, KY

Letters to Airmen notifying pilots of the Informal Airspace Meeting and the proposed Standiford Field ARSA were scheduled to be mailed in mid-December, 1985. Due to the failure of the contractor to mail the notifications until approximately two weeks prior to the meeting, the FAA, in keeping with the policy to notify pilots of ARSA meetings at least 60 days in advance, has extended the comment period and will hold another Informal Airspace Meeting for Standiford Field Airport, Louisville, KY. Thus, no action on the proposed Louisville ARSA is being taken at this time.

Tucson International Airport, AZ, and Davis-Monthan AFB, AZ.

One commenter claimed the proposed ARSA would negatively impact balloon operations in the outer core in the vicinity of the Catalina Mountains particularly in the area of Tanque-Verde and Rillito washes. The commenter requested a blanket exemption for balloon operations in the outer core in the above areas. The FAA does not agree. As stated above, the local facility will make every effort to eliminate any adverse impact on these operations, through local agreements if necessary.

The Arizona Soaring Association opposed the proposed ARSA in the Tucson area. They stated that if an ARSA is implemented, the base altitude in the outer core should be raised to that of the present TRSA. The FAA does not agree. The proposed base altitude of 4,200 affords more terrain clearance than the TRSA.

The Soaring Society of America claims that although the Tucson and Davis-Monthan ARSA's will not impact local towing routes, training areas, and landing areas, there may be an impact on cross-country routes. As stated above, the FAA will monitor these operations and, if necessary, take positive steps to eliminate adverse effects on these routes.

AOPA and others objected to the ARSA's basing their claims on compression of air traffic and the lack of need for ARSA's at Tucson and Davis-Monthan AFB. These comments have been addressed above.

The Arizona Pilots Association, in its letter of January 15, 1986, endorsed the proposed ARSA in Tucson. However, in its letter of March 15, 1986, the Association claimed the Tucson ARSA was not needed, but stated that if an ARSA is to be implemented in Tucson, the proposed ARSA is both safe and workable.

The Cochise County Aviation Planning Commission endorsed the January 15, 1986, position of the Arizona Pilots Association.

The Arizona Airspace Utilization Committee supported the Tucson and Davis-Monthan proposals without reservation.

The United States Air Force fully supports the implementation of an ARSA at both Tucson International Airport and Davis-Monthan AFB.

Several commenters expressed thoughts that the ARSA was a good idea.

Wichita Mid-Continent Airport, KS

AOPA and other commenters claimed the ARSA as proposed at Wichita would serve no purpose as the TRSA is operating well. The FAA does not agree that an ARSA will serve no purpose at Wichita. As stated above, the NAR recommended and the FAA adopted the recommendation to propose to replace TRSA with ARSA.

The United States Air Force, the Commander 384th Air Refueling Wing, and the Director of Air Traffic Services, Strategic Air Command, support the ARSA concept and program. However, all opposed the implementation of an ARSA at Wichita Mid-Continent Airport at this time. They requested the implementation be delayed until an ARSA could be proposed and implemented simultaneously at McConnell AFB. McConnell AFB does not qualify as an ARSA candidate under existing criteria. To delay implementation of an ARSA at Wichita Mid-Continent Airport until criteria are developed, staff studies made and candidacy proposed for McConnell would deny the benefits of the ARSA to the majority of the airspace users in the Wichita area. For these reasons, the FAA does not agree.

AOPA, Beech Aircraft Corporation, and other commenters objected to the proposal citing the possibility of delays entering and leaving the ARSA. These comments have been addressed above.

The Beech Aircraft Corporation objected to the ARSA supporting, for the most part, the AOPA position.

AOPA claimed that six NORDO aircraft based at Westport Airport would have to install radios to operate in the ARSA. Aircraft operations at Westport Airport will be covered by a Letter of Agreement.

Other Comments

A number of other comments were received addressing matters beyond the scope of these proposals such as charting, the number of frequencies depicted on a chart, the general design features of an ARSA, etc. The FAA will give consideration to all of the points raised in these comments but will not address them as a part of this rulemaking.

Regulatory Evaluation

Those comments which addressed information presented in the Regulatory Evaluations of the notices for the dockets included in this final rule have been discussed above. A detailed Regulatory Evaluation of this final rule has been placed in the regulatory docket.

Briefly, the FAA finds that a direct comparison of the costs and benefits of this rule is difficult for a number of reasons. Many of the benefits of the rule are nonquantifiable, especially those associated with simplification and standardization of terminal airspace procedures. Further, the benefits of standardization result collectively from the overall ARSA program, and as discussed previously, estimates of potential reductions in absolute accident rates resulting from the ARSA program cannot realistically be disaggregated below the national level. Therefore, it is difficult to specifically attribute these benefits to individual ARSA sites. Finally, until more experience has been gained with ARSA operations, estimates of *both* the efficiency improvements resulting in time savings to aircraft operators, and the potential delays resulting from mandatory participation, will be quite preliminary.

ATC personnel at some facilities anticipate that the process will go very smoothly, that delays will be minimal, and that efficiency gains will be realized from the start. Other sites anticipate that delay problems will dominate the initial adjustment period.

FAA believes these adjustment problems will only be temporary, and that once established, the ARSA program will result in an overall improvement in efficiency in terminal area operations at those airports where ARSA's are established. These overall gains which FAA expects for the group of ARSA sites established by this rule typify the benefits which FAA expects to achieve nationally from the ARSA program. These benefits are expected to be achieved without any additional controller staffing or radar equipment costs to the FAA.

In addition to these operational efficiency improvements, establishment of these ARSA sites will contribute to a reduction in midair collisions. The quantifiable benefits of this safety improvement could range from less than $100 thousand, to as much as $300 million, for each accident prevented.

For these reasons, FAA expects that the ARSA sites established in this rule will produce long term, ongoing benefits which will exceed their costs, which are essentially transitional in nature.

Regulatory Flexibility Determination

Under the terms of the Regulatory Flexibility Act, the FAA has reviewed this rulemaking action to determine what impact it may have on small entities. FAA's Regulatory Flexibility Determination was published in the NPRM, and those comments which addressed it have been discussed above. For the reasons presented in the NPRM and clarified in the Discussion of Comments, FAA has determined that this rulemaking action is not expected to affect a substantial number of small entities. Therefore, the FAA certifies that this regulatory action will not result in a significant economic impact on a substantial number of small entities.

The Rule

This action designates Airport Radar Service Areas (ARSA) at the seven airports listed below. Each location designated is a public or military airport at which a nonregulatory Terminal Radar Service Area is currently in effect. Establishment of each ARSA will require that pilots maintain two-way radio communication with air traffic control while in the ARSA. Implementation of ARSA procedures at each of the affected locations will reduce the risk of midair collision in terminal areas and promote the efficient control of air traffic.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; and (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 11034; February 26, 1979).

List of Subjects in 14 CFR Part 71

Aviation safety, Airport radar service areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a) and 1354(a); 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

2. Section 71.501 is amended as follows:

Albuquerque International Airport, NM—[New]

That airspace extending upward from the surface to and including 9,400 feet MSL within a 5-mile radius of Albuquerque International Airport (lat. 35°02'30" N., 106°36'23" W.), and that airspace extending upward from 7,800 feet MSL to 9,400 feet MSL within a 10-mile radius of the airport from the 072° bearing from the airport clockwise to the 117° bearing from the airport and that airspace extending upward from 6,900 feet MSL to 9,400 feet MSL within a 10-mile radius of the airport from the 117° bearing from the airport clockwise to the 034° bearing from the airport at 10 miles thence southerly along a line direct to a point 7 miles from the airport on the 072° bearing from the airport then southwesterly along this 072° bearing from the airport to the 5-mile radius from the airport.

Davis-Monthan AFB, AZ—[New]

That airspace extending upward from the surface to and including 6,600 feet MSL within a 5-mile radius of the Davis-Monthan AFB (lat. 32°09'54" N., long. 110°52'54" W.) to the points where the 5-mile arc joins a 5-mile arc from the Tucson International Airport, AZ, (lat. 32°07'06" N., long. 110° 56'35" W.) Airport Radar Service Area (ARSA), and that airspace extending upward from 4,200 feet MSL to 6,600 feet MSL within a 10-mile radius of Davis-Monthan AFB to the points where the 10-mile arc joins a 10-mile arc from the Tucson International Airport ARSA.

Greater Cincinnati International Airport, Covington, KY—[New]

That airspace extending upward from the surface to and including 4,900 feet MSL within a 5-mile radius of the Greater Cincinnati International Airport (lat. 39°02'52" N., long. 84° 40'00" W.), and that airspace extending upward from 2,100 feet MSL to 4,900 feet MSL within a 10-mile radius of the Greater Cincinnati International Airport.

Indianapolis International Airport, IN—[New]

That airspace extending upward from the surface to and including 4,800 feet MSL within a 5-mile radius of the Indianapolis International Airport (lat. 39°43'26" N., long. 86°17'00" W.), excluding that airspace extending upward from the surface to but not including 1,700 feet MSL within a 1-mile radius of Speedway Airport (lat. 39°47'55" N., long. 86°21'20" W.); and that airspace extending upward from 2,100 feet MSL within a 10-mile radius of the Indianapolis International Airport.

Phoenix Sky Harbor International Airport, AZ—[New]

That airspace extending upward from the surface to and including 5,100 feet MSL within a 5-mile radius of the Phoenix Sky Harbor Airport (lat. 33°26'10" N. 112°00'32" W.); and that airspace within a 10-mile radius of Phoenix Sky Harbor Airport extending upward from 4,000 feet MSL to and including 5,100 feet MSL from the 166° bearing from the airport clockwise to the 243° bearing from the airport, and that airspace within a 10-mile radius of the airport extending upward from 2,300 feet MSL to and including 5,100 feet MSL from the 243° bearing clockwise to Grand Boulevard, and that airspace within a 10-mile radius of the airport extending upward from 2,800 feet MSL to and including 5,100 feet MSL from Grand Boulevard clockwise to lat. 33°30'00" N., and that airspace within a 10-mile radius of the airport extending upward from 2,300 feet MSL to and including 5,100 feet MSL from lat. 33°30'00" N., clockwise to the 166° bearing from the Phoenix Sky Harbor Airport.

Tucson International Airport, AZ—[New]

That airspace extending upward from the surface to 6,600 feet MSL within a 5-mile radius of the Tucson International Airport (lat. 32°07'06" N., long. 110°56'35" W.) to the points where the 5-mile arc joins a 5-mile arc from the Davis-Monthan AFB, AZ, (lat. 32°09'54" N., long. 110°52'54" W.) Airport Radar Service Area (ARSA), and that airspace extending upward from 4,200 feet MSL to and including 6,600 feet MSL to the points where the 10-mile arc joins a 10 mile arc from the Davis-Monthan AFB ARSA.

Wichita Mid-Continent Airport, KS—[New]

That airspace extending upward from the surface to and including 5,300 feet MSL within a 5-mile radius of the Wichita Mid-Continent Airport (lat. 37°39'00" N., long. 97°25'58" W.), and that airspace extending upward from 2,700 feet to 5,300 feet MSL within a 10-mile radius of the Wichita Mid-Continent Airport.

Issued in Washington, DC, on April 29, 1986.

Daniel J. Peterson,

Manager, Airspace-Rules and Aeronautical Information Division.

VOL 51 ISS 86 MY 5 1986 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 630

[Docket No. 86N-0027]

Additional Standards for Viral Vaccines; Poliovirus Vaccine Live Oral

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to amend the biologics regulations governing the manufacture of Poliovirus Vaccine Live Oral. FDA has reviewed these regulations and is proposing amendments to update the regulations consistent with current scientific knowledge and to remove unnecessary regulatory burdens. FDA is also proposing amendments that will make its standards more consistent with the requirements for manufacturing and testing oral poliovirus vaccine issued by the World Health Organization (WHO). The proposed amendments would facilitate the licensure for U.S. distribution of oral poliovirus vaccine currently meeting international standards of safety and effectiveness.

DATES: Comments by July 7, 1986. FDA proposes that the effective date of any final rule based on this proposal be 30 days after the date of its publicatin in the Federal Register. For additional information concerning the proposed effective date, see section III.Y. "Proposed Effective Date" appearing in the preamble of this document.

ADDRESS: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Steven F. Falter, Center for Drugs and Biologics (HFN–364), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8046.

IV. Environmental, economic, and information collection considerations

I. History of the Manufacture and Regulation of the Vaccine

Poliovirus Vaccine Live Oral (hereafter referred to generically as oral poliovirus vaccine) is a preparation of live, attenuated, poliovirus grown either in monkey kidney cell cultures or in a cell line of human origin. The vaccine is prepared in a form suitable for oral administration. The vaccine currently is administered exclusively as Poliovirus Vaccine Live Oral Trivalent, containing the three types of poliovirus that may infect humans: Type 1, Type 2, and Type 3.

Oral poliovirus vaccine is a biological product subject to licensure under section 351 of the Public Health Service Act (the PHS act) (42 U.S.C. 262). Under the PHS act, oral poliovirus vaccine must meet standards prescribed in regulations designed to ensure the continued safety, purity, and potency of the product. The additional standards for Poliovirus Vaccine Live Oral, now codified under 21 CFR 630.10 through 630.17, originally were issued on March 25, 1961, and were subsequently recodified in Title 21 of the Code of Federal Regulations. The first of the monovalent forms of Poliovirus Vaccine Live Oral was licensed in the United States in August 1961. The trivalent form of the vaccine, first licensed in June 1963, is the principal vaccine for the prevention of poliomyelitis in the United States. The monovalent forms of oral poliovirus vaccine are no longer used for immunization purposes. Currently, one firm is licensed for the manufacture of Poliovirus Vaccine Live Oral Trivalent.

II. Reasons for the Rulemaking

FDA has reviewed the additional standards for Poliovirus Vaccine Live Oral and is proposing to revise the regulations for several reasons.

1. *To update the regulations consistent with current scientific knowledge and the standards of the World Health Organization (WHO).* During the past 20 years, FDA and other health agencies worldwide have gathered considerable information and scientific understanding concerning the manufacture, testing, and use of oral poliovirus vaccine. With this increased scientific knowledge, the world's health agencies have recognized the need to update the standards by which oral poliovirus vaccine is manufactured and tested. Accordingly, FDA and other health agencies have cooperated in the development of revised WHO standards concerning the manufacture and testing of any oral poliovirus vaccine. WHO published its revised standards in 1983 ("Requirements for Poliomyelitis Vaccine (Oral) (Requirements for Biological Substances No. 7)," *World Health Organization Technical Report Series*, No. 687, 1983). Most countries now will accept for domestic use oral poliovirus vaccine manufactured according to WHO standards. FDA has reviewed the revised WHO standards and believes that, for the most part, they are appropriate for assuring the safety and effectiveness of oral poliovirus vaccine licensed for use in the United States. FDA has also reviewed its standards, independent of the WHO review, to identify areas where the regulations could be updated based on current scientific knowledge. Accordingly, FDA is proposing to revise its additional standards for oral poliovirus vaccine to be more consistent with the WHO standards and is also proposing other amendments consistent with the findings of FDA's independent review of the current regulations. FDA discusses each of the changes individually later in this preamble.

Under this proposed rule, some differences between FDA's standards and WHO's standards would still remain; however, FDA believes the remaining differences will not inhibit the manufacture of a domestically and internationally acceptable vaccine.

2. *To facilitate the licensure of safe and effective vaccines.* Since 1979 only one manufacturer has remained licensed for Poliovirus Vaccine Live Oral Trivalent. The one manufacturer has met consistently the Nation's needs for oral poliovirus vaccine. FDA recognizes, however, that dependence on a sole source for an essential vaccine leaves immunization programs vulnerable to any of a variety of circumstances that may disrupt vaccine supplies from the sole manufacturer. Occasional minor outbreaks of poliomyelitis occurring in unimmunized populations in the United States and abroad illustrate the need to continue, uninterrupted, immunization of children with oral poliovirus vaccine. Multiple sources of oral poliovirus vaccine would assure the continuation of immunization programs, even if supplies from one of the manufacturers were temporarily interrupted. Likely candidates for obtaining licensure of oral poliovirus vaccine include those manufacturers who are already supplying a safe and effective oral poliovirus vaccine to other countries. FDA believes that licensure of such vaccines will become feasible only if FDA's standards and international (WHO) standards are reasonably consistent. FDA has found that there are differences between FDA's standards and international standards which do not affect the assurances of safety and effectiveness of the vaccine, but which would preclude the U.S. licensure and sale of a scientifically acceptable poliovirus oral vaccine, manufactured and tested under international (WHO) standards. FDA believes that these existing differences may deter manufacturers from seeking licensure in the United States of oral poliovirus vaccine currently used safely and effectively in other countries. Accordingly, FDA is proposing to amend the additional standards to be more consistent with acceptable international standards so as to facilitate the U.S. licensure of oral poliovirus vaccine from multiple sources.

3. *To reduce the regulatory burdens of the regulations.* Under the Regulatory Flexibility Act (Pub. L. 96–354) and Executive Order 12291, FDA is required to systematically undertake a periodic review of its regulations to identify and appropriately revise or remove unduly burdensome regulations. FDA has systematically reviewed the regulations in §§ 630.10 through 630.17 and is proposing amendments to reduce or remove unduly burdensome regulations while assuring the continued safety and effectiveness of oral poliovirus vaccine. For example, the proposed requirements would reduce the number of primates used to test for vaccine safety without affecting adversely the reliability of the test.

4. *To improve the clarity of the regulations.* FDA is proposing numerous editorial amendments in the regulations. Except for amendments involving reorganization and redesignation of regulations, FDA does not discuss further in this preamble specific editorial amendments.

III. Proposed Amendments to the Regulations

In the Federal Register of December 6, 1984 (49 FR 47622), FDA proposed to amend its biologics regulations to establish general requirements for cell lines used for manufacturing any biological product for human use. In that proposed rule, FDA proposed to remove specific requirements concerning the use of cell lines from §§ 630.10, 630.12, and 630.13 of the additional standards for Poliovirus Vaccine Live Oral and, instead, reference in the additional standards the proposed general requirements for cell lines in 21 CFR 610.18. This proposed rule is consistent with the December 1984 proposed rule.

FDA is discussing below each significant proposed change to the regulations.

A. Proper Name and Definition

FDA proposes to amend § 630.10(a) to provide the proper name and definition of only the trivalent form of oral poliovirus vaccine. FDA is proposing related amendments in §§ 630.11 and 630.17(c) that would remove requirements affecting monovalent vaccines. For many years, monovalent oral poliovirus vaccine has not been manufactured as a final product in the United States. FDA believes that it is highly unlikely that there will be any indication for use of a monovalent vaccine in the future. Accordingly, FDA proposes that § 630.10(a) define oral poliovirus vaccine only in terms of the trivalent vaccine. For the same reason, FDA is proposing to amend § 630.11 by removing the references to monovalent vaccine and to amend § 630.17(c) (redesignated in this proposed rule as § 630.15(b)) by removing the potency requirements for the monovalent vaccines.

B. Criteria for Virus Strains and Seed Virus

FDA proposes to reorganize § 630.10 by including in paragraph (b) the criteria for acceptable virus strains and in paragraph (c) the criteria for qualification of the seed virus. Currently, the criteria for virus strains and for seed virus are both under § 630.10(b). FDA has found that the terms "virus strain" and "seed virus" are sometimes confused and, on occasion, have been misinterpreted by lay persons to be identical in meaning. The virus strain is the genetic variety of poliovirus used to make the vaccine. In most countries, a combination of the three types of the Sabin strains of poliovirus is used for vaccine manufacture. A seed virus is the virus culture, prepared from the virus strain, selected by a manufacturer for use in manufacturing vaccine. Thus, a licensed manufacturer will continually use the same virus strain but may repeatedly select a new seed virus for vaccine manufacture. The proposed amendments would clarify the differences in the meaning between the two terms and the differences in regulatory criteria governing the virus strain and the seed virus.

C. Acceptability of Sabin Strains of Attenuated Poliovirus

FDA proposes to amend § 630.10(b)(1) to specify the criteria that apply to the acceptance of Sabin strains and § 630.10(b)(2) to specify the criteria that would apply to the acceptance of other poliovirus strains. The acceptability of the Sabin strains of attenauted poliovirus for vaccine manufacture has been documented both by extensive studies at the time of the vaccine's initial licensure and by 25 years of safe and effective use in the United States and elsewhere. FDA is proposing that Sabin strains intended for vaccine manufacture meet the criteria specified in proposed § 630.10(b)(1) (i) through (vi). These criteria are intended to affirm the identity of the Sabin strains. FDA proposes to remove the criterion in current § 630.10(b)(1)(iv) which requires information concerning the pathogenicity of poliovirus strains in animals other than monkeys. This information has not proven useful in the past in assessing the safety of real poliovirus vaccine. Because of the extensive information already available which demonstrates the safety of the Sabin strains this information is no longer necessary.

D. Acceptance Criteria for Other Poliovirus Strains

In § 630.10(b)(2), FDA proposes to require that a poliovirus strain other than a Sabin strain be shown: (1) To meet the criteria of § 630.10(b)(1), also applicable to Sabin strains; (2) to be at least as safe as the corresponding Sabin strain; and (3) to produce a vaccine meeting the safety and potency requirements of §§ 630.11, 630.15, and 630.16.

VOL 51 ISS 86 MY 5 1986 UMI

Under current § 630.10(b)(2), a manufacturer must demonstrate the safety of a new viral strain by conducting a clinical study involving at least 1 million people shown to be susceptible to poliomyelitis. FDA believes that any new oral poliovirus vaccine must be shown to be at least as safe and effective as the current vaccine using Sabin strains. However, the specific type of clinical trial necessary to document safety may vary significantly. For example, different evidence may be required depending on whether the new viral strain has been genetically engineered to make it less likely to mutate and unable to replicate in the central nervous system or, in contrast, is a new, wild, attenuated strain with unstable genetic properties. Therefore, FDA cannot predetermine what laboratory and clinical evidence would be necessary to demonstrate the safety of an oral poliovirus vaccine using a new viral strain. Under the regulations governing the investigation of biological products (21 CFR Part 312), FDA would consider the type of clinical studies necessary to document the safety of a new oral poliovirus vaccine before initiation of any clinical study. Accordingly, FDA is proposing to remove the current requirement concerning clinical studies for determining vaccine safety and to replace it with the more general requirement that a vaccine using a new poliovirus strain be shown to be at least as safe as the current vaccine.

E. Preparation of Seed Virus in Monkey Kidney Cells

FDA is proposing to amend § 630.10(b)(3) (redesignated in this proposed rule as § 630.10(c)(1)) to require that seed virus be prepared in acceptable monkey kidney cell cultures.

FDA believes that the seed virus intended for use in vaccine preparation should be prepared only in a monkey kidney cell culture. In effect, the proposed amendment would prohibit the passage of the virus through human cell lines except, if the manufacturer so chooses and FDA agrees, for the one passage used for preparing the vaccine itself. There is evidence suggesting that repeated passages of the virus in human cells may increase the possibility of the virus reverting to a more neurovirulent state after ingestion. The virus for the currently licensed vaccine is grown solely in monkey kidney cell cultures and its manufacture would not be affected by proposed § 630.10(c)(1).

F. The Intramuscular Test in Monkeys

FDA is proposing to amend § 630.10(b)(4) (redesignated in this proposed rule as § 630.10(c)(2)) by removing the requirement that seed virus be tested for neurovirulence by an intramuscular test in monkeys.

During the 25 years of manufacture of oral poliovirus vaccine, no seed virus produced from a Sabin strain has failed the intramuscular test, even though vaccines produced from some seed virus preparations subsequently were found to have an unacceptable level of neurovirulence that precluded their use. Because of the minimal neuropathologic findings resulting from this test, FDA and manufacturers of oral vaccine have been unable to develop quantitative criteria for assessing the results of the intramuscular test. Because the test has not been useful in assessing product safety, elimination of the test requirements would not decrease the assurances of safety of oral poliovirus vaccine. Removal of this requirement would result in conservation of test monkeys and in reduced expenses for manufacturers.

G. Preparation of Seed Virus in a Virus Seed Lot System

FDA is proposing to add § 630.10(c)(4), which would require that seed virus be prepared in a virus seed lot system. The current manufacture of oral poliovirus vaccine in the United States uses a seed lot system for the preparation of seed virus. To assure the continued genetic integrity of the seed virus, a manufacturer prepares a "Master seed lot" from which new seed virus used for vaccine manufacture is prepared. A large number of lots of seed virus may be prepared from the same master seed lot. FDA is aware that theoretically a new seed virus may be prepared from a seed virus previously used for vaccine production. Use of a seed lot system avoids needless increases in the number of passages from the original virus strain, thereby decreasing the likelihood that the seed virus will vary genetically from the original virus strain.

H. Assessment of Seed Virus Neurovirulence

FDA is proposing several amendments relevant to the assessment of the neurovirulence of seed virus:

(1) FDA is proposing to remove § 630.10(b)(5), which requires the testing of the seed virus for neurovirulence in monkeys as often as necessary to establish that the seed virus used for vaccine manufacture has maintained its neurovirulence properties. FDA believes that when there is evidence that the seed virus may be producing vaccines with an unacceptable neurovirulence, a new seed virus should be prepared and qualified for vaccine production. Under proposed § 630.10(c)(5), discussed elsewhere in this preamble, FDA is proposing to require the disqualification of a seed virus when the rate of unacceptable neurovirulence for vaccine lots prepared from the seed virus is higher than predicted.

(2) FDA is proposing in § 630.10(c) (2) and (3) to require that a new seed virus and the first five consecutive monovalent virus pools prepared from that seed virus be of acceptable neurovirulence as determined by the intraspinal test in monkeys and that evidence showing acceptability of a new seed virus be submitted to FDA as a license amendment. The requirements in proposed § 630.10(c) (2) and (3) are consistent with the requirements in portions of current §§ 630.10(b)(4) and 630.17(b), which FDA is proposing to remove. The testing requirements of proposed § 630.10(c) (2) and (3) are necessary to demonstrate that the seed virus is of acceptable neurovirulence and is capable of consistently producing vaccine of acceptable neurovirulence. Once the new seed virus has been approved by FDA, the consistency of the neurovirulence properties of the vaccine produced from the seed virus would be monitored under § 630.10(c)(5), as discussed below.

(3) FDA is proposing to add new § 630.10(c)(5) to require the disqualification of a seed virus when the frequency of monovalent pools that exceed the criteria for neurovirulence in monkeys under § 630.16(b)(1)(ii) is higher than the predicted rate. Under the criteria in proposed § 630.16(b)(1), monovalent virus pools prepared with neurovirulence identical to the appropriate reference would be expected to fail the intraspinal test at a frequency of 1 in 100, when 1 group of monkeys is inoculated. The expected frequency of failure of 1 in 100 does not mean that, for any given number of tests, exactly 1 failure out of 100 tests will occur. Test failure of a monovalent virus pool, unrelated to an actual increase in neurovirulence, is a random event that may occur at any time. Therefore, after a limited number of tests, the failure rate may appear to be somewhat more than 1, but when enough tests are conducted, however, the frequency of failure should average 1 in 100.

To allow for the unpredictability of this event, FDA is proposing in § 630.10(c)(5) to require the use of a common statistical analysis to determine whether a rate of failure apparently exceeding 1 in 100 of monovalent virus pools from the same seed virus is readily explainable by random variation of test results or is statistically significant, indicating that the seed virus is producing vaccine with a higher neurovirulence than the reference virus preparation. Under proposed § 630.10(c)(5), a manufacturer may continue to use a seed virus for vaccine preparation only if the frequency of test failures of monovalent virus pools prepared from the same seed virus does not exceed the predicted rate. If the predicted rate of failure is exceeded, FDA is proposing that the seed virus be disqualified from further use in manufacturing vaccine.

(4) FDA is also proposing to add new § 630.10(c)(6), which would allow existing seed virus prepared and tested under the current regulations to continue to be used in vaccine production without retesting under the revised regulations. The agency believes that both the current and the proposed regulations provide adequate assurances of the safety of the seed virus for use in oral poliovirus vaccine. Seed virus may be used acceptably for many years after it is first prepared and tested. Retesting existing seed virus under the revised regulations would entail needless use of monkeys and needless expense. The time necessary to complete such retesting might also result in delays in vaccine preparation that could lead to a shortage of supply.

Because the retesting is unnecessary to assure the safety of the vaccine products, FDA believes that it is most appropriate to allow continued use of seed virus properly tested under the current regulations. However, the agency also believes that it is appropriate to subject the existing seed virus to disqualification under § 630.10(c)(5) if the frequency of monovalent pools that exceed the criteria for neurovirulence in monkeys under § 630.16(b)(1)(ii) is higher than the predicted rate. Thus, if evidence should develop concerning either an existing seed virus or a new seed virus that suggests the seed virus may be producing vaccines with unacceptable neurovirulence, that seed virus could no longer be used.

I. Clinical Trials to Qualify for License

FDA is proposing to amend § 630.11 by removing one of two alternatives currently offered for assessing the antigenicity of oral poliovirus vaccine used in clinical trails to qualify for license.

Under current § 630.11, oral poliovirus vaccine administered in clinical trials to qualify for license must induce type specific neutralizing antibodies in at least 90 percent of susceptible recipients when administered as a single dose or at least 90 percent of recipients when administered in a series of doses. FDA believes that the dosage schedule used in clinical trials to qualify for licensure of a vaccine should be consistent with the intended dosage schedule of the licensed vaccine. Oral poliovirus vaccine is administered in a series of doses to assure maximum protective antibody production. Accordingly, FDA is proposing that the criteria for assessing the antigenicity of oral poliovirus vaccine be based only on clinical studies using a series of doses.

J. Acceptance Criteria for Human Cell Lines

FDA is proposing to remove § 630.12(b). In the December 6, 1984, proposed rule (49 FR 47622), with which this proposed rule is consistent, FDA proposed to remove § 630.12(b) (1) and (2) and replace these requirements with new requirements in § 610.18(c) that would apply to all biological products using cell lines, including oral poliovirus vaccine. FDA now is proposing to remove the remainder of § 630.12(b), which prescribes specific requirements for conducting clinical studies to demonstrate the safety and antigenicity of oral poliovirus vaccine manufactured from a human cell line. FDA believes that the appropriate design of such clinical studies would depend on the previous experience with, and available data on, the cell line when used for vaccine manufacture, and the availability of suitable test populations. Accoringly, FDA cannot predetermine what laboratory and clinical data would be necessary to demonstrate the safety and antigenicity of an oral poliovirus vaccine manufactured from a human cell line. Under regulations governing the investigation of biological products (21 CFR Part 312), FDA would consider the type of clinical studies appropriate for documenting the safety and effectiveness, including antigenicity, of any new oral poliovirus vaccine manufactured using a human cell line. Accordingly, FDA believes that § 630.12(b) is no longer necessary or appropriate.

K. Virus Passages From the Original Strain

FDA is proposing to amend § 630.13(a) by requiring that virus in the final vaccine may represent no more than five passages from the original strain or no more than five passages from a virus clone derived from one of the first five passages from the original strain. FDA is also proposing to amend § 630.13(a) by removing the requirement that each tissue culture passage be shown to meet the acceptability criteria of § 630.10(b) (redesignated in this proposed rule as § 630.10(c)).

Current § 630.13(a) requires that virus in the final vaccine represent no more than five passages from the original strain. FDA limits the number of virus passages through which poliovirus may pass to assure that the virus used in vaccine retains the characteristics of the original strain. FDA now believes that the restriction of five passages from the original strain is unnecessarily rigid. Using modern cloning techniques, a virus clone, derived from one of the first five tissue culture passages, can be developed that is equivalent to the original strain in its ability to produce safe and effective vaccine. A virus is cloned by isolating a single virus particle and propagating the single virus in tissue culture to producer a culture of genetically identical virus. Once seed virus prepared from the virus clone is determined to be acceptable by the criteria in proposed § 630.10(c) and shown to meet the other requirements of the proposed standards, the clone can be considered to have retained the properties of the original virus strain and up to five tissue culture passages from the virus clone may be used for vaccine manufacture.

Under current § 630.10(b) (proposed § 630.10(c)), each seed virus used for vaccine manufacture must meet specific acceptability criteria before use. Current § 630.13(a) requires that any tissue culture passage, including not only seed virus but also master seed lots used only for production of seed virus, meet the criteria of § 630.10(b). FDA believes that it is unnecessary to show that a master seed lot meets the acceptability criteria for seed virus. Under proposed § 630.10(c), the manufacturer would assure that any seed virus prepared from the master seed lot meets the acceptability criteria, thereby assuring that the seed virus is accepable for the manufacture of vaccine.

L. Inoculation of Cell Cultures; Ratio of Test Material to Culture Medium

FDA is proposing to amend §§ 630.13(b)(3) and 630.16(b) (5), (6), and (7) to make the terminology consistent with WHO requirements and current scientific usage. Each of the regulations above describes a test of vaccine material in one or more types of cell cultures for the detection of viable microbial agents. Currently, FDA requires that the ratio of test inoculum to culture medium be between 1:1 and 1:3. FDA is proposing to amend these requirements editorially to state that the dilution of test inoculum with culture medium shall be no greater than 1:4,

VOL 51 ISS 86 MY 5 1986 UMI

consistent with the terminology used in the WHO requirements. The current statements and the proposed statements are equivalent in meaning.

M. Temperature of Incubation of Kidney Cell Cultures After Virus Inoculation

FDA is proposing to amend § 630.13(b)(6) to require that production vessels be maintained at 33.0 to 35.0 °C during the course of virus propagation. Current § 630.13(b)(6) requires that production vessels be maintained at a temperature not to exceed 35 °C during virus propagation. The temperature at which poliovirus is grown may affect both the antigenicity and neurovirulence of the virus. Accordingly, FDA believes it important to propagate poliovirus at a consistent temperature shown to produce a safe and effective vaccine. The proposed amendment is consistent with current manufactuing practices and WHO standards.

N. Availability of Reference Virus Preparations

FDA is proposing to amend § 630.14 by reorganizing the section into paragraphs (a) and (b). In paragraph (a), FDA is proposing to include provisions of current § 630.14 that announce the availability of Reference Poliovirus, Live, Attenuated, for use as a control for correlation of virus titers in tissue cultures. In paragraph (b), FDA is proposing to require that manufacturers obtain either Reference Attenuated Poliovirus of the appropriate type from the Office of Biologics Research and Review or WHO reference virus preparations of the appropriate type for use as controls for the evaluation of monkey neurovirulence tests.

The reference virus preparations listed in proposed § 630.14(a) usually are used by manufacturers to establish in-house reference virus preparations which, in turn, are used as controls in the potency test required by § 630.15. FDA does not require that FDA's reference virus preparations be used as a control in the potency test, but the reference virus preparation in use must be calibrated against FDA's reference virus preparations. Under proposed § 630.14(b), FDA would require that manufacturers use the reference virus preparations provided by either FDA or WHO as controls for the neurovirulence test in monkeys required by § 630.16(b)(1). As discussed elsewhere in this preamble, FDA is proposing to amend § 630.16(b)(1) to require that the Reference Attenuated Poliovirus of the corresponding type be used as a control when testing a monovalent virus pool for neurovirulence by the intraspinal test in monkeys. Accordingly, FDA is listing reference virus preparations of all three types in proposed in § 630.14(b)(1).

O. Reorganization and Amendment of Potency Requirements

FDA is proposing to redesignate current § 630.15 as § 630.15(a); remove current § 630.16(b)(2), which is redundant with proposed § 630.15(a); redesignate current § 630.17(c) as § 630.15(b); and remove the infectivity titer standards for monovalent vaccine from redesignated § 630.15(b). The reorganization would place the standards for potency under one section in the regulations. FDA is proposing to remove the standards for potency of monovalent vaccine because it is highly unlikely that monovalent vaccine will be manufactured as a final product in the future.

FDA is proposing to amend § 630.15(a) to clarify that in-house reference preparations may be used as a control in the potency test and that the in-house reference preparations must be calibrated against FDA's reference virus preparations. The proposed amendment is consistent with current manufacturing practices.

FDA is proposing in § 630.15(b) to clarify that numerical values of potency equivalent to those specified in § 630.15(b) are acceptable. Any of several methods may be used for determining vaccine potency. FDA has found that at some laboratories the numerical values of potency for the same vaccine tested by two different methods will consistently differ by a set amount. Thus, a vaccine meeting FDA's potency requirements when tested by one method may appear to fail the potency test if tested by a different method, unless the numerical value is adjusted because of the known differences in test methods. FDA has previously approved these alternative potency test methods and adjusted potency values under the equivalent methods provisions of 21 CFR 610.9.

P. Testing of Monovalent Virus Pools for Adventitious and Infectious Agents

FDA is proposing to amend § 630.16(a) by removing the list of the specific microbial agents for the presence of which oral poliovirus vaccine must be tested. FDA is not proposing to change the methods for their detection. FDA is also proposing to amend § 630.16(a)(7) by substituting the more scientifically accepted name, cercopithecid herpesvirus 1, for the name in the current regulation, B virus. FDA believes it is unnecessary to list all the infectious agents for the absence of which oral poliovirus vaccine must be tested. Sections 630.16(a) (1) through (7) would continue to require specific tests for detecting significant infectious agents, many of which are also listed in current § 630.16(a).

Q. Safety Tests in Monkey Kidney and Human Cell Cultures

FDA is proposing technical amendments to § 630.16(a) (5) and (6), which prescribe safety tests by inoculation of monkey kidney tissue cultures and by inoculation of human cell cultures, respectively. The amendments would require that the antiserum used in the tests be prepared by using antigen grown in a cell line other than that used for the safety test. The proposed requirement would assure that the antiserum does not contain antibodies that may interfere with the performance of the test. The proposed amendment is consistent with current manufacturing practices and WHO requirements.

FDA is also proposing to amend § 630.16(a)(6)(iii) to clarify that a cell system used for detecting the presence of measles virus in a monovalent virus pool may be of human or nonhuman origin, provided the cell system is of comparable susceptibility to measles virus as the cell systems identified in § 630.16(a)(6) (i) and (ii).

R. Neurovirulence in Monkeys—Revised Test Method

FDA is proposing to amend § 630.16(b)(1) by removing the current methodology for conducting and evaluating the test for neurovirulence in monkeys and replacing it with updated methodology based upon the method recommended by WHO.

In 1962, WHO adopted its current test for determining the neurovirulence of oral poliovirus vaccine in monkeys. FDA, in cooperation with health agencies of other countries, aided in the development and validation of the WHO test method. The revised WHO test was developed as a standardized test to replace the various tests for neurovirulence used worldwide since the early 1960's. All countries except the United States now accept the WHO test for determining the neurovirulence of oral poliovirus vaccine in monkeys.

FDA is proposing to revise its required neurovirulence test procedures consistent with scientific knowledge. The proposed procedures are quite similar to those recommended by WHO; however, FDA's proposed method differs in some minor respects, consistent with FDA's experience and current good manufacturing practices. Despite these differences, a manufacturer will readily be able to test

oral poliovirus vaccine for neurovirulence in monkeys by a method that meets both FDA's and WHO's standards.

FDA's current test and the proposed test are similar, but several differences are significant. FDA discusses the proposed method in detail later in this preamble. In the following chart, FDA is comparing the significant differences between the current test and the test proposed to replace it in § 630.16(b)(1).

	Current test	Proposed test
A. Intrathalamic inoculation	Thirty monkeys injected intrathalamically for each monovalent pool.	Intrathalamic inoculation not required.
b Intraspinal inoculation: (1) Inoculum	Median tissue culture infective dose ($TCID_{50}$) of at least $10^{7.0}$ and dilutions of 1:1,000 and 1:10,000.	$TCID_{50}$ of between $10^{6.5}$ and $10^{7.5}$, no dilutions tested.
(2) Number of monkeys inoculated	Fifteen monkeys injected for each monovalent virus pool	At least 12 monkeys inoculated if testing either Type 1 or Type 2 poliovirus, and at least 20 monkeys if testing Type 3 poliovirus.
(3) Reference attenuated poliovirus—type	Reference Attenuated Poliovirus, Type 1, used as control for test, regardless of virus type being tested.	Referenced attenuated poliovirus of corresponding type (Type 1, Type 2, or Type 3) used as control.
(4) Reference attenuated poliovirus—frequency of testing.	Reference attenuated poliovirus tested at least every 10 production lots of vaccine, but must be tested within 3 months of test of vaccine lots.	Reference attenuated poliovirus tested concurrently with testing of vaccine, certain exceptions provided.
(5) Basis of comparison	Comparative evaluation made of evidence of neurovirulence of poliovirus under test and reference attenuated poliovirus using histo-pathological criteria specified in the regulations.	Comparative evaluation made of magnitude of neurovirulence of polio virus under test with results of test using reference attenuated poliovirus by a mathematical method that is expected to reject poliovirus vaccine lots with neurovirulence identical to the reference at a frequency of not less than 1 in 100.

FDA is proposing to remove the requirements for intrathalamic inoculation of test vaccine and intraspinal inoculation of 1:1,000 and 1:10,000 dilutions of test vaccine. Experience has demonstrated that, when groups of 30 monkeys are inoculated by the intrathalamic route with monovalent virus pools prepared from a seed virus in current use, the frequency of monkeys developing specific lesions is so low that a meaningful assessment of the degree of neurovirulence of the pool cannot be made. Similarly, FDA has found that the 1:1,000 and 1:10,000 dilutions of poliovirus tested by intraspinal inoculation do not yield useful information for assessing vaccine neurovirulence. Thus, FDA is eliminating testing requirements that have not been useful in assessing vaccine neurovirulence. In addition, by removing these testing requirements, FDA would conserve the number of test monkeys, a scarce and expensive resource, without impairing the assurances of vaccine safety.

FDA is proposing that the inoculum for the intraspinal test contain between $10^{6.5}$ and $10^{7.5}$ $TCID_{50}$ per milliliter. The current regulation requires that the inoculum contain at least $10^{7.0}$ $TCID_{50}$ per milliliter, but does not limit the maximum level of infectivity. The proposed infectivity of the inoculum is based on data from a collaborative study involving FDA that showed no differences between the results of intraspinal tests carried out with the proposed upper and lower range of infectivity of inoculum. The proposed rule would assure comparability in inoculum infectivity of vaccine and reference, thereby controlling an important variable in the test procedure. With the proposed lower minimum infectivity, testing laboratories will be able to better conserve supplies of reference virus preparations, without affecting the reliability of the test.

FDA is proposing that each monovalent pool of oral poliovirus vaccine be tested and compared with the reference attenuated poliovirus of the corresponding type, i.e., Type 1, Type 2, or Type 3. FDA is also proposing that the monovalent virus pool and Reference Attenuated Poliovirus be tested concurrently, if possible. Under the current requirements, monovalent virus pools, regardless of type, are compared with Reference Attenuated Poliovirus, Type 1. In both the current and proposed tests, an acceptable monovalent virus pool should display neurovirulence in monkeys comparable to that displayed by the reference attenuated poliovirus. However, Type 2 poliovirus generally displays less neurovirulence than Type 1 poliovirus and always passes the current neurovirulence test when compared with a Type 1 reference. In contrast, Type 3 poliovirus displays a greater variability in neurovirulence in monkeys than Type 1. Accordingly, a Type 3 monovalent virus pool known to meet current neurovirulence requirements and used to manufacture safe vaccine could exceed the limits of acceptability if tested by the proposed method while using a Type 1 reference preparation. FDA believes that the proposed amendment provides a more precise and reproducible means of determining the neurovirulence of each type of poliovirus.

FDA is proposing that the monovalent virus pool and reference attenuated poliovirus be tested concurrently. Concurrent testing will allow the testing laboratory to determine whether the limits of acceptability for neurovirulence are satisfied in each test of a monovalent virus pool. As with most comparative biological assays, FDA believes it is important to test the vaccine and reference preparation concurrently to eliminate any variable related to time and environment that may affect test results. FDA is proposing to provide exceptions to this requirement when the monkeys used for the test are in short supply and are not available from any supplier.

FDA is proposing to require that manufacturers use either the reference virus preparations provided by FDA or WHO reference virus preparations as a control for evaluation of monkey neurovirulence tests. FDA has participated in a comparison of the reference virus preparations made available by FDA and WHO and found that they display equivalent neurovirulence in monkeys and are equally suitable for use as controls for evaluation of neurovirulence tests. No other reference virus preparations have been shown equivalent to FDA's reference virus preparation.

FDA is proposing to require that, whenever possible, the monkeys inoculated with a monovalent virus pool and reference virus preparation be from the same quarantine group and be distributed randomly between the two test groups. This requirement would assure that the test animals used in testing the vaccine virus and the reference virus preparations are uniform.

Consistent with current practice, FDA is proposing to require that the test monkeys be suitably anesthetized before inoculation. All testing laboratories rountinely anesthetize monkeys before inoculation. FDA believes that it is important that the

VOL 51 ISS 86 MY 5 1986 UMI

regulations reflect that the welfare of the animals is properly considered.

FDA is proposing several requirements concerning the number of monkeys that must be inoculated, survive the observation period, and evaluated for evidence of neurovirulence. The proposed requirements, as summarized below, apply equally to monkeys inoculated with a monovalent virus pool or with a reference virus preparation.

(1) For tests with Type 1 and Type 2 poliovirus, at least 12 monkeys shall be inoculated, and for Type 3 poliovirus, at least 20 monkeys shall be inoculated.

(2) At least 80 percent of the monkeys inoculated in a group shall survive 48 hours after inoculation. Those animals (up to 40 percent) that do not survive this period may be replaced by additional monkeys.

(3) If more than 20 percent of the monkeys in a group do not survive the observation period, excluding the first 48 hours after inoculation, for reasons unrelated to poliovirus infection, that portion of the test shall be considered invalid and shall be repeated.

(4) The evaluation of neurovirulence shall be based upon at least 11 positive monkeys for Type 1 and Type 2 virus pools and at least 18 positive monkeys for Type 3 virus pools.
